[*Reprinted from the "Gazette of India"*]

The following orders issued by the Government of India in the Home Department, are republished for general information

C E BUCKLAND,
Offg Chief Secy to the Govt of Bengal

NOTIFICATIONS

PUBLIC

Calcutta, the 7th December 1900

No 3291—I—In exercise of the power conferred by section 17 of the Indian Explosives Act, 1884 (IV of 1884), the Governor General in Council is pleased hereby to declare that acetylene, when in admixture with atmospheric air or with oxygen gas in whatever proportion and at whatever pressure and whether or not in admixture with other substances, shall be deemed to be an explosive within the meaning of the said Act

II—In exercise of the powers conferred by section 6 of the said Act, the Governor-General in Council is pleased to prohibit the manufacture, possession or importation of such acetylene as is declared by paragraph I of this Notification to be an explosive

Provided that nothing in this Notification shall apply to acetylene in admixture with air when such admixture takes place only in a burner or contrivance in which the mixture is intended to be burnt

Provided, also, that nothing in this Notification shall be held to apply to an admixture of acetylene and air which may unavoidably occur in the first use or re-charging of an apparatus properly designed and constructed with a view to the production of pure acetylene

SYED MOHIUDDIN, for Collector.

Advertisement of Sale

NOTICE is hereby given that the proprietary right of Government as specified in the conditions of sale below to the undermentioned estates situate in the district of Nadia will be put up to sale at the Nadia Collectorate on Monday the 7th January 1901 corresponding with Bengali 23rd Paus 1307.

The purchasers will be subject to the following conditions of sale:—

Conditions of Sale

1st.—The estate to be sold to the highest bidder above the upset price which will be fixed by the Collector at the time of sale. The purchasers of the estates will be considered as the proprietors of the estates and the entire proprietary right of Government in such estates will be transferred to them subject to the revenue fixed in perpetuity.

2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities.

3rd.—If the amount of purchase money do not exceed Rs. 100 the whole amount to be paid down at once.

4th.—If the amount of purchase money exceed Rs. 100 one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale reckoning the day of sale as one or if that day be a close holiday then by noon of the first succeeding office day the sale is to be cancelled (the sum deposited being forfeited to Government) and the estate to be again put up to sale at the risk of the defaulting purchaser after issue of advertisement as in the case of original sale.

Gaya Collectorate, the 17th December 1900

C A OLDHAM Offg Collector

Notification A

NOTICE is hereby given under sections 6 and 13 Act XI of 1859 that the undermentioned estates and shares of estates in the district of Cuttack will be put up for sale at the office of the Collector of that district on the 21st January 1901 for arrears of revenue and other demands which by law are realisable as arrears of land revenue.

When in columns 5, 7 and 9 of the appended statement it is stated that only a share is to be sold it is to be understood that a separate account is kept for that share and that the other share or shares in the estate are excluded from the sale.

Tauzi No.	Name of mahal and pargana.	Sadar jama of whole estate.	Whether the whole estate is to be sold	If only a share is to be sold specification of such share or shares	Names of proprietors of property to be sold	If only a share is to be sold the sadar jama of such share	If the whole estate is to be sold the arrears due from it	If only a share is to be sold, the arrears due from it.

The Indian Law Reports

Published under Authority

THE Indian Law Reports published under the authority of the Governor General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta Madras Bombay, and Allahabad and comprise four series—one for the Calcutta High Court a second for the Madras High Court a third for the Bombay High Court, and a fourth for the Allahabad High Court The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt and the Madras Bombay and Allahabad Series are distributed direct from Madras, Bombay and Allahabad respectively

In supersession of the previous advertisements on and from the 1st January 1889 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the reports from 1876 —

The List of Books available for sale at the Bengal Secretariat Book Depot will in future be published once only in each month

Spare copies of the List will however be kept in stock ready for issue on receipt of applications for them

Notice

IT is hereby notified for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

THE following Weather Reports of the Bengal Meteorological Department issued by orders of the Government of Bengal can be supplied to the public at the prices annexed:—

1st.—Bay of Bengal Daily Weather Report, giving meteorological observations taken at 28 stations in Bengal and on or near the coast of the Bay, with a chart and summary. This is published in connection with the Bay of Bengal Storm Signal Service. The report giving 8 A.M. observations of the day is distributed by post in Calcutta soon after midday. Price to subscribers in Calcutta Rs. 2 per mensem, payable in advance for six months.

This report will be issued every year from 1st November to 30th April. From 1st May again the Bay of Bengal Report containing observations taken at 66 stations will be issued up to 31st October.

2nd.—A Monthly Statement of Meteorological Observation taken at 51 observing stations and of rainfall recorded at 355 subdivisional and other stations, together with summaries of the more important features of the meteorology of the past month of the province and of the distribution of the rainfall and its variation from the normal. Price of the Monthly Summary Rs. [illegible] per annum payable in advance.

Subscriptions payable to the Meteorological Reporter to the Government of Bengal, 4 Camac Street, Calcutta, for the Bay of Bengal and Bengal Daily Weather Report and to the Accountant and Treasurer, Bengal Secretariat, for the Monthly Report.

C. LITTLE,

Meteorological Reporter to the Govt. of Bengal.

Notice

NOTICE is hereby given that the terms for the purchase of publications from the Bengal Secretariat Book Depôt, *for* Government officers or offices under the control of Government Officers, are strictly cash, and on no other terms will any publication be supplied or advertisement notice, &c., inserted in either of the Gazettes.

In the case of insolvency notices cash must be sent with such notices when forwarded by Mofussil courts or offices, and for those forwarded by the Official Assignee cash must be paid on presentation of memorandum of cost by the Accountant and Treasurer, Bengal Secretariat.

Remittances in postage stamps should be accompanied by an addition of one anna in the rupee on account of discount.

☞ Applications for Acts of the Bengal Legislative Council required on the public service should be addressed to the REGISTRAR, Office of the Legislative Department, Government of Bengal.

Copies are available for purchase at the Bengal Secretariat Book Depôt.

Cleveland bay —Tidal signals at Townsville

The British Admiralty has given notice (No 802 of 1900) that, on and after 1st November 1900, the following signals to indicate the actual rise of the tide above low water datum, will be made from the Pilot station at Townsville —

Height of Tide Ft	in	Signal by Day	Signal by Night
0	6	Cylinder	White light
1	0	Two cylinders, horizontal	Two white lights, horizontal
1	6	Ditto, vertical	Ditto, vertical
2	0	Cone	Green light
2	6	Two cones, horizontal	Two green lights, horizontal
3	0	Ditto, vertical	Ditto, vertical
3	6	Ball	Red light
4	0	Two balls, horizontal	Two red lights, horizontal
4	6	Ditto, vertical	Ditto, vertical
5	0	Cone and cylinder horizontal	Green and white lights, horizontal
5	6	Cylinder above cone	White above green light
6	0	Ditto below do	Green do white do
6	6	Ball and cylinder, horizontal	Red and white lights, horizontal
7	0	Cylinder above ball	White above red light
7	6	Ditto below do	Red do white do
8	0	Ball and cone horizontal	Do and green lights, horizontal
8	6	Cone above ball	Green above red light
9	0	Do below do	Red above green light
9	6	Cylinder, and cylinder above cone	White, and white above green light
10	0	Cone, and cylinder above cylinder	Green, and white above white light
10	6	Cone, and cone above cylinder	Green, and green above white light
11	0	Cylinder, and cone above cone	White, and green above green light
11	6	Ball, and ball above cylinder	Red, and red above white light
12	0	Cylinder, and ball above ball	White, and red above red light

The above figures should be added to the depth in the cuttings to give the depth in the channel

The depths at low water ordinary springs at present are—

(a) Platypus channel . 15 feet
(b) Ross Creek bar (rocky) 18 inches

Approximate position, lat 19° 15′ S, long 146° 50′ E

AFRICA, SOUTH—CAPE COLONY

Kowie river (port Alfred)—Information respecting it

NOTICE to Mariners (No 786 of 1900) issued by the British Admiralty is republished

The following information respecting Kowie river has been taken from the Cape of Good Hope Government Gazette, dated 23rd October 1900 —

WINDS AND CURRENTS —The prevailing winds in summer are from an easterly to south easterly direction during the day, calms and light airs off the land at night, but occasionally a strong south east wind blows continuously day and night for two or three days

During the winter, westerly winds blow with bad weather at times, but a gale may be blowing in the offing when it is fine near the coast

The Agulhas current sets to the westward sometimes very strongly at a distance of 5 to 25 miles from the coast, and a current sometimes setting against the wind is experienced in the roadstead (assisting vessels to ride), which prevents the regular tidal ebb and flow being perceptible

THE BAR —The bar is composed of sand over rock, westerly and south westerly gales send in a heavy swell which deposits more sand on the bar, making it impassable for two or three days, this deposit, however, is usually scoured out by the following spring tides The passage over the bar in consequence varies considerably in direction, position and depth

DIRECTIONS, &c —Upon a vessel appearing off the port, the Harbour Master, who is also Shipping Master, will come on board, if weather permits, and point out a berth, otherwise a birth will be signalled from the Port office The best anchorage is in from 15 to 17 fathoms, with the entrance of the river open and the Port office flag staff on the western bank near the entrance, bearing N 25 W, the holding ground here being good and the position outside the rollers The holding ground in other areas is generally not good, being sand over patches of rock The anchor should be buoyed, coir riding stoppers being used for the cables, and arrangements made for slipping in case of bad weather, when the end of the cable must also be buoyed

Top gallant yards and masts should be struck, the topsails double reefed, and the vessel always kept ready for sea, strict attention being paid to all signals made from the Port office so that there will be no delay in putting to sea when the signal to do so is made By keeping within 12 miles of the coast the very heavy sea which gets up outside that distance, due to the Agulhas current, will be avoided

All vessels visiting this port should be provided with the best ground tackle and a stout coir spring to ride by

With the wind from the eastward or westward it is preferable to ride at single anchor with a whole cable and a spring on, but with a southerly wind and dirty weather, and with no chance of putting to sea, it is better to give the vessel a good sheer, let go a second anchor before veering on the first, and then veer both cables together

Masters are strongly advised to remain on board as much as possible, and to exercise discretion in permitting boats to leave their vessels at any time as accidents have occurred through drifting

SIGNALS —Mariners can communicate their wishes to their agents through the Port office by use of the Commercial Code, and every assistance will be rendered as far as practicable

Vessels not possessing the Commercial Code can make the following signals —

1	Ensign in fore topmast rigging	I am in want of a cable
2	Ditto main ditto	Ditto an anchor
3	Ditto fore rigging	I have parted a power cable
4	Ditto main do	Want an anchor and cable
5	Weft—where best seen	I want assistance

WEATHER SIGNALS —The following signals will be shown from the Port office —

1	A black ball over union jack	Veer about 70 fathoms, see second anchor clear
2	Ditto under do	Put to sea at once, get an offing
3	Flag (blue, white, blue horizontal) over union jack	Send down top gallant yards and mast, point yards, see every thing clear for working ship as far as practicable
4	Union jack over white and blue flag	See third anchor clear and prepare for bad weather
5	Union jack over red, white, blue (vertical) flag	Heave up second anchor and shorten in to same scope as before

BAR SIGNALS —

1 Black ball at western yardarm Bar impassable
2 Ditto hoisted half way up Bar dangerous
3 A working flag (red pierced white) will be hoisted when the bar is practicable for tug boats and lighters, it will be kept half mast when special caution is necessary in crossing the bar, and hauled down altogether when the bar is impassable Pilots are always in readiness with a steam tug to take vessels in or out, and no vessel should attempt to enter the river even in most favourable weather without a pilot No ships' boats should attempt to cross the bar, however smooth it may appear

The whole of the above signals are to be answered by the answering penant hoisted where best seen, and promptly acted upon, neglect to do so will be reported to Lloyds, and also to the owner Masters, however, should not necessarily wait for the signals, but take timely precautions The first rise of a low barometer indicates a strong westerly gale, the first fall of a high barometer foretells a strong easterly gale with short chopping sea

Port Alfred is in telegraphic and daily postal communication with Cape Colony generally, and railway connection will follow very shortly (*Notice No 756 of 1900*)

Approximate position, lat 33° 36 S, long 26° 54 E

(Variation 30° Westerly in 1900)

This Notice affects the following Admiralty Chart —Kowie river No 1223 Also, Africa Pilot, part III, 1897, pages 136 to 139, and Supplement 1900, page 8

THE British Admiralty has given notice (No 775 of 1900) of the following particulars relating to the Cocos islands —

The native name for the group is Pulo Sa Laut The group consists of two low islands covered with tall trees, which can be seen from a distance of 13 miles

The larger island named Sa Laut Pesar, is about 2 miles long in an E N E and W S W direction and $1\frac{1}{2}$ miles broad, on its southern side a reef extends for a distance of about one mile from the coast

Approximate position of the centre of the island, lat 2° 58 35" N, long 95° 23 40" E

The smaller island, named Sa Laut Ketjil, is about 1,100 yards in diameter On the north east and south sides of this island reefs and discoloured water extend for a distance of about 900 yards, but on the south east side there is good anchorage in 8 fathoms water

Approximate position of the centre of the island, lat 3° 0 55" N, long 95° 24' 50" E (*Notice No 775 of 1900*)

(*Variation 2° Easterly in 1900*)

This Notice affects the following Admiralty Chart —Acheh head to Tjingkok bay, No 2760 Also, China Sea Directory, vol I, 1896, page 319 and Supplement, 1899, page 29

JAPAN, SOUTH COAST—Kii CHANNEL

Sunken rocks

THE British Admiralty has given notice (No 777 of 1900) of the existence of the following reefs in the Kii channel —

(*a*) A shoal of about two cables in extent North and South, with a least depth of 2¼ fathoms over it, situated with Cape Tanabo (Namariyama mi saki) bearing N 37° W, distant 18 cables

There are depths of 5 fathoms on the east and west sides of this shoal

Approximate position, lat 33° 38¼ N, long 135° 22½ E

(*b*) A shoal, with a depth of 3¼ fathoms over it, situated about 6 cables south-westward of Yoko jima, in lat 33° 28 35″ N, long 135° 40 0″ E (*Notice No 777 of 1900*)

(*Variation 4° Westerly in 1900*)

APPOINTMENT OF A FAMINE COMMISSION

GOVERNMENT OF INDIA

DEPARTMENT OF REVENUE AND AGRICULTURE

Extract from the Proceedings of the Government of India in the Department of Revenue and Agriculture, No 11—29½ 3(Famine), dated 20th December 1900

READ—

(1) Despatch to Her Majesty's Secretary of State for India, No 59, dated 25th October 1900

(2) Telegram from Her Majesty's Secretary of State for India dated 27th November 1900

RESOLUTION

The Governor General in Council has decided, with the concurrence of Her Majesty's Secretary of State for India in Council, and in accordance with the action taken after the famines of 1876-78 and 1896 97, to appoint a Commission to collate and consider the experiences of the late famine while they are still fresh in the memory of the Governments and the people and to investigate the differences in the methods of relief which have been adopted in the different provinces of British India, both as regards their success in saving life or in mitigating distress and also as regards efficiency and economy The magnitude and severity of the drought, the unparalleled scale on which it has been found necessary to conduct relief operations, and the heavy mortality which, notwithstanding these efforts, has been recorded in many parts of the afflicted area, commend this course to Her Majesty's Government and to the Governor General in Council as likely to be productive of valuable results in the treatment of future famines

2 The report of the Commission of 1898, in its exhaustive survey of the principles and practice of famine relief as developed during the two preceding decades, and in its full discussion of the technical details of the Famine Codes, obviously prescribes a starting point for the Commission which the Governor General in Council proposes to constitute, and will greatly facilitate and abbreviate its labours The drought of 1899 occurred while the recommendations of the Commission of 1898 were still undergoing examination by the Local Governments, and before definite conclusions as to their incorporation in the Famine Codes had been arrived at The recommendations, however, were in a greater or less degree and in a more or less modified form acted upon in every province where famine prevailed, and largely influenced the policy which has been pursued It is highly desirable that the results of actual experience as to their working should be ascertained and brought under review before the final revision of the Famine Codes is undertaken This will constitute the first and most important subject of enquiry

3 Connected with this subject is the relative use that has been made in the various provinces of the several methods of relief recognised in the Codes, and their results as regarded from the standpoint both of the successful relief of distress and of financial outlay Gratuitous relief has been more largely resorted to in some tracts than in others, and has varied widely in form relief works have exhibited great diversities in scheme and management the difficult problem of adapting the relief system to the special requirements of the rainy season has been differently treated in different localities the wage scale, the effective enforcement of tasks and other tests of necessity, the provision of adequate administrative, medical and public works establishments, are also matters in respect of which the practice has varied much Absolute uniformity of method in the widely diverse conditions which famine presents is unattainable, but the degree of variation in the methods actually adopted cannot be wholly thus explained A close analysis and comparison of methods and results should conduce to greater uniformity in the administration of future famines, as well as to increased efficiency and economy in relief operations In considering results, the Commission will examine the mortality during the famine in each province with reference to its excess over the mortality of ordinary years, and to the causes of such excess

4 Intimately connected with the system of famine relief are the subjects of loans to cultivators and others, and the collection of the land revenue The use made of the loan system (*taccavi*) or other advances in the various provinces should be enquired into and suggestions should, if necessary, be made for improving or extending this form of relief The collection of the land revenue demand in the several provinces and the extent to which relief was granted to distressed owners and occupiers of land by revenue suspensions or remissions are also matters for careful enquiry Every province has its own regulations on this subject, which have been framed with special reference to the local revenue assessment system and to local conditions Here, again, uniformity of treatment is neither practicable nor desirable But in the late famine considerable divergence has occurred in different parts of British India, if not in the question of principle, at least in the method adopted for selecting the recipients of relief and in the machinery for granting it From the Famine Commission of 1878 to the present time all authorities have recognised that a prompt and judicious application of this form of relief within proper limits and subject to proper safeguards is an essential feature of famine administration But there is room for differences of opinion and practice as regards the limits, the safeguards and the machinery, and these considerations govern the application of the principle The Commission may profitably examine the actual practice prevailing in the several affected provinces as examplified in the late famine, with a view to ascertaining whether it is calculated to give, and actually does give, a proper measure of relief in the matter of the land-revenue demand in a year of drought and general distress As regards the larger question of the incidence and pressure of the land assessment in the different provinces, and its effects on the well being and resources of the agricultural population, the Governor General in Council does not underrate the importance of this subject, upon which he has already addressed the various Local Governments and

Administrations A study of their replies will enable him to decide whether further investigation is necessary It would be manifestly undesirable to postpone the labours of the present Commission until an answer can be given to this question But should the Commission in the course of its enquiries find it necessary to ask any question on this subject solely with a view to obtaining information likely to be of use in connection with the matters specifically referred to it for examination and report, it will be at liberty to do so

5 The Commission's enquiries will be limited to famine relief in British India But as in these enquiries the Commission may have to take cognizance of the fact that the relief administration of British districts bordering on native territory has been affected by immigration from Native States, the Commission should examine and report upon the extent, nature, and general causes of such immigration, its effect on the relief measures and on the death rate of British districts in which it chiefly occurred, and the methods adopted by British officers in concert with the States for checking or regulating it The Commission should also advise with reference to the recommendations on the point made by the Famine Commission of 1898, whether and in what manner a greater amount of co operation can be secured between British and Native Governments in the future

Report paragraph 596

6 While it will be open to the Commission to consider and report on the general character and effect, as a method of relief, of the several kinds of public works which have been undertaken in the several provinces, the Governor General in Council does not propose to refer to the Commission the question, in its technical aspect, of the relief programmes of public works existing in the several provinces at the outbreak of the famine and utilised for the employment of famine labour This question was carefully considered by the Famine Commission of 1898, and formed the subject of several valuable recommendations In pursuance of these recommendations an enquiry is necessary as to the utility of the public works which have been undertaken in the late famine, and as to the measures which should be taken to complete and maintain such of them as are found to be of permanent advantage And enquiry will also be necessary as to what additional irrigation and water storage projects of a protective nature can be devised in each province for inclusion in the relief programmes and for eventual execution either in times of famine or at other times by funds allotted from the annual famine grant The investigation and preparation of such projects require to be placed on a more systematic and permanent basis, and to be more closely and unremittingly pursued The enquiries which the Governor General in Council has in view under this head are, however, as observed above, of a technical character, and he considers that it will be more convenient, instead of remitting them to the Commission, to make special arrangements in the Public Works Department for their prosecution

7 Subject to the foregoing remarks, the Commission will therefore enquire into and report upon the following subjects —

(1) How far the recommendations of the Famine Commission of 1898 have been followed, with or without modification or departed from, in the different provinces in the late famine, and to what extent the fresh experience now acquired confirms their wisdom or suggests their amendment

(2) What light the experience of the recent famine throws upon the subjects of Relief Works, Gratuitous Relief, or Famine Relief as a whole, how far the systems adopted in the different areas have been successful, or the reverse, in their bearing, primarily, upon the relief of distress, and, secondarily, with regard to economy, how they compare with each other, and whether any fresh rules or modifications of rules are required

(3) In what manner relief by means of *taccavi* or other advances of public money, and by means of the suspension or remission of the land assessment, has been applied in the different provinces to their special needs, whether the existing machinery for the prompt institution of these forms of relief is adequate, and whether

any general instructions are called for with regard to the principles or methods by which such relief should be determined

(4) In what manner the famine affected the death rate of the various provinces and districts, with an enquiry into the causes of any variation

(5) The extent, nature, and general causes of immigration from Native States into British districts, its effect upon relief measures in them, how it was dealt with, and what better arrangements for concerted action between British and Native authorities can be devised

8 The Commission will not be precluded from recording any recommendations or opinions which it is thought may be of use either in anticipation or in the treatment of future famines

9 The Commission will be constituted as follows —

President

THE HON'BLE SIR A P MACDONNELL, G C S I, I C S,
Lieutenant Governor of the North Western Provinces and Chief Commissioner of Oudh

Members

THE HON'BLE MR F A NICHOLSON, C I E, I C S,
Member of the Board of Revenue, Madras

THE HON'BLE MR J A BOURDILLON, C S I, I C S,
Chief Secretary to the Government of Bengal

RAO BAHADUR KANTI CHANDRA MUKHARJI, C I E,
Chief Member of the Council of the Jaipur State in Rajputana

Secretary

MR S H BUTLER, I C S,
Settlement Officer, North-Western Provinces and Oudh

and will assemble at such time and in such place as the President may appoint The general conduct of the enquiry and the regulation of the course of business before the Commission is entrusted to the President in communication with the Members The Governor General in Council leaves it to the President to determine the procedure to be adopted in obtaining and recording evidence It is desirable in the interests of public business and with a view to despatch that the proceedings of the Commission in these respects should be abbreviated as far as possible The Commission through its Secretary, acting under the instructions of the President, will correspond directly with Local Governments and Departments of the Government of India, and with any local authorities with whom such communications may be authorised by Local Governments as a matter of convenience and in order to save time The Governor General in Council desires that all communications or requisitions emanating from the Commission may be treated as urgent and complied with promptly, and that in the event of the Commission visiting a province it may be afforded every facility for its enquiries

---

ORDER —Ordered that a copy of the foregoing Resolution be forwarded to the President, Members, and Secretary of the Commission, to all Local Governments and Administrations, and to the Finance, Public Works, Foreign, and Home Departments of the Government of India

Ordered also that it be published in the Supplement to the *Gazette of India* for general information

(True Extract)

T W HOLDERNESS,

Secretary to the Government of India

REMODELLING OF THE SYSTEM OF VERNACULAR EDUCATION IN BENGAL

GENERAL DEPARTMENT—EDUCATION

Calcutta, the 1st January 1901

RESOLUTION—No 1

READ—

This Government Resolution No 1921, dated the 1st July 1899, and the papers read in the preamble to that Resolution

Director of Public Instruction's letter No 3126, dated the 8th May 1900, submitting the second report of the Committee appointed to revise the subjects and text-books used in vernacular education in Bengal

Read also—

This Government letter No 1091T—G dated the 7th September 1900, and the Director of Public Instruction's reply No 2223T, dated the 17th October 1900

The question of remodelling the lines on which vernacular education in the Indian Empire has hitherto been based has, for a considerable time, been exercising the attention of both the Imperial and Local Governments The following short history of the question was given in the annexed Resolution of this Government No 1921, dated the 1st July 1899 —

It was particularly in its relation to agriculture that this question engaged the attention of the fifth meeting of the Agricultural Conference held in the Department of Revenue and Agriculture at Simla on the 6th October 1893 After considering the recommendations made by Dr Voelcker in paragraphs 527 and 528 of his report on the improvement of Indian Agriculture, the following Resolutions were passed —

Resolution I.—That in considering the question of agricultural education and progress, the Conference desire to express the opinion that it is most desirable to extend primary education among the agricultural classes

Resolution II—That, as a general rule, instruction in agriculture should be combined with the existing course of education, and not depend exclusively on separate special institutions

Resolution III—That it is most desirable that the Universities should recognise the Science of Agriculture as an optional subject in the course for a degree

Resolution IX—That, in the opinion of the Conference education in the lower schools should be of such a practical character as to fit the pupils for technical pursuits including agriculture, as well as for literary and commercial pursuits

Resolution X—That the text-books used in schools should be written in the simplest language ordinarily understood by the people, and should be descriptive of subjects with which they are familiar, also that the use of pictorial lesson charts illustrating familiar objects should be encouraged

Resolution XI—That the system of training in normal schools should be adapted to qualify school teachers to give instruction of the character indicated in Resolution VIII

Resolution XII—That in each Province a Committee, in which agricultural officers should be included, should be convened at an early date for the consideration of the questions raised in the preceding resolutions

The Governor General in Council, after considering the recommendations of the Conference, and after correspondence with the Secretary of State, determined, before enunciating finally the principles or policy to be adopted, to give Local Governments the opportunity of fully examining the various subjects dealt with by the Conference, and with a view to affording them every facility in their investigation, deputed Sir Edward Buck to attend a series of Provincial Conferences and explain the various issues under discussion and the different methods proposed or adopted in other provinces It was explained that the Government of India believed that "greater success was to be expected from making instruction in the rudiments of agriculture part and parcel of the primary system of instruction in the country than from teaching it as a subject apart from the general educational programme, and that such general enlightenment and intellectual expansion of the agricultural classes as would enable them to perceive for themselves the small reforms which are within their means and opportunities would be more likely to produce substantial results than special instruction in particular agricultural processes" It followed therefore that the educational question which was given to each Province to answer was not merely how to adapt education to the training of agriculturists, but how the plan of instruction should be so fashioned as to promote in the pupils the power of assimilating easily any kind of technical instruction

2 This phase of the question was discussed at the meeting of the Bengal Provincial Conference held on the 6th of January 1896, and it was suggested that the course of science in primary and middle schools should be reconsidered and so graduated as to include at different stages branches of the elements of agriculture, care being taken to exclude words or ideas of which the pupils could have no understanding Effect was to be given to this resolution by arranging for the introduction of a compulsory course of Elementary Science illustrated as far as practicable by object lessons and the Director of Public Instruction was asked to report how he proposed to give effect to these suggestions This he did in August 1897, and in March 1898 a stimulus to the establishment of agricultural education was given by the opening of the Agricultural classes at the Sibpur Engineering College This was, however, only a scheme for a "Higher Agricultural Education" and still left out of account the objects of the original scheme, the pupils of the vernacular schools, and in August 1898 the Lieutenant Governor called for proposals of a wider nature aimed at a change in the system of vernacular education by the adoption of methods designed rather to develop the minds of the boys than to practise and strengthen their memories After indicating the points for consideration, he referred the matter for careful discussion and report to a small Committee of educational experts whose names are given in the margin

3 The Committee submitted a careful and thorough report in April 1899 The full text of it was published in July 1899, and for convenience a copy of it is an annexure to the present Resolution The Committee came to the conclusion that the aims of the Government could only be fulfilled by the introduction of the methods originally put forward by Froebel and now known under the name of Kindergarten training Under that system children are trained and not taught in the ordinary acceptation of the word They are so trained as to do and learn things of themselves They are encouraged to feel that each one possesses a certain amount of innate intelligence and initiative, the gradual development of which depends on the child himself and his personal activity They are led to see that eyes, ears and hands all help in the acquiring of knowledge, and these are the channels through which under that system all first knowledge is acquired Closely allied with the methods of Kindergarten teaching is the so called object lesson teaching, and it was the opinion of the Committee that object lessons must be insisted on if habits of observation are to be fostered, and that they should be made a means for mental exercise and not merely a method of imparting miscellaneous or even valuable information The Committee remarked that Kindergarten training may be an expensive and elaborate form of education, and that the "Gifts of Froebel," the appliances with which the system is ordinarily carried out in European schools, were beyond the means of Indian schools They asserted, however, that a form of Kindergarten could be devised for India, which would be suitable to the circumstances and local conditions of the pupils, and which would yet entail little or no expenditure They advised that the principles they recommended should be worked out on more or less new lines with the use of objects already to be found in almost every primary school They proposed that the first years of a child's life, from about 5 to 7, should be devoted almost entirely to training the senses and powers of observation Then would begin the strengthening and development of the memory and reasoning powers They were of opinion that object lessons should be a prominent part of the teaching of all classes up to and including the lower primary stage, and that the various subjects taught up to the upper primary stage should be treated as far as possible as object lessons Guided by these views, the Committee prepared a syllabus, which is given in detail in the annexed report Briefly, it was proposed that free hand drawing and drill should run through the whole course Manual training for boys should begin in the A class of the lower primary, while needlework for girls should begin in class B of the lower primary A simple reading course was arranged as follows —For boys in town schools, some elementary notions of the simplest facts and principles of Botany, Natural History, Hygiene, Physical Science, and Chemistry, for boys in country schools, a similar course, only with Agriculture substituted for Physical Science and Chemistry, for girls in both town and country, a similar course of Botany, Natural History, and Domestic Economy only, the readers were to be written in the [illegible]

and explained as far as possible by means of object-lessons In the Writing course the forms of simple documents which are commonly used by raiya's were to be introduced as exercises Mensuration was to include a course of simple practical Geometry In the two highest standards Euclid was introduced as an alternative, instead of as at present a compulsory subject Under the head of Literature and Poetry, the subject of moral training was to be considered in the selection of pieces

4 The Committee observed that there were three necessary preliminaries to the introduction of their scheme First, the immediate introduction of instruction in the new methods into training schools, so as to enable them to turn out rapidly teachers qualified to take up school work under the new system Second, the training of Inspecting Pandits, Sub Inspectors, and Deputy Inspectors of Schools, who would have to be familiarised with the new methods Third, the preparation of manuals for the teachers and text books for the pupils They considered that a period of two and a half years should be allowed to elapse, from the date of publication of the syllabus, for schools to adapt themselves to the altered requirements, and they recommended that their new system should be introduced throughout the Province, and not by any partial or local method

5 The changes recommended by this Committee were of the most vital importance to the interests of education in Bengal The Lieutenant Governor therefore published their report for general information, and invited any who might desire to do so to submit criticisms on the proposals The call was widely responded to Numerous representations from public bodies were received by Government, and the newspapers commented at length on the Committee's scheme The criticisms on the whole were not by any means unfavourable Those that disparaged the scheme were very often based on a misconception of the proposals Thus, for instance, it was distinctly laid down in the original syllabus that arithmetic was to be taught as at present, and that both European and Native systems were to be included Much, however, of the adverse criticism was based on the supposition that instruction in zamindari and mahajani accounts was to be abolished

Another mistaken conception on which some of the criticisms were based was that the proposed scheme was meant to give scientific and technical education of a character suited to the agricultural classes only But the committee expressly declared their intention to give into the hands of pupils lesson books on subjects with which they have to do every day of their lives, instead of on matters altogether foreign to their experience, and thus to help in cultivating their faculties of observation and making their education more real than it is at present

A third objection was based on the contention that the proposed scheme aimed at teaching too many subjects, whereas in effect the subjects intended to be taught are Reading, Writing, and Arithmetic, as before, with drill and drawing added, the burden on students being sensibly reduced chiefly as regards the quantity of book work

This proposed reduction has led very many of the critics to assume that the scheme will discourage the growth of vernacular literature, and they insisted again and again on the importance of literature, on the value of it in helping the development of the emotions, and the neglect of it in the proposed scheme Indeed, it was said that this neglect would affect the prospects of Bengali literature The obvious reply to remarks of this nature is that a literature cannot be called into existence by the prospect of books being selected for primary examinations, nor can vernacular literary works of the highest merit be prescribed for elementary schools since the children would be unable to understand them

6 The former Committee was reconstituted to consider these reviews and representations, and they altogether held 15 meetings since the 3rd of January 1900 The results arrived at by the Director of Public Instruction and the Committee with regard to the original proposals, as viewed in the light of the criticisms given, will be found in the Director of Public Instruction's report No 3126, dated 8th May 1900, which is also published as an annexure to this Resolution

7 After considering the opinions which the public had expressed in answer to the invitation of Government on the scheme suggested, the Committee, in their second report, intimated that in their opinion the original proposals might be modified in the following manner —

(1) A Literature book should be prescribed for the upper primary course

(2) The course in Grammar for the upper primary and middle vernacular standards should be extended

(3) The amount of History and Geography to be taught in the upper primary and middle vernacular standards should be increased, and separate books for Geography and History were recommended

(4) Bamboo work and basket-weaving should be omitted from the manual training course, and manual training should be made optional

(5) The Writing course should be extended up to the last (that is the sixth) standard in the revised scheme, and it would be thus practicable to prescribe the writing of more vernacular documents, and accounts, than was originally contemplated

They admitted the danger of accentuating the already existing tendency on the part of parents to send their children to high schools or other English schools at the very commencement of their school life, and recommended, in supplement of their original proposals, certain measures to check this tendency and to give that prominence to vernacular education which ought to obtain in the early training of Indian boys They also recommended that a certain elasticity should be allowed at first in the manner of teaching the proposed course

8 The Committee were not, however, disposed to modify the views they had expressed with regard to the principles on which the system of vernacular education should be based They declined to abandon the principles of the Kindergarten system It was, they said, now universally recognised as the best for infant education, and as teaching by object lessons is only an extension of the same system, the whole scheme they had recommended for the vernacular schools was really based on it

As to whether the scheme should be tried tentatively or not in the first instance, the Committee were of the opinion, as before, that it should at the outset be brought into action throughout the whole Province

9 The Committee in their first report had quoted the successful introduction of somewhat a similar scheme in the Central Provinces It was admitted, however, that manual training had been lately and deliberately excluded from the course there, and the Lieutenant Governor considered that the brief reference in the Committee's second report to the action of the Central Provinces Government in subsequently abandoning the Kindergarten system in rural schools was a most inadequate notice of a very important experience It seemed to him that the Committee must justify their proposals by a much more detailed statement and explanation of them, and he desired the Director to answer the following questions —

(1) How far the Committee's proposal varied from the system which was tried in the Central Provinces and to a certain extent subsequently abandoned, what reasons there were for anticipating a different result for the proposed plan in Bengal and how far the proposals received support from any experience in other Provinces

(2) Whether the new system should be introduced simultaneously into (*a*) all primary and middle schools over the whole Province, or (*b*) into selected areas, or (*c* into selected schools

(3) Whether the new syllabus should be introduced into the lower classes of high schools which correspond to the corresponding classes of middle and primary schools

10 On the first question, the Director of Public Instruction has furnished an explanation in his letter No 2223T, dated 17th October 1900, which forms an annexure to this Resolution He has explained that in the Central Provinces the Kindergarten system has been given up only in rural schools, and in them mainly for two reasons, first, because it has been decided to have in country schools a half day system, instead of the whole day course, and second, because the expense was found to be intolerable of the stereotyped and costly European "Froebel's Gifts" The fact that these gifts are quite foreign to an Indian child's experience and that the pupil ordinarily could not handle the gifts and so actually engage in the object lesson rendered success in this particular experiment in Kindergarten a great difficulty, and almost invited its failure The Central Provinces system must be modified in the future if it is to become a success, and must be made to suit Indian pupils and Indian circumstances and also be made of such a kind that its cost enables every pupil to take part in the exercise It is open to very grave doubt, he said, whether the gifts of coloured worsted balls, wooden cubes, &c, which may and do appeal to European children, will appeal equally to Indian children, and hence when the Committee considered the question of the introduction of Kindergarten, they very rightly

they attempted to work out the application of his principles by the use of purely indigenous materials, and of such a kind that every child can provide its own gifts to illustrate the principles of teaching

Hence the withdrawal of the Kindergarten system from the rural schools in the Central Provinces cannot, in the Director's opinion, be taken to represent at all a failure of Kindergarten principles in Indian schools, but it really represents only the want of success of a particular (and for India, a mistaken) form of the application of the principles

The system proposed by the Committee does not follow at all in the train of the Central Provinces system They proposed, as the Director explains, to depart entirely from the stereotyped European system and to introduce simple exercises, which can be made with pieces of string, paper, leaves, coloured cloths and objects of everyday life, such as a piece of wood, a box, a stool or chair, a table or a school desk, simple lessons about plants. No expensive ' gifts" are to be given which children would find to be quite outside their ordinary lives and experiences, but objects found in every school-house and in every village are to be selected and used in the school, and the various faculties of observation, reasoning, descriptive powers, &c, are to be exercised and practised on these familiar objects School work will therefore be really a developed part of their every day life, while habits of accuracy, and obedience, will be inculcated by the process of stick laying and simple physical exercises and action songs In the great majority of the subjects in which instruction is to be given, everything which is treated of almost forms an integral part of every day life in the town or country, as the case may be

It is not expected that the teachers will all at once, teach the new subjects well It is almost certain they will teach them badly, but what is contended is that the teaching cannot be worse than the present entirely mechanical system of training the memory whereby all the other faculties are dulled at the expense of monotonous parrot like exercises It is urged that bad teaching with a good educational system will produce better results than bad teaching with a bad and unsound system Hence the change is considered necessary notwithstanding the grave difficulties which will have to be faced

The lesson thus given by the Central Provinces is that the failure there was merely the failure of a particular form of practice, and that to be a success in this country the system must be made to suit Indian pupils and Indian circumstances and of such a kind that its cost will enable every pupil to take part in the exercises All of this the Director has shown can be effected without in any way changing the principles of the system That such is the case will appear from the references given by the Director as to what is now being done with much success in Madras and Burma, where the practice followed is one suitable to Indian life and circumstances, more especially so in the case of Madras, the authorities of which Province have entirely discarded the uses of the European forms of Froebel's Gifts

The Lieutenant Governor is of opinion that the Director and his Committee have successfully established their case He believes with him that the Kindergarten plan is the best and truest method of training and developing the intelligence of children, and experience elsewhere confirms the opinion that when the plan is adapted in its form to the circumstances and conditions of the country, it meets with perfect success He accepts the recommendation of the Committee on this point in principle

11. As regards the second point of the three courses possible the first is the one advocated by the Committee in its reports It is, however, evident that there are very serious difficulties involved in this proposal To introduce the system simultaneously throughout the province, it [illegible] necessary to attempt to specially train all the primary and middle school teachers in Bengal numbering some 50,000 at the least, some of whom (those who are in charge of good schools) are fairly intelligent and able, [illegible] are of a very inferior type, such as the *gurus* who start the [illegible] *pathsalas* The task of training such an enormous number of teachers [illegible] be colossal, and it is feared that the difficulties which might arise in this matter would militate against the success of the scheme and might give rise to doubts as to the soundness of the scheme itself

In the case of the second plan, limiting the introduction of the scheme to a selected area, the difficulties to be met are of a precisely similar nature to those just described, though smaller in amount The main difficulty in this case would be to teach the inferior type of *gurus* in their new work within the time which it has been proposed to introduce the scheme. Another difficulty would

be that of selection of the areas for experiment, and a further slight difficulty might be found in cases where boys migrated from a school in a selected area to another in which the old course of instruction was still maintained.

In the case of the third course, the proposal would be to limit the compulsory introduction of the new scheme to those schools where boys are being actually sent up for competition for scholarships of the middle, upper primary, and lower primary stages, in which classes of schools the gurus are generally experienced and trained men, and to leave the *gurus* in schools of a lower type, such as season pathsalas, either to continue to teach as now the old system of instruction, or to attempt the new should they wish to do so, or feel they were competent to undertake it The number of primary schools, upper and lower, is 47,714 of these not more than 16,444, exactly one third of the whole, compete for scholarships

The Lieutenant Governor has no doubt that the last is the soundest course In recently recommending the introduction of reforms of a very similar character into Ireland, the Irish Commissioners were unanimous in considering that the proposed changes "ought to be introduced, not all at once, but gradually and tentatively," beginning with the larger centres And they based their conclusion on the fact that time would be required to organize the training of teachers, of whom those selected for initial instruction would be aided at the outset by the counsel and instruction of expert instructors (page 45 of the appendices to this Resolution) The Lieutenant Governor is of opinion that these considerations have equal, if not greater, weight in Bengal It may be hoped that the inducement held out under this third course to the most competent of the gurus to adopt the new system will succeed in providing the best schools with masters willing to learn and more or less able to become themselves efficient teachers under the guidance and instruction of experts And progress will be facilitated not only by the initial restriction of the numbers to be trained, but also by the circumstance that those who will come under first instruction will be the best of their class The Director has now finally arrived at the same conclusion, and the Lieutenant Governor, accepting, as he has, the principle of the proposals, decides that they shall be carried out by this method The scholarship examinations for the middle, and upper and lower primary schools will accordingly be held in the year 1904 and onwards in accordance with the new courses only, the present scholarship courses being abolished from that date Also in schools sending up candidates to the upper primary and lower primary examinations from that date, examinations corresponding in standard to the present A and B standard examinations will be held in the new course On the other hand, in all lower primary schools which do not choose to send up pupils in competition for the lower primary scholarships examinations in the *present* A and B standards will continue to be held In schools which send up candidates in 1904 and onwards to the middle vernacular, primary, or lower primary scholarship examinations, two examinations will be held for rewards in the standards set forth in the Committee's report in "third year of infant class" and "standard I" in exactly the same way as examinations in the standards B and A which are held at the present time

12 With reference to the third point, it appears that till within the last few years the lower classes of High English schools were conducted on a vernacular basis, and are now conducted on what is called the English basis This means that even in the lowest classes of such schools English is almost exclusively used as the medium of instruction for the subjects that are taught in them In plainer words a child is taught the rudiments of geography and history through English sentences and English explanations before he has mastered English sentences for himself It is not surprising that this system has been found to be perfectly disastrous to the sound instruction of the pupils in the English which their parents want them to acquire. The excuse for it lay in the belief that a child could not begin English too young, if he was to be a proficient in the language, and that it is a waste of time to teach him rudiments in his vernacular and the higher stages in English The experience of even a few years has shown this belief to be entirely false The child gets his instruction from a master of the lowest class; his instruction is a matter of rote and not of intelligence, and his English is of a type from which it never recovers This most pernicious plan was begun in private schools, it has extended to the Government high schools and aided schools, apparently from the fear that they would lose pupils

two systems appears to have preceded the change of basis, and certainly no formal sanction from the Government has ever been given to the system of teaching children in a foreign language from practically the earliest stages of their instruction. The teaching in the lowest classes of high schools through the medium of English was formally considered and formally condemned at a conference of the Inspectors of Schools which sat early this year, and by which a return to the former vernacular basis of instruction in the lower classes of such schools was advocated In Sir John Woodburn's opinion the conference were altogether in the right. He has himself been greatly struck in visits to these schools by the frequent inability of the scholars to explain in their own language the meaning of what they read A system which debars young students from an early training in their own vernacular cannot but be wrong Where instruction is given from the very commencement of a child's attendance at school in a foreign language, the result could only be what it has proved to be—that the pupil learns merely by rote without in most cases obtaining any intelligent grasp of the meaning of what he is being taught, and if education is to be on a sound basis, we must revert without delay to the system from which we have so rapidly and almost unconsciously departed In all Government high schools the medium of instruction in the lowest classes will hereafter be in the vernacular, and this will be a condition of aid to the aided schools Over private schools the Government has no control, but the Lieutenant-Governor hopes that they will, in loyalty to their own vernacular, follow the example that has been set to them, and as an encouragement to that end, he directs that students in the lower classes of high and middle schools corresponding in educational standard to similar classes in middle and primary shools shall be allowed to compete for middle and upper primary scholarships on the same terms as students in middle and upper primary schools There is at present no examination for such scholarships in the lower classes of those schools and he hopes that this new privilege will form an effective incentive to the adoption of a system which appeals alike to experience and patriotism The substitution of vernacular for English text books in the first three lowest classes is probably the first step necessary to the reversion to the old system

13 Having decided what should be done, the next and far more difficult step is to settle the manner in which effect is to be given to these conclusions. Obviously, the very first matter to be taken in hand is the preparation of manuals for the guidance and use of the teachers in the new system and of readers for the children, the second is the training of the teachers. Details as to the methods to be followed with reference to the preparation and supply of the requisite primers and teachers' manuals will be published presently, but it is to be clearly understood that one of the essential principles to be followed is that the objects required to illustrate the course of instruction must be such as can be obtained locally and at practically a nominal cost The Lieutenant-Governor is compelled to anticipate that the compilation of these manuals and primers with the care and clearness that is necessary will occupy the better part of a year In the meantime, the Kurseong Training School (which will commence work in February and for which a Principal of special experience has already arrived from England) will be utilized in the careful instruction in the system of the masters of the nine other training schools of the Province

As soon as the teachers' manuals have been prepared, a copy will in the first place be supplied to each member of the inspecting staff (Inspectors, Deputy Inspectors, Sub Inspectors, Inspecting Pandits, and Circle Pandits), as well as to every vernacular teacher of the manual relating to the class or classes of schools in which he is interested

A conference will then be held by each Inspector of Schools of all Deputy Inspectors in his circle with the view of discussing the new subjects and methods of instruction, and of dealing with any difficulties which they may have found in the syllabus or in the teachers' manuals

As soon as the new courses have been started in the training schools at the head quarters of each Inspector's circle, the Deputy and Sub Inspectors of the circle will be required to attend at the schools for a period of a month or six weeks to be instructed in the working of the new system

When each Deputy Inspector or Sub-Inspector of Schools has completed his course of instruction at the training school, he will be required in all his future tours to call together at different centres, whether at thanas or at other convenient places in his subdivision, the Inspecting Pandits and the masters of such middle and primary schools of his beat as have sent up pupils for

scholarships, in order to instruct them in the methods of teaching the new courses, and at the same time to explain carefully the character and design of the teachers' manuals

The Deputy or Sub Inspector will also, whenever he may visit any of the schools in which the new course has been or is to be adopted, be expected to explain and demonstrate practically to the masters or gurus the nature of the new subjects to be taught, and the proper method of teaching them The recurrence at intervals of six or eight weeks of the Sub Inspectors' rounds will enable those officers to repeat and amplify their instructions, to ascertain and correct any mistakes or misapprehensions which may have occurred, and to inform themselves generally of the progress which each teacher may have made in dealing with the new system and of his capacity for further improvement Each Sub Inspector will have, on the average, 65 schools on the new system under his supervision

It will also be desirable that the Deputy Inspector of each district should from time to time summon all Sub Inspectors and Inspecting Pandits under his charge to some convenient centre, where there is a good school, which would be utilized as what might be termed a practising school for the demonstration of methods of instruction in a practical manner Conferences thus convened might last for two or three weeks

The Lieutenant Governor is conscious that the scheme for the training of teachers is imperfect, but it will at least serve as a useful foundation for further developments in the required direction

14 Sir John Woodburn has so far not made any allusion to the important matter of technical instruction He wishes it to be distinctly understood that the primary object of giving a more practical turn to the general system of early education is not that of preparing boys for learning any particular trade or profession The first aim of these reforms is here as it has been in Europe and now under similar circumstances in Great Britain, to train and improve the intelligence of the young, whatever may be the future occupation of their life The Irish Commissioners state that in their investigations on the Continent they "enquired particularly whether the literary side of school studies had suffered any loss by the change," and received a uniform assurance in every country 'that no such loss had been observed, but that in some cases literary studies had been positively improved by the introduction of the new system, a result accounted for partly by the increased intelligence of the children, partly by the constant change and variety of their occupation, and partly by their increased interest in their work " It is true that the reformed methods will have the effect of giving to those boys who intend either to follow practical professions such as those of Medicine and Engineering, or to take up as the occupation of their life any of the various trades and handicrafts of the country, a far better preparation than the narrower system hitherto in force So far this is an immense gain For, as the Irish Commissioners pointed out, the present system of primary education is so one sided in its character that it leaves the pupils quite unprepared for technical education ' But, to quote their concluding words, "the system of education modified as we propose " (and it may be noted that these proposals coincide in principle entirely with those embodied in the present scheme) " would give an all round training to the faculties of the children and would thus lay a solid foundation for any system of higher education, literary scientific or technical, which might afterwards be found suitable to their talents and circumstances " The width of the Commission's enquiries gives a special weight to their findings, and the Lieutenant Governor believes that the results of the system will not be different in Bengal from those which have followed it elsewhere

ORDER—Ordered that this Resolution, with all the papers read and referred to, in the preamble to this Resolution, be published for general information

By order of the Lieutenant Governor of Bengal,

F A SLACKE,

Secretary to the Government of Bengal

A short report on the system of vernacular education in the Central Provinces by Alexander Peller, Esq F R S received with the Director of Public Instruction s letter No 477 dated the 16th January 1899

The final report of the Commission on Manual and Practical Instruction in Primary Schools under the Board of National Education in Ireland, dated the 25th of June 1898

The question of remodelling the lines on which vernacular education in the Indian Empire has hitherto been based, has for a considerable time been exercising the most anxious consideration of both the Imperial and Local Governments, and it was more particularly in its relation to agriculture that this question engaged the attention of the fifth meeting of the Agricultural Conference held in the Department of Revenue and Agriculture at Simla on the 6th of October 1893 After considering the recommendations made by Dr Voelcker in paragraphs 527 and 528 of his Report on the Improvement of Indian Agriculture, the following Resolutions were passed —

Resolution I—That in considering the question of agricultural education and progress, the Conference desires to express the opinion that it is most desirable to extend primary education among the agricultural classes

Resolution II—That, as a general rule, instruction in agriculture should be combined with the existing course of education, and not depend exclusively on separate special institutions

Resolution III—That, it is most desirable that the Universities should recognize the Science of Agriculture as an optional subject in the course for a degree

Resolution IV—That, in the opinion of the Conference, education in the lower schools should be of such a practical character as to fit the pupils for technical pursuits including agriculture, as well as for literary and commercial pursuits

Resolution X—That the text books used in schools should be written in the simplest language ordinarily understood by the people, and should be descriptive of subjects with which they are familiar, also that the use of pictorial lesson charts illustrating familiar objects, should be encouraged.

Resolution XI—That the system of training in normal schools should be adapted to qualify school teachers to give instruction of the character indicated in Resolution VIII

Resolution XII—That in each Province a Committee in which agricultural officers should be included, should be convened at an early date for the consideration of the questions raised in the preceding resolutions

The Governor-General in Council, after considering the recommendations of the Conference, and after correspondence with the Secretary of State,

determined, before enunciating finally the principles or policy to be adopted, to give Local Governments the opportunity of fully examining the various subjects dealt with by the Conference, and with a view to affording them every facility in their investigation, deputed Sir Edward Buck to attend a series of Provincial Conferences and explain the various issues under discussion and the different methods proposed or adopted in other Provinces It was explained that the Government of India believed that 'greater success was to be expected from making instruction in the rudiments of Agriculture part and parcel of the primary system of instruction in the country than from teaching it as a subject apart from the general educational programme, and that such general enlightenment and intellectual expansion of the agricultural classes, as would enable them to perceive for themselves the small reforms which are within their means and opportunities would be more likely to produce substantial results than special instruction in particular agricultural processes" It followed therefore that the educational question which was given to each Province to answer was not merely how to adapt education to the training of agriculturists, but how the plan of instruction should be so fashioned as to promote in the pupils taught the power of assimilating easily any kind of technical instruction

2 This phase of the question was discussed at the meeting of the Bengal Provincial Conference held on the 6th of January 1896, and it was suggested that the course of Science in primary and middle schools should be reconsidered and so graduated as to include at different stages branches of the elements of agriculture, care being taken to exclude words and ideas of which the pupils could have no understanding Effect was to be given to this resolution by arranging for the introduction of a compulsory course of Elementary, Physical and Natural Science, including Zoology, illustrated as far as practicable by object lessons, and the Director of Public Instruction was asked to report how he proposed to give effect to these suggestions This he did in August 1897, and in March 1898 an impetus to the establishment of Agricultural education was given by the opening of the Agricultural classes at the Sibpur Engineering College This was, however, only a scheme for a "Higher Agricultural Education" and still left the pupils of the vernacular schools unprovided for, and in August 1898 the Lieutenant Governor called for proposals of a wider nature with a view to the introduction of a system of vernacular education designed more to develop the minds of the boys than to practise and strengthen their memories, and after indicating the points for consideration, referred the matter for careful discussion and report to a small Committee of Educational experts whose names are given in the margin Their report—a record of singularly careful and thorough research—has now been received, and in it the Committee have shown how it is possible to adapt the principles accepted by the experience of Europe to the conditions of Indian vernacular education

The changes recommended are changes which are of the most vital importance to the interests of education in Bengal, and before taking any action on the proposals made by the Committee, the Lieutenant Governor considers it to be advisable to publish their report for general information, and invites any who may desire to do so to submit to Government on or before the 1st of October 1899 any criticisms he has to make on the proposals now before Government

The view that the general principles on which the Committee base their recommendations to Government are such as will stimulate the intelligence of the scholars and lead to the material progress of the people of this Province, finds support from the success which has attended the introduction of modern methods and subjects of education in the Central Provinces It would appear from Mr Pedler's report that the first beginning was made in 1880, and though the progress made has been gradual, Drill, Drawing, Agricultural teaching, Physical Science, Kindergarten, and Object lesson teaching are all now recognised features of the education given in vernacular schools in the Central Provinces.

The increased interest with which the pupils accept the training provided for them has been manifest, and the result has been most beneficial both in the higher development of the intelligence of the pupils and in their discipline in school Manual training was also introduced, and before it was omitted from the course of instruction (for reasons which Mr Pedler believes to have been somewhat prematurely accepted), it had been sufficiently clearly demonstrated that its introduction in vernacular schools was not only possible, but suitable Such statistics as are available on the subject go to corroborate the conclusion drawn by the Director from the numerous careful enquiries he made that the modern system can be introduced at no increase of cost to the State, and it is not an unsatisfactory feature of the Committee's proposals that the books the scholars would have to buy are cheaper than those of the present curriculum

Since the report of the Committee was received, the Lieutenant Governor has had brought to his notice the Final Report of the Commissioners* appointed to consider Manual and Practical Instruction in Primary Schools under the Board of National Education in Ireland Part I of this work, which represents the continuous labour of two years and is based upon the evidence of the leading authorities in Great Britain, Sweden, Denmark, Germany, France, Switzerland, and Holland, is printed as an Appendix to this Resolution, and there could scarcely be a higher tribute to the thoroughness and ability which the Bengal Committee have brought to bear on the work entrusted to their charge than the close correspondence between their conclusions and those of the Irish Commission

REPORT OF THE COMMITTEE APPOINTED TO REVISE THE SUBJECTS, AND TEXT BOOKS USED IN VERNACULAR EDUCATION IN BENGAL

In obedience to the orders contained in the Government of Bengal's letter "Agriculture No 2679, dated Calcutta, 12th August 1898, from M Finucane, Esq, C S I, Secretary in the General Department, to A Pedler Esq, F R S, Officiating Director of Public Instruction, Bengal," the members of the Committee therein named have the honour to submit the following report —

The Committee consider that the orders in the Government letter have required theme to submit proposals for remodelling practically the whole scheme of vernacular education in Bengal, specially with regard to the subjects which are taught in various classes of vernacular schools and the manner in which instruction is given

It is, indeed, pointed out in paragraph 6 of that letter that the introduction of the study of such branches as Agriculture, Natural History, Sanitation, and Physics as compulsory subjects into vernacular schools, which is one of the principal orders in the letter, will itself involve the question of the methods by which such instruction should be given It is also an instruction to the Committee (paragraph 5) that the aim in making alterations in the present system of education should be "more to develop the minds of the boys than to strengthen their memories The object in view is the training of the powers of observation and the development of the powers of hand and eye" And again in paragraph 6 it is stated "The Lieutenant-Governor is further of opinion that Elementary Drawing should form a subject of instruction in all primary schools"

The Committee have, therefore, in their proposals made suggestions for revising on modern lines the general curriculum of the vernacular schools of all grades from the infant stage up to and including the middle vernacular stage

2 Working on the principle that the development of the educational structure is very considerably dependent on the nature of its foundations, the Committee first earnestly considered whether the instruction which is now given in lower primary schools is of the type which is desired, and whether such education is not easily capable of being improved The first stage of the present instruction in a *patsala* is for the children to be made to sit as still as they can, anything like activity being sternly repressed, while they have to repeat hour after hour ordinary multiplication and other tables for the purpose of committing them to memory A more unnatural method of commencing the training of a child can hardly be imagined Speaking generally, the lowest class of a lower primary school now works for about seven hours a day, of which one hour is given to learning the letters of the alphabet, etc, and one hour to instruction in writing, while the remaining hours (5 hours a day) are devoted entirely to the repetition of arithmetical tables and the revision of old lessons In the next higher class the length of time devoted to reading and writing remains the same, but rather less time is

The present system

devoted to repetition of tables and revision of old lessons, while European and Native Arithmetic and Mensuration (after the Native system) are here commenced. In the next higher or the lower primary class most of the subjects remain as before except that the repetition of multiplication tables is dropped, while the reading of manuscript and a little Sanitation are taught.

3. Looking at this programme of work it can be seen how little the present system of education conforms to the principles formulated in the Government letter, which lays down in precise terms that the education required is intended "more to develop the minds of the boys than to strengthen their memories, and to train the powers of observation and develop the power of the hand and eye."

General principles of the proposed changes.

Hence it is clear that the orders of Government can only be carried out by making a drastic change in both methods and subjects, even from the very lowest or the infant stage of education.

4. The two leading principles which appear to be accepted in Europe as a sound basis for the education of early childhood are as follows*:—

Report of the Committee of Council on Education for England and Wales 1897-98, page 630.

(1) The recognition of the child's spontaneous activity, and the stimulation of this activity in certain well defined directions by the teachers.

(2) The harmonious and complete development of the whole of the child's faculties. The teachers should pay special regard to the love of movement which can alone secure healthy physical conditions, to the observant use of the organs of sense, specially those of sight and touch, and to that eager desire of questioning which intelligent children exhibit. All these should be encouraged under due limitations and should be developed simultaneously, so that each stage of development may be complete in itself.

5. The principles which are here enunciated can, in the opinion of the Committee, only be fulfilled by the introduction of the methods originally put forward by Froebel, which are now known under the name of Kindergarten training. The principles which underlie this system are well known. By Kindergarten children are trained and not taught, in the ordinary acceptation of the word. They are trained so as to arouse a desire to *be* something, to *do* something, and to *know* something. The children are encouraged to feel that each one possesses a certain amount of innate power and capacity, the gradual development of which depends on the individual's own activity. They are led to see that eyes, ears and hands all help in the acquiring of knowledge, and these are the channels through which all *first* knowledge is acquired. The teaching also develops all the sides of a child's nature. The games, marching and singing, of the Kindergarten system secure the healthy physical exercise and development so necessary to a growing child. The stories told to the children and the nature teaching are so arranged as to develop the moral side of the child, and the habits which are formed of attention, of accurate observation and of thought, and the power to express thought concretely in form and in language, are most valuable intellectual and mental training. Another principle in Kindergarten training is the recognition of the desire of almost every child to work, invent, or originate on its own account, and hence stress is always laid on the teaching of such subjects as drawing, modelling in clay, etc., which gives scope for such desires.

Kindergarten.

It is of course true that Kindergarten training may be made an expensive and elaborate kind of education, but it is submitted that there is nothing in the above principles which necessitates any real expense, and that if the form of Kindergarten adopted is made suitable to the circumstances and local conditions of the pupils, little or no expenditure will be necessary. In India primary schools work at an expenditure of about a rupee per pupil per annum, and hence expensive or even moderately priced gifts of Froebel cannot be provided in the primary schools of Bengal. The principles above enunciated must therefore be worked out on more or less new lines, and only the use of objects now found in almost every primary school will be necessary to carry out such teaching in the proposals made by the Committee.

6. Closely allied with the methods of Kindergarten teaching is the so-called object-lesson teaching; indeed, the latter may almost be called a part of or possibly an extension of the former, as it is dependent on the same principles.

Object lessons.

*Object lessons cannot be dispensed with in teaching, if habits of observation are to be duly fostered, and they should always be treated as a means for mental exercise and not merely as a method of imparting miscellaneous and even valuable information. To fulfil this purpose, however, objects must always be present and in sufficient numbers, and the chief aim should be to call into activity observation and the construction of clear mental pictures, so that the intelligence of pupils may be exercised and developed.

*See Circular No. 332, page 638 of the English Education Department for 1897-98.

7. The principle of teaching by object lessons appears capable of far greater extension than is frequently considered to be the case. Usually object lessons are confined to the exhibition of a few natural substances, such as minerals, plants, etc., or to the pictures of a few animals, but the

Teaching of Geography and History.

method can easily be extended Thus, if a Geography lesson is taught by visible illustrations, and by actual modelling in sand and clay for the production of miniature rivers, hill plains, moun ains, etc, it really becomes an object lesson Tales from History, if graphically told and well illustrated by striking pictures, are almost equally object lessons, while the facts of elementary science obviously form excellent subjects from this point of view

Methods of teaching

8 In order to carry out the principles laid down in the Government letter which are those fully accepted by mordern educationists the Committee propose that the first years of a child's school-life should be devoted almost entirely to training the senses and the powers of observation To effect this the Committee wish to introduce Kindergarten methods at the very commencement of education These methods will be supplemented by object lessons and drawing, with possibly a certain amount of action songs in the infant stages Having commenced the development of the senses and powers of observation in the lowest stage it is then proposed to strengthen and develop the memory and reasoning powers and to continue the training of the hand and eye, etc It was also considered that training on Kindergarten principles should extend throughout the whole of the infant stage of education, that is, during the period when children are from about 5 to 7 years old The Committee are of opinion that object lessons should be a prominent part of the teaching of all classes up to and including the lower primary stage, and that the various subjects taught up to the upper primary stage should be treated as far as possible as object lessons

In the middle standard of education the necessity of teaching by the object lesson method is perhaps not quite so pronounced as proper habits of working will probably have been well established by the instruction up to the upper primary stage

The training of the hand and eye by such work as drawing has been considered to be essential throughout all stages of vernacular education, and in the case of the education of boys the Committee think this teaching should be supplemented at about the age of 8 by a little manual work in the form of leaf manipulation, etc In the case of girls this subject would be replaced by needlework At ages above this the Committee consider the manual training should be broadened and extended up to certainly the middle vernacular standard

Scientific teaching

9 The Committee have carefully examined the list of elementary sciences which the Government have proposed to introduce into the curriculum of the schools and they have accepted as feasible the Government proposals almost as they stand They wish it, however to be very distinctly understood that there is no intention of teaching or attempting to teach such subjects as Chemistry Physics, Natural History, etc *as sciences* to the children who attend the vernacular schools, but they wish to point out and make it quite clear that all that can be done is to present in a homely way some of the simpler and more important facts and truths of such sciences These facts must be suited to the intelligence of children and taught in a more or less practical way so that the facts may be assimilated and give food for observation thought, and inference and thus be a help to the children in their everyday lives later on Really it would be more correct to designate the facts which are intended to be taught under the headings of Chemistry Physics Natural History etc as the *Science of everyday life* '

Physical training

10 The Committee have also considered that if children are made, while at school, to work solely at their books or studies, only one part of what may be called a complete education is given They believe that a true system of education should try to develop not only the powers of observation, the mental faculties and the power of the hand and eye, but that no system can be called complete unless at the same time the physical powers are fostered and strengthened to the utmost possible extent

It is specially the case with young children that, if they are kept for any length of time consecutively at book work they become listless and tired, and make little real progress On the other hand if book lessons are alternated with lessons which require action and movement, then the children return to their books with renewed interest and vigour For this reason the Committee consider it to be essential to introduce act on songs into the infant stage of teaching, elementary drill into the next higher stages, and drill and gymnastics for boys, or drill and calisthenics for girls into the remaining stages of vernacular education

In the Central Provinces, for instance, an extremely complete system of drill and gymnastics has been introduced into the vernacular schools, and has been in force for several years The pupils take very great interest in such exercises and they become most expert They are smartly obedient to short words of command, and exhibit not only great skill in the exercises, but the excellent discipline which is now shown in these schools both in and out of class is an eloquent testimony to the mental discipline which a good system of drill enforces

11 There appears to the Committee to be no necessity for them to defend in detail the introduction of any of the above subjects into vernacular education in Bengal In the case of Kindergarten training, object lesson teaching drawing (hand and eye training), needlework for girls, manual work, and drill they are fully convinced of the necessity for their study, and they consider that there are no insuperable difficulties in the way of their introduction The success which has attended the systems of education in Europe since the introduction of these subjects is in itself sufficient to prove their suitability In the case

of the science subjects, or what may be called the "Science of everyday life," it is proposed to introduce the facts required into the ordinary class readers, and hence these can scarcely be said to be new subjects but rather an attempt to direct the reading work of the pupils to subjects which are of interest and importance to them in their everyday lives, instead of requiring them to read books which rarely contain any useful information, and are frequently of a very uninteresting nature

12 As appendices to this report (Appendices A and B) two syllabuses are given The first is the detailed statement of the subjects and the extent to which it is proposed to teach them in all the classes of the vernacular schools, while the second syllabus gives a condensed view of the detailed syllabus

The detailed scheme as recommended by the Committee

It will be convenient to note here some of the leading points of the syllabus Free hand drawing is introduced at the earliest stage and runs through the whole course Manual training for boys in the form of leaf manipulation, paper cutting and folding begins in the A class of the lower primary, as needlework for girls it begins in the third year of the infant class or class B of the lower primary Drill for boys and girls runs through the whole course Under the head of Reading, beginning with the A class of the lower primary, there is a list of science subjects which without the explanation given in the next paragraph and in paragraph 9 may seem to impose too great a burden on the students, but on examination it will resolve itself into a simple reading course arranged as follows - For boys in town schools, some elementary notions of the simplest facts and principles of Botany, Natural History, Hygiene Physical Science and Chemistry For boys in country schools a similar course, only with Agriculture substituted for Physical Science and Chemistry For girls in both town and country a similar course of Botany, Natural History, and Domestic Economy only The reader itself will be written in the most simple and comprehensible language, devoid of technicalities and to minimise the danger of the reading exercise degenerating into learning by rote, the different subjects up to Standard IV are to be illustrated and explained as far as possible by means of object lessons

The advantages of a course of Agriculture for village schools in Bengal need not be entered upon Naturally this subject becomes of a more technical character than the other Science subjects but at the same time it will be treated in a manner suitable for the age and understanding of schoolboys In Standard V and VI practical work in a school garden is introduced The syllabus for Standard IV of the subject 'Writing' may be noticed in this connection as a part of it has indirect reference to Agriculture It was brought to the notice of the Committee that in very many cases raiyats unwittingly placed themselves in the power of money lenders through absolute ignorance of the meaning of the documents to which they subscribed The Committee, therefore were of opinion, considering that they were providing a course of education mainly for the agricultural classes that it would not be out of place to introduce as an exercise in Writing the forms of simple documents which are commonly used by raiyats Mensuration will include a course of simple practical Geometry In the two highest standards Euclid is introduced as an alternative subject only in the present course it is compulsory The subject of moral training will be considered in the selection of pieces for the literature book and in subject IX (Poetry)

13 As it may be objected that several new subjects are proposed to be introduced in the curriculum, it is well to state that the increase of the course is only nominal, for most of the new subjects are only in substitution for others which are now taught

Thus, for instance, in the lower primary course, there are subjects in the present curriculum which partly or wholly go out in the new proposals

Taking the case of the B and A standards of a lower primary class corresponding to the two stages of infant training the children will be practically relieved of the work in reading and also in learning multiplication tables by rote In their place the children will have to take up Kindergarten occupation and object lessons In the lower primary class the time at present spent in reading and in working at the *Sarti Palan* (Science of Sanitation) will be devoted to studying the new primer for Standard I in what has been called the "Science of everyday life The same remark which has just been made with reference to the lower primary class will almost hold good for all the classes above it, as it is proposed that the Science Readers which are to be prepared should be substituted for the ordinary reading books now used in the schools

14 Again writing is usually taught to the children in all the classes of vernacular schools at least an hour a day it is proposed that a portion of this time, say, two hours a week should be devoted to Drawing Arithmetic multiplication tables, etc, are now taught at least 2 to 2½ hours a day, and in some classes for a much longer time Under the new scheme the tedium of the children's work in the infant stages will be lightened, for the idea of numbers will be introduced during the Kindergarten and object lesson work, when dealing with the leaves of trees, the fingers of the hand, etc, so that in the two lowest classes the Arithmetic will be more like systematised play than a serious study It is also thought that the learning of multiplication tables should certainly be postponed to the second period or year of study of the infant stage In the same way it is thought that the children should not learn the letters of the alphabet till the second year of tuition, while they will only commence their full course of reading and writing in the third year of study

15 Again it may be remarked that in the present upper primary course the following subjects are taught —Literature, Science, and Grammar, which may be considered to be replaced by the Science Reader Writing is to be partly replaced in the new scheme by

Drawing The dry facts of History and Geography now taught in the upper primary schools are to be replaced by interesting Historical and Geographical Readers, which will also include stories with a moral tendency Euclid, now taught in the two classes of the upper primary school, will be replaced by Geometrical Drawing, and so on Practically the only additional subjects in the proposed new courses will be Drill and Manual Training These lessons must be really looked upon as a relaxation, and it is believed that, as is found to be the case in England, the introduction of these additional subjects will enable the other work of the school to be carried out more efficiently and expeditiously

Hence it will be seen that the new scheme proposes to relieve the children of a considerable amount of tedious routine work, and to substitute for it lessons which will be at the same time more instructive and more interesting

Time tables

16 The statements appended to this report (Appendices E to G) are time tables giving the number of hours to be spent every week in each of the prescribed subjects in the different standards, for the lower primary, the upper primary, and the middle schools With a view to diminish the pressure on the pupils at the infant stage, care has been taken to restrict school work to 18 hours a week for the first stage, 24 hours for the second, and 25 hours for the third stage, while 27 hours have been assigned to both the first and second standards From the third to the sixth standard the number of school hours has been fixed at 30, including four hours for drill and manual work which, according to the experience gained elsewhere, afford marked relaxation from purely intellectual labour

Date of introduction of the new scheme

17 The Committee consider that though the syllabus of studies now put forward is based mainly on the existing capabilities of schools of different grades, it will be some time before it can be effectively taught in those institutions They are of opinion that a period of two and a-half years should be allowed to elapse, from the date of publication of the syllabus, for schools to adapt themselves to their altered requirements and that the first examination for scholarships under the revised standards should be held in 1902 The Committee do not consider it expedient to recommend the partial introduction of these standards either in particular localities or in particular grades of schools, at an earlier date as the present system of scholarships embraces both urban and rural areas which cannot be educationally severed from one another without the creation of practical difficulties They therefore venture to recommend that all classes of vernacular schools be given notice at an early date that the examination for scholarships will be held under the new system from the year 1902 This recommendation is made on the assumption that the middle and upper primary examinations will continue to be held before the Durga Puja holidays, and the lower primary examination in November or December as at present

Preliminaries to the introduction of the scheme

18 The necessary preliminaries to the introduction of the new scheme will be three First, the immediate introduction of teaching the new subjects into training schools, so as to enable them to turn out rapidly teachers qualified to take up school work under the new system Second, the training of Inspecting Pandits, Sub-Inspectors and Deputy Inspectors of Schools who will have to be familiarised with the methods of teaching now proposed to be adopted They may be invited to see actual work under the syllabus in the training schools for a week or ten days, and with the help of the knowledge thus gained, they can be expected to aid the teachers in introducing the system Third, the preparation of manuals for the teachers and text books for the students

Teachers Manuals and text books

19 Appendix C gives a statement of the books and manuals required under the proposed new scheme They consist of two Teachers Manuals, one Drill Book and the Drawing Books for the use of the teachers, and the following text books to be purchased by students —

For the Lower Primary

One Reader and one Arithmetic Book

For the Upper Primary

One Science Primer
One Historical Geographical and Moral Reader
One Arithmetic Book

For the Middle Vernacular

One Science Primer
One Literature Book and Moral Reader
One Historical and Geographical Reader
One Arithmetic Book
Euclid (alternative)

20 Referring first to the Manuals for Teachers, the Committee are of opinion that the necessity for them is sufficiently shown by the inefficiency which is to be found in the work of many teachers in primary and other schools in Bengal

The *gurus* in many primary schools have never seen what good or proper teaching is like, and they have never received any instruction as to the best methods by which such teaching should be given The Teachers' Manuals, which the Committee consider should be prepared at once, will deal with the work required to be done by a school-master, and indicate

the nature of the subjects to be taught and the precise method by which the instruction should be given

21 The vernacular education which is being dealt with in this report may really be divided into four stages—the Infant stage, the Lower and Upper Primary and the Middle stages In the Infant stage practically everything depends upon the teacher It is therefore necessary to supply each of the lower primary *gurus* with a manual giving very full instructions as to how the teacher should conduct the training of the senses and how he should proceed with object lessons, etc, which are detailed in the syllabus This manual, called the Junior Teachers' Manual, would also indicate more briefly how the remaining subjects up to the lower primary standard (*i e*, standards I and II of the syllabus) are to be taught

The second manual for the senior teachers would go rather more fully into the methods of managing the classes of a school, into the methods of maintaining discipline, the methods of keeping school registers and accounts the requirements as to cleanliness and sanitation in school rooms and school houses, and other matters of the same kind, and, in addition, it would explain in detail the principles upon which the teaching of the classes of an upper primary school should be conducted

A few additional chapters dealing with the new subjects taught in the middle schools, and on a few other matters would be sufficient to make this second book suitable for the use of teachers in middle schools as well as for those in upper primary schools

The subjects which are to be treated in the two Teachers' Manuals are given in detail in Appendix D

Drawing Book and Drill Book

22 The want of drawing examples for Indian schools has been supplied by a series of four books lately prepared under the supervision of the Superintendent of the Calcutta School of Art, by order of the Government of India To make them more complete some additional examples are now being prepared, and it will only be necessary to arrange for a cheap edition of the whole series to make it suitable for use in primary and other schools in Bengal

An excellent Drill book published in Hindi, embodying the native form of gymnastic exercises, has been introduced into the Central Provinces schools with marked success The Committee consider that the Drill book for schools in Bengal should be framed on similar lines

23 The scope and method of the text books required for the students are sufficiently indicated in the detailed syllabus The number of pages to be allotted to each subject in the different standards and the selling prices of the books are given in Appendix C

Method of procuring the text books and manuals required

24 It remains now to consider the best method of procuring the class of text books and manuals required

Two alternatives were considered by the Committee —

1st —To rely on private enterprise

2nd —To depute official or non official experts to prepare them on suitable terms as to remuneration and adoption of the books by Government

After much deliberation the Committee decided that the first course was preferable, as it would disarm much of the opposition and ill feeling which was sure to be aroused among authors and publishers by the unavoidable interference with their vested interest in existing text books, involved in the reorganisation of the present curriculum Any attempt on the part of Government to create a monopoly in the preparation of the new books might easily give rise to a strong agitation against the whole scheme Another advantage of throwing open to competition the work of preparing all the books required would be to relieve Government of the difficult and somewhat invidious task of nominating experts It is clear that no single author can be an expert in all the subjects which are dealt with in the Science Primers It would therefore follow that some one author must act as an editor of a book or series employing experts to write sections of the work which he would incorporate in a primer Hence there would be a further and grave difficulty if it were decided that Government should undertake the preparation of the Science and other readers

The Committee therefore considered that the best course to follow would be to notify publicly the manuals and text books required for the different classes of schools, the subject matter and lines on which the books are to be drawn up being clearly specified, and to invite authors and publishers to submit works for the approval of a Committee to be hereafter nominated by Government The books might be written in any vernacular used in Bengal, but a very full type written summary of the contents in English should be submitted with each book The authors or publishers, as the case might be, of the works selected would be allowed to retain the copyright, but they would be required to undertake the printing and publishing on their own account The maximum selling price is indicated in Appendix C With regard to the text books for students and the Teachers' Manuals, the Committee consider that the copyright of works selected, being a property of considerable value, would offer a sufficient inducement for authors and publishers to compete without any honoraria being given, but probably Government would have to give a guarantee that no changes would be made in the books for a certain time, perhaps for five years

Financial effect of the scheme

25 The financial effect of the scheme can as yet be estimated only approximately The Committee are of opinion that the new standards of education can without difficulty be taught in the schools by the present masters Hence no additional expenditure will be thrown on public funds from

this cause The Committee do not expect that at the outset the teaching in some of the new subjects will be very satisfactory, but, as suggested in paragraph 18, steps will be taken to gradually raise the standard of teaching The Committee are convinced that the teaching of the new system cannot possibly be less satisfactory than the teaching at present carried on With regard to other items of the cost of the new scheme, the Committee have come to the conclusion that the preparation of the text books for the pupils as well as the two Manuals for Teachers should be left to private enterprise If this recommendation be carried out, the cost to Government of the introduction of the scheme will be practically nothing except what is incurred in the publication of the Drawing books and the Drill book, District Boards and other local authorities will have to provide the lower and upper primary schools with copies of the Teachers' Manuals and the Drawing books and the Drill book The total cost for each lower primary school will thus be about 10 annas, and for each upper primary school about 12 annas The number of lower primary schools in these Provinces being 43,483, and of upper primary schools 4,113, the local authorities will have to incur an expenditure of about Rs 32 000 for supplying these books to the schools As most of the lessons suggested in the syllabus deal with common objects, the Committee trust that the articles required will be secured by each school locally without any extra cost A sum of 4 annas a year may, however, be put down as covering the entire cost of these articles for a lower primary school In that case about Rs 12,000 will have to be provided either by the school *gurus* or the villagers In upper primary schools the annual cost may probably be a rupee, and in middle schools the expenditure may vary with the ability of the school to bear it

26 It remains to be seen how the changes about to be introduced are likely to affect the students of the different grades of vernacular schools for whose benefit the Committee have endeavoured to revise the entire curriculum of studies The number of pages of text-books gone through by a candidate for a middle scholarship under existing arrangements is about 1,400, and the cost of the books is about Rs 6, while under the scheme here set forth the number of pages will be five to six hundred and the cost one rupee to one rupee eight annas In addition to this, drawing appliances, costing about 8 annas to each pupil and one rupee to the school, will have to be provided In respect of the Upper Primary Scholarship class, the pages at present come up to 1 000 and their cost to about Rs 2-13, while the new scheme reduces the pages to 300 or 350, and their cost to 8 to 12 annas or to perhaps a rupee including drawing instruments In the same way the Lower Primary Scholarship class now has to go through 230 pages, the books costing about 10 annas, while the new scheme gives 140 pages, costing 6 annas These figures give some idea of the relief which would be afforded to students of vernacular schools of different classes in respect of the burden of text books and their cost to the pupils

27 The Committee are of opinion that it will be time to discuss the question of assigning different values or marks to the separate subjects for the purposes of the different scholarship examinations when the Government have intimated their decision on the scheme embodied in the present report The Committee, therefore, consider it premature to make any detailed proposals in respect of marking for the present

APPENDIX A

THE DETAILED SYLLABUS

NOTE —It is of the utmost importance that all objects which are used to illustrate the courses of instruction in vernacular schools should be selected from materials or things that are commonly found in every school or which can be obtained in every village without difficulty and without cost This rule applies to objects which are to be used for the training of the senses in the infant classes and for object lessons etc and also as far as possible to those used in the teaching of the science of every day life

INFANT CLASS

THE following "Kindergarten" and "Object lesson" subjects shall be prescribed for the first stage of instruction before the children are allowed to began to learn their letters or to learn to read, &c —

FIRST PERIOD OF INFANT CLASS—ONE YEAR'S COURSE

Age about 5 years

A —Kindergarten and Object lessons for training children by observation or impressions obtained through the senses—

1 Through the eye—

(a) Lessons on form
Curved lines
Lines, straight and crooked
Ball shaped bodies

(b) Lessons on colour—
Black and white substances
Yellow and red ditto
Blue and green ditto

2 Through the hand—

Things, hard and soft
" rough and smooth
" heavy and light
" brittle and tough

3 Through sense of taste—

Things, sweet and sour
" pungent or hot, sour, salt, and bitter

B —Object lessons on things of every day life, such as, a flat board or a piece of wood, a box, a stool or chair, a table or school desk, also very simple object lessons about plants, growing and flowering, indicating the root, the stem, the leaves, the flowers, etc, and their simple uses, and showing that a plant must be watered for it to continue to live

Very simple lessons about the human body—

Parts of the body—the head, arms, legs, hands and feet
What the body is made of (bones and flesh)

C – Training of hand and eye—

Drawing of curved, straight, and crooked lines
Ditto squares and oblongs, circles and figures like circles bounded by curved lines

D —Very simple lessons as to different kinds of animals—

Some animals walk only
Ditto have 2, 4, and more legs.
Ditto crawl.
Ditto fly
Ditto swim
Ditto walk and fly
Ditto walk and swim.

Necessity of kindness to domestic animals.
Kindness of children to one another

E.—From the object-lessons on the leaves of trees and on the hands and feet, etc, the idea of numbers can be readily introduced, and from numbers to addition, subtraction, and simple mental arithmetic

F.—The children are to be allowed to learn to write the numerals about this stage

G.—The children must be trained daily in simple physical exercises and in action songs

H.—Kindergarten occupations such as stick laying, etc

SECOND PERIOD OF INFANT CLASS—ONE YEAR'S COURSE

Age about 6 years

A.—Training through the senses—

1 Through the eye—

(a) Lessons on form—
Extension of lessons given in first period
Also lessons on angles and on triangles of various shapes
Also lessons on cube and brick shaped bodies

(b) Lessons on colour—
Extension of lessons given in first period
Grey, orange, purple, brown

2 Through the hand-
Extension of lessons given in first period, showing various degrees of the properties then tested

3 Through sense of taste—
Extension of lessons given in first period

4 Through the ear—
Sounds, loud and soft
" distant and near
" pleasant and unpleasant
Different animals give different sounds
Sounds of pain, sounds of pleasure
Sounds give spoken language

5 Through the organs of smell—
Pure air has no smell
Air which has smell is not pure
Sweet or pleasant smells of flowers
Unpleasant smell of rotting or decaying vegetation
Unpleasant smell of rotting or decaying animal matter
Air with bad smell is unhealthy to breathe

6 Lessons on size and measurement—
Length, breadth, and thickness
Measures of length, both vernacular measures, and the yard, foot, and inch

B.—The following object-lessons on common things —

1 On a stool or chair
2 " a slate and pencil
3 " a book
4 " a tree and its fruit
5 " a mango and plantain.
6 " seeds.
7 " grass.
8 " a plant yielding fibres which the children can extract
9 " the parts of the human body in greater detail than in the first period.
10 " a cat

C.—The hand and eye should be again trained by simple drawing exercises of the same character as those in the first period, but rather more advanced, with the drawing of triangles, rectangles, pentagons, etc, in addition

Tracing outlines of leaves of plants of various shapes and of other flat bodies on slates Leaves of plants may be pressed between sheets of paper (old newspapers) to make them lie quite flat

After tracing a leaf or other flat object on the slate, the pupil should be required to make a freehand copy of his own diagram by the side of it, and compare it and correct it by placing the original object over it This would help to train the eye and would fix the form of the object more clearly in the memory than simple tracing would

D —At this period the children are to begin to learn their letters, etc, and to write the letters of the alphabet and to form short words

E —Additional arithmetical exercises, multiplication tables, etc, should be learned Slates may be used for the simple arithmetic

F —Short pieces of poetry should be committed to memory Some of these should teach morality and the duties of children

G —Simple physical exercises and action songs

H —Kindergarten occupations such as stick laying, seed work, etc

THIRD PERIOD OF INFANT CLASS—ONE YEAR'S COURSE (EQUAL TO STANDARD B OF PRESENT PRIMARY COURSE)

Age about 7 years

A —Training through the senses—

1 Through the eye—

(a) Lessons on form should include the notions of perpendicular, horizontal, oblique, parallel lines, the circle, sphere, cylinder, prisms pyramid, and cone

(b) Lessons on colour should deal with dark and light colours, and with the varying shades of such colours as red, blue, green, yellow, etc

Primary and secondary colours, browns, greys, etc

(c) Lessons on the four cardinal points

2 Determination of weights with the use of bazar scales

3 Elementary notions about time should be given (indigenous and European), to include the year, month, week, day, hour, and minute also division of the year into seasons

B —Object-lessons—

3 Further lessons about plants—

Seeds to be sown and grown to form plants

Objects lessons on plants, such as pumpkin, and on vegetables, such as brinjal, beans, etc, for food

4 Further lessons about the human body—

The blood, the brain, the skin

5 Object-lessons about birds (pigeon, duck)

Simple lessons about the cow

6 Object-lessons on vessels—

An earthen pot

A water glass or a bottle

A brass *lotah* or a brass plate (*thala*)

7 Object-lessons on common metals.

" coins, copper and silver

" nails, screws.

" a knife

" a key for a lock.

8 Object-lessons about plants yielding fibres, more advanced than in the previous stage
The use of various fibres in the manufacture of cloth for clothing

C —Drawing (Hand and Eye training)—
Drawing on slates, of rather more advanced character than in the two previous stages
Drawing outlines of leaves, etc, from memory must be practised

D —The study of reading and arithmetic to be continued, and before passing on to the next stage the children should be able to read very simple language, written and printed, and should be able to write slowly, very simple words from dictation

E.—Verses on the duties of children should be committed to memory and recited

F —School Drill also to be included

G —Needlework (*for girls only*) —Hemming

H —Kindergarten occupations such as stick-laying, seed work, paper folding, etc

STANDARD I—ONE YEAR'S COURSE (CORRESPONDING TO THE "A" CLASS OF A LOWER PRIMARY SCHOOL)

Age about 8 years

Class subjects —Reading Writing,* Arithmetic,* Object lessons and a Primer, with Drawing (Hand and Eye training), Manual work, Needlework for girls, and School Drill

Object lessons (2 pages)—

THE SKY

Sunrise, noon, sunset —The children are to note with reference to the school house or village the object over which the sun rises or sets from month to month, and to note also the sun's position at noon, and its varying height above the horizon

Shadow —The pupils are to notice by aid of an upright stick on a flat piece of ground the varying length of the shadow month by month

Moon —Note its changes The pupils should draw the shape of the illuminated portion week by week

Day and night —Varying length of day and night at different seasons to be noted, and connected with the varying position of the sun as determined at rising and setting and at noon

The Primer for this class will contain—

A —Botany (5 pages) —

1 A broad sketch of the plant in reference to its three principal parts,—the root, the stem, and the leaf

2 Talk about a seedling

3 Distinction between root and stem—Observe the germination of seed One part grows upwards—the stem, and the other downwards—the root If a growing plant be placed in an inverted position for some time observe that the stem will bend and grow upwards and the root in the contrary direction (A germinating pea placed upside down will show this)

B —Natural History (10 pages) —Habits and general description of the following domestic animals with anecdotes the cow, the cat, and the dog, incidentally illustrating what is meant by herbivorous and carnivorous animals their offensive and defensive weapons

C —Agriculture (10 pages) for Country schools, for boys only —Alternative with Physics and Chemistry

Necessaries of Life; Variety desirable as a protection against failure of crops *Objects required*—specimens of cereals, pulses oil seeds vegetables, sugar, salt milk, fibres, straw, bamboos, timber spices,

* As at present.

D—Physics (5) pages for town schools, for boys only—The following lesson is to be in the form of conversation—

Solid substances and some of their properties—Take a solid and show that it has a definite shape This shape cannot be easily altered

Some solids may be converted into liquids by heating e g wax

Porous bodies—Take a piece of charcoal and show the pores Examine also a piece of unglazed pottery Water percolates through the pores Examine blotting paper

Liquids and some of their properties—As example take water It has no shape of its own it takes the shape of the vessel in which it is poured It breaks into drops It flows down Fill a bottle full of water Try to cork it The water is difficult to compress

Solids are converted into liquids by heating liquids are converted into solids by cooling Observe how cocoanut oil becomes solidified in winter

E—Chemistry (4 pages) for town schools, for boys only—Lesson on solubility—

Take a pinch of common salt sugar and finely powdered chalk respectively in a tumbler and add the same volume of water to each and stir with a rod Observe the appearance of the liquids the water with the salt and sugar is perfectly clear that containing the chalk is milky Now pass the liquids through filter papers Observe that the milkiness in the last has now disappeared Taste them one by one The water containing the salt has a brackish taste that which was poured over the sugar has a sweetish taste whilst that which was treated with chalk has *no taste* whatever Evaporate the liquids in succession in earthenware or enamelled cups The water evaporates off slowly and at last we have a residue of salt and sugar but the water which was similarly treated with chalk leaves *nothing* behind

F—Hygiene (8 pages), for boys only—

Food—Its necessity Evils of under feeding and over feeding Ordinary articles of food including meat eggs milk, fruits

Drink—Pure water how obtained Causes of impurities in water

Air—Necessity of pure air Causes of its impurities How to purify the air of dwelling houses

Sunlight—Its necessity in dwelling houses

F(a)—Domestic Economy (8 pages), for girls only—

Bathing—Anointing the body before bathing Bathing as a means of cleaning the body Bathing of little children

Dress—Dress capable of improvement Clothes to be washed and kept clean Children s clothes to be changed frequently

The kitchen—Should be kept clean Removal of refuse Scrubbing the floor and cleaning walls and the ceiling Admission of light and air into the kitchen

G—Drawing (Hand- and Eye training)—Half the first part (of the four parts) of the Indian Drawing Books prepared in the School of Art—

A set of Indian drawing copies has recently been supplied by a drawing book in four parts prepared by order of the Government of India With some additional examples and a carefully prepared set of instructions for teachers the first book would be suitable for use in lower primary schools The examples would have to be enlarged mounted on pasteboard and varnished These enlarged examples would be hung in front of the class and copied by the students on their slates so that one set would be sufficient for each school The only expense would be the cost of one book for the teacher and one set of examples for each school The examples would be of so simple a character that any intelligent teacher by the help of the printed instructions would be able to direct the class in the correct method of drawing them

One page of directions regarding Drawing is to be included in the Science Primer

H—Manual Training, for boys only—Leaf and Paper work

Leaves (palm, &c)—Making fans of different kinds, whistles, ornamental designs, baskets

Paper—Paper-folding paper modelling, such as caps boats, and other toys inkpots pen cases etc flying kites flowers garlands, slings lanterns etc etc, envelopes.

Two pages of the Reader to contain directions about Manual Training

H(a)—*Needlework (for girls)*—Top-sewing or seaming

I—Verses teaching the duties of children

(Two pages at the end of the Primer)

STANDARD II (CORRESPONDING TO PRESENT LOWER PRIMARY STANDARD)

Age about 9 years

Class subjects—Reading, Writing,* Arithmetic,* Object-lessons and a Primer, with Drawing (Hand- and Eye training), Manual work, Needlework for girls and School Drill †

Object lessons 2 (pages)—

THE AIR

Winds—The pupils should record the varying directions of the winds from season to season, or day to day, also note that some winds are warm, some cold, that some bring rain and some dry weather

Air—Contains moisture or water vapour shown by two classes of facts—(a) clothes left out in open air at night become damp and wet, salt becomes damp and wet during rainy season, i e, vapour from air is turned into water, and (b) pools of water and tanks dry up in wind and sun, wet cloth becomes dry when hung in wind and sun, i e, the water in them turns into vapour Human breath contains vapour, and this turns to water when a cold slate is breathed upon, or on a cold morning breath becomes visible owing to water being formed from the vapour in it

Surface of lands—The meaning of the terms plains, valleys, hills, etc, must be explained, and the teacher should make models in clay, sand, etc, to illustrate the meaning of such terms

The Reader for this class will contain—

A—*Botany (5 pages)*—

Root of a plant—Function of the root (1) to hold the plant, (2) to supply food Examine different kinds of roots

Distinguish between the main roots and rootlets—

Fibrous roots—grass.
Fleshy roots—radish beet.
Adventitious roots—banyan

B—*Natural History (10 pages)*—

General description of the members of the cat family with anecdotes

Mammals—The cat, chosen as a type—external configuration—round face—arrangement and disposition of the hair—habits.

Examination of the paw (a) under surface, the fleshy pad—the retractile claws—when excited the claws are drawn out of the protecting sheath and the hair stands on end—mode of seizing prey

The pupil of the cat's eye almost a vertical line in broad daylight—in the dark it expands

The cat its maternal instincts—attitude of the male cat towards the offspring

The tiger only a big cat

C—*Agriculture (8 pages), alternative with Physics and Chemistry for village schools, for boys only*—

A lesson on rice and a lesson on oilseeds

* As at present.
† Book containing instructions in Drill to be prepared.

D—Physics (5 pages) for boys only—

Gases and some of their properties—Blow into water through a tube, you see something bubbling up Blow against your hand, you feel a current of air Gases cannot be kept in an open-mouthed vessel Gases are easily compressible

Resume of the general properties of matter (ice, water and steam)

Divisibility of matter

Gravity

E—Chemistry (4 pages), for boys only—Further lessons about solubility

Take some lime in a bottle fill half the bottle with water cork it tightly and violently agitate the contents Allow to settle over night Next day carefully decant off the clear liquid note the *alkaline* nature of the water divide it into two portions blow into one by means of a tube of bamboo or some kind of reed Observe how the water turns milky, the lime which was in solution has now been rendered insoluble and thus *precipitated* Pass the milky water through a filter The water is now colourless and devoid of taste (*Cf* Lessons on the Chemistry of a Candle)

Treat similarly powdered alum sulphate of copper charcoal sand etc and find out which of the above are soluble and which insoluble in water

F—Hygiene (8 pages), for boys only—

Cleanliness and dress—Bathing its necessity How to keep clean How to keep the house clean Uses of dress Different articles used for weaving cloths

Exercise and rest including change of air

Epidemics—How to check their spread

F(a)—Domestic Economy (8 pages), for girls—

Cooking—Cleanliness to be observed Cleaning of utensils Supply of good water for cooking food Articles to be properly prepared and washed before cooking Food to be prepared and kept covered as far as possible Rice to be cooked last and eaten before it gets cold Variety in food

Bed room—Day sleep to be avoided Regular hours of sleep Over crowding in rooms injurious Use of mosquito curtains Ventilation of rooms Bedding of infants to be changed when soiled Bed clothes and pillows to be aired and sunned and washed

G—Drawing (Hand and Eye training)—Second half of first part of the School of Art Drawing Book *

H—Manual Training (for boys only)—Exercises in Clay modelling

Construction of pots country lamps, other household articles models of fruits and playthings

One page of directions regarding Manual Training is to be included in the Science Primer

H(a)—Needlework, for girls—Running and felling and back stitching

I—Verses teaching morality and duties of children (3 pages)

STANDARD III (CORRESPONDING TO LOWER CLASS OF UPPER PRIMARY SCHOOL)—ONE YEAR'S COURSE

Age about 10 years

Class subjects—Reading, Writing,† Arithmetic,† a Historical, Geographical and Moral Reader, a Science Primer, Drawing (Hand and Eye training), Practical Geometry (INSTEAD OF EUCLID), Manual work, Needlework for girls and School Drill ‡

---

* These Drawing Books are now in course of revision, and drawings of Indian leaves plants and animals illustrating the lessons in agriculture, natural history, and botany are to be included in them

† As at present

In addition to the Science Primer, a Reader containing lessons in History and Geography will have to be prepared for the Upper Primary Standard, and the first-half of this book will be used in this class This book should contain a few pieces of poetry, also some anecdotes with a moral tendency It should not exceed 120 pages

Object-lessons (2 pages) —

WATER

Mist and fog—Are produced in the air and over tanks, etc, because the vapour, when cooled, changes into little drops of water

Clouds—Are formed in the same way, but in the upper atmosphere

Rain—Comes from these clouds or from the vapour which has been cooled into drops of water

Dew—Is water formed from vapour on or near the surface of the ground The pupils should note when dew is formed, *i e*, whether during cloudy or cloudless weather, etc, the difference in the amount of dew in different seasons of the year, and on what objects the dew lies thickest

Hailstones—Are rain drops made solid by cold, and they fall usually during thunderstorms Hailstones should be collected and examined, and allowed to melt in a glass, so that the water can be seen and tested

Thunder and lightning—Also usually occur during storms of rain, hail, etc

The Science Primer will contain—

A —Botany (8 pages)—Stems and their functions—

Stems of plants —The stem grows upward, so that the plant may get as much light as it can Green plants cannot grow without light Observe the discolouration and unhealthy condition of grass growing when shaded from light

Different kinds of stems—

a —Woody stems

b —Climbing stems Observe the twining tendrils by which the plant obtains support, *e g* cucurbita.

c —Succulent stems

d —Underground stems *e.g* potato, turmeric ginger etc

B —Natural History (10 pages)—

Difference between a vertebrate and an invertebrate animal as illustrated by comparing the wings, legs and body of a bird with those of a butterfly

Animals without a backbone a snail, a cray fish, an earth worm, a milliped, a butterfly, a leech and a cockroach compared with a fish

The dog as compared with the cat in external appearance —the longish face—claws non retractile—different breeds of dogs—Newfoundland, spaniel, greyhound, St Bernard and the uses they are put to—dogs of the cold countries furnished with a thick coating of fur

C —Agriculture (16 pages) for country schools, for boys only (alternative with Physics and Chemistry) —

Why crops fail

Drought-resisting crops

Irrigation from small depth and from great depth

D —Physics (10 pages) for town schools, for boys only—

Liquids —Surface of liquid is always level Pressure exerted by liquids in all directions Bodies weigh less in water than in air Floating bodies.

Gases —Pressure exerted by the atmosphere Invert a tumbler filled with water with the open mouth covered with a card. Observe the water is kept from falling The syringe.

E.—Chemistry (6 pages) for town schools, for boys only—

Chemistry of a Candle.—A candle attached to a stout iron wire is lighted and gradually lowered into a wide mouthed glass bottle it continues to burn. Observe that the sides of the bottle begin to lose transparency and become covered over with mist. Where does the water come from? The mouth of the bottle is gradually closed with a glass or earthenware plate. The light begins to get more and more dim till it is extinguished. Pour lime water into the bottle and shake it. The lime water turns milky. Take some fresh lime water in a tumbler and blow into it. The lime water in this case also turns milky.

F.—Hygiene (16 pages), for boys only—

Air.—Pure air. Cause of its impurities. Overcrowding in houses and public institutions. Means of ventilation.

Water.—Its sources of supply. Different ways in which it is rendered impure. How to secure pure water. Filters. Alcoholic and other objectionable drinks.

Food.—Why do we eat. Over eating and under eating. Different kinds of food, including cereals pulses, tubers vegetables meat milk and its preparation, sugar eggs fruits preserved foods condiments.

Sunlight with special reference to its disinfecting action and necessity to health.

F (a).—Domestic Economy (16 pages), for girls—

How to keep rooms clean.—How they become unclean. Open lamps. Spitting in rooms and on walls improper. Sitting with naked back to the wall. Cobwebs. Children not to play with dirty things in rooms.

Furnishing rooms.—Furniture and utensils to be sufficient for the requirements of the household. Everything in its place. Use of lanterns. Advantages of glass or glazed or stone vessels over metallic articles from a sanitary point of view.

The kitchen.—To be kept quite clean. Adjoining parts also to be clean. Utensils cooking vessels dishes to be made clean before and after use. Admission of light and air into the kitchen.

Sunlight with special reference to its disinfecting action and necessity to health.

G.—Drawing (Hand- and Eye training).—8 pages, explaining the lessons in the drawing book and the elementary practical geometry which is to take the place of mensuration are to be included in the Primer.

Subjects.—(1) Freehand drawing with chalk on the blackboard or a prepared wall surface. (2) Elementary practical geometry.

NOTE 1.—The value of freehand drawing on the blackboard as a means of physical and hand and eye training is very great, and is hardly sufficiently appreciated in most scheme adopted in Europe. The facility with which it can be put into practice in any school building which has *pucka* walls makes it especially suitable for India. The advantages of it are that the students do not sit in a stooping position as in writing or drawing on paper. They stand upright with the head erect and the example opposite the eye. They walk backwards and forwards occasionally to observe their work at a distance. The hand does not rest on anything but moves freely on the wrist. This in itself gives the arm and wrist a strength and the hand a certainty of touch which cannot be acquired by any other kind of drawing.

The difficulty regarding the provision of blackboards or other drawing surface for a large number of students in all the upper primary schools in Bengal is easily surmounted. It is obvious that any upright surface properly prepared will answer as well as or better than a blackboard. Any building which has a *pucka* wall can have a surface prepared for drawing on at comparatively small expense. Portland cement would be the best material. It resists damp and saltpetre, which destroy ordinary plaster, and it makes a surface when properly prepared which will last for years. The colour of the surface is the next consideration. The natural colour of Portland cement is dirty and ugly but by mixing the cement with Indian red (a red ochre which can be obtained easily and cheaply) in the proportion of about 1 to 6 by weight a low toned and pleasant colour can be obtained which would not be trying to the eyes. So instead of blackboards a band of coloured Portland cement, about 3 feet wide running round the whole class room, at a height of about 3 feet from the ground, would make an excellent surface for drawing on, and would be a cheerful decorative feature in the class room. The black coloured surface is only necessary for a teacher's work in demonstrating figures and diagrams to students who sit at some distance off. For students drawing practice, it is neither necessary nor desirable. The next question is the drawing examples. These would be taken from the Indian School of Art drawing book alluded to before. They would be mounted on cardboard and hung from a strip of wood fastened to the wall at the upper edge of the drawing surface. The students would enlarge the examples to three or four times the size, so that the copying should not be merely mechanical.

The elementary course of practical geometry is also advocated as being of far greater educational value for students of this age than the learning of Euclid, which is almost sure to degenerate into a mere memory exercise The instruments required are not expensive They consist of a pair of pencil compasses, a six inch scale, and one or two small set squares

II —Manual Training, for boys only —Weaving (4 pages)—

Basket-weaving with palm leaves

String weaving (knotting netting looping plaiting weaving of single loop chains of one string, sling weaving)

II(a) —Needlework, for girls —Cross-stitch and making *kurta*

STANDARD IV (CORRESPONDING TO UPPER PRIMARY CLASS—ONE YEAR'S COURSE)

Age about 11 years

Class subjects.—Reading, Writing,* Arithmetic,* a Historical Geographical and Moral Reader, Science Primer, Drawing (Hand and Eye-training), Practical Geometry and Mensuration, Manual work for boys, Needlework for girls and School Drill †

The second-half of the Geographical, Historical and Moral Reader will be taken

Object lessons (8 pages)—

The action of water in nature and on the surface of the land

Water, when it falls in the form of rain, etc , partly runs over the surface of the ground into tanks, streams, and rivers it partly sinks into the ground to pass into wells and to reappear in the form of springs, etc , at a lower level, and it partly passes again into the air in the form of vapour

The action of heavy rain in cutting channels in the earth or soil and in carrying away particles of light material, such as straw and wood, and of soil or earth, or even stones, into the nearest stream, and then into a larger stream or river, should be carefully watched by the pupils

The pupils should study the nature of the nearest stream of water, determining in what part of the stream the current is most rapid, etc , and ascertaining how it carries away soil and even small stones, and how it cuts away its banks, etc

The turbid water produced by a rapid stream should be placed in a glass tumbler, and the deposit of silt or soil found at the bottom on standing should be observed Attention should be drawn to the fact that in this way new earth or soil has been formed in Bengal

The pupils should be required to decide simple questions, such as—Is the ground on which the school stands level or sloping ? Is the ground in the neighbourhood of the school, village or town level or sloping, the nature of the land being ascertained by watching the flow of water after rain (*i e*, by the drainage) ? It should be noted that the greater the slope of the land, the more rapid will be the flow of water The action of rain and running water in modifying the surface of the land must be fully explained

The differences in the erosion of land by running water when (*a*) the land surface is bare and (*b*) when the land is covered with grass or vegetation or by forests must be explained

Water can be made to pass through certain soils, sand, etc., easily, but it cannot pass through clay This can be experimentally shown

Wells and tanks are dependent for their supply of water on the level of the water in the soil, and the depth of this from the surface depends upon the nature of the soil, rain fall, etc Subsoil water is essential to the growth of plants.

* As at present.
† Drill book to be prepared

The Science Primer for the class to contain—

A.—Botany (8 pages).—Lessons on leaves and flowers.

Leaves.—Function of leaves.
Different parts of a leaf—the stalk and the blade.

Make a collection and examine the different kinds of simple and compound leaves.
Some leaves are sensitive to touch, *e.g.*, the sensitive plant. Observe the order in which leaves close when the end of a branch is touched.

Flowers.—The function of flowers is to produce seeds, which give rise to a new plant.

Study of the different parts of a flower.
Count the number of sepals, petals, stamens and pistils of different kinds of flowers.
Examine pollen grains, also the pistil and the enclosed ovules. Pollen must fall on the stigma for the maturing of the seed.
Pollination often done by insects. The brightly coloured petals serve to attract the insects.

B.—Natural History (10 pages).—

The cow and the horse compared—the cloven foot and the solid foot—other members of the cow family: the buffalo, the sheep, the goat. Stomach of a goat (a typical ruminant) examined and laid open—the four chambers—the construction of the stomach suited to the habits of the animals which chew the cud.

C.—Agriculture (16 pages) for country schools, for boys only, alternative with Physics and Chemistry.—

Food and fodder yielding trees.
Insect and fungus pests.
Oil cakes as cattle food and manure.

D.—Physics (10 pages) for town schools, for boys only.—
Heat—

Expansion of solid, liquids and gases.
Make a simple liquid thermometer with a bottle and a tube or quill and explain the principle of a thermometer.
Change of condition—
From solid to liquid.
liquid to gas.

Conduction—
Good conductors and bad conductors. Principle of warm clothing.

Convection—
Air currents and winds.

Radiation.

Boiling—
Elastic force of steam.

A simple reading lesson on the steam engine.

E.—Chemistry (6 pages) for town schools, for boys only.—
Chemistry of a Candle, second-half.—

When air is breathed out an invisible gas comes out which has the property of turning lime water milky. This gas is also formed when a candle burns. Combustion to be explained and compared to respiration. The part which oxygen plays. Blow air into a charcoal fire by means of a pair of bellows. The fire becomes more and more brisk. The common practice in this country of stirring a fire by blowing air into it by means of a bamboo pipe to be referred to.

F.—Hygiene (for boys only).—16 pages.

Slightly more advanced than the matters intended for Lower Primary course—*Cleanliness* to *Epidemics*.
Ordinary accidents.—Burns, snake bites, bites of rabid animals, drowning.

F (a) —*Domestic Economy (for girls)*—*16 pages*

Cooking—Good water to be used Every article to be properly prepared and well cleaned and washed before putting it in the cooking pot Cooking pots to be cleaned before use Cooked food to be kept covered Variety of dishes necessary

Meals—Time of meals All to eat at the same time if possible Hall for meals to be spacious and clean Dishes and cups Distribution of food Economy and no waste Simultaneous eating saves trouble and ensures economy Evils of eating at separate times Feeding of infants and little children Over feeding and under feeding

Bed room—Elevated bed necessary especially in damp rooms Over crowding bad Use of curtains Sunning and washing bedding and clothes Ventilation of rooms Soiling of bedding by little children

Ordinary accidents—Burns snake bites bites of rabid animals drowning

G—*Drawing (Hand and Eye training)*—Free hand drawing book Practical Geometry and Mensuration (15 pages)

H—*Manual training (for boys only)*—*2 pages*

Bamboo works—(*Dao* and knife) Making of sticks angling rods paring of split bamboo for fencing purposes cage making frame work for plants

H(a)—*Needlework (for girls)*—Cutting out a *kurta* sewing on buttons and strings, making buttonholes, marking

STANDARD V—CLASS ABOVE THE UPPER PRIMARY STANDARD OR LOWER CLASS OR MIDDLE SCHOOL—ONE YEAR'S COURSE

Age about 12 years

Class subjects—Reading, writing,* Arithmetic * a Literature book (about 150 pages), Geographical and Historical Reader, including some lessons in Physical Geography (together about 150 pages) † Science Reader, Drawing (Hand and Eye training), Practical Geometry and Mensuration alternative with Euclid first 26 propositions of book I, Manual work, Needlework, for girls and School Drill ‡

More advanced Readers, to be prepared for the Middle School Standard in History and Geography, of which one half would be read in this year's course

The Science Reader for this class to contain—

A—*Botany (12 pages)*—

Life history of a plant

(1) How plants obtain their food—

A more detailed study of the functions of the root and leaf Observe the arrangement of leaves to secure the largest area exposed to light Transpiration

(2) How plants store up food for future use

( ) in the stem

( ) in the root

( ) in the seed for future use of the seedling

(3) How plants protect themselves by means of thorns and other devices

B—*Natural History (12 pages)*—Teeth of certain typical animals

Arrangement of the teeth in the upper and lower jaw respectively of the cat—the prominent *canines*—a characteristic of the carnivora—the function of the incisor—the canine and the molar teeth explained

Dentition of a ruminant and rodent compared

Some typical members of the rodent family, the rat, and the squirrel

C—*Agriculture (16 pages) for country schools for boys only (alternative with Physics and Chemistry)*—

Every Middle School choosing Agriculture as an alternative subject in place of Physics and Chemistry should provide itself with land sufficient for a small garden where each boy can grow a few square yards of some crop Each boy must also make a collection of at least five articles of agricultural interest for the school museum under the teacher's guidance In course of time a complete local

---

* As at present

† Such as Lee Warner's Citizen of India

‡ Drill book to be prepared.

collection of soils crops manures weeds oils fibres and other agricultural produce insect and fungus pests insecticides and fungicides etc may be made

Fertility of soil Lessons on *arahar* and *dhaincha* How saltpetre is made Sugarcane and sugar

D—Physics (10 pages) for town schools, for boys only Light—

Light travels in a straight line Shadows

Reflection of light—plane mirror Refraction of light Refraction through a prism

A double convex lens—Formation of images by a double convex lens Use of a lens as a simple microscope

E—Chemistry (6 pages) for town schools, for boys only—Metals

General properties of the metals—lustre malleability the alloys and their mode of formation liability to rust

The well known metals—Gold, silver copper tin lead zinc iron and the alloys brass and *kansa* the different uses to which they are put

F—Hygiene (for boys only)—20 pages

A short chapter defining terms used and giving some idea of the human body and the functions of nutrition and respiration

Food—Components of perfect food Articles of good food advantages of variety in food Food according to age and occupation

Drink—Water and its sources of supply—How to secure good water Rivers tanks and wells how to be protected from pollution Filters storage of rain water Alcoholic and other drinks

Air—Carbonic acid gas Other substances that pollute the air Air inside and outside of houses Air in towns swamps and in dry and high places Slow poisoning by impure air Natural purification of air how carried on Ventilation in houses

Construction of dwelling houses—Admission of air and sun light How to keep the premises clean and dry

F(a)—Domestic economy (for girls)—20 pages

Feeding bathing and cleanliness pure air ventilation of houses

Management of common ailments Colds coughs, fevers skin diseases indigestion Sick diet

Burns and scalds wounds and bruises

G—Free hand Drawing (Hand and Eye training)—

G(*a*) Practical plane geometry including simple practical mensuration of lines and surfaces*(1) pages)

G(*b*) Euclid alternative with G(*a*) First 26 propositions of 1st Book ‡

H—Manual Training (for boys)—Bamboo work—3 pages

Bamboo work—As in the upper Primary course

H(a)—Needlework (for girls)—Gathering and sewing on a band, darning and herring boning

STANDARD VI—MIDDLE STANDARD—ONE YEAR'S COURSE

Age about 13 years

Class subjects—Reading Writing,* Arithmetic,* a Literature book, Geographical and Historical Reader, including some lessons in Physical Geography, Science Reader, Drawing (Hand and Eye training), Practical Geometry and Mensuration alternative with Euclid, Book I, Manual work for boys, Needlework for girls and School Drill †

The second halves of the Geographical and Historical Readers to be prepared

Science Reader to contain—

A—Botany (12 pages)—Life history of a plant

How the seeds mature—

(*a*) Pollination by insects The object of bright colouring of the flower leaves Insects are also attracted by scent Observe how small and inconspicuous flowers club together to become conspicuous *e g* compositæ
(*b*) Pollination by the wind
(*c*) Water as carrier of pollen grain

Dispersion of seeds and the object of dispersion—

(*a*) Winged seeds
(*b*) Seeds which are scattered by mechanical means
(*c*) Seeds which are dispersed through the agency of birds and other animals
(*d*) Dispersion of seed by currents of water

---

* As at present.
† Drill book to be prepared
‡ In a separate book.

B —Natural History (12 pages) —

Development and metamorphosis of an insect, *e g* a butterfly or a silkworm—the pupa and the chrysalis stage etc

Some typical members of the monkey family The common monkey (*bandar*)—the *hunuman*

The snakes their habits—mode of progression, how the snake bites—the curved grooved poison fang

C —Agriculture (16 pages), for boys in country schools (alternative with Physics and Chemistry)—

Rotation of crops
Food and keep of cattle
Use of bones as manure

D —Physics (10 pages) for town schools, for boys only — Electricity and Magnetism

Two kinds of electrification Action of electrified bodies on one another A pith ball electroscope

Directive action of earth on a magnet A simple compass needle Mutual action of similar and opposite poles

Production of electric currents Action of a current on a suspended magnetic needle

E —Chemistry (6 pages for town schools, for boys only — Elements and compounds, carbon and sulphur

Carbon graphite and diamond the physical properties of each well illustrated and the economical uses to which they are applied What happens when a piece of charcoal is burnt (*Cf* Lesson on the Chemistry of a Candle)

Some ideas of an *element* and a *compound* incidentally conveyed A blade of a knife previously well cleaned is dipped into a solution of a sulphate of copper the deposit of metallic copper shown The copper a component of sulphate of copper in a compound the properties of the component elements are entirely changed

A lesson on Sulphur its physical properties colour brittleness bad conducting power of heat fusibility insolubility in water economic uses, etc

F—Hygiene for boys only (20 pages)—

Village conservancy —Disposal of filth and sewage How villages are rendered unhealthy

Cleanliness —Personal and domestic Bathing

Dress —Dress materials Dress according to weather Washing clothes

Exercise and rest —Different kinds of exercise Sleep and its hours Absolute rest in certain cases

Epidemics —Precautions to be taken

Accidents —Burns snake bites, bites of rabid animals drowning bleeding

F(a) —Domestic Economy for girls (20 pages)—

Management of infectious diseases including cholera small pox chicken pox measles

Infection —Disinfection of premises bedding clothes

The sick room—Duties of the sick nurse food and drinks for the sick

Cooking of articles of sick diet —Necessity of absolute cleanliness in preparing food including pure water aerated waters lime water

G —Drawing (Hand and Eye training)—Free hand drawing

G(*a*) —Practical plane Geometry including simple practical Mensuration of lines and surfaces—(15 pages)

G(*b*) —Euclid alternative with G(*a*) whole of 1st Book *

H —Manual Training, for boys only (5 pages) —Bamboo work, woodwork

Bamboo work —As in the Upper Primary course

Woodwork —Simple slojd work with the slojd knife only

H(a) —Needlework for girls —Cutting out and making a *piran*, feather-stitching and ornamental marking

* Euclid will be contained in a separate book.

APPENDIX B

CONDENSED TABULAR SYLLABUS

District	Age 5	Age 6	Age	Age 8	Age 9	Age 10	Age 11	Age 1	Age 13
	First year of infant class.	Second year of infant class	Third year of infant Class B (I) of Lower Primary School	Standard I—A Class Lower Primary School	Standard II=Lower Primary Class	Standard III	Standard IV—Upper Primary Class	Standard V	Standard VI=Middle Vernacular Class.
1	2	3	4	5	6	7	8	9	10

* The Junior Teacher's Manual (a book of about 200 pages) will give directions how the subjects marked (*) are to be taught It should be in the hands of teachers of Lower Primary Standards

† The Drill Book (about 75 pages) should also be in the hands of the teacher only

‡ The Senior Teacher's Manual (about 250 pages) will give directions how the subjects marked (‡) are to be taught It will also give directions regarding school management (including keeping of registers and accounts) and discipline It should be in the hands of teachers of the Upper Primary and Middle Vernacular Standards

APPENDIX D

THE TEACHERS MANUAL FOR THE LOWER PRIMARY STANDARD (200 PAGES)

1 *Introduction* —A short and simple statement of the principles of the Kindergarten method of training young children (10 pages)
2 The Kindergarten occupations and action songs (8 pages)
3 The requirements of the syllabus for the Infant and Lower Primary Standards of Vernacular Education (10 pages)
4 The school room and arrangement of children (3 pages)
5 Methods of giving lessons on particular subjects, full notes of lessons containing detailed instructions as to how to give lessons on form, colour writing, reading, arithmetic, etc, so that the pupils might thoroughly learn the subjects taught, and that at the same time their senses might be trained, and their power of expression and all the faculties—physical, mental, and moral—be duly developed (162 pages)
6 Qualifications and duties of a good teacher, and his conduct towards his pupils, punctuality and discipline, corporal punishment (6 pages)

THE TEACHERS MANUAL FOR THE UPPER PRIMARY AND MIDDLE VERNACULAR STANDARDS (250 PAGES)

1 *Introduction* —The principles of Froebel's method, the principles underlying school education, the English Public School system, the Hindu method (20 pages)
2 The requirements of the syllabus for the Upper Primary and Middle Vernacular standards (10 pages)
3 *Class-teaching* —Instruction and education, collective instruction, attention to individuals, analysis and synthesis, oral teaching and questioning, the Socratic method, answering, proceeding from the known to the unknown, from the concrete to the abstract, the verbal material, and pictorial illustration, the use to be made of analogy and contrast, the use of the black board, learning by heart, repetition, home exercises, examining (30 pages)
4 Methods of teaching particular subjects, together with notes of lessons selected from text books prescribed in science, literature, history, geography, etc (155 pages)
5 Moral training (5 pages)
6 *Organisation* —The organisation of a good school, time tables, the arrangements into sections and classes, and of the standard of classification, the teaching staff, the apparatus and furniture, the register and account books, the drill and recreation, the sanitation of the school room and school house, etc (10 pages)
7 The qualities necessary in a pupil, necessity of punctuality, discipline, rewards and punishment, drill as an aid to discipline (15 pages)
8 Qualifications and duties of a good teacher, and his conduct towards his pupils (5 pages)

APPENDIX E.

Statement showing the number of hours to be spent in a week on each subject in a Lower Primary School

FINAL REPORT OF THE COMMISSIONERS APPOINTED TO CONSIDER MANUAL AND PRACTICAL INSTRUCTION IN PRIMARY SCHOOLS UNDER THE BOARD OF NATIONAL EDUCATION IN IRELAND

PART I

General conclusions, and the grounds on which they are based

I — *Kindergarten* —We are of opinion that the general principles and methods of the system known by the name of Kindergarten, which have been already introduced into some of the schools under the National Education Board, should be extended, as far as possible, to all schools attended by infant children

II —*Educational handwork* —We think that Kindergarten methods and principles should be continued in Classes I, II, and III of ordinary schools in the form of Paper-folding, Cardboard-work, Wire-work, Brick laying, clay modelling and such like exercises. These exercises we include under the general term of *Hand and Eye Training* and we look upon them as of great importance for the purpose of carrying on the manual training of the children, from the Kindergarten stage to the higher grades of Manual Instruction Further, we consider that some form of more advanced Manual instruction should be introduced, as far as possible, in the higher classes of schools for boys, and we recommend as most suitable for this purpose instruction in the principles and practice of *Woodwork*, treated educationally The object to be aimed at is not to make the boys carpenters, but to train them in habits of accurate observation, careful measurement, and exact workmanship Such habits we regard as of great value to all boys, whatever may be their subsequent career in life

III — *Drawing* —We recommend that Drawing should be made compulsory, as far as possible, in all National Schools The first elements of it find a place in the Kindergarten system, and it should be continued, we think, to the end of the school career In the classes above the Kindergarten, it should be associated with Hand- and Eye Training, with Woodwork, and to some extent also with Elementary Science, as soon as these subjects are introduced

IV —*Elementary science* —We are of opinion that a simple course of Elementary Science should form a part of ordinary education in National Schools This course should be so framed as to bring home to the mind of the children an intelligent knowledge of the common facts of nature, and the rudimentary principles of science In the lower classes it should consist in great part of object lessons, and in the higher classes it should be illustrated by simple experiments The pupils should be encouraged and assisted, as far as may be found practicable, to take part in the experiments The programme for this course while following everywhere the same general lines, may with advantage be varied in its details, according to the circumstances of the locality and the character and condition of the children

V —*Agriculture* — We do not think that Agriculture as an art, that is to say, practical farming, is a subject that properly belongs to elementary education At present the study of what is called the Theory of Agriculture is compulsory for boys in all rural schools, and is highly encouraged by fees But our inquiry has shown that this study consists for the most part in committing a text book to memory , and we have come to the conclusion that it has little educational or practical value We recommend instead that the course of Elementary Science to be taught in rural schools should be so framed as to illustrate the more simple scientific principles that underlie the art and industry of Agriculture We also recommend the maintenance and extension of School Gardens as a means by which these scientific principles may be illustrated and made interesting to the pupils On the other hand, we do not consider that the maintenance of School Farms, the object of which is to teach the art of Agriculture, properly belongs to the functions of a Board of primary education As regards the Model Farm at Glasnevin and the Munster Dairy School, we think that they could be made more useful for the purposes of agricultural education if placed in charge of an Agricultural Department, whenever such a Department is established in Ireland

VI —*Cookery, Laundry work, and Domestic Science* —We think it very desirable that Cookery, Laundry work and Domestic Science should be taught, as far as may be found practicable, in girls' schools We cannot advise that these subjects should at present be made compulsory, but we do recommened that aid should be freely given to provide the necessary buildings and equipment for teaching them, and that managers and teachers should be encouraged to take them up by a liberal system of grants

VII —*Needlework* —Needlework should continue to form, as at present, an important element in all schools for girls The first elements of it are taught in the Kindergarten system It should be continued in Classes I, II, and III as a part of Hand- and Eye Training, and in the higher classes advanced Needlework will naturaly occupy the time devoted to Woodwork in schools for boys

VIII.—*Singing* — We recommend that Singing should be brought within the reach as far as possible, of all the children attending National Schools in Ireland. It has a cultivating and refining influence, and furnishes a source of permanent enjoyment. In England and Scotland the number of children who are taught Singing in schools inspected by the State is about 99 per cent of the number in average attendance, and we see no

reason why an equally good result should not be attained in Ireland, if equal encouragement be given From the experience of English and Scotch schools, it seems clear the Tonic Sol fa method of teaching is the most simple and effective This system has been already adopted in some Irish schools, and we strongly recommend that it be extended as rapidly and widely as may be found possible.

IX.—*Drill and Physical Exercises* —Various kinds of Drill and Physical Exercises are now a recognised part of primary education in England, in Scotland, and on the Continent of Europe, and we think they should be introduced into the primary schools of Ireland with the least possible delay We are satisfied, from what we have seen and heard on this subject, that such exercises contribute largely to the health, the spirits, and the general well-being of the children They are no additional burden on school life, but rather a pleasant form of recreation, and the children return from them to their studies with renewed energy

Mode of introduction

It will be for the Commissioners of National Education to consider and determine in what manner these various changes can best be introduced into their system But we have ventured to make some general suggestions on this head, which it may be well to set forth here in a summary form

We think that the changes recommended ought to be introduced, not all at once, but gradually and tentatively They should be tried first in the larger centres and afterwards extended to more remote districts It would be necessary, at the outset, to engage the services of experts from outside the present staff of the national Education Board, whose duty it would be to organise the classes and to aid the teachers with their counsel and instruction But we have no doubt that this work, after a little time, could be taken up by the ordinary staff of the Board Again it is obviously important that all future teachers should be trained in the new subjects, and the programme of the Training Colleges must accordingly be framed to this end with as little delay as possible

We have carefully considered the question by what means time may be found for the several exercises in manual and practical training which we have recommended, and we have pointed out certain modifications in the present programme of studies which may be adopted for that purpose, and which, we believe, will not interfere unfavourably with the course of instruction hitherto given in the National Schools

Lastly, we are strongly of opinion that the system of Results Fees, depending on the individual examination of pupils at present in force in the National Schools, ought not to be applied to these subjects of Manual and Practical Instruction While it should be always open to the Inspector to examine individual pupils, we think that the grants awarded to the teacher in these subjects should largely depend on the general evidence of his own zeal and industry, on the efficiency of his method of teaching, and on his power to arrest and hold the attention of his class

Reasons.

The considerations by which we have been led to the general conclusions above set out will be fully discussed in the second part of this Report, under the several heads of Manual and Practical Instruction But we think it will be for your Excellency's convenience that the general summary of our conclusions should be here followed by a general summary of the grounds on which they are based—

Reasons m ly educatio

I —First, then, there are reasons founded on educational principles The present system, which consists largely in the study of books is one-sided in its character, and it leaves some of the most useful faculties of the mind absolutely untrained We think it important that children should be taught not merely to take in knowledge from books, but to observe with intelligence the material world around them, that they should be trained in habits of correct reasoning on the facts observed, and that they should, even at school, acquire some skill in the use of hand and eye to execute the conceptions of the brain Such a training we regard as valuable to all, but especially valuable to those whose lives are to be mainly devoted to industrial arts and occupations The great bulk of the pupils attending primary schools under the National Board will have to earn their bread by the work of their hands it is therefore important that they should be trained from the beginning to use their hands with dexterity and intelligence [1]

Reason fr experience

II —Next, we have the practical experience of those schools in England, Scotland, and on the continent of Europe in which such a system as we recommend has been already introduced and tested The evidence we have received on this point is absolutely unanimous and, as we think entirely conclusive We have been told over and over again that the introduction of manual and practical training has contributed greatly to stimulate the intelligence of the pupils, to increase their interest in school work, and to make school life generally brighter and more pleasant As a consequence the school attendance is improved, the children remain at school to a more advanced age, and much time is gained for the purpose of education

---

1 The general educational value of Manual Training in Primary Schools especially for those who have to devote their lives to manual work has been insisted on by a great number of witnesses The following may be taken as examples —*Mr A H Bevis* Director of Manual Training to the Birmingham School Board vol ii pp 3134—7 *Mr George H Robinson* Head Master Board School Brimingham vol ii, pp 3584—90 *Sir Philip Magnus* City and Guilds of London Institute vol ii pp. 4167 4220—1 *Mr T G Rooper* H M Inspector of Schools in England vol ii pp 5136—41 *Mr Solomon Barter*, Organiser of Manual Instruction to the London School Board vol ii pp 4928—34 *Mr Edmund Morris* Instructor in Woodwork to the Barrow in Furness School Board vol. ii pp 10448—8A *Mr Arnold Graves* Honorary Secretary to the Technical Education Association for Ireland vol iii p 10692 *Mr S M C Murray* Head Master Sciennes Public School, Edinburgh, vol. iv, pp 22199—204, *Mr J G Kerr*, Head Master, Allan Glen s School Glasgow, vol. iv, pp. 23533—40

We inquired particularly whether the literary side of school studies—reading, writing arithmetic, grammar, and geography—had suffered any loss by the change, and the answer was uniform that no such loss had been observed. In some cases we were assured that the literary studies had been positively improved by the introduction of manual training. This result was accounted for partly by the increased intelligence of the children partly by the constant change and variety of their occupations,—many of the most useful exercises being only a kind of organised play, and partly by their increased interest in their work.

We regard it also as a very significant testimony to the value of manual training that wherever it has been once introduced, it has with hardly an exception, been continued and extended. There has been practically no disposition to go back to the old system, which made primary education almost exclusively literary in its character, and after an experience extending over some years, there is a general consensus of managers of schools inspectors, and parents that the value of primary education has been greatly enhanced by the change [1]

III.—Lastly, there is a consideration of a practical character which seems to us deserving of no little weight. A strong desire exists throughout this country, and it is growing stronger every day, for the introduction of a general system of Technical Education. It is thought that a good system of Technical Education would contribute largely towards the development of arts and industries in Ireland and in this opinion we entirely concur. But the present system of primary education is so one sided in its character that it leaves the pupils quite unprepared for Technical Education. The clever boys trained in the National Schools, if they are disposed to seek for a higher education, may pass with advantage into Intermediate Schools of the kind now general in Ireland, but they are not fit to enter a Technical School, even if they had such a school at their doors. Now it seems to us that the changes we recommend would go far to remedy this defect. The system of National Education, modified as we propose, would give an all round training to the faculties of the children, and would thus lay a solid foundation for any system of higher education—literary, scientific, or technical—which might afterwards be found suitable to their talents and their circumstances [2]

[1] The testimony by which the statements made in the three paragraphs of the above section are supported permeates the whole body of the evidence we have taken in England and Scotland, and it can not be adequately represented by isolated citations. Nevertheless we think it may be well to subjoin here a few references to particular passages of the evidence which may be taken as typical examples of what we have everywhere heard.

(1) INCREASED INTELLIGENCE OF THE PUPILS. Mr George H Robinson Head Master Board School Birmingham vol ii pp 3 87 3197 Hon E Lyulph Stanley Member of the London School Board vol ii pp 41 2 3 Mr J R Diggle formerly Chairman of the London School Board vol ii p 4 92 Rev C D Du Port H M Chief Inspector of Schools in England vol 2 ii pp 5118 9 Mr C A Buckmaster Senior Inspector of Schools under the Science and Art Department vol ii p 5589 Mr Alfred Percival Graves H M Inspector of Schools in England vol ii pp [illegible] 4 Sir Joshua Fitch formerly H M Chief Inspector of Training Colleges in England vol ii p [illegible] Mr Edward M Hance Clerk to the Liverpool School Board vol ii p [illegible] Mr James Wallace Teacher Harlaw Public School Canonbie vol iv pp 21557–8 Mr Robert Galter H M Inspector of Schools in Scotland vol iv pp 23599 904

(2) GREATER INTEREST IN SCHOOL WORK IMPROVED ATTENDANCE AND LONGER TIME AT SCHOOL. Mr George H Robinson, Head Master Board School Birmingham vol ii 4[illegible]3 Sir Philip Magnus City and Guilds of London Institute vol ii p 4170 Hon E Lyulph Stanley Member of the London School Board vol ii pp 4401 5 Mr J R Diggle formerly Chairman of the London School Board vol ii pp 4557 8[illegible] Mr William Oulton Vice Chairman of the Liverpool School Board vol ii pp 6[illegible]2–4 7000–5 Mr Edward M Hance Clerk to the Liverpool School Board vol ii pp 7196 8 7[illegible]38 [illegible]30[illegible]–3 Mr A T Bott Senior Inspector of Schools to the Liverpool School Board vol ii p 7693 Dr J H Gladstone F R S formerly Member of the London School Board, vol ii p 3923

(3) LITERARY STUDIES HAVE NOT SUFFERED.—Mr John Taylor Head Master Board School Birmingham vol ii, pp 369 –[illegible]00 Sir Philip Magnus City and Guilds of London Institute vol ii p 4172 Hon E Lyulph Stanley Member of the London School Board vol ii p 1471 Mr William Oulton Vice Chairman of the Liverpool School Board vol ii pp 70[illegible]–[illegible]8 Mr Edward M Hance Clerk to the Liverpool School Board vol ii pp 7199 [illegible] Mr J C Pearson Director of Manual Instruction Liverpool School Board vol ii pp 80[illegible]9–59 Mr C[illegible] G Macrae Chairman of the Edinburgh School Board vol iv pp 21882–[illegible] 21901–8 Mr A E Scougal H M Inspector of Schools in Scotland vol iv pp 2261 [illegible] Mr G W Alexander Clerk to the Glasgow School Board vol iv pp [illegible]–32

(4) MANUAL TRAINING ONCE INTRODUCED WAS FOUND USEFUL TOOK ROOT AND DEVELOPED AND BECAME POPULAR.—Mr A H Bevis Director of Manual Training to Birmingham School Board vol ii p 31 9 Mr John Taylor Head Master Board School Birmingham vol ii pp 3693–4 3725–38 Sir Philip Magnus City and Guilds of London Institute, vol ii p 4167 Hon E Lyulph Stanley Member of the London School Board vol ii p 4483 Mr T G Rooper H M Inspector of Schools in England vol ii pp 5031 5138 45 Rev C D Du Port H M Chief Inspector of Schools in England vol ii pp 5108—16 Mr John Cook Hon Secretary Sloyd Association for Great Britain and Ireland vol ii, pp 5519—27 Mrs Homan Member of the London School Board vol ii pp 6357—61 Mr William Oulton Vice Chairman of the Liverpool School Board vol ii pp 6903 6949 58 7019 Mr A T Bott Senior Inspector of Schools to the Liverpool School Board vol ii pp 7593—60 Mr William Nelson Superintendent of Manual Instruction to the Manchester School Board vol ii p 8599 Mr A E Scougal H M Inspector of Schools in Scotland vol iv pp 225 6—83 Sir James Low, formerly Lord Provost of Dundee vol iv pp 23 43—7

(5) GENERAL EVIDENCE INCLUDING TWO OR MORE OF THE ABOVE HEADS.—Sir Joshua Fitch Formerly H M Chief Inspector of Training Colleges in England vol ii pp 6133—39 6 43—46 Mr S[illegible]mon Barter Organizer of Manual Instruction to the London School Board vol ii pp 4532–3[illegible] Mr Arthur Harbridge Superintendent of Schools to Barrow-in-Furness School Board vol ii pp 10 8[illegible] 9[illegible] Mr Colin G Macrae Chairman of the Edinburgh School Board vol iv pp. 21825—35 21739—49 21753—70 Mr S M C Murray Head Master Sciennes Public School Edinburgh vol iv pp 22142—8 22205—11 22264—79 Sir John Cuthbertson Chairman of the Glasgow School Board vol iv pp 22993 23109—14 Mr J G Kerr Head Master Allan Glen School Glasgow vol iv pp 2[illegible]512—23 Mr G J Torbat Head Master, Continuation School Dundee vol iv pp 23963—70

[2] Many witnesses in the course of their evidence have incidentally pointed out the necessity of Manual and Practical Instruction in primary schools as a basis for Technical Education. For example—Professor H E Armstrong City and Guilds of London Institute vol ii pp 795—6 Mr J R Diggle formerly Chairman of the London School Board, vol ii pp 4650—61 Mr Solomon Bast Organizer of Manual Instruction to the London School Board vol ii p 4838 Mr William Oulton, Vice Chairman of the Liverpool School Board vol ii p 6331 Rev Brother Thomas Principal, De La Salle Training College vol v p 1427 Rev J Lally Honorary Secretary Galway Technical School vol iv pp 17039–42 Mr James Perry County Surveyor of Galway vol iv pp 17281—301 Mr Colin G Macrae Chairman of the Edinburgh School Board vol iv pp 21843—4 Sir John Cuthbertson Chairman of the Glasgow School Board vol iv pp 23057—9 Sir James Low formerly Lord Provost of Dundee vol iv pp 23711—14 Professor Hartley F R S College of Science, Dublin, vol iv pp 26248 51 26323—4

By order of the Lieutenant Governor of Bengal,

F. A. SLACKE,

Offg. Secy. to the Govt of Bengal

No 3126, dated Darjeeling the 8th May 1900

From—A PEDLER Esq, F R S, Director of Public Instruction, Bengal,

To—The Secretary to the Government of Bengal, General Department

WITH reference to the reviews and representations that have been made in connection with the revised scheme for vernacular education which was submitted by the Committee appointed by Government in Agricultural Department No 2679, dated the 12th August 1898, to the address of the Officiating Director of Public Instruction, I have the honour to state, for the information of Government, that the former Committee was reconstituted to consider the numerous criticisms which had been collected and received both by Government and by the office of the Director of Public Instruction

2 I have to state that there have been altogether fifteen meetings held since the 3rd of January 1900 These meetings were held weekly, each usually lasting about between two and three hours

3 Practically each of the members constituting the Committee was present at all the meetings

4 I have, therefore, to point out that the second report, which is herewith submitted, has involved a large amount of labour and a good deal of care and thought, and that this has been the cause of the delay in the submission of this second report

---

FURTHER REPORT OF THE COMMITTEE APPOINTED TO REVISE THE SUBJECTS AND TEXT BOOKS USED IN VERNACULAR EDUCATION IN BENGAL

WITH reference to the reviews and representations that have been made in connection with the scheme submitted by the Committee with their report, dated the 6th April 1899, which was published in the *Calcutta Gazette* of the 5th July 1899 the Committee have the honour to submit a further report giving the results of their deliberations

Representations from public bodies

2 The representations from the public bodies that were considered by the Committee were those from the British Indian Association and the Bangiya Sahitya Parishad, one from the Chairman of the District Board of the 24 Parganas, and one from the Burdwan Teachers' Committee

Newspaper criticisms

3 The newspaper criticisms that were considered appeared in the following journals —

(1) The *Bengalee* of the 16th and 23rd September 1899

(2) *Amritabazar Patrika* of the 14th and 25th August and the 7th September 1899

(3) The *Indian Nation* of 18th and 25th September and of the 2nd and 9th October 1899

(4) The *Indian Daily News* of the 26th September 1899

(5) The *Statesman* of the 29th September and of 1st October 1899

(6) The *Reis and Raiyat* of the 30th September 1899

(7) The *Hindu Patriot* of the 6th 7th and 12th September 1899

(8) The *Indian Mirror* of 7th July 20th August 7th 16h 26th September and 26th October 1899

(9) *Nabyabhárat* for Kárti

(10) *Dacca Prokas*	(several articles)
(11) *Dainik Chandrika*	(ditto)
(12) *Sanjibani*	(ditto)
(13) *Sikshak Surhid*	(ditto)
(14) *Saraswat Patra*	(ditto)
(15) *Dacca Gazette*	(ditto)
(16) *Hitabadi*	(ditto)
(17) *Education Gazette*	(ditto)
(18) *Hataishi*	(ditto)
(19) *Bangabasi*	(ditto)
(20) *Charu Mihir*	(ditto)
(21) *Som Prakash.*	
(22) *Samay*	(ditto)
(23) *Medini Bandhab*	
(24) *Bankura Darpan.*	

Other popular representations

4 Of other popular representations, the most important was one, dated the 3rd September 1899, a lengthy document, purporting to come from the "inhabitants of Bengal," and another, dated the 29th September, signed by Babu Narendra Nath Sen as President of a public meeting held in Calcutta.

5 The Committee likewise considered objections and suggestions from certain individuals, both European and native, having experience in educational matters, whose names are too numerous to mention in this report

Letters from Educational officers, &c.

6 They also considered a letter, dated the 15th August 1899, from Messrs. Longmans, Green and Company, Publishers, offering certain suggestions regarding the publication of text-books

From a publishing firm

7 The Committee also gave very careful consideration to the recent changes introduced in the Central Provinces' curriculum for vernacular schools by which the Kindergarten system has been abolished in all the rural primary schools

Changes in the Central Provinces

8 It should be mentioned at the outset that the criticisms, on the whole, are not by any means unfavourable In some instances the journals criticising the scheme subsequently repudiated their own criticisms and supported the proposals of the Committee, and in others an unfavourable review winds up with recommendations substantially corresponding with the scheme originally submitted by the Committee Some of the unfavourable criticisms were, however, sufficiently convincing to lead the Committee to make certain changes in their original scheme Generally speaking the unfavourable reviews are based on a misconception of the proposals It was distinctly laid down, for instance, in the syllabus originally submitted, that Arithmetic was to be taught as at present, and that both European and native systems were to be included Much of the criticism is, however, based on the supposition that the Committee had recommended the abolition of *zamindari* and *mahajani* accounts.

General nature of the criticisms

9 Another mistaken conception on which some of the criticisms are based is that the proposed scheme is meant to give scientific and technical education of a character suited to the agricultural classes only All that is intended by the Committee is to give into the hands of pupils lesson-books on subjects with which they have to do every day of their lives instead of on matters altogether foreign to their experience, and thus to help in cultivating their faculties of observation and making their education more real than it is at present Under the proposed scheme there will be reading books in prose and poetry, as under the existing system, and it is not intended that the lessons given in the Science Primers or Readers should be either scientific or technical in character, to explain which teachers with scientific or technical training will be needed Agricultural lessons again are not prescribed for town-schools, nor Physics and Chemistry lessons for country schools so that teachers should have no difficulty in giving object lessons on the few subjects under each scientific head taught either inside or outside the school house The Committee consider that the books prescribed should aim, while teaching language, at teaching facts instead of fables, and facts of the kind in which children take the most interest

Proposed scheme not technical

10 A third objection is based on the contention that the proposed scheme aims at teaching too many subjects Appendices A and B to this report show that the subjects intended to be taught are Reading, Writing, and Arithmetic, as before together with Drill and Drawing Appendix A shows the actual differences between the proposed and the existing courses, and it will be seen that the burden on students has been sensibly reduced, chiefly as regards the quantity of book work

Not elaborate and not altogether new

11 This reduction of the quantity of book work has led very many of the critics to assume that the scheme of the Committee will discourage the growth of vernacular literature, they insist again and again on the importance of literature on the value of it in helping the development of the emotions, and the neglect of it in the proposed scheme Middle vernacular and upper primary scholars will continue to have a literature book, so that opponents of the scheme can only complain of the absence of literature primers for the lower primary students The so-called literature-books now studied by lower primary scholars do not consist of poetry, drama, essay or any other kind of composition which strictly speaking can be classed as literature What they teach is language, a few homely words arranged in easy constructions, and, if they teach anything else, they teach facts This purpose will be served equally well by the proposed Science Readers and the facts taught will be of a more useful kind It has been said that the neglect of literature in the scheme will affect the prospects of Bengali literature But a literature cannot be called into existence by the prospect of books being selected for the primary examinations, and Bengali literary works of the highest merit cannot be prescribed as text books for the primary or even for the middle examinations, simply because the boys cannot understand them

Vernacular literature not in danger

The Committee maintain that no sound scheme of vernacular education in its elementary stages can be framed with the main view of developing literary work, but they believe that a scheme which tends to develop the intellectual faculties of pupils will indirectly lead to the growth of a healthy literature The interests of the students and of literary progress do not depend on the quantity of text books produced for school use There is no doubt, the the scheme of the Committee if approved by Government, will, by reducing the quantity and bulk of text-books, affect adversely a large number of persons now interested in their production, but the Committee believe that this change will be entirely to the advantage of students and their guardians. It cannot be an objection from the pupils', or parents', or teachers'

point of view, that the books are to be made cheaper, smaller and fewer in number, but many of the critics actually condemn the scheme on these particular grounds

Suggestions adopted.

12 The special points in which the Committee have seen reason for making changes which they believe to be improvements are—

(1) A Literature Book has been prescribed for the upper primary course

(2) The course in Grammar for the upper primary and middle vernacular standards has been extended

(3) The amount of History and Geography to be taught in the upper primary and middle vernacular standards has been increased, and separate books for Geography and History recommended

(4) Bamboo-work and basket weaving have been omitted from the Manual Training course, and Manual Training has been made optional To encourage the teaching of this subject, the grants to schools may be so regulated through District Boards that they may be induced to give Manual Training (which is evidently an unpopular subject at present) a fair recognition though marks obtained in it need not count towards scholarships Owing to difficulties connected with the teaching of needlework, girls reading in mixed schools along with boys have been given the option of taking up manual training instead

(5) The extension of the Writing course up to the last (i e, the sixth) standard in the revised scheme has enabled the Committee to prescribe the writing of more vernacular documents, etc, than was originally contemplated

Introduction of English into middle schools.

13 An objection was raised that the scheme, as originally submitted by the Committee, might result in considerable damage being done to vernacular education by accentuating the already existing tendency on the part of parents to send their children to high schools or other English schools at the very commencement of their school life It was pointed out that the Muktearship examination and the entrance to the Medical and Survey schools being now barred against boys educated on the vernacular basis only, middle vernacular and primary schools were fast losing ground

The Committee consider that the following steps should be taken to check this tendency and to give that prominence to vernacular education that it ought to obtain in the early training of the native youth of this country —

First —The lower classes of high schools should be assimilated to the corresponding classes of middle schools, thus giving the former a vernacular basis English should be taught in the lower classes of all secondary schools as a second language, and not used as a medium of instruction as at present The books used in the lower classes of the middle and high schools would then in all cases be in the vernacular except those used for the teaching of English

Second —The Middle Scholarship examination should be thrown open to high schools and other English schools to which a proportion of the existing middle vernacular scholarships might be allotted or for which new scholarships might be founded

Third —English should be introduced as an optional subject into middle schools from standard IV upwards

Fourth —Marks in English should count towards scholarships

Elasticity

14 The Committee recommend that a certain elasticity should be allowed at first in the manner of teaching the proposed course The syllabus has, no doubt, somewhat rigidly fixed the subjects in great detail, but, if any schools did not want to compete for scholarships they might be allowed to teach as much of the proposed subjects as they chose and as well as they could Pupils appearing for the scholarship examinations must take up all the compulsory subjects Inspecting officers should be instructed departmentally to allow a certain amount of latitude in the teaching of the different standards by the pandits and *gurus* and in the examinations for rewards

Amendments that could not be accepted

15 In the following points, the Committee regret they do not see their way to altering their original scheme —

(1) Kindergarten principles cannot be abandoned The Kindergarten system is universally recognised as the best for infant education, and as teaching by object lessons is only an extension of the same system, the whole scheme of education recommended for the vernacular schools is really based upon it It is not intended, however, that Froebel's system, which is suitable for European children and European environments, should be adopted in its entirety in the teaching of Bengali children The Kindergarten *principles* only are to be recognised, and such objects chosen for illustration of lessons as can be easily procured without expenditure or at a nominal cost The writers of the Teachers' Manuals should bear this in mind in giving directions as to the exact methods to be adopted for Bengal schools

(2) The introduction of the proposed system experimentally in certain localities or in certain schools only does not commend itself to the members of the Committee for these reasons —(*a*) It would be against the interest of individual

pupils who might wish to get transferred from one locality or one school to another during the experimental period (*b*) The Committee consider it highly probable that local influences might be brought to bear to make the trial a failure on account of the man interests involved in keeping intact the present system (*c*) The Committee recommend the new system with the fullest confidence that it is better than the existing one and that even with the present staff of teachers it is better to work on a good system than on one which has proved itself defective

(3) Some of the reviewers wish moral and religious teaching to be recognised more fully in the proposed course The Committee have already advised that the poetical and historical lessons should be framed from a moral point of view, and recommended the introduction of drill and discipline as an integral part of children's education Beyond this they feel that the introduction of any moral training which would not be objected to on religious or other grounds by one section of people or another is attended with almost insuperable difficulties But they suggest that managers of schools might do something in this matter by allowing persons of influence and high standing, who might be willing to undertake such duties, to visit the schools occasionally and give moral advice to pupils The Committee further observe that parents at home should recognise their duties in this matter more than they do at present, as lesson books and schools can do little in this direction if good home influences are wanting

Preparation of text books

16 With reference to the preparation of books required under the proposed scheme of education, the Committee consider that one of the two alternative plans suggested by Messrs Longmans, Green and Co may be accepted, which is, 'that all books which might appear of a suitable character may be authorised for use, absolute free trade being allowed between rival series and publishers, so that the best books would be those which would get the larger sale" The Committee approve of this principle, as regards ordinary text books, and they are of opinion that all suitable books might be authorised for use annually as at present They consider, however, that an exception must be made in the case of the Science Primers and Teachers' Manuals It is of the utmost importance for the successful starting of the scheme that the most competent writers should be induced to come forward at once to prepare these books, and as an inducement for them to do so, protection for three or five years should ordinarily be granted

Training of pandits

17 With regard to the manner of training of pandits and *gurus* in the new system, the Committee feel that that subject is beyond the scope of their deliberations The system of teaching adopted in training schools will no doubt be altered as soon as the proposed scheme is sanctioned by Government, so that in two years' time some teachers trained under the new system will be available Through the inspecting staff also a system of instruction of *gurus* and pandits will no doubt be organised departmentally

Revised syllabus

18 The revised syllabus (Appendix E) with other Appendices submitted herewith, embody all the changes indicated in this report

Recommendation for increased grant

19 In concluding this further report, the Committee strongly recommend for favourable consideration of Government a substantial increase in the grant for primary education It is not the opinion of the Committee that the system of education they have recommended is much more expensive than the existing system as some of their critics maintain The recommendation here made is of a general character, an increased grant being needed for education to be more effective, whether the existing or any other system is followed The remuneration that pandits and *gurus* at present receive for the work they do is so small that it cannot possibly attract men of superior intelligence and worth The comparisons instituted in some of the public representations between the small proportion of revenue spent on primary education in Bengal and that spent in other provinces of India and in European countries, though irrelevant to the present subject, seem to the Committee to be entitled to consideration.

APPENDIX A

A COMPARISON OF THE OLD AND THE NEW COURSES

Lower Primary Examination

Existing Course	*Proposed Course*
1 One literature book, including a lesson in Geography; Hand writing; Reading text book; Reading manuscript } (84 pages)	1 Science Primers Standards I and II; Hand writing; Reading } (69 pages)
2 (*a*) Arithmetic—(100 pages) (*b*) Mental Arithmetic (European and Native)	2 Arithmetic European and native Mental Arithmetic (100 pages)
3 Subhankari (50 pages)	3 Drawing
4 Hygiene (40 pages)	4 School drill
	5 Object lessons on the sky and air and the subjects in Science (10 pages)
	6 Manual work (optional)
Total course of reading 274 pages	Total course of reading 179 pages

Upper Primary Examination

1 Bengali language and Grammar (2 0 pages)	1 A literature book including— (*a*) Prose (40 pages) (*b*) Poetry (20 pages) (*c*) Grammar (40 pages)
2 (*a*) History of Bengal (100 pages) (*b*) Geography of the four quarters (60 pages) (*c*) Geography of Bengal (25 pages)	2 Historical Reader (Bengal) (60 pages)
	3 Geographical Reader (40 pages)
3 European Arithmetic and Native Arithmetic (100 pages)	4 European and Native Arithmetic and Mental Arithmetic (100 pages)
4 Euclid Book I, 26 propositions and Mensuration (50 pages)	5 Practical Geometry and Mensuration (40 pages)
5 (*a*) Elements of Physical Science (60 pages) or Agriculture (200 pages) (*b*) Sanitation for boys (200 pages) Domestic Economy for girls (100 pages)	6 Science Primers Standards III and IV (60 pages)
	7 Freehand drawing
	8 Drill
	9 Object lessons on the action of water in nature and the subjects in Science (0 pages)
	10 Manual work (optional)
Total course of reading: Boys 815 or 915 pages; Girls 605 pages	Total course of reading 490 pages

Middle Vernacular Examination

1 Vernacular language— (*a*) Two text books (163 pages) (*b*) Grammar (100 pages) (*c*) Composition (100 ,,)	1 A literature book including— (*a*) Prose (100 pages) (*b*) Poetry (50 pages) (*c*) Grammar and composition (50 pages)
2 European Arithmetic and Subhankari rules (100 pages)	2 Arithmetic European and native as at present (100 pages)
3 History of India (300 pages)	3 Historical Reader (India) (120 pages)
4 Geography— (*a*) General with special knowledge of Bengal and India (150 pages) (*b*) Physical (55 ,,)	4 Geographical Reader (chiefly British Empire) including Physical Geography (60 pages)
5 Euclid Book I, including Mensuration (86 pages)	5 Euclid Book I (80 pages) or Practical Geometry and Mensuration (50 pages)
6 Science— (*a*) Physics (100 pages) (*b*) Hygiene (140 ,,)	6 Science Reader Standards V and VI (132 pages)
	7 Freehand Drawing
	8 Drill
	9 Manual work (optional)
	10 English (optional)(120 pages)
Total course of reading 1,294 pages	Total course of reading 692 or 602 pages

APPENDIX B

Short Tabular Syllabus

Subject	Age 5	Age 6	Age 7	Age 8	Age 9	Age 10	Age 11	Age 12	Age 13	Remarks
	First year Infant Class	Second year Infant Class	Third year Infant Class	Standard I	Standard II (Lower Primary Class)	Standard III	Standard IV (Upper Primary Class)	Standard V	Standard VI (Middle Vernacular Class)	
1	2	3	4	5	6	7	8	9	10	11
Reading	Kindergarten to take the place of reading &c]		Alphabet and spelling book	Science Readers. Poetry		Literature Book. History and Geography. Grammar and Composition				The infant stage may be reduced from three to two years in the case of intelligent pupils showing satisfactory progress. In Standards II, IV and VI the subjects of Standards I, III and V respectively are to be revised. Kindergarten methods should be adopted in training children in all the infant classes in all the subjects, e.g., with the help of seed, sticks, &c. No expense need be incurred in adopting such methods. The reading lessons are to be on the science of every day life for all the standards. The poetical and historical lessons are meant to inculcate moral teaching.
Writing	Numerals up to 10 (Kindergarten)	Alphabet writing of hat ka kara and ganda	Words from dictation notation up to 10,000 writing burri pan chok katha, bigha, ser and man	Writing from dictation writing of letters to senior relatives	Forms of pottah kabuliyats and rent receipts.	Letters to different persons in proper form	Chitha simple bonds and jamakharach	Khatian jamabandi, mahajani khata and rokar chalans.	Mortgage deeds and deeds of sale	
Arithmetic	Idea of numbers (Kindergarten)	Simple addition subtraction and multiplication (multiplication table up to 10×10)	Addition, subtraction, multiplication, saija, deria, arya	First four simple rules, country tables, masks, serkasa, son kasa and masmahina	Compound rules, bazar accounts, bighakali, katha kali, jamabandi	C. C. M., L. C. M., tables of mahina, hathkali, footkali, mahajani accounts	Simple proportion, use of decimals, fractions, problems	Up to interest and calculation of prices, and wages and native method	Arithmetic, the whole check of accounts between landlord and tenant and creditor and debtor	
Drawing	Lines	Rectilineal figures tracing outlines of flat objects	Simple free-hand drawing tracing	Free hand drawing (1st half of 1st School of Art Book)	Free hand drawing (2nd half of 1st School of Art Book)	Free hand drawing (1st half of 2nd School of Art Book)	Free hand drawing (2nd half of 2nd School of Art Book)	Free hand drawing (3rd School of Art Book)	Free-hand drawing (3rd and 4th School of Art Books)	
Drill	Simple action songs		Elementary drill and gymnastics or calisthenics	Drill and gymnastics or calisthenics						
Needle work for girls only except in mixed schools where girls may take up manual work	Nil	Nil	Hemming	Top sewing or seam lux	Running, felling and back stitching	Cross stitching and making a kurta	Cutting out a kurta sewing on button and strings making button holes marking	Gathering and sewing on a band, darning and herring boning	Cutting out and making a turban, feather stitching and ornamental marking	
Optional: Manual Training	Kindergarten occupation		Seed placing and stick laying	Leaf manipulation and paper folding	Leaf manipulation and paper cutting	Bead threading and string weaving	Clay modelling	Clay modelling	Clay modelling	
Optional: English	Nil	Nil	Nil	Nil	Nil	Nil	English primer word book	English reader advanced word book simple composition and translation	Middle English course elementary English grammar composition and translation	

APPENDIX C

Detailed Tabular Syllabus

Nil ...	Nil	Nil	Nil
III Object lessons	About school furniture plants human body differences of animals	About common objects [illegible] parts of body a cat etc	On birds the cow on common metals and simple articles made from metals on plants yielding fibre etc on domestic vessels o parts of the human body	The sky the subjects in science, etc are to be treated as object lessons	The air etc the subjects in science etc are to be treated as object lessons.	Water the subjects in science etc are to be treated as object lessons.	The action of water in nature the subjects in science etc are to be treated as object-lessons	Nil ...	Nil
IV Manual training optional for boys only or for boys and girls in mixed schools	Nil	Nil	Seed placing and stick laying	Leaf manipulation and paper folding	Leaf manipulation and paper-cutting	Bead treading and string weaving	Clay modelling	Clay modelling	Clay modelling
IVa. Needle-work (for girls only except in mixed schools where girls may take up manual work)	Nil ..	Nil	Hemming	Top-sewing or seaming	Running and felling and back-stitching	Cross-stitch and making a kurta	Cutting out a kurta sewing on buttons and string making button holes marking	Gathering and sewing on a band darning and herring-boning	Cutting out and making a piran feather-stitching and ornamental marking
V Drill (for boys only)	Simple action songs ..	Simple action songs	Elementary drill and gymnastics	Drill and gymnastics	Drill and gymnastics	Drill and gymnastics	Drill and gymnastics	Drill and gymnastics	Drill and gymnastics.
Va. Drill (for girls only)	Ditto	Ditto	Elementary drill and calisthenics	Drill and calisthenics	Drill and calisthenics	Drill and calisthenics	Drill and calisthenics	Drill and calisthenics	Drill and calisthenics.
VI. Writing	Commence writing numerals.	Writing of letters of the alphabet and simple words writing of satika kara and ganda.	Writing short words etc from dictation writing sums writing of buri pán, kok katha, bigha, se and mán	Writing more complex words and sentences and letters to senior relatives	Writing complex words and sentences, and forms of pottah kabulyat and rent receipts.	Writing letters to different persons in proper forms	Writing of chitha, simple bond and jamakharach	Writing of khatian jamabandi, maha jani khasra and rokar chalans	Mortgage deeds and deeds of sale
VII Arithmetic	Idea of number from object lessons and Kindergarten.	Simple examples of addition substraction simple multiplication table notation up to 100.	Examples of addition subtraction multiplication mental arithmetic notation up to 10 000 saiya, deriya and araiya.	Four simple rules mental arithmetic notation the whole country ables, mon kasa, serkasa sonakasa, masmahina.	Simple and compound rules reductions mental arithmetic Bazar accounts bighaka i, kathakali and jamabandi	G C M L C M mental arithmetic batsarmahina, bat kali for tkali mahajani.	Simple proportion, vulgar and decimal fractions problems	Interest square root problems, calculations of prices wages &c, on native method	The whole checking of accounts between landlord and tenant and creditor and debtor
VIII. Reading	Nil	Learning letters ..	Reading simple printed and written language.	Standard I, Science Primer	Standard II Science Primer	Standard III Science Primer	Standard IV Science Primer	Standard V Science Reader	Standard VI, Science Reader
Science Primer includes the following subjects:— Botany	Nil	Nil	Nil	Simple facts about a seedling and a full	Lessons on the roots of plants.	Lessons on stems	Lessons on leaves and flowers	Life-history of plants	Life-history of plants continued
Natural History	Nil	Nil	Nil	Habits and description of domestic animals—cow cat and dog	Further lessons about the cat family	Difference between vertebrate and invertebrate animals more about the dog	[illegible] pared		metamorphosis of an insect members of the monkey family snakes.
A. Agriculture (for country schools for boys only)	Nil	Nil	Nil ..	A Necessaries of life Varieties of crops	A Lesson on rice and oil seeds	A Why crops fail; drought irrigation	A Food and fodder yielding trees pests oil cakes.	A Work in school garden collection of specimens also lessons on fertility pulse crops sugarcane and saltpetre foot-and mouth disease	A Work in school garden, collections of specimens also lessons on rotation of crops feed and keep of cattle use of excreta and bones segregation of cattle during epidemics.
or									
B. Physical Science (for town schools for boys only)	Nil	Nil	Nil	B Simple facts about general properties of matter	B Further discussion on properties of matter	B Pressure exerted by liquids floating bodies pressure of atmosphere syringe	B Heat and its effects—conduction convection radiation boiling	B Light—reflection refraction	B Electricity and magnetism.
Chemistry (for town schools for boys only)	Nil	Nil	Nil	B Solubility	B Further experiments [illegible] soluble and insoluble substance	B Chemistry of a candle, first half	B Chemistry of a candle second half	B General and chemical properties of well known metals.	B Elements and compounds—carbon and sulphur
Hygiene for boys ...	Nil	Nil	Nil	Food drink air light	Cleanliness and dress exercise and rest epidemics	Air water food sunlight	More advanced course ordinary accidents	Food drink air dwelling houses	Village conservancy cleanliness dress exercise and first epidemics accidents.
or									
Domestic Economy for girls.	Nil	Nil	Nil	Bathing dress the kitchen	Cooking bed-room	How to keep rooms clean furnishing rooms the kitchen sunlight	Cooking meals bed room ordinary accidents	Personal hygiene treatment of common ailments burns, scalds wounds and bruises	Infectious diseases infection sick-room cooking of sick diet
IX. Poetry or memorising short poems.*	Nil	Short pieces to be committed to memory	Short prieces to be committed to memory	Short pieces about duties of children to be committed to memory	Pieces to be committed to memory	Included in Literature book			
X History	Nil	Nil ..	Nil	Nil ...	Nil	First part of Historical Reader (Bengal)	Second part of Historical Reader (Bengal)	First part of a more advanced Reader on Indian History	Second part of a more advanced Reader on Indian History including a Chapter on the British Administration in India.
XI Geography	Nil ..	Nil	Nil	Nil	Nil	Map of school room house and compound map of village first part of Geographical Reader	Map of district in which school is situated maps of Bengal, India and World with a special reference to British Possessions second part of Geographical Reader	First half of a more advanced Reader	Second half of a more advanced Reader
XII. Mensuration for boys only	Nil	.. Nil	Nil	Nil ..	Nil	Taught as practical Geometry	Elementary practical Geometry including simple practical Mensuration	Practical plane Geometry including Mensuration or First 26 propositions of the First Book of Euclid	Practical plane Geometry including Mensuration or First Book of Euclid.
XIII. Literature book (including Grammar and Composition)	Nil ...	Nil	Nil	Nil ..	Nil	Literature book including prose poetry and 10 pages of grammatical lessons (for Standard IV only)		Literature book, including prose, poetry and lessons on grammar and composition.	
XIV English, including Grammar and Composition.	Nil ..	.. Nil	.. Nil ...	.. Nil	... Nil ...	Nil ...	English Primer and Word-book	English Reader, advanced Word book simple composition and translation	Middle English course elementary English Grammar composition and translation.

[illegible] and Chemistry) Euclid and Mensuration. Manual work may be substituted by girls for needlework in mixed schools

APPENDIX D

Table showing approximately the number of pages of lessons allotted to each Standard and the prices of the books

NOTE — The numbers of pages included within brakets, referring to alternative or optional subjects have not been counted in the totals

[The Text-books prescribed are—The Junior Teacher's Manual (not more than 8 annas), the Senior Teacher's Manual (not more than 10 annas) the Drill Book (2 annas), the Alphabet and Spelling Book (not more than one anna), Indian Drawing Book, 4 parts (3 annas each), Lower Primary Reader (3 annas), Upper Primary Science Primer (4 annas), Upper Primary Literature Book, and Historical and Geographical Readers (3 annas each), Middle Vernacular Science Primer (7 annas), Middle Vernacular Literature Book (6 annas), Middle Vernacular Historical and Geographical Readers (4 annas each), Euclid, First Book (2 annas), and Arithmetic Book in two parts the first for Lower Primary Standard and the second for Upper Primary and Middle Vernacular Standards, prices 4 and 8 annas, respectively The Teachers' Manuals, the Drill Book and the Drawing Books need not be purchased by pupils. They should be supplied to schools]

‡ ... pages) will give directions how the subject marked (‡) are to be taught. It will also give directions regarding school managements (including keeping of registers and accounts) and discipline. It should be in the ... Vernacular Standards.

APPENDIX E

THE DETAILED SYLLABUS

NOTE—It is of the utmost importance that all objects which are to be used to illustrate the courses of instruction in vernacular schools should be selected from materials or things that are commonly found in every school, or which can be obtained in every village without difficulty and without cost This rule applies to object which are to be used for the training of the senses in the infant classes and for object lessons, etc and also as far as possible to those to be used in the teaching of the science of every day life

INFANT CLASS

THE following "Kindergarten" and "Object lesson" subjects shall be prescribed for the first stage of instruction before the children are allowed to begin to learn their letters or to learn to read, etc —

FIRST PERIOD OF INFANT CLASS—ONE YEAR'S COURSE

Age about five years

A —Kindergarten and Object lessons for training children by observation or impressions obtained through the senses—

1 Through the eye—

(a) Lessons on form—

Curved lines
Lines, straight and crooked
Ball shaped bodies

(b) Lessons on colour—

Black and white substances
Yellow and red ditto
Blue and green ditto

2 Through the hand—

Things, hard and soft
" rough and smooth
" heavy and light
" brittle and tough

3 Through the sense of taste—

Things, sweet and sour
" pungent or hot, sour, salt, and bitter

B —Object lessons on things of every day life, such as a flat board or a piece of wood, a box a stool or chair, a table or school desk, also very simple object lessons about plants, growing and flowering, indicating the root, the stem, the leaves, the flowers, etc, and their simple uses, and showing that a plant must be watered for it to continue to live

Very simple lessons about the human body—

Parts of the body—the head, arms, legs, hands and feet
What the body is made of (bones and flesh)

C —Training of hand and eye—

Drawing of curved, straight and crooked lines
Drawing of squares and oblongs, circles and figures like circles bounded by curved lines

D —Very simple lessons as to different kinds of animals—

Some animals walk only
Ditto have 2, 4 and more legs
Ditto crawl
Ditto fly
Ditto swim
Ditto walk and fly
Ditto walk and swim
Necessity of kindness to domestic animals
Kindness of children to one another.

E.—From the object-lessons on the leaves of trees and on the hands and feet, etc, the idea of numbers can be readily introduced and from numbers to addition, subtraction, and simple mental arithmetic

F.—The children are to be allowed to learn to write the numerals about this stage

G.—The children must be trained daily in simple physical exercises and in action songs

H.—Kindergarten occupation such as stick lying, etc

SECOND PERIOD OF INFANT CLASS—ONE YEAR'S COURSE

Age about 6 years

A.—Training through the senses—

1 Through the eye—

(a) Lessons on form—

Extension of lessons given in first period
Also lessons on angles and on triangles of various shapes
Also lessons on cube and brick shaped bodies

(b) Lessons on colour

Extension of lessons given in first period
Grey, orange, purple, brown

2 Through the hand—

Extension of lessons given in first period showing various degrees of the properties then tested

3 Through the same of taste—

Extension of lessons given in first period

4 Through the ear—

Sounds, loud and soft
" distant and near
" pleasant and unpleasant
Different animals give different sounds
Sounds of pain, sounds of pleasure
Sounds give spoken language

5 Through the organs of smell—

Pure air has no smell
Air which has smell is not pure
Sweet or pleasant smells of flowers
Unpleasant smell of rotting or decaying vegetation
Unpleasant smell of rotting or decaying animal matter
Air with bad smell is unhealthy to breathe

6 Lessons on size and measurement—

Length, breadth and thickness
Measures of length, both vernacular measures, and the yard, foot and inch

B.—The following object lessons on common things —

1 On a stool or chair
2 " a slate and pencil
3 " a book
4 " a tree and its fruits
5 " a mango and plantain
6 " seeds
7 " grass
8 " a plant yielding fibres which the children can extract
9 " the parts of the human body in greater detail than in the first period
10 " a cat

C.—The hand and eye should be again trained by simple drawing exercises of the same character as those in the first period, but rather more advanced, with the drawing of triangles, quadrilaterals, pentagons, etc., in addition

Tracing outlines of leaves of plants of various shapes and of other flat bodies on slates Leaves of plants may be pressed between sheets of paper (old newspaper) to make them lie quite flat

After tracing a leaf or other flat object on the slate, the pupil should be required to make a freehand copy of his own diagram by the side of it, and compare it and correct it by placing the original object over it This would help to train the eye and would fix the form of the object more clearly in the memory than simple tracing would do

D —At this period the children are to begin to learn their letters, etc, and to write the letters of the alphabet and to form short words Also writing *shatiká*, *kará* and *gandá*

E —Additional arithmetical exercises, notation up to 100, multiplication table up to 10 × 10, simple addition, subtraction and multiplication Slates may be used for the simple arithmetic

F —Short pieces of poetry should be committed to memory Some of these should teach morality and the duties of children

G —Simple physical exercises and action songs

H —Kindergarten occupations such as stick laying, seed placing, etc

THIRD PERIOD OF INFANT CLASS—ONE YEAR'S COURSE*
(EQUAL TO STANDARD B OF PRESENT PRIMARY COURSE)

Age about 7 years

A —Training through the senses—

1 Through the eye -

(*a*) Lessons on form should include the notions of perpendicular, horizontal, oblique, parallel lines, the circle, sphere, cylinder, prisms, pyramid, and cone

(*b*) Lessons on colour should deal with dark and light colours, and with the varying shades of such colours as red, blue, green, yellow, etc Primary and secondary colours, browns, greys, etc

(*c*) Lessons on the four cardinal points

2 Determination of weights and measures with the use of bazar scales and measures Short weights and measures used for cheating

3 Elementary notions about time should be given (indigenous and European), to include the year, month, week, day, hour, and minute, also division of the year into seasons

B —Object lessons—

3 Further lessons about plants—

Seeds to be sown and grown to form plants

Object lessons on plants, such as pumpkin, and on vegetables, such as brinjal, beans, etc, for food

4 Further lessons about the human body—

The blood, the brain, the skin

5 Object lessons about birds (pigeon, duck)

Simple lessons about the cow

6 Object lessons on vessels—

An earthen pot.

A water glass or a bottle

A brass *lotah* or a brass plate (*thala*)

7 Object lessons on common metals

" on coins, copper and silver

" on nails, screws

" on a knife

" on a key for a lock

* Double promotion may be given to intelligent pupils at the infant stage where the work of three years can be satisfactorily done in two

8 Object-lessons about plants yielding fibres, more advanced than in the previous stage

The use of various fibres in the manufacture of cloth for clothing

C —Drawing (Hand and Eye-training)—

Drawing on slates, of rather more advanced character than in the two previous stages

Drawing outlines of leaves, etc, from memory must be practised

D —Arithmetic and writing —

Addition, subtraction and multiplication, notation up to 10,000, *shátya, detta* and *ariya*, writing *buri, pan, chok, kátha, bigha, ser* and *man* Writing short words, etc, from dictation

E —Verses on the duties of children should be committed to memory and recited The reading of simple printed and written language should be commenced

F —School Drill

G —Needlework (*for girls only*) —Hemming

H —Kindergarten occupations such as stick laying, seed-work, etc

STANDARD I —ONE YEAR'S COURSE (CORRESPONDING TO THE "A" CLASS OF A LOWER PRIMARY SCHOOL)

Age about 8 years

Class subjects —Reading, Writing, Arithmetic, Object lessons and a Primer, with Drawing (Hand and Eye training), Manual work, Needlwork for girls and School Drill

Writing —To write from dictation, to write more complex words and sentences, and an ordinary letter to a senior relative

Arithmetic —First four simple rules, including mental operations, country tables of money, weights measure and land measure, *mankasa, serkasa, soudkasa, musmáhina*

Object lessons (*5 pages*)—

THE SKY

Sunrise, noon, sunset —The children are to note with reference to the school house or village the object over which the sun rises or sets from month to month, and to note also the sun's position at noon, and its varying height above the horizon

Shadow —The pupils are to notice by aid of an upright stick on a flat piece of ground the varying length of the shadow month by month

Moon —Note its changes The pupils should draw the shape of illuminated portion week by week

Day and night —Varying length of day and night at different seasons to be noted, and connected with the varying position of the sun as determined at rising and setting and at noon

The Primer for the class will contain—

A —*Botany* (*5 pages*)—

1 A broad sketch of the plant in reference to its three principal parts —the root, the stem and the leaf

2 Talk about a seedling

3 Distinction between root and stem —Observe the germination of seed One part grows upwards—the stem and the other downwards—the root If a growing plant be placed in an inverted position for some time, observe that the stem will bend and grow upwards and the root in the contrary direction (A germinating pea placed upside down will show this)

B —*Natural History* (*10 pages*) —Habits and general description of the following domestic animals with anecdotes the cow, the cat and the dog, incidentally illustrating what is meant by herbivorous and carnivorous animals, their offensive and defensive weapons

C —*Agriculture* (*10 pages*) *for Country schools for boys only* —Alternative with Physics and Chemistry

Necessaries of Life—variety desirable as a protection against failure of crops. *Objects required*—specimens of cereals pulses oil seeds vegetables, sugar, salt, milk, fibres, straw, bamboos timber spices.

D.—Physics (5 pages) for town schools, for boys only—

The following lesson is to be in the form of conversation:—

Solid substances and some of their properties—Take a solid and show that it has a definite shape. This shape cannot be easily altered.

Some solids may be converted into liquids by heating, e.g., wax.

Porous bodies.—Take a piece of charcoal and show the pores. Examine also a piece of unglazed pottery. Water percolates through the pores. Examine blotting paper.

Liquids and some of their properties.—As example take water. It has no shape of its own: it takes the shape of the vessel in which it is poured. It breaks into drops. It flows down. Fill a bottle full of water. Try to cork it. The water is difficult to compress.

Solids are converted into liquids by heating; liquids are converted into solids by cooling. Observe how cocoanut oil becomes solidified in winter.

E.—Chemistry (4 pages) for town schools, for boys only.—

Lesson on solubility:—

Take a pinch of common salt, sugar and finely powdered chalk respectively in a tumbler and add the same volume of water to each and stir with a rod. Observe the appearance of the liquids: the water with the salt and sugar is perfectly clear: that containing the chalk is milky. Now pass the liquids through filter papers. Observe that the milkiness in the last has now disappeared. Taste them one by one. The water containing the salt has a brackish taste; that which was poured over the sugar has a sweetish state, whilst that which was treated with chalk has *no taste* whatever. Evaporate the liquids in succession in earthenware or enamelled cups. The water evaporates off slowly, and at last we have residue of salt and sugar; but the water which was similarly treated with chalk leaves *nothing* behind.

F.—Hygiene (8 pages), for boys only—

Food.—Its necessity. Evils of under feeding and over feeding. Ordinary articles of food including meat, e.g., milk, fruits.

Drink.—Pure water, how obtained. Causes of impurities in water.

Air.—Necessity of pure air. Causes of its impurities. How to purify the air of dwelling houses.

Sunlight.—It necessity in dwelling houses.

F (a).—Domestic economy (8 pages), for girls only—

Bathing.—Anointing the body before bathing. Bathing as a means of cleaning the body. Bathing of little children.

Dress.—Dress capable of improvement. Clothes to be washed and kept clean. Children's clothes to be changed frequently.

The kitchen.—Should be kept clean. Removal of refuse. Scrubbing the floor and cleaning walls and the ceiling. Admission of light and air into the kitchen.

G.—Drawing (Hand and Eye training.—Half the first part (of the four parts) of the Indian Drawing Books prepared in the School of Art.

A set of Indian drawing copies has recently been supplied by a drawing book in four parts prepared by order of the Government of India. With some additional examples and a carefully prepared set of instructions for teachers the first book would be suitable for use in lower primary schools. The examples would have to be enlarged, mounted on pasteboard and varnished. These enlarged examples would be hung in front of the class and copied by the students on their slates, so that one set would be sufficient for each school. The only expense would be the cost of one book for the teacher and one set of examples for each school. The examples would be of so simple a character that any intelligent teacher by the help of the printed instructions would be able to direct the class in the correct method of drawing them.

One page of directions regarding Drawing is to be included in the Science Primer.

H.—Manual Training (optional, except in mixed schools where girls may have to take up this subject in place of needle-work).—Leaf and Paper work.

Leaves (palm, etc.)—Making fans of different kinds, whistles, ornamental designs.

Paper.—Paper folding, paper modelling such as caps, boats and other toys, ink pots, pen cases, etc., flying kites, flowers, garlands, slings, lanterns, envelopes, etc., etc.

Two pages of the Reader to contain directions about Manual Training.

H (a) —*Needlework (for girls)* – Top-sewing or seaming
I —Verses teaching the duties of children
(Two pages at the end of the Primer)
J — *School drill*

STANDARD II (CORRESPONDING TO PRESENT LOWER

PRIMARY STANDARD)

Age about 9 years

Class subjects —Reading Writing Arithmetic, Object lessons and a Primer, with Drawing (Hand and Eye training), Manual work, Needlework for girls, and School Drill

Writing —Revision of subjects of Standard I, writing out forms of *pattahs kabuliyats*, rent receipts

Arithmetic —Revision of subjects of Standard I and compound rules, accounts of bazar purchases, calculation of prices including mental operations, *bighakali, kathakali, jamakandi*

Object lessons (5 pages)—

THE AIR

Winds —The pupils should record the varying directions of the winds from season to season or day to day, also note that some winds are warm, some cold, that some bring rain and some dry weather

Air —Contains moisture or water vapour shown by two classes of facts—(*a*) clothes left out in open air at night become damp and wet salt becomes damp and wet during rainy season, *i e*, vapour from air is turned into water, and (*b*) pools of water and tanks dry up in wind and sun, wet cloth becomes dry when hung in wind and sun, *i e*, the water in them turns into vapour Human breath contains vapour and this turns to water when a cold slate is breathed upon or on a cold morning breath becomes visible owing to water being formed from the vapour in it

Surface of lands —The meaning of the terms plains valleys hills etc, must be explained, and the teacher should make models in clay, sands, etc, to illustrate the meaning of such terms

The Reader for this class will contain—

A —*Botany (5 pages)*—

Root of a plant —Function of the root (1) to hold the plant, (2) to supply food Examine different kinds of roots

Distinguish between the main roots and rootlets—

Fibrous roots—grass
Fleshy roots—radish beet
Adventitious roots—banyan

B —*Natural History (10 pages)*—

General description of the members of the cat family with anecdotes.

Mammals —The cat chosen as a type—external configuration—round face—arrangement and disposition of the hair—habits

Examination of the paws (*a*) under surface, the fleshy pad—the retractile claws—when excited the claws are drawn out of the protecting sheath and the hair stands on end—mode of seizing prey

The pupil of the cat's eye almost a vertical line in broad daylight—in the dark it expands

The cat its maternal instincts – attitude of the male cat towards the offspring

The tiger only a big cat

C — *Agriculture (8 pages), alternative with Physics and Chemistry for village schools, for boys only*—

A lesson on rice and a lesson on oilseeds

D.—Physics—(5 pages), for boys only—

Gases and some of their properties.—Blow into water through a tube, you see something bubbling up. Blow against your hand, you feel a current of air. Gases cannot be kept in an open mouthed vessel. Gases are easily compressible.

Resumé of the general properties of matter (ice, water and steam).

Divisibility of matter.

Gravity.

E.—Chemistry (4 pages), for boys only.—Further lessons about solubility.

Take some lime in a bottle, fill half the bottle with water, cork it tightly and violently agitate the contents. Allow to settle over night. Next day carefully decant off the clear liquid; note the *alkaline* nature of the water; divide it into two portions; blow into one by means of a tube or bamboo or some kind of reed. Observe how the water turns milky; the lime which was in solution has now been rendered insoluble and thus *precipitated*. Pass the milky water through a filter. The water is now colourless and devoid of taste. (*Cf.* Lessons on the Chemistry of a Candle.)

Treat similarly powdered alum, sulphate of copper, charcoal, sand, etc., and find out which of the above are soluble and which insoluble in water.

F.—Hygiene (8 pages), for boys only—

Cleanliness and dress.—Bathing, its necessity. How to keep clean. How to keep the house clean. Uses of dress. Different articles used for weaving cloths.

Exercise and rest, including change of air.

Epidemics.—How to check their spread.

F (a).—Domestic Economy (8 pages), for girls—

Cooking.—Cleanliness to be observed. Cleaning of utensils. Supply of good water for cooking food. Articles to be properly prepared and washed before cooking. Food to be prepared and kept covered as far as possible. Rice to be cooked last and eaten before it gets cold. Variety in food.

Bed room.—Day sleep to be avoided. Regular hours of sleep. Overcrowding in rooms injurious. Use of mosquito curtains. Ventilation of rooms. Bedding of infants to be changed when soiled. Bed clothes and pillows to be aired and sunned and washed.

G.—Drawing (Hand and Eye training).—Second half of first part of the School of Art Drawing Book.*

H.—Manual Training (optional, except in mixed schools where girls may have to take up this subject in place of needlework) (for boys only).—More difficult exercises in leaf manipulation and paper cutting.

One page of directions regarding Manual Training is to be included in the Science Primer.

H (a).—Needlework, for girls.—Running and felling and back stitching.

I.—Verses teaching morality and duties of children (3 pages).

J.—School Drill.

STANDARD III (CORRESPONDING TO LOWER CLASS OF UPPER PRIMARY SCHOOL)—ONE YEAR'S COURSE.

Age about 10 years.

Class subjects.—Reading, Writing, Arithmetic, Literature Book, Historical and Geographical Readers, a Science Primer, Drawing (Hand and Eye training), Practical Geometry (INSTEAD OF EUCLID), Manual work, Needlework for girls and School Drill.

---

* These Drawing Books are now in course of revision, and drawings of Indian leaves, plants and animals illustrating the lessons in agriculture, natural history and botany are to be included in them.

Reading—In addition to the Science Primer, a Literatrue book and Readers containing lessons in History and Geography will have to be prepared for the Upper Primary Standard, and the first half of these books will be used in this class The Literature book should contain a few pieces of poetry, also some anecdotes with a moral tendency It should not exceed 70 pages

Writing — Writing out forms of letters to different persons

Arithmetic—G C M, L C M including mental operations, *batsar mâhinâ*, *hât kâli* and *foot kâli* How to open a personal account with a village *mudi* or *mahâjan*

Object-lessons (*10 pages*)—

WATER

Mist and fog—Are produced in the air and over tanks, etc., because the vapour, when cooled, changes into little drops of water

Clouds—Are formed in the same way, but in the upper atmosphere

Rain—Comes from these clouds, or from the vapour which has been cooled into drops of water

Dew—Is water formed from vapour on or near the surface of the ground The pupils should note when dew is formed, *i e*, whether during cloudy or cloudless weather, etc, the difference in the amount of dew in different seasons of the year, and on what objects the dew lies thickest

Hailstones—Are rain drops made solid by cold, and they fall usually during thunder storms Hailstones should be collected and examined and allowed to melt in a glass, so that the water can be seen and tested

Thunder and lightning—Also usually occur during storms of rain, hail, etc

The Science Primer will contain—

A—*Botany* (*8 pages*) *Stems and their functions*—

Stems of plants—The stem grows upward, so that the plant may get as much light as it can Green plants cannot grow without light Observe the discolouration and unhealthy condition of grass growing when shaded from light

Different kinds of stems—

a—Woody stems
b—Climbing stems Observe the twining tendrils by which the plants obtain support, *e g* cucurbita
c—Succulent stems
d—Underground stems, *e g* potatoe turmeric ginger, etc

B—*Natural History* (*10 pages*)—

Difference between a vertebrate and an invertebrate animal as illustrated by comparing the wings, legs and body of a bird with those of a butterfly

Animals without a backbone a snail, a cray fish, an earthworm, a milliped, a butterfly, a leech and a cockroach compared with a fish

The dog as compared with the cat in external appearance —the longish face—claws non retractile—different breeds of dogs—Newfoundland, spaniel, greyhound, St Bernard and the uses they are put to—dogs of the cold countries furnished with a thick coating of fur

C—*Agriculture* (*16 pages*) *for country schools, for boys only* (*alternative with Physics and Chemistry*)—

Why crops fail
Drought resisting crops
Irrigation from small depth and from great depth

D—*Physics* (*10 pages*) *for town schools, for boys only*—

Liquids—Surface of liquid is always level Pressure exerted by liquids in all directions. Bodies weigh less in water than in air Floating bodies

Gases—Pressure exerted by the atmosphere Invert a tumbler filled with water, with the open mouth covered with a card Observe the water is kept from falling The syringe.

E.—Chemistry (6 pages) for town schools, for boys only—

Chemistry of a Candle.—A candle attached to a stout iron wire is lighted and gradually lowered into a wide mouthed glass bottle it continues to burn Observe that the sides of the bottle begin to lose transparency and become covered over with mist. Where does the water come from? The mouth of the bottle is gradually closed with a glass or earthenware plate The light begins to get more and more dim till it is extinguished Pour lime water into the bottle and shake it The lime water turns milky Take some fresh lime water in a tumbler and blow into it The lime water in this case also turns milky

F.—Hygiene (16 pages), for boys only—

Air.—Pure air Cause of its impurities Overcrowding in houses and public institutions Means of ventilation

Water.—Its sources of supply Different ways in which it is rendered impure How to secure pure water Filters Alcoholic and other objectionable drinks

Food.—Why do we eat Over eating and under eating Different kinds of food including cereals pulses tubers vegetables meat milk and its preparation sugar eggs fruits preserved foods condiments

Sunlight, with special reference to its disinfecting action and necessity to health

F(a).—Domestic Economy (16 pages), for girls—

How to keep rooms clean.—How they become unclean Open lamps Spitting in rooms and on walls improper Sitting with naked back to the wall Cobwebs Children not to play with dirty things in rooms

Furnishing rooms.—Furniture and utensils to be sufficient for the requirements of the household Everything in its place Use of lanterns Advantages of glass or glazed or stone vessels over metallic articles from a sanitary point of view

The kitchen. To be a kept quite clean Adjoining parts also to be clean Utensils cooking vessels dishes to be made clean before and after use Admission of light and air into the kitchen

Sunlight with special reference to its disinfecting action and necessity to health

G.—Drawing (Hand and Eye training)—20 pages, explaining the lessons in the drawing book and the elementary practical geometry which is to take the place of mensuration are to be included in the Primer

Subjects (1) Freehand drawing with chalk on the blackboard or a prepared wall surface (2) Elementary practical geometry

NOTE 1.—The value of freehand drawing on the blackboard as a means of physical and hand and eye training is very great and is hardly sufficiently appreciated in most schemes adopted in Europe The facility with which it can be put into practice in any school building which has *pucka* walls makes it especially suitable for India The advantages of it are that the students do not sit in a stooping position as in writing or drawing on paper They stand upright with the head erect and the example opposite the eye They walk backwards and forwards occasionally to observe their work at a distance The hand does not rest on anything but moves freely on the wrist This in itself gives the arm and wrist a strength and the hand a certainty of touch which cannot be acquired by any other kind of drawing

The difficulty regarding the provision of blackboards or other drawing surface for a large number of students in all the upper primary schools in Bengal is easily surmounted It is obvious that any upright surface properly prepared will answer as well as or better than a blackboard Any building which has a *pucka* wall can have a surface prepared for drawing on at comparatively small expense Portland cement would be the best material it resists damp and saltpetre which destroy ordinary plaster and it makes a surface when properly prepared which will last for years The colour of the surface is the next consideration The natural colour of Portland cement is dirty and ugly but by mixing the cement with Indian red (a red ochre which can be obtained easily and cheaply) in the proportion of about 1 to 6 by weight a low toned and pleasant colour can be obtained which would not be trying to the eyes So instead of blackboards a band of coloured Portland cement about 3 feet wide running round the whole class room at a height of about 3 feet from the ground would make an excellent surface for drawing on and would be a cheerful decorative feature in the class room The black coloured surface is only necessary for a teacher's work in demonstrating figures and diagrams to students who sit at some distance off For students drawing practice it is neither necessary nor desirable The next question is the drawing examples These would be taken from the Indian School of Art drawing book alluded to before They would be mounted on cardboard and hung from a strip of wood fastened to the wall at the upper edge of the drawing surface. The students would enlarge the examples to three or four times the size so that the copying should not be merely mechanical

The elementary course of practical geometry is also advocated as being of far greater educational value for students of this age than the learning of Euclid, which is almost sure to degenerate into a mere memory exercise The instruments required are not expensive They consist of a pair of pencil compasses, a six inch scale, and one or two small set squares.

H —Manual Training optional, except in mixed schools, where girls may have to take up this subject in place of needle work — Bead-threading and string-weaving (4 pages) —

String weaving (knotting, netting looping plaiting weaving of single loop chains of one string sling weaving)

H(a) —Needlework, for girls —Cross-stitch and making a *kurta*

I —School Drill

STANDARD IV (CORRESPONDING TO UPPER PRIMARY CLASS—ONE YEAR'S COURSE)

Age about 11 years

Class subjects —Reading, Writing, Arithmetic, a Literature book, Historical and Geographical Readers, Science Primer, Drawing (Hand and Eye training), Practical Geometry and Mensuration, English (optional), Manual work (optional) Needle work for girls and School Drill

Reading —The whole of the Science Primer and the whole of the Literature Book and Geographical and Historical Readers for Standards III and IV

Writing —Revision of subjects of Standard III, writing forms of *chittha* and of simple bonds, and *jamakharcah*

Arithmetic —Revision of subjects of Standard III, simple proportion, vulgar and decimal fractions, problems

Object lessons (10 pages)—

The action of water in nature and on the surface of the land

Water, when it falls in the form of rain etc, partly runs over the surface of the ground into tanks, streams, and rivers it partly sinks into the ground to pass into wells and to re appear in the form of springs etc, at a lower level, and it partly passes again into the air in the form of vapour

The action of heavy rain in cutting channels in the earth or soil and in carrying away particles of light material, such as straw and wood, and of soil or earth, or even stones, into the nearest stream, and then into a larger stream or river, should be carefully watched by the pupils

The pupils should study the nature of the nearest stream of water determining in what part of the stream the current is most rapid, etc, and ascertaining how it carries away soil and even small stones, and how it cuts away its banks, etc

The turbid water produced by a rapid stream should be placed in a glass tumbler and the deposit of silt or soil found at the bottom on standing should be observed Attention should be drawn to the fact that in this way new earth or soil has been formed in Bengal

The pupils should be required to decide simple questions, such as —Is the ground on which the school stands level or sloping? Is the ground in the neighbourhood of the school, village or town level or sloping, the nature of the land being ascertained by watching the flow of water after rain (i e, by the drainage)? It should be noted that the greater the slope of the land, the more rapid will be the flow of water The action of rain and running water in modifying the surface of the land must be fully explained

The differences in the erosion of land by running water when (*a*) the land surface is bare, and (*b*) when the land is covered with grass or vegetation or by forests, must be explained

Water can be made to pass through certain soils, sand, etc. easily, but it cannot pass through clay This can be experimentally shown

Wells and tanks are dependent for their supply of water on the level of the water in the soil, and the depth of this from the surface depends upon the nature of the soil, rainfall, etc Subsoil water is essential to the growth of plants

The Science Primer for this class to contain—

A—*Botany* (*8 pages*)—Lessons on leaves and flowers

Leaves—Function of leaves

Different parts of a leaf—the stalk and the blade

Make a collection and examine the different kinds of simple and compound leaves

Some leaves are sensitive to touch, *e.g* the sensitive plant Observe the order in which leaves close when the end of a branch is touched

Flowers—The function of flowers is to produce seeds, which give rise to a new plant

Study of the different parts of a flower

Count the number of sepals petals stamens and pistils of different kinds of flowers

Examine pollen grains also the pistil and the enclosed ovules Pollen must fall on the stigma for the maturing of the seed

Pollination often done by insects The brightly coloured petals serve to attract the insects

B—*Natural History* (*10 pages*)—

The cow and the horse compared—the cloven foot and the solid foot—other members of the cow family the buffalo, the sheep, the goat Stomach of a goat (a typical ruminant) examined and laid open—the four chambers—the construction of the stomach suited to the habits of the animals which chew the cud.

C—*Agriculture* (*16 pages*) *for country schools, for boys only, alternative with Physics and Chemistry*—

Food and fodder yielding trees

Insect and fungus pests

Oil cakes as cattle food and manure

D—*Physics* (*10 pages*) *for town schools, for boys only*—

Heat—

Expansion of solids liquids and gases

Make a simple liquid thermometer with a bottle and a tube or quill, and explain the principle of a thermometer

Change of condition—

From solid to liquid

" liquid to gas

Conduction—

Good conductors and bad conductors Principle of warm clothing

Convection—

Air currents and winds

Radiation

Boiling—

Elastic force of steam

A simple reading lesson on the steam engine

E—*Chemistry* (*6 pages*) *for town schools, for boys only*—

Chemistry of a Candle, second-half —

When air is breathed out an invisible gas comes out which has the property of turning lime water milky This gas is also formed when a candle burns Combustion to be explained and compared to respiration The part which oxygen plays Blow air into a charcoal fire by means of a pair of bellows The fire becomes more and more brisk The common practice in this country of stirring a fire by blowing air into it by means of a bamboo pipe to be referred to

F—*Hygiene* (*for boys only*)—*16 pages*—

Slightly more advanced than the matters intended for Lower Primary course *Cleanliness Epidemics*

Ordinary accidents—Burns, snake bites, bites of rabid animals drowning

F(*a*)—*Domestic Economy* (*for girls*)—*16 pages*—

Cooking—Good water to be used Every article to be properly prepared and well cleaned and washed before putting it in the cooking pot Cooking pots to be cleaned before use Cooked food to be kept covered Variety of dishes necessary

Meals —Time of meals All to eat at the same time if possible Room for meals to be spacious and clean Dishes and cups Distribution of food Economy and no waste Simultaneous eating saves trouble and ensures economy Evils of eating at separate times Feeding of infants and little children Over feeding and under feeding

Bed-room —Elevated bed necessary, especially in damp rooms Over crowding bad Use of curtains Sunning and washing bedding and clothes Ventilation of rooms Soiling of bedding by little children

Ordinary accidents —Burns snake bites, bites of rabid animals, drowning

G —Drawing (Hand- and Eye-training) —Freehand drawing book Practical Geometry and Mensuration (20 pages)

H —Manual Training optional, except in mixed schools, where girls may have to take up this subject in place of needlework—3 pages —

Clay modelling such as models of balls cylinders, rings and fruits.

H(a) —Needlework (for girls) —Cutting out a *kurta*, sewing on buttons and strings, making button holes, marking

I —School Drill

J —English (optional) —An English Primer with reading lessons on common objects Lessons from a Word book—(40 pages)

STANDARD V —CLASS ABOVE THE UPPER PRIMARY STANDARD OR LOWER CLASS OF MIDDLE SCHOOL—ONE YEAR'S COURSE

Age about 12 years

Class subjects —Reading, Writing, Arithmetic, a Literature book (about 200 pages), Geographical and Historical Readers, including some lessons in Physical Geography (together about 180 pages), Science Reader, drawing (Hand- and Eye training), Practical Geometry and Mensuration alternative with Euclid first 26 propositions of book I, English (optional), Manual work (optional), Needlework (for girls) and School Drill

Reading —More advanced Readers, to be prepared for the Middle School Standard in Literature, History and Geography, of which one half would be read in this year's course

Writing —Writing samples of *khatian* from *chitha*, *jamabandi*, *mahajani khasra* and *rokar* Writing *chalans* for remitting money to treasury or to zamindar's or mahajan's head office

Arithmetic —Up to interest and square root, including the native methods of expressing money, weight and land measure, calculation of prices and wages, mental operations for abridging calculations

The Science Reader for this class to contain—

A —Botany (12 pages) —

Life history of a plant—

(1) How plants obtain their food—

A more detailed study of the functions of the root and leaf Observe the arrangement of leaves to secure the largest area exposed to light. Transpiration

(2) How plants store up food for future use—

(*a* in the stem,
(*b*) in the root;
(*c*) in the seed for future use of the seedling

(3) How plants protect themselves by means of thorns and other devices

B —Natural History (12 pages) —Teeth of certain typical animals

Arrangement of the teeth in the upper and lower jaw respectively of the cat—the prominent *canines*—a characteristic of the carnivora—the function of the incisor—the canine and the molar teeth explained.

Dentition of a ruminant and a rodent compared

Some typical members of the rodent family the rat and the squirrel.

C—Agriculture (20 pages) for country schools, for boys only (alternative with Physics and Chemistry)—

Every Middle School choosing Agriculture as an alternative subject in place of Physics and Chemistry should provide itself with land sufficient for a small garden where each boy can grow a few square yards of some crop Each boy must also make a collection of at least five articles of agricultural interest for the school museum under the teacher s guidance In course of time a complete local collection of soils crops manures weeds oils fibres and other agricultural produce insect and fungus pests, insecticides and fungicides etc may be made

Fertility of soil Lessons on *arahar* and *dhaincha* How saltpetre is made Sugarcane and sugar Foot and mouth disease

D—Physics (10 pages) for town schools, for boys only—
Light—

Light travels in a straight line Shadows

Reflection of light—plane mirror Refraction of light Refraction through a prism

A double convex lens—Formation of images by a double convex lens Use of a lens as a simple microscope

E—Chemistry (6 pages) for town schools, for boys only—
Metals—

General properties of the metals—Lustre—malleability the alloys and their mode of formation liability to rust

The well known metals—Gold silver copper tin lead zinc iron and the alloys brass and *kansa* the different uses to which they are put

F—Hygiene (for boys only) 20 pages—

A short chapter defining terms used and giving some idea of the human body and the functions of nutrition and respiration

Food—Components of perfect food Articles of good food advantages of variety in food Food according to age and occupation

Drink—Water and its sources of supply—How to secure good water Rivers tanks and wells how to be protected from pollution Filters storage of rain water Alcoholic and other drinks

Air—Carbonic acid gas Other substances that pollute the air Air inside and outside of houses Air in towns swamps and in dry and high places Slow poisoning by impure air Natural purification of air how carried on Ventilation in houses

Construction of dwelling houses—Admission of air and sunlight How to keep the premises clean and dry

F(a)—Domestic Economy (for girls)—20 pages—

Feeding bathing and cleanliness pure air ventilation of houses

Management of common ailments Cold, coughs fevers skin diseases indigestion Sick diet

Burns and scalds wounds and bruises

G—Free hand Drawing (Hand and Eye training)—

G(a)—Practical plane geometry including simple practical mensuration of lines and surfaces (25 pages)

G(b)—Euclid alternative with G(*a*) first 26 propositions of 1st Book

H—Manual Training, optional, except in mixed schools where girls may have to take up this subject in place of needlework—3 pages—

Clay modelling—more advanced course

H(a)—Needlework (for girls)—Gathering and sewing on a band darning and herring boning

I—School Drill

J—English, (optional) 60 pages—English Reader More advanced lessons from a Wordbook Composition of simple sentences Translation of short sentences from vernacular into English and *vice versâ*

STANDARD VI—MIDDLE STANDARD—ONE YEAR'S COURSE

Age about 13 years

Class subjects—Reading, Writing, Arithmetic, a Literature book, Geographical and Historical Readers, including some lessons in Physical Geography, Science Reader, Drawing (Hand and Eye training), Practical Geometry and Mensuration alternative with Euclid, Book 1, English (optional), Manual work (optional), Needlework (for girls) and School Drill

Reading—The second halves of the four Readers to be read and the first halves revised

Writing —Revision of subjects of Standard V, writing mortgage deeds and deeds of sale

Arithmetic —The whole Methods of checking ordinary accounts between landlord and tenant and creditor and debtor

Science Reader to contain—

A —Botany (12 pages) —Life history of a plant

How the seeds mature—

(a) Pollination by insects The object of bright colouring of the flower leaves Insects are also attracted by scent Observe how small and inconspicuous flowers club together to become conspicuous *e g* compositæ
(b) Pollination by the wind
(c) Water as carrier of pollen grain

Dispersion of seeds and the object of dispersion—

(a) Winged seeds
(b) Seeds which are scattered by mechanical means
(c) Seeds which are dispersed through the agency of birds and other animals
(d) Dispersion of seed by currents of water

B —Natural History (12 pages) —

Development and metamorphosis of an insect *e g* a butterfly or a silkworm—the pupa and the chrysalis stage etc

Some typical members of the monkey family the common monkey (*bandar*)—the (*hanuman*)

The snakes their habits—mode of progression, how the snake bites—the curved, grooved poison fang

C —Agriculture (24 pages for boys in country schools alternative with Physics and Chemistry) —

Rotation of crops
Feed and keep of cattle
Use of excreta and bones as manure
Segregation of cattle during epidemics

D —Physics (10 pages) for town schools, for boys only — Electricity and Magnetism—

Two kinds of electrification Action of electrified bodies on one another A pith ball electroscope

Directive action of earth on a magnet A simple compass needle Mutual action of similar and opposite poles

Production of electric currents Action of a current on a suspended magnetic needle

E —Chemistry (6 pages) for town schools, for boys only — Elements and compounds, carbon and sulphur

Carbon graphite and diamond the physical properties of each well illustrated and the economical uses to which they are applied What happens when a piece of charcoal is burnt (*Cf* Lesson on the Chemistry of a Candle)

Some ideas of an *element* and a *compound* incidentally conveyed A blade of a knife previously well cleaned is dipped into a solution of sulphate of copper the deposit of metallic copper shown The copper a component of sulphate of copper in a compound the properties of the component elements are entirely changed

A lesson on Sulphur its physical properties, colour brittleness bad conductivity for heat fusibility insolubility in water economic uses etc

F —Hygiene for boys only (20 pages) —

Village conservancy —Disposal of filth and sewage How villages are rendered unhealthy

Cleanliness —Personal and domestic Bathing

Dress —Dress materials Dress according to weather Washing clothes

Exercise and rest —Different kinds of exercise Sleep and its hours Absolute rest in certain cases

Epidemics —Precautions to be taken

Accidents —Burns, snake bites bites of rabid animals drowning bleeding

F(a) —Domestic Economy for girls (20 pages) —

Management of infectious diseases including cholera small pox chicken pox measles

Infection —Disinfection of premises bedding clothes

The sick room —Duties of the sick nurse, food and drinks for the sick

Cooking of articles of sick diet —Necessity of absolute cleanliness in preparing food, including pure water aerated waters, lime water

G—*Drawing* (*Hand and Eye training*)—Freehand drawing

G(*a*)—Practical plane Geometry, including simple practical Mensuration of lines and surfaces (25 pages)

G(*b*).—Euclid, whole of 1st Book, alternative with G(*a*)

H—*Manual Training* (*optional, except in mixed schools, where girls may have to take up this subject in place of needlework*) (*5 pages*)—

Clay modelling—more advanced course

H(*a*)—*Needlework for girls*—Cutting out and making a *piran*, feather-stitching and ornamental marking

I—*School Drill*

J—*English* (*optional*) *60 pages*—Middle English Course as prescribed by the Director of Public Instruction An elementary English Grammar with simple analysis and parsing Composition and translation

APPENDIX F

Statement showing the number of hours to be spent in a week on each subject in the various standards

Names of Subjects	Infant Stages			Standard I	Standard II	Standard III	Standard IV	Standard V	Standard VI	Remarks
	Stage I	Stage II	Stage III							
1	2	3	4	5	6	7	8	9	10	11
I Drawing	2	2	2	2	2	2	2	2	2	Five hours a day for 5 days in the week and 3 hours a day on Saturday give 28 hours which leave 4 hours or more to be allotted to any extra subject such as English religious teaching manual training &c which a school may choose to take up beyond the regular school subjects
II Kindergarten	3	3	2							
III Object Lessons	3	3	2	3	3	2	2			
IV Manual training (optional)				(2)	(2)	(2)	(2)	(2)	(2)	Extra hours
V Needlework, for girls only			(1)	(2)	(2)	(2)	(2)	(2)	(2)	Extra hours
VI Drill, for boys / VIa Drill, for girls	3	3	3	3	3	2	2	2	2	One teacher and [illegible] the [illegible] requirement for [illegible] teacher is supposed to be [illegible] successfully a Lower Primary School and two teachers [illegible] is an Upper Primary School
VII Writing	3	6	6	3	3	1	1	1	1

Total	17	23	24	24	24	24	24	24	24	

APPENDIX G

THE TEACHER'S MANUAL FOR THE LOWER PRIMARY STANDARD (200 PAGES)

1. *Introduction* —A short and simple statement of the principles of the Kindergarten method of training young children (10 pages)
2. The Kindergarten occupations and action songs (8 pages)
3. The requirements of the syllabus for the Infant and Lower Primary standards of vernacular education (10 pages)
4. The school-room and arrangement of children (3 pages)
5. Methods of giving lessons on particular subjects full notes of lessons containing detailed instructions as to how to give lessons on form colour, writing reading, arithmetic, etc, so that the pupils might thoroughly learn the

subjects taught, and that at the same time their senses might be trained, and their power of expression and all the faculties—physical, mental, and moral—be duly developed (162 pages)

6 Qualifications and duties of a good teacher, and his conduct towards his pupils, punctuality and discipline, corporal punishment (6 pages)

THE TEACHER'S MANUAL FOR THE UPPER PRIMARY AND MIDDLE VERNACULAR STANDARDS (250 PAGES)

1 *Introduction* —The principles of Froebel's method, the principles underlying school education, the English Public School system, the Hindu method (20 pages)
2 The requirements of the syllabus for the Upper Primary and Middle Vernacular standards (10 pages)
3 *Class teaching* — Instruction and education, collective instruction, attention to individuals, analysis and synthesis, oral teaching and questioning, the Socratic method, answering, proceeding from the known to the unknown, from the concrete to the abstract, the verbal, material and pictorial illustration, the use to be made of analogy and contrast, the use of the black board, learning by heart, repetition home exercises, examining (30 pages)
4 Methods of teaching particular subjects, together with notes of lessons selected from text books prescribed in science, literature, history, geography, etc, (155 pages)
5 Moral training (5 pages)
6 *Organisation* —The organization of a good school, time tables, the arrangements into sections and classes, the standard of classification, the teaching staff, the apparatus and furniture, the register and account books, drill and recreation sanitation of the school-house, etc (10 pages)
7 The qualities desirable in a pupil, necessity of punctuality, discipline, rewards and punishment, drill as an aid to discipline (15 pages)
8 Qualifications and duties of a good teacher, and his conduct towards his pupils (5 pages)

CALCUTTA,
The 17th April 1900

No 1091T —G, dated Darjeeling, the 7th September 1900

From—E LISTER, ESQ, Under-Secy to the Govt of Bengal, General Dept,
To —The Director of Public Instruction, Bengal

BEFORE dealing finally with the further report of the Vernacular Education Committee, submitted with your letter No 3126, dated the 8th May 1900, the Lieutenant Governor would be obliged by your explaining fully how far the Committee's proposals, in paragraph 15 of the report for the introduction of the Kindergarten system generally in primary schools in Bengal, vary from the system which was tried in the Central Provinces and abolished (*vide* paragraph 7 of the report), what reasons there are for anticipating a different result for the proposed plan, and how far the proposals receive support from any experience in other Provinces

No 2223T, dated Darjeeling, the 17th October 1900

From—A PEDLER, Esq, F R S, Director of Public Instruction, Bengal,
To—The Secretary to the Government of Bengal, General Department

I HAVE the honour to acknowledge the receipt of your No 1091T—G-, dated 7th September, in which you ask me to explain fully how far the proposals made by the Committee appointed to consider the revision of the subjects to be taught in Vernacular Education in paragraph 15 of their report, in which they propose the introduction of the Kindergarten system generally in Bengal, vary from the system which was tried in the Central Provinces and abolished, what reasons there are for anticipating a different result from the proposed plan, and how far the proposals receive support from any experience in other Provinces

2 I would, in the first instance, explain that the statement that the Kindergarten system was tried and abolished in the Central Provinces is not wholly correct The revision of the course of instruction which took place in the Central Provinces about a year ago, excluded the Kindergarten system from the rural primary schools only, and no change was made in the system as carried on in urban schools As explained also in notes on this point previously submitted,* and copy of which is attached, the exclusion of the Kindergarten system was not attempted to be justified on any educational principles whatever, and is regarded by some of the Central Provinces educational officers as rather a retrograde step Exclusion of Kindergarten teaching in rural schools was ordered apparently on three grounds—

(1) the necessity of reducing the amount of instruction owing to the introduction of a half time or half day's system of tuition only instead of a full day's work which had previously obtained

(2) the inferiority of the teaching staff and the inability of the teachers to teach the precise methods of Kindergarten which had been introduced, and

(3) the wish to give larger amounts of instruction in such subjects as Native and European arithmetic, mental arithmetic, bazár accounts, &c

* Memorandum dated 10th November 1899 entitled Recent changes in Primary Education in the Central Provinces signed A P

3 I should wish to explain very clearly that in considering this subject it is desirable to differentiate between Kindergarten principles and Kindergarten practice, or the methods used in carrying these principles into effect

The main educational principle which Froebel laid down was that it was necessary in a child's education to train *all* the faculties of the mind and all the activities of the body from the very beginning, and practically at the same time, so as to make the progress of the child's nature harmonious, broad and complete, instead of one-sided and narrow only In ordinary systems of infant education only one faculty of the mind is taken up, and that is the memory, and the training of the other faculties of the mind and the due exercise of the muscles of the body are usually entirely neglected The memory is trained and strengthened in the earlier stages of ordinary education to such an extent that in after school life it is in a vast number of instances difficult and almost impossible to make the pupils use or rely on any other faculty, and memory and memory alone is the great stand by with large numbers of students In India this is specially the case, and anyone with experience of Indian students knows that such faculties as reasoning powers, observation, grasp of a subject and originality, &c, are lamentably absent among Indian students as a whole I personally believe that this absence is to a considerable extent due to the faulty training which Indian children receive in schools conducted on the present faulty principles of instruction

Froebel's principle is that a child's occupations in school should be so cho en that accuracy, observation, the first principles of reasoning, the possibility of discovering facts by individuals and by individual observation and reasoning are all taught at the same time as the memory is developed and strengthened. All these faculties are cultivated and fostered by the use of certain occupations which in Europe involve the use of the so-called "gifts"

At the same time also nicety and dexterity in handling, accuracy of movement, and obedience to command or discipline, with pleasure in active exertion are taught by the various forms of occupation, like paper folding and cutting, stick placing, pattern making, action songs, drill, &c, &c The occupations, such as the use of gifts, practically develop all the faculties of the mind, and the manual occupations, drill, &c, develop the various activities of the body

4 Kindergarten, too, is practically only a portion of the system of teaching, commonly included under the head of object lessons, for even in the earliest forms of Kindergarten certain objects are given for the children to handle, and they are taught from them to observe certain facts and draw certain inferences This is exactly what is done in the higher classes in what is called object lesson teaching Indeed in many respects the term object lessons is much more comprehensive and far superior to the ordinary term Kindergarten In practice, however, the terms cannot be separated, and the object lessons spoken of in the higher stages of instruction proposed by the Committee are merely more advanced Kindergarten It is much to be regretted, however, that the term Kindergarten is very often misunderstood, and it is thought to be a technical branch of education very difficult to understand and impossible to practise, except after the most elaborate preparation in the way of apparatus and teachers, &c It is, however, submitted that the principles themselves can always be worked up to, and that even an unskilled teacher may be made to help his pupils to exercise other faculties besides that of memory

The word Kindergarten used by Froebel has of course become so familiar in reference to these principles that it is difficult to use any other equally comprehensive term, but the name might with advantage be dropped altogether in the Committee's proposals, and the difference between the system proposed and the old system of training might be said to be the difference between the scientific and complete system of training and the unscientific and fragmentary system

5 The teaching of Kindergarten in Europe has to a great extent been stereotyped into the use of certain gifts, the first six of which are as follow —

Gift 1 —Six worsted balls in the colours of the rainbow, namely, three primary colours—red, blue and yellow, and three mixed—green, violet, and orange

Gift 2 —A wooden ball, a cylinder, and two cubes, one of them with holes and eyelets, also some strings and a stick

Gift 3 —A cube divided equally through all its sides, so that each part represents the whole on a smaller scale, and the one cube makes eight smaller cubes

Gift 4 —A cube divided into eight oblong pieces (or bricks), the length of each being twice the breadth, and the breadth twice the thickness

Gifts 5 and 6 —Cubes divided in various ways different from Gift 4

Other gifts follow, which are used for stick laying and placing, paper folding and cutting, &c, &c

These gifts, which are most useful and appropriate in European schools, have by their extended and prolonged use proved their suitability for European children, but it does not appear that these are the only gifts or the only means of working out Froebel's principles Further, these gifts as ordinarily made are expensive, a set of well made gifts, costing at least Rs 9, and a country made set Rs 5 In English schools also, each pupil has a set of gifts for his own use

Obviously it is impossible in Indian schools to give a set of gifts to each primary pupil, for the total cost of education of a primary pupil averages about Rs 2 8 a year In the Central Provinces one or two such sets are provided in each primary school, but the essence of Kindergarten teaching is that each pupil is able to do all the desired work with his own hands Hence it appeared to me that in the Central Provinces a fatal mistake had been made in prescribing the stereotyped and costly European Froebel's gifts The fact that the gifts are quite foreign to an Indian child's experience and that the pupil ordinarily could not handle the gifts and so actually engage in the object lesson at once rendered success in this precise

experiment in Kindergarten a great difficulty, and almost invited its failure The Central Provinces system must be modified in the future if it is to become a success, and must be made to suit Indian pupils and Indian circumstances and also be made of such a kind that its cost enables every pupil to take part in the exercise

It is open to very grave doubt whether the gifts of coloured worsted balls, wooden cubes, &c, which may and do appeal to European children, will appeal equally to Indian children, and hence when the Committee considered the question of the introduction of Kindergarten they very rightly discarded Froebel's gifts altogether, and while accepting Froebel's principles, they have attempted to work out the application of his principles by the use of purely indigenous materials, and of such a kind that every child can provide its own gifts to illustrate the principles of teaching

Hence the withdrawal of the Kindergarten system from the rural schools in the Central Provinces cannot be taken to represent at all a failure of Kindergarten principles in Indian schools, but it really represents only the want of success of a particular (and for India, in my opinion, a mistaken) form of the application of the principles

6 That this is a correct view of the situation appears to be borne out by the history of the introduction of Kindergarten into the Madras educational work The following is Mr Cotton's description of this in his Quinquennial Review of Education in India —

> Kindergarten training began to receive serious attention in 1875, when Mrs Brander, then Superintendent of the Female Normal School at Madras City, introduced the system into the lower classes of the practising school, and also devoted an hour a week after school hours to the instruction of the Normal students in Kindergarten occupations The system was first recognised in the Grant in Aid Code of 1885 in which three Kindergarten occupations and four action songs were prescribed for the first and second standards in "results" schools for Indian children, and for the third standard also in European schools Grants varying from 2 to 6 annas each for Indian children, and from 2 annas to Re 1½ for European children were allowed for these occupations and songs separately In 1892, the curriculum was altered so as to include as many as six occupations, and pupils were required to answer simple question on the form colour, and other striking qualities of the materials used But as the occupations were taught without the songs and *vice versa*, they came to be practised very mechanically, and beyond some dexterity and an improved knowledge of colour and form, the pupils gained little Hence in 1896 it was ruled that simple stories should be told to the children and that the occupations and action songs should illustrate these stories, and that one consolidated grant should be given for the three subdivisions (stories, occupation and songs) The rate of grant for Kindergarten has since been raised to the scale provided for the second language This has led to an improvement in teaching, and to a larger number of passes In 1896 97, the total number of passes in Kindergarten for "results grants" in Primary school for boys (excluding "salary results" schools) was 1,438 But it is only in the very best Girls' schools and in Training Schools for mistresses, that Kindergarten methods are systematically and intelligently carried out In Training Schools for masters of the Primary and Lower Secondary grade little has yet been done—mainly for want of qualified teachers With a view to supply this want, the Director proposes gradually to make instruction in Kindergarten methods compulsory in all practising schools managed by the Department, and to require the students under training to devote special attention to the matter 'The paltry assignment which alone it has been found possible to make to 'results schools' has led to the neglect of the teaching of optional subjects generally in such schools, and it was partly, with a view to eradicate this evil, that the important changes in the Grant in Aid Code, now under the consideration of Government, were recommended by the recent Conference

Mrs Brander, who is the Madras authority on Indian Kindergarten, has in her new books just published entirely discarded the uses of the European forms of Froebel's gifts

7 The above paragraphs have dealt with the reason for the want of success of the Kindergarten system in the Central Provinces It is, however, also asked what reasons there are for anticipating a different result if this system is introduced into Bengal It has been pointed out that the system proposed by the Committee does not follow at all in the train of the Central Provinces system, and it is proposed to depart entirely from the stereotyped European system, and to introduce simple exercises, which can be made with pieces of string, paper, leaves, coloured cloths, and objects of every day life, such as a piece of wood, a box, a stool, or chair, a table or a school desk, simple lessons about plants, &c (see page 13 of Committee Report, Appendix E, &c.).

No expensive "gifts" are to be given which children would find are quite outside their ordinary lives and experiences, but objects found in every school-house and in every village are to be selected and used in the school and the various faculties of observation, reasoning, descriptive powers, &c, are to be exercised and practised on these familiar objects School work will therefore be really a developed part of their every day life, while habits of accuracy, obedience, &c, will be inculcated by the process of stick laying (in which small and thin pieces of bamboo may be used), and simple physical exercises and action songs (see pages 13 and 14, &c, &c, of Report)

No teacher should have any difficulty in making a child observe the various properties of say a piece of wood, or that some animals walk some have two legs, some four or more legs, that some animals crawl, some fly, &c, &c

Indeed for such teaching no special instruction for the primary school teachers in Bengal is at present possible, though, of course, it is not contended that a properly trained teacher would not secure far better results than an untrained one with the system of instruction which has been proposed

I would ask His Honour to carefully go through the detailed syllabus of instruction proposed by the Committee, and to note that in the great majority of the subjects in which instruction is to be given, everything, which is treated of, almost forms an integral part of every day life in the town or country, as the case may be

8 It is of course neither hoped nor expected that the teachers will all at once teach the new subjects well It is almost certain they will teach them badly, but what is contended is that the teaching cannot be worse than the present absolutely mechanical system of training the memory whereby all the other faculties are dulled at the expense of monotonous parrot like exercises It is also apparently a perfectly sound principle that bad teaching with a good educational system will produce better results than the same bad teaching with an unsound and rotten system Hence the change is urged notwithstanding the absolutely grave difficulties which will have to be faced

9 With regard to the experience of other Provinces in the matter of modern forms of instruction involving the principles underlying the Kindergarten system, that of Madras has already been alluded to in paragraph 6 of this letter, but the following additional information about the Madras system may be again taken from Mr Cotton's report —

The extent to which practical subjects are encouraged by the optional system which prevails in Madras may be learnt from the following extract from the syllabus of study prescribed by the Educational Rules for the fourth or highest standard in primary schools —

Object Lessons or Elementary Science—

(a) To show a fuller acquaintance than in the third standard with (1) familiar animals or animal products, (2) familiar plants or vegetable products, (3) familiar minerals or mineral products, and (4) familiar facts regarding the weather Twenty four lessons to be prepared, six from each subdivision

(b) To answer questions more difficult than in the third standard on the lessons prepared with reference to (1) the food, habits, and uses of the animals, their classification and structure, and the adaptation of their structure to their food and habits, (2) the cultivation or mode of growth of the plants, their general structure and uses, and (3) the origin or preparation of the mineral substances and their chief properties and uses

(c) To answer simple questions on the chief characteristics of the classes to which the animals plants, and minerals belong and on the chief points of resemblance between those of the same class and of difference from those of other classes The animals plants and minerals shall be selected from those in the neighbourhood with which the pupils may be expected to be familiar, and the examination shall have reference, in part at least, to actual observations made by the pupils during the year

"*Free hand Drawing*

Free hand drawing on paper from enlarged copy on the black board or from a large diagram, curved figures, ornamental forms, common objects, flowers, leaves, &c

"*Needlework* (for girls in Native schools)—

(a) To cut from a pattern or by measurement, and to show ability to make a jacket and a petticoat of full size suitable to a girl of from six to twelve years of age

(b) To show one finished garment of each kind done in the course of the year

(c) To work button holes
(d) To darn an old cloth

"*Geography* —

(a) Shape and size of the earth, simple notions regarding the relations of sun, moon, and earth
(b) The oceans and continents of the world
(c) The geography of the Madras Presidency, Coorg, Travancore, Mysore, Cochin and Hyderabad, as in any approved book, also the important physical features of the rest of India

"*History of India* —

A very elementary knowledge of the leading periods of the history of India down to 1858 with such a knowledge of the geography of Asia as may be necessary for the intelligent study of the subject

"*Agriculture* (for boys only)—

The elements of agriculture as in any approved book

"*Mensuration* (for boys only)—

Definitions of, and connected with, the various figures named below

(a) Lengths—linear measures, English and Indian Practical use of the chain, tape and rod
(b) Areas— square, rectangle

"*Hygiene and Elementary Sanitary Science*—

Elements of hygiene as in any approved book The pupil will be expected to answer such simple questions on sanitation as would come within his daily experience "

In order to induce managers of "results schools to teach optional subjects, the scale of "results grants fixed for some of them is raised from time to time Thus during the last five years the grants for kindergarten and for object lessons and elementary science have been raised to the amount fixed for the second language, and in the fourth and higher standards, drawing and agriculture now carry a higher grant than the second language, geography, or history As tested by the results of the examinations, geography and hygiene are the most popular of the optional subjects During the last five years the number of passes in agriculture has risen from 567 to 829, and the number of passes in drawing from 180 to 736 In compliance with a suggestion from Government, instructions have recently been issued for the improvement of the teaching in hygiene

10 If His Honour will compare the subjects detailed above with the syllabus given by the Committee in their Report, it will be found there is a remarkable agreement not only in the actual subjects themselves, but even in the detailed parts of each subject which are required in the Madras Code and proposed Bengal Code This has been purely accidental, for the details of the Madras Code were not known to me or to the Committee when the Report was written

11 In the case of Bombay I have had difficulty in ascertaining the full facts They appear to be briefly as follows —

In the case of the primary schools in Bombay in the standard issued in 1897 for the infant classes (boys), the following subjects are included—

(c) simple instruction in the form, colour and use of common objects (i e, apparently modified Kindergarten training)
(e) recitation and singing in unison of simple household songs,
(f) infant drill and exercises

And in the Girls' schools needle work is required

Payments are also made according to a notification of 1890 for passing in drawing in vernacular schools, while at higher stages in vernacular schools geometrical drawing is introduced

Hence it will be seen that in Bombay also much attention is paid to practical or modern subjects in elementary schools

12 In the case of the Punjab, object lessons, physical science, and drawing have for years formed part of the optional subjects in the curriculum of the vernacular and anlgo vernacular schools Object lessons and agriculture appear to have lately been made compulsory Mr Cotton also writes in his report about the Punjab—

" In Primary schools, practical subjects occupy a fair place A course of objects lessons has been introduced into each class during the period under review Agriculture is taught in every Board school, the teachers being required to take their pupils out into the fields, to illustrate the lessons by reference to the actual operation of field work A little practical mensuration is also taught, though complaint is made that the simple apparatus for this is sometimes lacking "

13 In the case of Burma the following are the remarks made by Mr Cotton —

In Burma, where Missionary influence is strong, practical subjects of infant education have taken root Kindergarten methods are now adopted in 12 schools, where the total attendance was 178 in the first year class and 97 in the second year class There is a Kindergarten class in the Government Normal School at Moulmein, with 20 pupils, to enable the students to acquire a practical knowledge of the system During last year Slojd was introduced into the same school Vocal music is taught in four schools, which passed altogether 548 pupils in this subject in 1896 97 Mr Sheriff, of the Teachers' Institute at Rangoon, is active in training teachers in the Sol fa system Calisthenics and musical drill are also practised at several of the Girls schools conducted by Missionaries, and in some of the Boys' schools there are classes for carpentry, weaving, shorthand, commercial arithmetic and other technical subjects In 1896, Sir E Buck summoned a Conference to discuss the question of introducing the elements of agriculture and science into the schools generally Arrangements have been made for introducing these subjects, and for training teachers in them as soon as suitable text books are ready

Drawing is now taught in 22 Anglo Vernacular schools compared with 18, three years ago, the increase being due to the introduction of this subject into schools under private management Shading from the cast is at present not insisted upon In 1896 97, the total number of passes was 1,219 of which 219 were from St Paul's Roman Catholic Mission School at Rangoon, and 171 from the Rangoon Collegiate School

During 1896 97, advantage was taken of the aptitude of the Burmans for drawing to Institute Teachers certificates in that subject Two grades of instruction were drawn up, a Primary and a Secondary the former qualifying for grants in all Vernacular schools and the Primary departments of Anglo Vernacular schools, the latter in the Middle and High departments of Anglo Vernacular schools A beginning was made with free hand and geometrical drawing in each grade Owing to the late period of the year it was only possible to open classes at three centres At Prome and Pegu the services of the drawing master of the Municipal school were utilised while at Rangoon a special class was held in connection with the Teachers' Institute With a view to bringing drawing within the reach of all lay schools, special provision was made for attaching itinerant teachers to the classes, where they received daily instruction for one month At an examination held in November, the total number of passes among itinerant teachers was 129 The experiment will be extended next year, and it is hoped that it will have the effect of popularising the subject of drawing in Vernacular schools

14 Even in small Provinces like Coorg and Berar primary education is now being made more practical, as can be seen from the following extracts from Mr Cotton's report —

Similarly, in Coorg the system of general education closely follows that in Madras The Secondary course includes elementary science, hygiene, agriculture and mensuration as optional subjects with needlework for girls Nothing is said about drawing The Primary course includes hygiene, mensuration, agriculture, and freehand drawing as optional subjects, also with needlework for girls

In Berar again, the general system of education closely follows that in Bombay The course for all classes of schools was revised in 1896 In Primary schools easy object lessons are prescribed for the first standard, and the recitation of poetry and singing in unison for the first two standards the 'Way to Health' and elementary physical geography come into the two highest standards, with mensuration as an optional subject

15 It is contended, therefore, there are abundant precedents in India for the Committee's attempt to make Primary education in Bengal of a more practical nature, and to use modified Kindergarten principles (though the name Kindergarten might be omitted) as the basis of the lower stages of education Also, so far as can be seen, these practical methods of education in India have proved a success At all events in most provinces where they have been tried there is no talk of going back to the old methods Hence the Committee have looked forward with confidence to a successful result if the scheme proposed by them is adopted in Bengal

WEATHER AND CROP REPORT

For the week ending the 31st December 1900

Burdwan.—Rainfall at Sadar 0 20, Kalna 0 21, Katwa nil, Raniganj 0 10 Weather cloudy Harvesting of *aman* and pressing of Sugarcane going on Fodder and water sufficient Common rice selling as follows —

	Srs	
Sadar	12	per rupee
Kalna	$11\frac{5}{16}$	
Katwa	13	
Raniganj	$13\frac{1}{2}$	

Birbhum.—No rain Weather cloudy Harvesting of *aman* continues Standing crops doing well Price of rice at Sadar $13\frac{1}{2}$ and at Rampur Hat $14\frac{1}{2}$ seers per rupee Fodder sufficient

Bankura.—Rainfall at Bankura 0 17, Vishnupur 0 48 Weather generally cloudy Threshing going on Sugarcane and *rabi* doing well Fodder and water sufficient No cattle-disease reported Price of common rice at Bankura $13\frac{1}{2}$ seers and at Vishnupur $11\frac{1}{2}$ seers per rupee

Midnapore.—Rainfall at Sadar 0 61, Contai 0 11, Tamluk 0 04, Ghatal 0 13 Fodder sufficient except at Contai *Aman* being reaped Common rice sells as follows —

	Srs	
Sadar	14	per rupee
Contai	15	
Tamluk	1[illegible]$\frac{1}{2}$	
Ghatal	$10\frac{7}{8}$	

Hooghly.—Rainfall at Sadar 46, Serampore 25, Arambagh 33 Weather seasonable Prospect of *rabi* good Harvesting of *aman* nearly finished Common rice sells at 10 seers 15 chitaks per rupee

Howrah.—Rainfall at Sadar 11 Ulubaria 20 Harvesting of *aman* going on Fodder and water sufficient Common rice sells at $10\frac{1}{4}$ seers per rupee

24-Parganas.—Rainfall 0 05 Weather seasonable Standing crops doing tolerably well *Rabi* crops growing Harvesting of *aman* going on No cattle disease Fodder and water sufficient Common rice sells as follows —

	Srs
Sadar	10 per rupee
Barasat	10 per rupee
Basirhat	Report not received
Diamond Harbour	$12\frac{1}{16}$ per rupee

Nadia.—Rainfall at Sadar 0 01, Ranaghat 0 08 Weather seasonable Drizzling in Sadar and Ranaghat More rain is wanted for standing crops which are suffering from drought Harvesting of *aman* and threshing of *dhan* continuing Fodder and water sufficient Common rice sells as follows —

	Srs.
Sadar	Report not received
Kushtia	$13\frac{1}{8}$ per rupee
Meherpur	$12\frac{8}{16}$ per rupee
Chuadanga	12 per rupee
Ranaghat	$10\frac{1}{2}$ per rupee

Murshidabad.—No rain Weather seasonable and cloudy Harvesting of *aman* still continues *Kalai* is being harvested Prospects of *rabi* crops unfavourable in parts, rain wanted No cattle-disease Fodder and water sufficient Common rice sells as follows —

	Srs	
Sadar	13	per rupee
Lalbagh	14	
Kandi	15	
Jangipur	15	

Jessore—Rainfall at Sadar 0 14 Weather seasonable Prospects of standing crops not favourable Harvesting of *aman* continues Fodder and water sufficient, Common rice sells as follows —

	Srs
Sadar	14 per rupee
Jhenida	Report not received
Magura	13½ per rupee
Narail	13$\frac{5}{16}$ per rupee
Bangaon	13$\frac{5}{16}$ per rupee

Khulna.—Rainfall nil Weather seasonable Harvesting of *aman* paddy continues Prospects favourable Fodder and water sufficient Common rice sells as follows —

	Srs
Sadar	13¾ per rupee
Bagerhat	13$\frac{5}{16}$ per rupee
Satkhira	10½ per rupee

Rajshahi—Weather seasonable Prospects of standing crops fair Harvesting of winter rice going on Condition of cattle good Fodder and water ample Common rice selling at 14½ seers a rupee

Dinajpur—Rainfall nil Weather seasonable Harvesting of *aman* progressing No cattle disease Fodder and water plentiful Rice selling at Sadar 16 seers and at Thakurgaon 13 seers per rupee

Jalpaiguri—Rainfall nil Weather seasonable Harvesting of *haimanti* paddy going on Condition of *rabi* crops satisfactory Common rice sells at 13 seers a rupee Fodder and water sufficient

Darjeeling—Rainfall at Darjeeling 0 25, Kurseong 04, Siliguri 4, Kalimpong nil Weather seasonable Days cloudy, nights cold and frosty *Bara marua aman dhan, kalai* being harvested *Phapor, tori*, wheat, barley progressing *Terai—haimanti* paddy being harvested Harvesting of potato, sugarcane finished Tobacco, mustard progressing Coarse rice sells as follows —

	Srs
Hills	9 per rupee
Terai	14 per rupee

Bhutia sells at Darjeeling and Kalimpong 20 seers per rupee

Rangpur—Rainfall nil Weather seasonable Harvesting of *aman* going on Fodder and water sufficient Price of common rice stationary

Bogra—No rain Harvesting of *aman* going on *Rabi* sowings continue in places Prospects moderate Fodder and water sufficient Common rice sells at 14 seers a rupee

Pabna—Rainfall nil Weather seasonable Harvesting of winter paddy nearly finished *Rabi* crops likely to suffer through want of rains Cattle disease reported from Chatmohar Prices stationary Fodder and water sufficient

Dacca—Rainfall at Sadar nil, Narayanganj nil, Munshiganj nil, Manikganj 02 Weather seasonable Prospects of crops fair No cattle disease Fodder available Common rice 12 seers per rupee

Mymensingh—Rainfall nil Weather cloudy during morning Harvesting of *aman* paddy nearly finished Transplantation of *boro* commenced Fodder sufficient Water available Common rice sells as follows —

	Srs
Sadar	10½ per rupee
Jamalpur	11⅝ per rupee
Kishorganj	11¼ per rupee
Tangail	11 per rupee
Netrakona	11$\frac{5}{16}$ per rupee

Faridpur—No rain Weather seasonable State and prospects of crops good Common rice sells at 12½ seers a rupee

Backergunge—Rainfall nil Weather seasonable Prospect of crops good Common rice sells at 10½ seers (old) *aman* and 12 seers (new)

Tippera—No rain Weather seasonable Harvesting of *aman* nearly over Reaping of *rabi* crops begun in places Fodder and water available Common rice averages 12 seers 7 chitaks.

Noakhali—No rain Weather seasonable. Harvesting of *aman* continues Prospects good Cattle-disease still prevails in Lakhipur Fodder and water sufficient Common rice sells at 15 seers *aus* and 18 seers *aman* per rupee

Chittagong—No rain Prospect of *aman* crop not favourable owing to insufficient rain Water and fodder sufficient Common rice 12½ seers per rupee

Patna—Rainfall at Sadar 0 13, Bihar 04, Dinapore 0 13, Barh 0 20, Bikram 0 12 Harvesting of paddy almost completed *Rabi* doing well Poppy germinating Pressing of sugarcane continues No cattle disease Fodder and water for cattle sufficient Common rice in Patna sells at 16 seers a rupee

Gaya—Rainfall at Sadar 72, Jahanabad 32, Aurangabad 34 Harvesting of paddy nearly over *Rabi* doing well Common rice sells at 13½ seers per rupee

Shahabad—Rainfall at Sadar 0 53, Buxar 0 65, Bhabhua 0 40, Sasaram 32, Dehri 0 32 Weather cold and cloudy Rainfall of the week has done much good to *rabi* Threshing of paddy and pressing of sugarcane going on. Fodder and water sufficient Rice 12 seers a rupee at Sadar

Saran—Rainfall at Sadar 0 33, Siwan 0 35, Gopalganj 0 20 Weather seasonable but cloudy Standing crops good *Rabi* much benifited by rain Poppy backward but good. Fodder and water sufficient Common rice 15$\frac{1}{16}$ seers, *makai* 23 seers per rupee

Champaran—Rainfall at Sadar 35, Bettiah 16 Prospects of *rabi* and poppy good Threshing of paddy going on Prices of common rice and maize at Sadar are 15½ and 20½ seers per rupee, respectively

Muzaffarpur—Rainfall at Sadar 14 Hajipur not received Sitamarhi 08 Prospects of crops excellent Prices are—Common rice 14 seers, wheat 13 seers, barley 20 seers, maize 24 seers, gram 15 seers, *arhar* 14 seers, and *marua* 25 seers a rupee

Darbhanga—Rainfall at Sadar 0 09, Samastipur 03 Madhubani 0 23 Harvesting of paddy is almost over *Rabi* doing well Fodder and water sufficient No cattle disease reported Common rice sells as follows—

	Srs	
Sadar	16½	per rupee
Samastipur	16	
Madhubani	16¼	

Monghyr—Rainfall at Begusarai 0 15 Weather cold and cloudy Harvesting of paddy nearly completed Prospect of standing crops good Common rice sells as follows—

	Srs	
Sadar	14¾	per rupee
Begusarai	15	
Jamui	Report not received	

Bhagalpur—Weather cold Sky cloudy Winter rice is being reaped Sugarcane is being pressed No cattle disease Fodder and water sufficient Prices stationary

Purnea.—Rainfall at Purnea 0 11, Kishnaganj and Araria nil Weather seasonable Harvesting of *aghani* rice still continues Prospects of *rabi* crops good No cattle disease. Fodder and water sufficient Common rice sells as follows:—

	Srs.	
Sadar	16	per rupee.
Kishanganj	14	
Araria	17	

Malda.—Rainfall nil. Weather cold and occasionally cloudy Harvesting of winter rice still going on *Kalai* and mustard ripening Other *rabi* crops doing well but rain water is much needed. Average price of rice stationary Fodder and water sufficient

Sonthal Parganas—Weather cold and cloudy Harvesting of winter rice crop still continues. State of standing *rabi* crops promising Cattle disease reported from Godda Fodder and water-supply sufficient. Average price of rice 15 seers and that of maize 20 seers 10 chitaks per rupee

Cuttack.—Rainfall at Kendrapara 0 03 Weather seasonable. Sugarcane and *guru sarad* being harvested. *Rabi* in flowers and pods *Dalua* and tobacco growing Want of

rain felt in places. Condition of cattle good Fodder and water sufficient Common rice sells as follows —

	Srs ch	
Sadar	14 7	per rupee
Jajpur	14 7	per rupee
Kendrapara	17 1	per rupee
Banki	Report not received	

Balasore —Rainfall nil *Sarad* and *Landha* being cut and threshed *Dalua* growing well Sugarcane cutting continues *Rabi* crops are flowering Cotton being gathered. Rice sells at 15¼, 14¼ and 16½ seers per rupee in interior, Balasore and Bhadrak, respectively Fodder and water sufficient

Angul —Rainfall nil Weather cloudy Harvesting of *til* and *rabi* crops and crushing of sugarcane continue Common rice selling at 20 and 13½ seers per rupee in the markets of Angul and Khondmals, respectively Fodder and water sufficient

Puri —Rainfall nil Weather seasonable *Sarad* paddy being harvested Sowing of *dalua* and *mung* is in progres Pressing of sugarcane continues Winter *mandia*, *kulthi* and other miscellaneous crops doing well Fodder and water sufficient Price of rice stationary

Hazaribagh —Rainfall at Sadar 90 Giridih 13 Weather cold and cloudy Fodder and water sufficient Common rice sells at Sadar 14 to 15 seers and at Giridih 14½ seers per rupee

Ranchi —Rainfall 0 38 Weather cold and cloudy Prospects of *rabi* crops much improved by rainfall during the week Rice sells at Sadar 17 seers per rupee No Cattle disease reported Fodder and water sufficient

Palamau —Rainfall 1 56 Weather cloudy *Rabi* progressing well Cattle-disease continues in places Rice selling at Sadar 12 seers 6 chitaks per rupee

Manbhum —Rainfall at Sadar 0 26, Gobindpur 0 05 Weather cloudy Prospects of crops on ground good Fodder and water sufficient Cattle disease reported from Jhawda, Topchanchi and Katras Average price of common rice at Sadar 14 seers 6 chitaks and at Gobindpur 13 seers per rupee Supply sufficient

Singhbhum —Rainfall 26 *Rabi* crops doing well Average price of rice is 17 seers 1 chitak in the district, at Chaibassa 16 seers

General Summary —There was some rain during the week almost in all districts of the Burdwan Division, Bihar and Chota Nagpur as well as in Nadia, Jessore, Darjeeling Dacca, and Cuttack The rain has been beneficial to the *rabi* crops in Bihar More rain is, however, needed in Nadia and Cuttack It is also badly wanted in Murshidabad, Pabna and Malda The harvesting of winter rice is being completed *Rabi* crops are generally in good condition except in Murshidabad In Bihar the poppy crop is doing well The pressing of sugarcane is in progress Cattle-disease reported from five districts Fodder generally sufficient The price of common rice has fallen in 11 districts, risen in 14, and is stationary in the rest (21)

By order of the Lieutenant-Governor of Bengal,

F A SLACKE,

Secretary to the Govt. of Bengal

	%
The mean relative humidity	76
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	71
	Inches
The total fall of rain from 23rd to 29th December 1900	0 05
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0 01
The total fall from 1st January to 29th December 1900	89 32
The average fall of the corresponding period for 24 years, Surveyor-General's Office	65 24

The mean pressure, temperature, &c, are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground

The barometer readings are corrected approximately to those of the standard, Newman's No 86, formerly at the Surveyor-General's Office

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph

The mouth of the rain-gauge is one foot above the ground.

(a) The decrease is due to the running in the corresponding period of 1899 of two extra troop trains from Dockyard to Umballa Cantonment.
(b) The decrease is chiefly due to heavier upward despatches of food grains in the corresponding period of 1899

Added No of passengers 46 434 and deducted Rs 351 }
† Do Mds 3 89 182 and 14 229 } On account of difference between the approximate and audited figures for the weeks ended 27th October and 3rd November 1900

F A SLACKE,

Secy to the Govt of Bengal

NOTIFICATION—No 156For

The 4th January 1901—Mr B B Osmaston, Deputy Conservator of Forests (transferred from the North-Western Provinces and Oudh, *vide* Notification No $\frac{98 F}{37-17}$, dated the 13th December 1900, issued by the Government of India Department of Revenue and Agriculture) is posted to the charge of the Chittagong Forest Division, with effect from the 28th December 1900

Chittagong

The services of Mr E P Stebbing, Deputy Conservator of Forests, Chittagong Division are placed at the disposal of the Government of India, Revenue and Agricultural Department, with effect from the 28th December 1900, the date on which he made over charge of the Chittagong Division to Mr B B Osmaston

F A SLACKE,
Secy to the Govt of Bengal

NOTIFICATION—No 157

The 8th January 1901—The Lieutenant Governor is pleased to appoint, under section 2 of the Indian Forest Act, VII of 1878, the Deputy Commissioner of the Sonthal Parganas and the Subdivisional Officers of the Rajmahal and Godda subdivisions of the Sonthal Parganas district to be "Forest Officers" to carry out the purposes of the said Act in respect of those "protected" forests lying within the limits of their respective jurisdictions which are not under the immediate control of the Forest Department, and to empower them to compound offences described in section 67 of the said Act as amended by section 13 of Act V of 1890 in respect of Forest Offences committed within the areas specified

Sonthal Parganas

The Lieutenant Governor is further pleased, under section 75 of the said Act and in continuation of notification dated the 14th October 1890 to prescribe that the officers mentioned in the first column of the following schedule shall exercise within their respective charges the powers of "Forest Officers" under the sections of the Forest Act mentioned in the second column of the same, opposite each class of officers respectively —

Class of officers empowered	Section of the Act under which powers are given	Brief description of nature of powers conferred
1	2	3
I —The Deputy Commissioner of the Sonthal Parganas district and the Subdivisional Officers of Rajmahal and Godda	33	Power to permit prohibited acts in protected forests
	60	Power to direct release of property seized
	82	Power to sell forest produce for Government dues
II —The Deputy Commissioner of the Sonthal Parganas district, the Subdivisional Officers of Rajmahal and Godda, all Deputy Rangers, Foresters and Forest Guards subordinate to any officer of class I	52	Power to seize property liable to confiscation
	55	Power to take charge of Government or confiscated property
	53	Power to arrest without warrant in certain cases
	69	Power to seize and impound cattle trespassing
	82	Power to take possession of produce under Government lien

For the purposes of notification, dated the 23rd October 1880, as amended by notification, dated the 23rd September 1889, the Lieutenant Governor is pleased to direct that the "Divisional Forest Officers" in rule 2 of that notification shall include the Subdivisional Officers of Rajmahal and Godda in the Sonthal Parganas district, and "the Conservator of Forests" in rule 4, the Deputy Commissioner of that district

F A SLACKE,
Secy to the Govt of Bengal

NOTIFICATION—No 161For

The 8th January 1901 —The Lieutenant-Governor is pleased to make the following rules under section 51 of the Indian Forest Act, VII of 1878, as amended by Act V of 1890, for the salving, collection and disposal of drift, &c, timber in the districts of Jalpaiguri and Darjeeling —

Jalpaiguri and Darjeeling

1 All timber in pieces exceeding 2 feet in girth and 4 feet in length, found adrift, beached, stranded or sunk in the areas defined by Notification dated the 3rd November 1879, as modified by Notification dated the 18th July 1887, that is to say, on the following rivers in the districts of Darjeeling and Jalpaiguri, together with their tributaries, so far as they flow through British territory down to the southern boundary of the districts —

(1) Mechi river,	(6) Jaldaka,	(11) Kalejani,
(2) Chenga,	(7) Dudua,	(12) Darsi,
(3) Balasun,	(8) Mojuai,	(13) Raidak,
(4) Mahanadi,	(9) Torsa,	(14) Kalkoli,
(5) Tista,	(10) Buri Torsa,	

may be salved by any person provided that nothing in this rule shall be held to prevent the Forest Officer contracting with the salvers to collect the wood and timber at certain places or leasing the right of collection and disposal at rates agreed on by the parties, and no salvage rate shall be claimable in addition to any rate paid under such contract

2 The salver shall intimate the fact that he has salved wood or timber to the Divisional Forest Officer in charge of the drift operations, or to the nearest police station, or to such police or other officer or subordinate as the Divisional Forest Officer may from time to time direct to receive such reports, every such police or other officer or subordinate shall be bound to give a receipt to the person so intimating, and report the same, without unnecessary delay, to the Divisional Forest Officer in charge of the forest division to which the control of the river pertains

3 The following salvage rates shall be payable by the Forest Officer to the salver —

(*a*) For salvage *in situ*—10 per cent of the value of the wood salved, as adjudged by the Forest Officer

(*b*) For salvage and transport to depot—25 per cent of the value of the wood salved as adjudged by the Forest Officer

The Forest Officer may fix any higher rate, not exceeding twice the above rates, for salving or for salving and transport to depot, on any portion of a river where such salving is unusually difficult or dangerous, or where any depot notified by the Forest Officer under section 45 of the Act is situated at a distance of over five miles from where the salving actually took place

4 No person shall, without permission in writing of the Forest Officer, cut up, remove, conceal, burn, mark or efface or alter any mark or marks on, or sell or otherwise dispose of, any wood or timber subject to those rules, except in accordance with their provisions

5 Any person who shall infringe any of the provisions of these rules shall be punished with imprisonment which may extend to six months, or with fine which may extend to five hundred rupees, or with both

NOTIFICATION—No 1601 R

The 8th January 1901 —Whereas a settlement of land revenue is about to be made in respect of estate Lohana Kuarchak, touzi No 987, Pargana Kasijora, in the district of Midnapore

Midnapore

Under the powers conferred upon him by section 101 (2) (*d*) of the Bengal Tenancy Act, VIII of 1885, as amended by the Bengal Tenancy (Amendment) Act, III (B C) of 1898, the Lieutenant-Governor of Bengal is pleased to direct that a survey shall be made and a record of rights prepared in respect of all lands included within the boundaries of the said estate

The particulars to be recorded in the said survey and record of rights shall be the following, viz —

(*a*) The name of each tenant or occupant

(*b*) The class to which each tenant belongs that is to say, whether he is a tenure-holder, raiyat holding at fixed rates, settled raiyat, occupancy raiyat, non-occupancy raiyat or under-raiyat, and if he is tenure holder, whether he is a permanent tenure holder or not, and whether his rent is liable to enhancement during the continuance of his tenure

(*c*) The situation and quality and one or more of the boundaries of the land held by each tenant or occupier

(*d*) The name of each tenant's landlord

(*e*) The rent payable at the time the record of rights is being prepared

(*f*) The mode in which that rent has been fixed whether by contract, by order of a Court, or otherwise

(*g*) If the rent is a gradually increasing rent, the time at which, and the steps by which, it increases

(*h*) The special conditions and incidents, if any, of the tenancy

(*i*) If the land is claimed to be held rent free, whether or not rent is actually paid, and if not paid whether or not the occupant is entitled to hold the land without payment of rent, and, if so entitled, under what authority

GENERAL DEPARTMENT—(ECCLESIASTICAL)

Notifications, Rules, and Orders as to Marriages, Baptisms and Burials

Calcutta, the 8th January 1901

I —NOTIFICATIONS

No 118 —In exercise of the power conferred by section 85 of the Indian Christian Marriage Act, XV of 1872, the Lieutenant Governor is pleased to declare that, in every place in Bengal to which the said Act applies and for which a District Judge has been appointed under the Bengal, North Western Provinces, and Assam Civil Courts Act, XII of 1887, such Judge shall be deemed to be the District Judge for the purposes of the first mentioned Act

No 119 —In exercise of the powers conferred by section 62 of the Indian Christian Marriage Act, XV of 1872, the Lieutenant Governor is pleased to direct—

(*1*) that the register book referred to in that section shall be kept in the first form prescribed in Schedule IV to the said Act, and

(*2*) that the extracts referred to in that section shall be made in the form prescribed in Appendix 1 to this Notification, and shall be deposited in the office of the Registrar General of Births, Deaths, and Marriages on the 31st December of each year

II —RULES

No 120 —In exercise of the powers conferred by sections 82 and 83 of the Indian Christian Marriage Act, XV of 1872, the Lieutenant Governor is pleased to fix the following fees and to make the following rules for the disposal of such fees, the supply of register books, and the preparation and submission of returns of marriages solemnised under the said Act

1 Fees shall be levied and disposed of in the manner prescribed in the following table —

For what purpose levied	To be levied— By Marriage Registrars	To be levied— By Licensed Ministers	To be levied— Under sections 37 61 63 or 64	How fees to be disposed of
1	2	3	4	5
	Rs A P	Rs A P	Rs A P	
(1) For receiving each notice of marriage	1 0 0	1 0 0		Fees levied by Marriage Registrars must be paid into the Government Treasury Fees levied by other persons may be retained by them Marriage Registrars are authorised to remit any portion not exceeding three fourths of the fees in cases where they may consider the parties unable to pay
(2) For publishing each notice of marriage	2 0 0	2 0 0		
(3) For the issuing of each certificate by a Marriage Registrar	5 0 0		0 4 0	
(4) For registering each marriage by a Marriage Registrar	3 0 0			
(5) For every protest against or prohibition of the issue of a marriage certificate by a Marriage Registrar	10 0 0			
(6) For allowing a search to be made in the marriage register book or for searching certificates duplicates or copies for a period of not more than one year or (in cases under sections 37 61 63 or 64) two years	1 0 0	1 0 0	0 8 0	
(7) Ditto for every additional year	0 4 0	0 4 0	0 2 0	
(8) For giving copies or duplicates of certificates	1 0 0	1 0 0	0 4 0	

2 (*1*) Registers and forms shall whenever required be supplied to Marriage Registrars by the Superintendent of Stationery free of charge

(2) One full set of registers and forms shall be supplied by the Superintendent of Stationery free of charge to licensed ministers and to persons authorised to grant certificates of marriages between Native Christians

Supply of registers and forms on payment.

3 (1) Registers and forms required by any person referred to in sub rule (2) of rule 2 after one full set has been furnished under that sub rule may be supplied by the Superintendent of Stationery on payment being made for the same out of the fees received by such persons under rule 1

(2) When the Superintendent of Stationery receives an indent under sub-rule (1), he shall intimate to the indenting officer the cost of the registers and forms required

(3) The indenting officer must send the amount of such cost to the nearest civil treasury, with a chalan, in duplicate, stating the date of the Superintendent's intimation

(4) One copy of such chalan shall be retained in the treasury, and the other shall be returned, duly receipted, to the remitter for transmission to the Superintendent of Stationery

(5) On receipt of the receipted chalan, the Superintendent shall comply with the indent

Indents when to be submitted to the Superintendent of Stationery direct and when through another officer

4 (1) Indents for registers and forms required by the Registrar of the Archdeaconry, the Senior Chaplain of the Church of Scotland, the Most Reverend Archbishop Dr Paul Goethals, S J, or the Vicar General of the Portuguese Missions in Bengal, shall be submitted by them direct to the Superintendent of Stationery

(2) Indents for registers and forms required by other officers shall be submitted by or through the Commissioner of the Division, or the Senior Marriage Registrar, Calcutta, to the Superintendent of Stationery

Forms of indent

5 The forms prescribed in Appendices VIII *a* to VIII *d* shall be used for indents

Certificate on returns of solemnisation of marriages

6 (1) Every return submitted under sections 29, 30 or 31 of the Indian Christian Marriage Act, 1872, shall have endorsed on it a certificate of truth in the form prescribed in Appendix IV

(2) Such certificate must be written or printed on the face of the form on which the returns are made, and the number of entries recorded must be mentioned in the certificate

Certificates of no occurrence

7 If during any quarter no marriages have been recorded, a certificate of no occurrence in the form prescribed in Appendix V shall be forwarded both by the officers who are required to furnish returns of marriages and by those who are required by sections 34, 55 and 56 of the said Act to submit certificates of marriages in original

Separate returns for each quarter

8 Returns of marriages for each quarter shall be kept distinct

Time for sending returns to Registrar General

9 The officers to whom returns of marriages are submitted and who are, by sections 29, 30 and 31 of the said Act, entrusted with the duty of forwarding a copy of such returns to the Registrar General, shall perform that duty within two months of the end of the quarter to which the returns relate

III—ORDERS OF GOVERNMENT

MARRIAGE RETURNS

No returns other than those prescribed by the Indian Marriage Act are required.

The procedure to be observed in the submission of the original certificates of marriages, by ministers of religions other than those who are empowered to submit returns, and by Marriage Registrars is laid down in the Indian Marriage Act and shall be observed

BAPTISM RETURNS

Returns of baptisms.

1 Every minister, of whatever denomination, who baptises European Christians, *i e*, all Christians of European birth or descent, or of mixed European and native descent, and Armenian Christians shall record such baptisms in the register to be kept by him for the purpose

To facilitate the filling in of the quarterly returns (forms specified in Appendix II) it will be found convenient to adopt for the register the form given in Appendix VI

Baptisms by laymen.

2 As the Government desire to possess a record of all baptisms of European, Eurasian and Armenian Christians solemnised by the laity, and not only of those solemnised by the clergy, all magisterial officers are required to report every baptism by laymen within their several jurisdictions to the Registrar General through the Divisional Commissioners. The Magistrate will enter such baptisms in a register in the form given in Appendix VI to be kept by him for the purpose

Exception—When a layman solemnises a baptism in a church and the rules of that church require that an entry of such baptism shall be made in the church register, it will suffice to make such entry, and a report thereof need not be made by the District Magistrate

Quarterly returns of baptisms.

3 (1) A quarterly return showing all baptisms of European and Armenian Christians, solemnised in whatever church or other place, shall be submitted by every clergyman of the Churches of England, Rome, Scotland and Armenia to the authority to whom he submits his quarterly return of marriages under Act XV of 1872

(2) A quarterly return of all baptisms of European and Armenian Christians solemnised by him shall be submitted by ministers of every denomination other than those mentioned in clause (1) above to the District Magistrate, within two months of the end of the quarters to which they relate

Certificate of correctness.

4 (1) Every quarterly return prescribed under clauses (1) and (2) of section 3 shall have endorsed on it the "Certificate of truth" in the form prescribed in Appendix IV

(2) Such certificate must be written or printed on the face of the form on which the returns are made, the number of entries recorded being mentioned in words as well as figures in such certificate

Returns to be kept distinct and supplementary returns. Native Christians.

5 Returns of baptisms for each quarter shall be kept distinct, and shall not contain entries which belong to other quarters If necessary, supplementary returns can be submitted.

6 These returns shall not include entries in respect of Native Christians

No occurrence certificate.

7 If during any quarter no baptisms have been recorded, a "Certificate of no occurrence" in the form prescribed in Appendix V shall be forwarded

8 The officers to whom the returns under rule 3 (1) and (2) are submitted shall forward, to the Registrar General within two months of the end of the quarter to which they relate, a consolidated return embodying all the baptisms so reported, and the District Magistrate shall in addition to the above also submit at the same time to the Registrar-General direct a quarterly return embodying all the entries relating to that quarter in the register kept by him under rule 2

BURIALS

1 For every Government cemetery there shall be kept a register of burials of European Christians (i e, of all Christians of European birth or descent, or of mixed European and native descent), and of Armenian Christians in the form prescribed in Appendix VII This register shall be in charge of the officer to whom under rule I of the Rules for the care and use of Government cemeteries, the charge of the cemetery belongs

2 On receipt of the notice of the burial, under rule VII (1) of the Rules for the care and use of Government cemeteries, the person in charge of the register prescribed in rule I above shall cause this register to be produced at the cemetery at the time of the ceremony

3 The person solemnising the burial shall immediately after the burial make an entry of the same therein

4 Every person solemnising a burial of a European or Armenian Christian in a place other than a cemetery should submit a report thereof to the District Magistrate, who will record such burial in a register to be kept by him for the purpose in the form prescribed in Appendix VII

5 As the Government desire to possess a record of all deaths of European, Eurasian and Armenian Christians buried by the laity, and not only of those buried by the clergy, all magisterial officers are required to report every burial by laymen within their several jurisdictions to the Registrar-General through the Divisional Commissioners The Magistrate will enter such burials in a register in the form given in Appendix VII to be kept by him for the purpose

Quarterly return burials

6 Quarterly returns of burials of European Christians and of Armenian Christians should in the case of burials solemnised at Government cemeteries, be forwarded by the officers in charge of the register to the Registrar General of Births, Deaths, and Marriages in the form specified in Appendix III within two months of the end of the quarter to which they belong

In the case of burials solemnised in a place other than a cemetery, the Magistrate should within the same period submit to the Registrar General a copy of all the entries in his register No VII relating to the same quarter

7 In the case of a cemetery other than a Government cemetery the managing body should make similar arrangements for the submission to the Registrar General of Births, Deaths, and Marriages within two months of the quarter to which they relate, of similar quarterly returns of the burials of all European and Armenian Christians buried in such cemetery

Certificate of correctness.

8 (1) Every return submitted to the Registrar General of Births, Deaths, and Marriages should have endorsed on it the "Certificate of truth" in the form prescribed in Appendix IV

(2) Such certificate must be written or printed on the face of the form on which the returns are made, the number of entries recorded being mentioned in such certificate

Returns to be kept distinct and supplementary returns.

9 Returns of Burials for each quarter shall be kept distinct, and shall not contain entries which belong to other quarters If necessary, supplementary returns can be submitted.

Native Christians.

10 These returns are not to include entries in respect of Native Christians

No occurrence certificates.

11 If in any cemetery during any quarter no burials have been recorded, a "Certificate of no occurrence" in the form prescribed in Appendix V shall be forwarded to the Registrar-General.

NOTIFICATIONS OF THE BOARD OF REVENUE

NOTIFICATION—No 34B

Dated Calcutta, the 4th January 1901

CUSTOMS

THE HON'BLE MR C W BOLTON, C S I

THE following rules 7 (*a*) and 14 (*a*) which have been added by the Board of Revenue, Lower Provinces, under the powers vested in them by section 164 of the Sea Customs Act, VIII of 1878, to the rules published at pages 793 798, Part I of the *Calcutta Gazette* of the 5th September 1888 under Notification No 1127B, dated the 30th August 1888, are published for general information in accordance with the provisions of section 204 of the Act

By order of the Board of Revenue, L P,

C J STEVENSON MOORE,

Offg Secretary

Rules

7 (*a*) Instead of shippers being required to take out shipping bills for goods taken on board of vessels of the Orissa Service plying under General passes, the Agents themselves shall be at liberty to send in a consolidated shipping bill containing all necessary particulars, separate shipping bills being, however, taken out for dutiable goods

14 (*a*) The Master or Agent of any vessel plying between Calcutta and the ports of the Orissa Division may on the announcement of such vessel's arrival in the river, enter her inwards at the Calcutta Custom House on the production by telegram of a certified copy of the manifest stating the name of the vessel and the port of departure and showing separately the number of packages and the description and destination of the goods shipped, and in the case of packages to be transhipped at Calcutta, the marks and numbers on and the names of the consignees of such packages as well The production of such manifest shall not, however, be held to dispense with the presentation, within 24 hours after the arrival of the vessel in port, of the extract from the cargo book and duplicate shipping bills for all dutiable cargo required under rule 14

NOTIFICATION—No 2715B

Dated Calcutta, the 28th December 1900

CUSTOMS

THE HON'BLE MR C W BOLTON, C S I

THE following rule regulating the remuneration of officers and peons attending the removal of goods from the wharf to the warehouse is published for general information, in supersession of the present Rule 10 of Chapter V at page 15 of the Calcutta Custom House Manual, 1895

2 The new rule shall take effect from 1st February 1901

By order of the Board of Revenue, L P,

C J STEVENSON MOORE,

Offg Secretary

Rule regulating the remuneration of officers and peons attending the removal of goods from the wharf to a bonding warehouse

BEFORE the time for removing the goods from the wharf to the wharehouse a written application in Form No 14 for the services of an officer and peons when the goods are to be bonded in a private licensed warehouse, or for the services of one or more peons as required when the goods are to be bonded in the warehouses of the Bengal Bonded Warehouse Association or a public bonded warehouse, will be presented to the Assistant Collector, who will order the following fees to be taken, which will be deposited in the manner laid down in Chapters XXI and XXII —

For an extra bonding officer where no such officer is already employed at the expense of the licensee and stationed at the warehouse, Rs 4 per diem For each extra bond peon annas 12 per diem The charge for an extra bond peon employed in the forenoon for only one journey from the wharf or Port Commissioners' jetties to the warehouse will be annas 8

An extra bond peon employed after 12 noon will be paid the full day's fee of annas 12 The working hours of extra bond officers and bond peons are from 10 A M to 5 P M, including Saturdays An overtime fee of Re 1 per hour for extra bond officers and annas 2 per hour for extra bond peons will be charged for work done before and after the working hours above mentioned The application in Form 14 will, after deposit of the fees for the services of extra bond officers and bond peons, be made over to the Bonding Department where the extra bond officer and bond peons will at once be posted for duty as required by the bondor whose goods have to be removed

PART IB

ORDERS BY THE LIEUT GOVERNOR OF BENGAL

MUNICIPAL AND LOCAL

NOTIFICATION

No 49M —The 3rd January 1901 —Whereas a Notification No 1365T M, dated the 30th August 1900, was published at page 183, Part IB of the *Calcutta Gazette* of the 5th September 1900, declaring the intention of the Lieutenant-Governor to sanction the levy by the Commissioners of the Meherpur Municipality, in the district of Nadia, of a tax, under section 131 of the Bengal Municipal Act, III of 1884, as modified up to 1st November 1896, on carriages and on horses and other animals specified in the fifth schedule of the Act, at rates not exceeding those mentioned in the said schedule and whereas no objection has been raised to the proposal within one month from the date of the publication of the above notification within the Municipality, it is hereby notified for general information that, in exercise of the power vested in the Local Government by section 86 (*a*) of the Act, and in accordance with the recommendation of the Commissioners of the Meherpur Municipality, made at a meeting the Lieutenant Governor sanctions the above proposal

Each of the Madras Bombay and Allahabad Series	1 0 0	1 0 0

The Indian Law Reports

Published under Authority

THE Indian Law Reports published under the authority of the Governor General in Council appear in monthly parts published as soon as possible after the first of each month at Calcutta Madras Bombay and Allahabad and comprise four series—one for the Calcutta High Court a second for the Madras High Court a third for the Bombay High Court and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council in appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depot and the Madras Bombay and Allahabad Series are distributed direct from Madras Bombay and Allahabad respectively.

In supersession of the previous advertisements on and from 1st January 1889 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the reports from 1876 —

PART VI

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 23

GOVERNMENT OF INDIA

LEGISLATIVE DEPARTMENT

The following Bill was introduced in the Council of the Governor General of India for the purpose of making Laws and Regulations on the 4th January, 1901 —

No 1 of 1901

A Bill to amend the law relating to the admission of Native Military Lunatics into Asylums

WHEREAS it is expedient to repeal certain provisions of the law now in force with regard to the admission of native military lunatics into asylums, It is hereby enacted as follows —

Repeal of certain enactments

1 The enactments mentioned in the schedule hereto annexed are repealed to the extent specified in the fourth column thereof

Saving of certain detentions.

2 The repeal by this Act of any enactment shall not affect any native military lunatic who, at the commencement of this Act, is detained in an asylum in pursuance of an order under section 6 of the Military Lunatics Act, 1877

X

THE SCHEDULE

(*See section 1*)

REPEAL OF ENACTMENTS

1	2	3	4
Year	No	Short title or subject	Extent of repeal
1869	V	Indian Articles of War	In article 179 *the words from* such allowance *to the end*
1877	XI	Military Lunatics	In the preamble *the words* and to amend the law now in force with regard to the admission thereto of native military lunatics Sections 4 5 and 6 In sections 7 and 8 *the words* whether European or native

STATEMENT OF OBJECTS AND REASONS

EXPERIENCE gathered since the passing of the Military Lunatics Act, 1877 has proved the expediency of following, in regard to persons subject to the Indian Articles of War, the practice, now well established in the British Army, of treating declared insanity as a ground for discharge The powers to discharge, conferred by articles 3 and 4, will be

exercised, as usual, in accordance with Army Regulations on the subject, and it is proposed that, for the future, Native military lunatics should, in consequence of discharge, be governed by the general law affecting the civil population For this purpose, however, it will be necessary to relieve the military authorities of certain statutory obligations which were imposed by the Military Lunatics Act, 1877 The case of European military lunatics with reference to whom no alteration of the law is contemplated, stands on an entirely different footing, inasmuch as it is rarely possible to make them over to the custody of friends or relatives in this country With regard to Natives detained in asylums at the date on which the Act now proposed comes into force, the Government are of opinion that, to avoid the inconvenience of taking fresh proceedings against them as civilians and any hardship arising from stoppage of the allowance at present payable under article 179 of the Indian Articles of War, they should continue to be governed by the procedure now applying to them

EDWIN H H COLLEN, *Major-General*,

The 3rd January, 1901

J M MACPHERSON,

Secretary to the Government of India

AFRICA, SOUTH—CAPE COLONY

Kowie river (port Alfred)—Information respecting it

NOTICE to Mariners (No 786 of 1900) issued by the British Admiralty is republished

The following information respecting Kowie river has been taken from the Cape of Good Hope Government Gazette, dated 23rd October 1900 —

WINDS AND CURRENTS —The prevailing winds in summer are from an easterly to south-easterly direction during the day, calms and light airs off the land at night, but occasionally a strong south east wind blows continuously day and night for two or three days

During the winter, westerly winds blow with bad weather at times, but a gale may be blowing in the offing when it is fine near the coast

The Agulhas current sets to the westward sometimes very strongly at a distance of 5 to 25 miles from the coast, and a current sometimes setting against the wind is experienced in the roadstead (assisting vessels to ride), which prevents the regular tidal ebb and flow being perceptible

THE BAR —The bar is composed of sand over rock, westerly and south westerly gales send in a heavy swell which deposits more sand on the bar, making it impassable for two or three days, this deposit, however, is usually scoured out by the following spring tides The passage over the bar in consequence varies considerably in direction, position and depth

DIRECTIONS, &c —Upon a vessel appearing off the port, the Harbour Master, who is also Shipping Master, will come on board, if weather permits and point out a berth, otherwise a birth will be signalled from the Port office The best anchorage is in from 15 to 17 fathoms, with the entrance of the river open and the Port office flag-staff on the western bank near the entrance, bearing N 25° W, the holding ground here being good and the position outside the rollers The holding ground in other areas is generally not good, being sand over patches of rock The anchor should be buoyed, coir riding stoppers being used for the cables, and arrangements made for slipping in case of bad weather, when the end of the cable must also be buoyed

Top gallant yards and masts should be struck, the topsails double reefed, and the vessel always kept ready for sea, strict attention being paid to all signals made from the Port office so that there will be no delay in putting to sea when the signal to do so is made By keeping within 12 miles of the coast the very heavy sea which gets up outside that distance, due to the Agulhas current, will be avoided

All vessels visiting this port should be provided with the best ground tackle and a stout coir spring to ride by

With the wind from the eastward or westward it is preferable to ride at single anchor with a whole cable and a spring on, but with a southerly wind and dirty weather, and with no chance of putting to sea, it is better to give the vessel a good sheer, let go a second anchor before veering on the first, and then veer both cables together

Masters are strongly advised to remain on board as much as possible, and to exercise discretion in permitting boats to leave their vessels at any time as accidents have occurred through drifting

SIGNALS —Mariners can communicate their wishes to their agents through the Port office by use of the Commercial Code, and every assistance will be rendered as far as practicable

Vessels not possessing the Commercial Code can make the following signals —

1	Ensign in fore topmast rigging	I am in want of a cable
2	Ditto main ditto	Ditto an anchor
3	Ditto fore rigging	I have parted a bower cable
4	Ditto main do	Want an anchor and cable
5	Weft—where best seen	I want assistance

WEATHER SIGNALS —The following signals will be shown from the Port office —

1	A black ball over union jack	Veer about 70 fathoms, see second anchor clear
2	Ditto under do	Put to sea at once, get an offing
3	Flag (blue, white, blue horizontal) over union jack	Send down top gallant yards and mast, point yards, see every thing clear for working ship as far as practicable
4	Union jack over white and blue flag	See third anchor clear and prepare for bad weather
5	Union jack over red, white, blue vertical) flag	Heave up second anchor and shorten into same scope as before

BAR SIGNALS —

1	Black ball at western yardarm	Bar impassable
2	Ditto hoisted half way up	Bar dangerous

3 A working flag (red pierced white) will be hoisted when the bar is practicable for tug boats and lighters, it will be kept half mast when special caution is necessary in crossing the bar, and hauled down altogether when the bar is impassable Pilots are always in readiness with a steam tug to take vessels in or out, and no vessel should attempt to enter the river even in most favourable weather without a pilot No ships' boats should attempt to cross the bar, however smooth it may appear

The whole of the above signals are to be answered by the answering pennant hoisted where best seen, and promptly acted upon, neglect to do so will be reported to Lloyds, and also to the owner Masters however, should not necessarily wait for the signals, but take timely precautions The first rise of a low barometer indicates a strong westerly gale, the first fall of a high barometer foretells a strong easterly gale with short chopping sea

Port Alfred is in telegraphic and daily postal communication with Cape Colony generally, and railway connection will follow very shortly (*Notice No 786 of 1900*)

APPOINTMENT OF MEMBERS OF THE PROVINCIAL CIVIL SERVICE TO POSTS LISTED AS OPEN TO THAT SERVICE

RESOLUTION—No 5244A

APPOINTMENT

Dated Calcutta, the 24th December 1900

READ—

The Resolution of the Government of India, in the Home Department, No $\frac{9 \text{ Publ}}{1342-1352}$, dated the 21st April 1892, indicating the appointments in each Province as open to the Provincial Service

Read also—

The notification of this Government, dated the 28th March 1893, declaring the number of appointments listed as open to members of the Provincial Civil Service in Bengal

The following correspondence with the Government of India regarding the manner in which appointments are to be transferred to the Provincial Service

Letter to the Government of India, Home Department, No 1242A D, dated the 9th June 1900

Letter from the Government of India, Home Department, No 512, dated the 17th August 1900

Letter to the Government of India, Home Department, No 2412A D, dated the 15th September 1900

Letter from the Government of India, Home Department, No 916, dated the 13th December 1900

IN the notification, dated the 28th March 1893, it was announced that the following appointments in Bengal, for which members of the Civil Service of

India had hitherto been recruited, should thencetorward be posts to which members of the Bengal Provincial Service could properly be appointed, subject to the rules for the time being in force, under 33 Vic Cap 3, Section 6 —

6 posts of District and Sessions Judge
4 posts of Collector and Magistrate of a district
1 post of Junior Secretary to the Board of Revenue
1 post of Under-Secretary to Government

In addition to these posts, the following appointments, for which recruit ment had hitherto previously been made in the Civil Service of India, were thrown open to the Bengal Provincial Civil Service and added to the existing grades of that service —

2 posts of Joint Magistrate of the first grade	to be converted into	2 posts of Deputy Magistrate and Collector in the 3rd grade on Rs 600
2 posts of Joint Magistrate of the second grade	ditto	2 posts of Deputy Magistrate and Collector in the 4th grade on Rs 500
2 posts of Assistant Magis trate on Rs 500 a month	ditto	2 posts of Deputy Magistrate and Collector in the 5th grade on Rs 400
2 posts of Assistant Magis trate on Rs 450 a month	ditto	2 posts of Deputy Magistrate and Collector in the 6th grade on Rs 300

2 The effect of this notification was qualified by paragraph 6 of the Resolution of the Government of India, No $\frac{9 \text{ Public}}{1\ 4\ 1892}$, dated the 21st April 1892, which declared that until all the existing statutory civil servants were provided for, either by promotion or by amalgamation with the Provincial Service, and until the prior claims of officers of the Civil Service of India had been satisfied, the posts thrown open to the members of the Provincial Service could not be transferred to that service

3 Eight superior listed appointments became available to the members of the Provincial Service after the confirmation in superior posts of the Indian Civilians appointed in 1888 All these appointments were, until recently, actually held by Statutory Civilians The death of Mr Nanda Krishna Bose, a Statutory Civilian holding one of these posts has reduced the number to seven One member of the Judicial Branch of the Provincial Service will now, with the sanction of the Government of India, be appointed a District and Sessions Judge of the third grade to make up the complement

4 The confirmation in superior posts of all the Indian Civilians appointed in 1889 will admit of the appointment of two more members of the Provincial Service to superior listed posts There are now two vacancies in the Executive Branch of the Indian Civil Service The claims of the last officer of 1889 of this service will be satisfied by promotion in one of these vacancies The other will be given to a member of the Executive Branch of the Provincial Service who, with the sanction of the Government of India, will now be appointed a Magistrate and Collector of the third grade

5 The next vacancy occurring in the third grade of Magistrates and Collectors will be available for the appointment of another member of the Executive Branch of the Provincial Service, and the total number of ten superior posts of Magistrates and Collectors and District and Sessions Judges will then have been filled

6 The eleventh post is that of a Joint Magistrate of the first grade It is now held by a Statutory Civilian, and cannot at present be converted into a Deputy Magistracy of the third grade

7 The twelfth post is also one in the first grade of Joint Magistrates It will now be converted into a Deputy Magistracy of the third grade, as the most junior of the Indian Civilians appointed in 1891 has received promotion to the first grade of Joint Magistrates

8 The thirteenth post is equivalent to a Joint Magistracy of the second grade, and it became available on the promotion of the last of the Indian Civilians appointed in 1892 to that grade It will now be converted into a Deputy Magistracy of the fourth grade

9 The fourteenth appointment is also equivalent to a Joint-Magistracy of he second grade It will be converted into a Deputy Magistracy of the fourth grade when the most junior Indian Civilian of 1893 has received promotion o the second grade of Joint Magistrates

10 The fifteenth and sixteenth are posts equivalent to that of an Assistant Magistrate on Rs 500 As all the Indian Civilians of 1893 and 1894 have eached that grade, two appointments will now be added to the fifth grade of Deputy Magistrates

11 The seventeenth and eighteenth appointments are equivalent to that of an Assistant Magistrate on Rs 450 One of these appointments was merged n the Provincial Service on the occasion of the transfer to that service of a Statutory Civilian since deceased The other will now be transferred to the sixth grade of Deputy Magistrates

12 To the two Secretariat posts, viz, the post of Junior Secretary to the Board of Revenue and the post of an Under Secretary to this Government, the main and essential condition laid down by the Government of India applies with special force, i e, proved and absolute fitness The proper performance of the duties of these posts, especially that of an Under Secretary to this Government, requires exceptional qualifications, and appointment to them must be expressly guided by a regard to the efficiency of the public services

13 The effect of the above orders will be that as soon as the sanction of the Government of India has been obtained two officers of the Provincial Service will be appointed by name to two superior listed posts and a third will be appointed on the occurrence of the first vacancy To inferior listed posts officers are not appointed by name, but an addition of five officers will immediately be made to the cadre of the Provincial Executive Service by promotion of officers to the various grades concerned

ORDERED—That the Resolution be published in the *Calcutta Gazette*

By order of the Lieutenant Governor of Bengal,

J A BOURDILLON,

Chief Secy to the Govt of Bengal.

RESOLUTION ON THE PROGRESS REPORT OF FOREST ADMINISTRA TION IN THE LOWER PROVINCES OF BENGAL FOR 1899 1900

REVENUE DEPARTMENT—FORESTS

Calcutta, the 5th January 1901

RESOLUTION—No 128For

READ—

The Progress Report of Forest Administration in the Lower Provinces of Bengal for the year 1899-1900

Read again—

The Progress Report of Forest Administration in the Lower Provinces of Bengal for the year 1898 99 and Government Resolution thereon

Mr A E Wild, who was in charge of the Bengal Forest Circle throughout the year, submitted his Report on the 10th November 1900, more than a month late

The following statement shows the area of each class of forest in the circle —

CLASS OF FOREST	Area at commencement of the year	Added	Excluded	Area at close of the year	PERCENTAGE— Of total forest area	Of the area of the provinces (156 571 square miles)
1	2	3	4	5	6	7
	Sq miles		Sq miles	Sq miles		
Reserved	5 881			5 881	43	3 6
Protected	3 816		141	3 675	27	2 35
Unclassed	4 033			4 033	30	2 58
Total	13 30		141	13 589		8 69

2 No actual changes in the area of reserved forests were made during the year The recent land revenue resettlement of the Khurda Government Estate shows an excess of 1,833 acres, and of 51,725 acres in the area of the reserved and protected forests, respectively, of the Puri Division, but the reasons for this not having been given, no actual alteration has yet been made in the figures In the Sundarbans 141 square miles of protected forests were transferred to be converted into cultivation The transfer of the Saoria tract of the Sonthal Parganas under the Deputy Commissioner will shortly be effected

3 *Settlement* —The Lieutenant Governor notices with regret, since the reasons given for the delay are not satisfactory, that the settlement of the area in the Chittagong Forest Division has not yet been completed The work was started as far back as 1897 98, and he trusts that it will be ready for notification within the current year

4 *Survey* —The recent proposals of the Board of Revenue that certain blocks should be set aside as fuel and fodder reserves in the Jalpaiguri district as protected forests, and placed under the control of the civil authorities, are under consideration of Government According to the approved programme of operations spread over a period of ten years, the Imperial Forest Survey Branch began work in December in the Singhbhum Division In future reports the Conservator should state what was the programme for the year and, in case it was not worked up to, what were the reasons for the deficiency It is reported that the progress made so far was not very encouraging, as there are to be two parties at work during the coming season, more check and supervision are required

The total length of boundaries as yet defined stands at 5,186 miles The Lieutenant Governor trusts that during the ensuing year forest officials will bear in mind the importance of carefully inspecting forest boundaries, a duty which appears to have been overlooked in many divisions

APPOINTMENT OF MEMBERS OF THE PROVINCIAL CIVIL SERVICE TO POSTS LISTED AS OPEN TO THAT SERVICE

RESOLUTION—No 5244A

APPOINTMENT

Dated Calcutta, the 24th December 1900

READ—

The Resolution of the Government of India, in the Home Department, No $\frac{9\text{-Public}}{1342-1351}$, dated the 21st April 1892, indicating the appointments in each Province as open to the Provincial Service

Read also—

The notification of this Government, dated the 28th March 1893, declaring the number of appointments listed as open to members of the Provincial Civil Service in Bengal

The following correspondence with the Government of India regarding the manner in which appointments are to be transferred to the Provincial Service

Letter to the Government of India, Home Department, No 1242A D , dated the 9th June 1900

Letter from the Government of India, Home Department, No 512, dated the 17th August 1900

Letter to the Government of India, Home Department, No 2412A D , dated the 15th September 1900

Letter from the Government of India, Home Department, No 916, dated the 13th December 1900

IN the notification, dated the 28th March 1893, it was announced that the following appointments in Bengal, for which members of the Civil Service of

India had hitherto been recruited, should thenceforward be posts to which members of the Bengal Provincial Service could properly be appointed, subject to the rules for the time being in force, under 33 Vic Cap 3, Section 6 —

6 posts of District and Sessions Judge
4 posts of Collector and Magistrate of a district
1 post of Junior Secretary to the Board of Revenue
1 post of Under Secretary to Government

In addition to these posts, the following appointments, for which recruitment had hitherto previously been made in the Civil Service of India, were thrown open to the Bengal Provincial Civil Service and added to the existing grades of that service —

2 posts of Joint Magistrate of the first grade	to be converted into	2 posts of Deputy Magistrate and Collector in the 3rd grade on Rs 600
2 posts of Joint Magistrate of the second grade	ditto	2 posts of Deputy Magistrate and Collector in the 4th grade on Rs 500
2 posts of Assistant Magistrate on Rs 500 a month	ditto	2 posts of Deputy Magistrate and Collector in the 5th grade on Rs 400
2 posts of Assistant Magistrate on Rs 450 a month	ditto	2 posts of Deputy Magistrate and Collector in the 6th grade on Rs 300

2 The effect of this notification was qualified by paragraph 6 of the Resolution of the Government of India, No $\frac{9\text{ Public}}{1342-1352}$, dated the 21st April 1892, which declared that until all the existing statutory civil servants were provided for, either by promotion or by amalgamation with the Provincial Service, and until the prior claims of officers of the Civil Service of India had been satisfied, the posts thrown open to the members of the Provincial Service could not be transferred to that service

3 Eight superior listed appointments became available to the members of the Provincial Service after the confirmation in superior posts of the Indian Civilians appointed in 1888 All these appointments were, until recently, actually held by Statutory Civilians The death of Mr Nanda Krishna Bose, a Statutory Civilian holding one of these posts has reduced the number to seven One member of the Judicial Branch of the Provincial Service will now, with the sanction of the Government of India, be appointed a District and Sessions Judge of the third grade to make up the complement

4 The confirmation in superior posts of all the Indian Civilians appointed in 1889 will admit of the appointment of two more members of the Provincial Service to superior listed posts There are now two vacancies in the Executive Branch of the Indian Civil Service The claims of the last officer of 1889 of this service will be satisfied by promotion in one of these vacancies The other will be given to a member of the Executive Branch of the Provincial Service who, with the sanction of the Government of India, will now be appointed a Magistrate and Collector of the third grade

5 The next vacancy occurring in the third grade of Magistrates and Collectors will be available for the appointment of another member of the Executive Branch of the Provincial Service, and the total number of ten superior posts of Magistrates and Collectors and District and Sessions Judges will then have been filled

6 The eleventh post is that of a Joint Magistrate of the first grade It is now held by a Statutory Civilian, and cannot at present be converted into a Deputy Magistracy of the third grade

7 The twelfth post is also one in the first grade of Joint Magistrates It will now be converted into a Deputy Magistracy of the third grade, as the most junior of the Indian Civilians appointed in 1891 has received promotion to the first grade of Joint Magistrates

8 The thirteenth post is equivalent to a Joint Magistracy of the second grade, and it became available on the promotion of the last of the Indian Civilians appointed in 1892 to that grade It will now be converted into a Deputy Magistracy of the fourth grade

9 The fourteenth appointment is also equivalent to a Joint-Magistracy of the second grade It will be converted into a Deputy Magistracy of the fourth grade when the most junior Indian Civilian of 1893 has received promotion to the second grade of Joint-Magistrates

10 The fifteenth and sixteenth are posts equivalent to that of an Assistant Magistrate on Rs 500 As all the Indian Civilians of 1893 and 1894 have reached that grade, two appointments will now be added to the fifth grade of Deputy Magistrates

11 The seventeenth and eighteenth appointments are equivalent to that of an Assistant Magistrate on Rs 450 One of these appointments was merged in the Provincial Service on the occasion of the transfer to that service of a Statutory Civilian since deceased The other will now be transferred to the sixth grade of Deputy Magistrates

12 To the two Secretariat posts, viz, the post of Junior Secretary to the Board of Revenue and the post of an Under-Secretary to this Government, the main and essential condition laid down by the Government of India applies with special force, i e, proved and absolute fitness The proper performance of the duties of these posts, especially that of an Under Secretary to this Government, requires exceptional qualifications, and appointment to them must be expressly guided by a regard to the efficiency of the public services

13 The effect of the above orders will be that as soon as the sanction of the Government of India has been obtained two officers of the Provincial Service will be appointed by name to two superior listed posts and a third will be appointed on the occurrence of the first vacancy To inferior listed posts officers are not appointed by name, but an addition of five officers will immediately be made to the cadre of the Provincial Executive Service by promotion of officers to the various grades concerned

ORDERED—That the Resolution be published in the *Calcutta Gazette*

By order of the Lieutenant-Governor of Bengal,

J A BOURDILLON,

Chief Secy to the Govt of Bengal.

RESOLUTION ON THE PROGRESS REPORT OF FOREST ADMINISTRATION IN THE LOWER PROVINCES OF BENGAL FOR 1899-1900

REVENUE DEPARTMENT—FORESTS

Calcutta, the 5th January 1901

RESOLUTION—No 128For

READ—

The Progress Report of Forest Administration in the Lower Provinces of Bengal for the year 1899 1900

Read again—

The Progress Report of Forest Administration in the Lower Provinces of Bengal for the year 1898 99 and Government Resolution thereon

Mr A E Wild, who was in charge of the Bengal Forest Circle throughout the year, submitted his Report on the 10th November 1900, more than a month late

The following statement shows the area of each class of forest in the circle —

Class of Forest	Area at commencement of the year	Added	Excluded	Area at close of the year	Percentage— Of total forest area	Of the area of the provinces (156 571 sq are miles)
1	2	3	4	5	6	7
	Sq miles		Sq miles	Sq miles		
Reserved ..	5 881			5 881	43	3 76
Protected	3 816		141	3 675	27	2 35
Unclassed	4 033			4 033	30	2 58
Total	13 730		141	13 589		8 69

2 No actual changes in the area of reserved forests were made during the year The recent land revenue resettlement of the Khurda Government Estate shows an excess of 1,833 acres, and of 51,725 acres in the area of the reserved and protected forests, respectively, of the Puri Division, but the reasons for this not having been given, no actual alteration has yet been made in the figures In the Sundarbans 141 square miles of protected forests were transferred to be converted into cultivation The transfer of the Saoria tract of the Sonthal Parganas under the Deputy Commissioner will shortly be effected

3 *Settlement* —The Lieutenant Governor notices with regret, since the reasons given for the delay are not satisfactory, that the settlement of the area in the Chittagong Forest Division has not yet been completed The work was started as far back as 1897 98, and he trusts that it will be ready for notification within the current year

The recent proposals of the Board of Revenue that certain blocks should be set aside as fuel and fodder reserves in the Jalpaiguri district as protected forests, and placed under the control of the civil authorities, are under consideration of Government According to the approved programme of operations spread over a period of ten years, the Imperial Forest Survey Branch began work in December in the Singhbhum Division In future reports the Conservator should state what was the programme for the year and, in case it was not worked up to, what were the reasons for the deficiency It is reported that the progress made so far was not very encouraging, as there are to be two parties at work during the coming season, more check and supervision are required

The total length of boundaries as yet defined stands at 5,186 miles The Lieutenant-Governor trusts that during the ensuing year forest officials will bear in mind the importance of carefully inspecting forest boundaries, a duty which appears to have been overlooked in many divisions

4 *Working-plans*—Of the total forest area in Bengal, viz., 13,589 square miles, working plans for 5,320 square miles have been either completed or are being compiled, and 8,269 square miles still remain to be dealt with The latter area includes 4,033 square miles of unclassed forest of Chittagong Owing to the unfortunate illness of Mr Hatt, who had nearly finished the working plans for the Puri Division (110 square miles), and of the tardy progress made by the Forest Survey Party in Singhbhum, which delayed Mr Haines, who had in hand the working plan (731 square miles) of that Division, no plans were completed during the year Here also the Lieutenant Governor would request that in future years details be given showing what was the programme for the year and to what extent it was worked up to with reasons for any shortcomings The table showing the comparative strength of the staff, area and percentage under working plans for the three provinces of Bengal, North Western Provinces, and Central Provinces, submitted by the Conservator, is interesting, but the figures for the areas under working plans in the Central Provinces do not tally with those given last year Speaking generally, the comparison as to strength of establishment is not very disadvantageous to Bengal, and the Lieutenant Governor is compelled to repeat that Bengal has hitherto failed to realise the great value of working plans It is so far satisfactory, however, to see that the importance and necessity of the work are now fully understood, for there is no part of the Forest Officer's duties of greater importance than the preparation of working plans for the forests in their charge Without them a new Forest Officer is helpless in his charge, and Government has no check on the proper working of any forest

But it does not appear that the Conservator's arrangements for carrying out these operations are as yet properly organized, since they seem to rest on the chance of securing the services of special officers for this work alone The matter will be dealt with when orders are passed on the report which has lately been called for giving, in the order of urgency, the Forest Divisions, for which working plans or revision of existing working plans are required during the next five years The Conservator has now had a material addition made to his superior staff, and the work must be taken energetically in hand

5 *Buildings and Communications*—The following statement shows the expenditure on roads and buildings in 1898 99 and 1899 1900 and the budget estimates for the latter year —

Description of work	Buildings			Roads and Bridges			Total		
	Actuals of 1898-99	Budget estimates of 1899 1900	Actuals of 1899 1900	Actuals of 1898 99	Budget estimates of 1899 1900	Actuals of 1899 1900	Actuals of 1898 99	Budget estimates of 1899 1900	Actuals of 1899 1900

Total	3[illegible] [illegible]39	4[illegible] 100	29 303	19 230	34 800	22 517	54 969	76 900	51 820

The budget estimates were not worked up to, partly owing to several works not having been taken up and partly to the diversion of the allotment to other purposes

The chief new buildings constructed during the year were the Sonthal Parganas head quarters house and three revenue station houses in the Sundarbans

Eighty four miles of new roads and paths were made during the year as against 57 in the previous year, and repairs were carried out along 787 miles of road, the corresponding figures for 1898 99 being 842 Of the new roads, 35 miles were for facilitating export and 49 miles were for inspection purposes The experiment of erecting a wire rope way in the Tista Division was a failure owing to the curves encountered, and the line will have to be re erected on the usual plan of straight lengths

6 *Breaches of Forest Law*—Three hundred and fifty five cases were taken into Court during the year under report as against 307 in 1898-99 This increase occurred mainly under "fire-cases" in the Singhbhum Division and under "other offences"

Of the cases disposed of, 88 per cent ended in conviction as against 90 in the previous year Prosecutions were instituted in 60 cases for offences with regard to fire, of which 38, involving 45 persons, ended in conviction, and 5, involving 18 persons, resulted in acquittal The remainder were pending at the end of the year Of the total cases of this kind, 28 occurred in Singhbhum, 9 in Palamau, 5 in Angul, 3 in Jalpaiguri, 2 in Chittagong, 1 in Darjeeling, 1 in Puri, and 1 in the Sonthal Parganas

The sentences awarded in fire cases have been generally of a much more deterrent nature than was the case during the previous year, and the Lieutenant-Governor agrees with Mr Wild that, "considering the difficulty in most fire cases of procuring any evidence at all, whenever convictions are obtained, the punishment ought in all cases to be exemplary" The Lieutenant Governor looks to the Conservator to bring promptly to the notice of Government any case in which, in his opinion, the punishment awarded has been inadequate The Government of India, as noted in last year's Resolution, asked if amendments were not required in the Indian Forest Act for the better protection of forests from fires and the punishment of incendiarism, proposals have accordingly been submitted by the Conservator to alter the existing law and to make villagers jointly responsible for fires

The number of cases compounded by Forest Officers amounted to 1,946, involving 3,962 persons as against 2,037 cases, involving 4,018 persons in the previous year The amount received as compensation was Rs 12,176, Rs 791 less than the amount in the previous year In the Sundarbans, the compensation accepted is usually high, as the cases are mostly of a more serious nature than in other Divisions, for the offenders carry off the wood in boat loads, whereas elsewhere the thefts are chiefly confined to the quantity that can be carried on a man's head Omitting this Division, the compensation received for each person involved varied between 8 annas 7 pies in Singhbhum and Rs 7 3 9 in Buxa The total number of offences decreased from 2,487 to 2,483, and of these, the Darjeeling Division contributed 446 cases, while the Tista, Sonthal Parganas, Puri, and the Sundarbans Divisions contributed over 300 cases each

7 *Forest fires* —Protective measures against fire were taken for 2,114 square miles, of which 194 square miles, or 9 per cent of the entire protected area, were burnt, as against 2 per cent in 1898 99 and 27 in 1897 98 This increase was, to some extent, to be expected owing to the early setting in of the hot weather

Although a far larger area was burnt than during the previous year, yet, looking at past results, the general result of the year under report was fairly satisfactory, and the Conservator points out that the accustomed alternation of good and bad years, which has been the rule since 1890-91 has been broken The Lieutenant Governor agrees with the Conservator that some praise is due to the officers of the Department for this improvement

Singhbhum again heads the record, having had 134 square miles burnt, and the fires there in 1899 1900 were worse than in 1898 99 In consequence of the many and severe fires in the early part of the season in the Saitba block of this Division, the burnt areas in that block were closed to grazing for three years as a punishment for malicious and careless firing

8 It would appear that for the Circle 92 fires as against 62 in the previous year were intentionally fired, damage being done to 101,365 acres as against 40,545 in 1898 99 Prosecutions were instituted in 14 of these cases, of which 10 ended in conviction, 2 resulted in acquittal, and 2 were pending at the close of the year

9 *Grazing* —Four hundred and seventeen square miles of reserved forests were open to all animals, as against 393 square miles in the previous year, the increase of 24 square miles being due to areas previously closed in the Darjeeling and Kurseong Divisions being thrown open during the year under report As in the previous year, 1,722 square miles of protected forests remained open during 1899-1900 The average area per head of cattle grazed in the reserved forests was 5 7 acres as compared with 5 5 acres in the year before In the protected forests, excluding Angul, which is under the management

of the Deputy Commissioner, and for which no returns have been furnished, the average per head (2·5) was practically unchanged, though the revenue increased by Rs 919 to Rs 84,941 owing to better collections in the Puri Division With regard to grazing, no change has been made in the method or system

10 *Yield and outturn of forest produce* —The following statement gives details of the forest outturn of the year —

Class of forest and agency by which produce was removed	Timber	Fuel	Total wood	Bamboos	Minor produce
1	2	3	4	5	6

Difference in 1899 1900	+ 920 016	+ 2,316 888	+ 3 236 904	+290 839	+32 730

* Includes Rs 2 108 collected from Hill Tippera (for two years)

The gross outturn under all heads was much greater than in the previous year, and considering that the gross yield of the year 1898-99 itself had been considerably larger than in 1897 98, this result is very satisfactory. The Sundarbans Division gave the largest increase, the timber and fuel there exceeding those of the previous year by 693,867 cubic feet and 2,316,888 cubic feet, respectively, and the Departmental Officers are reported to have shown much energy in exploiting the produce of this Division and taking advantage of a brisk demand

Singhbhum also showed a considerable improvement in its yield of timber, but fell off considerably in its fuel outturn, as also did Angul

11 *Financial Results* —The following statement shows the financial results during each of the last six official years —

Financial year	Receipts Rs	Charges Rs	Net revenue Rs.
1894 95	7,95,673	3 98,601	3,97,072
1895 96	9,18,709	4 66,068	4,52,641
1896-97	13,70,849	6,90,042	6,80,807
1897 98	11 89,285	6 53 437	5,35,848
1898-99	9,72 313	4,86,319	4,85,994
1899-1900	11,38,912	5,45,205	5,93,707

For the purposes of comparison the Conservator eliminates the years 1896—98 as exceptional owing to the extensive sleeper operations in Singhbhum, but this the Lieutenant Governor cannot agree to, since in his opinion there must yearly be a large demand for sleepers on the part of the railway companies, which it is the duty of the Forest Department to meet or to explain to the satisfaction of Government their inability so to do

12 The following table shows the result of the last two financial years, division by division —

Division	Receipts.		Charges		Surplus		Deficit

Net surplus					5 93 707	4 85 994		

The Lieutenant Governor regrets to find that no improvement was made in the Tista, Buxa, Palamau, Singhbhum, and Angul Divisions, which again worked at a loss during the year under report It is explained that in Singhbhum there would have been a small surplus, but for the expenditure of Rs 12,113 on surveys, and that the deficit in Tista was due to the inability to dispose of the sleepers prepared there in consequence of the breaks in the Tista Valley road In the Buxa Division operations, it is said, are retarded owing to the climate, which prevents the Department from securing reliable workmen, but the Conservator thinks that there will be a profit in the coming year Improvement in Angul is also promised though for what reason is not stated In reviewing the report of the previous year, the Government of India expressed the opinion that no forest division in Bengal, except the Direction Division, should show a deficit, and they agreed with the Lieutenant Governor in considering that more energy was required on the part of Divisional Forest Officers in seeking and developing markets for the many products of the Bengal forests

The Conservator reports that a certain zeal in the direction of opening out new markets has now been aroused among the officers of the Department, but that none have shown any special aptitude for commercial undertakings His Honour desires that the Conservator will impress upon all officers that unless they eagerly seek every chance of exploiting the forest produce and bringing the products to the knowledge of purchasers, instead of waiting for purchasers to approach them, they have failed in one of the essential duties of a forest officer

The answers given by the Conservator with reference to the questions asked concerning the supply of sleepers to the Cooch Bihar, Barun Daltonganj and Bengal Duars Railways do not show that it was impossible for the Department to furnish the necessary timber

The Lieutenant-Governor is glad to notice the successful and profitable introduction of Departmental operations in the matter of the collection and disposal of certain minor products, viz , India rubber in the Kurseong Division, myrabolams in the Singhbhum Division, and the fruit of the *strychnos nux vomica* in the Puri Division, and he is obliged to Mr Wild for the trouble he has taken in the improvement of this branch of the administration That the departmental

cultivation of lac in the Palamau forests has, owing to want of zeal, been so far a failure, is most regrettable, and the Lieutenant Governor trusts that the Conservator will see that this want of energy on the part of local officers is promptly remedied there would appear to be no reason why this cultivation should not be as successful as others, and it is trusted that next year's report will show better results It is satisfactory also to note that the right to cut *sabai* grass in the Singhbhum reserves, which had been leased for three years in 1897 at a total rent of Rs 30,000, was resettled in April 1900, for a further term of three years for a sum of Rs 1,26,000

The state of the mica industry in Hazaribagh continues to be disappointing, and the Conservator thinks that it is impossible to exercise much departmental check of the data on which the royalty on mica is calculated without a large increase of establishment A revision of the mica mining rules is now under the consideration of Government

13 *Miscellaneous*—Since the close of the year three new appointments have been sanctioned by Her Majesty's Secretary of State, viz, one Deputy Conservator, first grade, another of the third grade, and one Assistant Conservator, second grade

Considerable damage was done to the forests around Darjeeling by the unusully heavy storm and rainfall of the 24th and 25th September 1899 There was a formidable landslip on the Setikhola Jhora, and the torrents in the Tista river and its tributaries, the Rangit and the Bara Rangit, brought down large deposits of silt and washed away low lying strips of forest on their immediate banks, and a bed of silt was formed in the Apalchand forest in Jalpaiguri It is estimated that 463 acres of forest in the Darjeeling Division, and some 450 out of 600 acres in the bed of the Balasun river have been lost The damage to roads and paths was extensive in the three hill Divisions of Darjeeling, Kurseong, and Tista

The present report is full and in view of the remarks passed last year by the Government of India, it should if possible have been curtailed This subject, however is now under consideration, and the Lieutenant Governor is awaiting the opinion of the Conservator on the suggestion made by the Government of India in their Circular No 7F, dated the 18th September 1900, for the shortening of the Report

14 In thanking Mr Wild for his administration generally and for the large increase he and his officers have obtained in the departmental surplus, the Lieutenant-Governor desires that two points may be very closely kept in view during the ensuing year the vital importance of pushing on the preparation of working-plans and the keen exploitation of forest products

By order of the Lieutenant Governor of Bengal,

F A SLACKE,

Secretary to the Government of Bengal

PROGRESS OF EDUCATION IN BENGAL DURING 1899-1900

GENERAL DEPARTMENT—EDUCATION

Calcutta, the 8th January 1901

RESOLUTION—No 116

READ—

The Report on Public Instruction in Bengal for the year 1899-1900

THE report submitted by Mr Pedler, F R S, who has held charge of the Education Department throughout the year, reached Government with a punctuality which was the more commendable that his time has been much engrossed in the reports called for by the Government of India on the various points raised by Mr J S Cotton in his quinquennial Review on Education

2 *Number under instruction* —The following table shows the number of colleges and schools in Bengal and the number of pupils in them at the end of the years 1898 99 and 1899 1900 —

Class of Institution	1898-99 Schools	1898-99 Pupils	1899-1900 Schools	1899-1900 Pupils	Average number of pupils 1899	Average number of pupils 1900

Total	11 078	129 542	10 762	1[illegible]1 577	11 1	11 3
GRAND TOTAL	65 101	1 668 785	64 653	1 687 5[illegible]5	25 6	26 1

The number of educational institutions decreased during the year from 65,101 to 64,653, the decrease being mostly with regard to private institutions, but the pupils attending them increased by 18,810

3 A comparison with the figures from 1891 shows an almost continuous increase in the number of pupils with a yearly variation in the number of schools due to the appearance and disappearance of what may be called venture institutions

An examination of the figures in the table above shows the continued tendency of Arts Colleges and high English schools to gain in popularity, whereas the middle English schools and middle vernacular schools are year by year losing ground The reason is not far to seek, and lies undoubtedly in the prevailing but short-sighted opinion of parents that the future success of their children precludes any expenditure of time in gaining a knowledge of their

vernacular. This state of affairs raises the question whether the curriculum of the higher schools should not be modified in order to ensure that in the lower classes boys shall obtain a competent knowledge of their own language and the matter has just been dealt with in a separate Resolution

Primary schools have shown noticeable vitality, the upper section records a gain of 69 schools and 8,091 pupils, the lower section also, though the actual number of schools has decreased, shows a satisfactory increase of 6,123 pupils The Lieutenant Governor notices with pleasure the rapid growth of special schools, and concurs with the Director, who says regarding them—

> The increase of 27 9 per cent in the schools and 19 1 per cent in the pupils would tend to prove that the people of Bengal are waking up to the fact that a general training or, in the higher stages, a literary education, leading solely up to the Calcutta University examination alone, does not represent the sum total of education, and that other special forms of education really are beginning to offer better prospects of advancement in life

This is the beginning of a movement which must largely influence the development and prosperity of the province, and which is the more hopeful, because its growth is spontaneous Female education has during the year shown no marked sign of improvement, but the actual number of pupils has risen by 1 2 per cent There are many obstacles which retard the education of girls, and there is at least no retreat

4 *Ratio of pupils to population* —The percentage of boys of a school going age and similarly of girls for the whole of the Province, excluding Cooch Bihar, Hill Tippera, and the Tributary State of Chota Nagpur, to the numbers actually at school, is 28 9 and 1 9 per cent, respectively, as against 28 6 and 1 9 last year There are, however, great differences in the degrees of educational progress attained in the various districts and divisions, Midnapore returning 60·4 per cent and Purnea only 13 2 The poorer the districts the lower the number of boys at school With the exception of Patna, all the Bihar districts rank very low in the list

5 *Schools classified according to management* —The following table classifies the colleges and schools according to their management —

CLASS OF INSTITUTIONS	1899		1900	
	Schools	Pupils	Schools	Pupils
1	2	3	4	5
PUBLIC INSTITUTIONS				
Under Public Management				
Managed by Government	1 0	25 547	172	26 301
Do by District or Municipal Boards	200	13 800	200	13 076
Under Private Management				
Aided by Government or by District or Municipal Boards	38 041	1 164 193	38 993	1 188 149
Unaided	15 012	342,703	14 526	337 892
Total	54 0.3	1 546 243	53 891	1 566,018
PRIVATE INSTITUTIONS				
Of indigenous instruction	11 078	122,542	10 762	121 577
GRAND TOTAL	65 101	1 668 785	64,653	1 687 595

Owing to the transfer of the reformatory schools at Alipur and Hazaribagh from the Jail to the Education Department, the establishment of a Survey School at Angul, and the transfer of the Siliguri Middle Vernacular School in the Rajshahi Division to the aided list, there was a net increase of two in the institutions managed by Government. The schools managed by District or Municipal Boards remained stationary Of schools under private management, the unaided class decreased by 486, which was, however, attended by an increase of 352 in the aided class—results which indicate that success is attending the efforts now being made to bring these schools under inspection and to introduce method and system in their work

6 *Financial results* —The net expenditure on education for the last two years is compared in the following table —

Head of Charge	1898-99				1899-1900.			
	Net expenditure after deducting receipts—				Net expenditure after deducting receipts—			
	From Provincial Revenue	From District funds	From Municipal funds	Total expenditure	From Provincial Revenues	From District funds	From Municipal funds.	Total expenditure.

Total	23 74 226	11 37 4_4	94 877	1 11 12 906	24 17 501	11 71 380	92 440	1 13,94,555
	36 06,5 7				36 81 321			

An examination of the figures in the table shows that the total expenditure from Provincial Revenues rose by Rs 43,275, or by 1 8 per cent, and from District Funds by Rs 33,956, or 2 9 per cent, while that from Municipal Funds fell off by Rs 2,437, or by 2 6 per cent The total expenditure from all the public funds taken together shows an increase of Rs 74,794, or 2 1 per cent In the preceding year the expenditure from the public funds had decreased by 2 4 per cent Thus the expenditure from the public funds during the year under review is approximately the same as that of 1897 98

The expenditure from private sources rose from Rs 75,06,379 to Rs 77,13,237, or by 2 8 per cent Expenditure from Provincial Revenues decreased under the heads of "Collegiate" education, Scholarships, and Superintendence, but there was a considerable increase in the aid to "Special" education

7 *Inspection tours* —Mr Pedler was on tour for 63 days out of Calcutta in addition to 16 days occupied in attending the Conference held in Simla under the orders of the Government of India for the consideration of the scheme in connection with the establishment of a Research University by Mr Tata, of Bombay The Lieutenant Governor is pleased to see that the Director was able to give so considerable an amount of time to seeing for himself on the spot the working of the institutions under him—a duty of the highest value for effective guidance and control

The time spent on inspection by the inspecting staff of the Province is shown and compared for the past two years in the following statement —

Class of officers	1898 99		1899 1900	
	Number of officers	Average number of days on tour	Number of officers	Average number of days on tour
1	2	3	4	5
Inspectors	7	153	7	152
Inspector of European Schools	1	90	1	58
Inspectress of Girls' Schools	1	35	1	53
Assistant Inspectors	10	172	10	172
Deputy Inspectors	50	180	51	176
Sub Inspectors	209	212	212*	214

* Including one officer whose work being confined to Calcutta has been left out of consideration in calculating the average in column 5

The Director has reviewed in detail the work done by the Inspecting officers of all classes, and reports that they have generally performed their inspection duties satisfactorily There has been an improvement in the work of the Inspectress of Schools for Girls which was unfavourably commented on last year

Mr Pedler states that the Inspectors as a class have done their work well, but it is noticed that Mr Bamford, the Inspector of European Schools, was on tour for only 45 days out of 349 days he was on duty No explanation of this has been given, and His Honour must ask that a much larger amount of time be spent by the Inspector in visiting the schools under him

In a previous Resolution a desire was expressed by Government that those Assistant Inspectors of Schools who had very little office work to do should remain away from their head quarters for about 180 days, and that the tour of Assistant Inspectors of Schools for Muhammadan Education should not be permitted to fall below this limit These directions were during the year under review practically complied with, except in the case of Maulvi Muhammad Ibrahim, Assistant Inspector of Muhammadan Schools, Rajshahi and Burdwan Divisions, for which no explanation has been given

Opinions differ as to the character of the work done by the Inspecting pandits, but on the whole their work cannot be considered a success In some districts they are reported to have done their work satisfactorily, while in others they are reported to be men of inferior qualifications The Conference of Educational officers which met in January 1900 recommended that these officers should be chosen from pupils who have passed at least the second year examination of a first grade training school—a matter which is now awaiting a further report from the Director

8 *District Boards*—The Lieutenant Governor is glad to learn that the District Boards have worked in harmony with the officers of the Education Department, and that the suggestions and recommendations of the Deputy Inspectors generally received due consideration From the Burdwan Division complaints are made of delay in the payment of school grants, salaries and scholarships, this should be looked to And it is to be hoped that the District Board of Puri will in future be more careful in their choice of examiners

In some districts Local Boards have been entrusted with the administration of the primary fund and the control of primary education, in others they have no educational functions at all Some of the Local Boards are reported to have performed their duties fairly The Lieutenant Governor has no doubt that especially with judicious guidance the Local Boards may be made most useful auxiliaries in the promotion of primary education

9 *Municipal Boards*—In this Government's Circular No 1, dated the 11th January 1893, Municipalities were directed to provide for the education of half the male school going population within their areas at the rate of ten annas per pupil From the Director's report it appears that the wishes of Government were not given effect to in some cases, and that the distribution of the allotment, when made, was injudicious and unfavourable to the growth of primary education It is hoped that Commissioners and District Officers, with whom the ratification of the estimates of Municipal Boards lies, will see that the obligation imposed upon Municipalities is fulfilled as far as possible

10 *University Education*—There were 44 Arts Colleges working in Bengal during 1899 1900 as against 39 in the previous year Of these, 11 were maintained by Government, 1 was maintained by the Midnapore Municipality, 7 were in receipt of aid from Government, and 25 were unaided institutions The number of aided colleges increased by 2 and of unaided colleges by 3 The net increase of five colleges is explained by the abolition of one of the old colleges on the one hand and on the other by the opening of four new colleges and the resuscitation of two others after a period of suspended animation

The number of students attending Arts Colleges increased from 7,204 to 7,868, that is, by 664, the increase occurring in both aided and unaided colleges. In the Government colleges the numbers were practically the same as in the previous year, the figures for which were considerably in excess of the average of the three preceding years The attendance at the Hooghly College, which has been steadily declining during the last five years,

showed no further decrease The report called for on this subject in last year's Resolution is awaited The increasing attendance at the Bethune College for girls affords grounds for congratulation, and the great success achieved by the pupils is commented on below

11 *Cost of College education* —The total expenditure on collegiate education increased from Rs 7,32,690 to Rs 7,43,542, that on Government colleges decreased by Rs 8,680, while the expenditure on the aided and the unaided colleges increased by Rs 8,653 and Rs 10,773, respectively

The maintenance of the 11 Government colleges cost Rs 3,71,401, of which Rs 1,73,187 were contributed from Provincial Revenues, Rs 1,85,397 from fees, and Rs 12,817 from endowments The expenditure from Provincial Revenues decreased by Rs 10,869, while that from fee receipts increased by Rs. 2,187

Without counting the Martinière College for girls, which has not furnished returns of expenditure, the grant from Provincial Revenues to the aided colleges amounted to Rs 23,400

Although during the last four years the charge on Provincial Revenues under this head has decreased by Rs 99,036, yet even now nearly 47 per cent of the total cost of educating each student in a Government college is borne by the State The decrease which has been effected is not wholly permanent, being due in part to the accidental absence of many of the higher paid Professors

12 *Success at University Examinations* —The total number of candidates for the First Arts examination of 1900 was 3,037, or 241 more than in the preceding year Of these, 1,142 passed, the percentage of success very slightly declining The Government colleges passed 50 per cent of their pupils as against 48, and the aided and unaided colleges 37 and 33 per cent, respectively, as against 46 and 33 in the previous year The Bethune College for girls deserves especial commendation, since all of the ten candidates sent up were successful The Lieutenant Governor is pleased to see that the Calcutta Madrassa, which last year was the lowest, is now second in the percentage test, a success, however, which must in part be attributed to the training students received at the Presidency College Amongst the aided colleges His Honour is gratified to see the newly opened Dublin University Mission College at Hazaribagh passed 9 students out of 11 sent up

For the B A examination there were 1,667 candidates, of whom 461 passed The literary proved, as usual, more popular than the science subjects, and 1,041 candidates presented themselves for examination in the former, 626 in the latter The percentage of success was approximately the same in both divisions, 27 and 28 per cent, respectively Of 72 names on the Honours lists, 43 are of students belonging to Government colleges, 16 of students of aided colleges, and 13 of students of unaided colleges The last class of institutions judged by the results appear to limit their energies chiefly to securing pass degrees The Presidency College passed five out of the six candidates who obtained a place in the first division in Honours There has been some slight improvement in the Hooghly College, but in the large college of Dacca the results continue very disappointing It would appear that the staff at this college needs strengthening

The number of candidates for the M A examination rose from 162 to 206, and the number of passes from 63 to 92, the percentage of success being 44 6 as against 38 9 in the preceding year There were 111 candidates for the examination in English, 21 for Philosophy, 23 for Mathematics, 32 for Scientific subjects, 11 for Sanskrit, 2 for Persian, and 6 for History Of the 58 who passed from Government colleges, 50 came from the Presidency At present the majority of the candidates successful at these examinations come almost entirely from Government and the Missionary colleges

13 *Research Scholarships* —During the year under review three post graduate scholarships of Rs 100 each, tenable for a maximum period of three years, were founded by Government with a view to encourage the prosecution of original research by graduates of the Calcutta University The conditions on which these scholarships can be held are that candidates for them must have passed the M A examination, or must have obtained some equivalent degree in Medicine, Law or Engineering within three years previous

to the date of application. Ordinarily, two of the scholarships will be granted to graduates who take up scientific research, while the third will be awarded to a candidate who engages in original investigation in literary subjects, including Philology, History, Philosophy, Political Economy, &c. The scholarships for the year 1900 have been granted to three graduates, of whom one has taken up Mathematical Physics, another is engaged in Physico-Chemical research, and a third is engaged in investigations regarding the Literature, Science, &c, of the ancient Arabs

14 *Secondary Education*—The main statistics relating to secondary schools for the last five years are contained in the subjoined statement

Year	Number of schools	Number of pupils	Expenditure from— Public funds	Private funds	Total
			Rs	Rs	Rs
1895-96	2,422	207,542	6,07,983	22,61,106	28,69,089
1896 97	2,451	215,131	6,01,526	22,95,876	28,97,402
1897 98	2,453	220,159	5,99,672	23,46,117	29,45,789
1898 99	2,471	224,538	5,68,462	23,60,828	29,29,290
1899 1900	2 441	230,433	5,66,897	24,63,694	30,30,591

The steady progress in the number of secondary schools has not been continued during the year under report, there having been a decrease of 30 This has not affected the number of pupils which, when compared with the figures for last year, shows an increase of 11 per cent High English schools advanced both in number and strength The growth and extension of middle schools (both English and Vernacular) alone were arrested The Director remarks that schools of this class are losing in popularity, and their outlook is not bright It is the anxiety of ambitious youths to obtain a smattering of English as an avenue to employment that leads them to neglect these schools, but it must be remembered that "the existence of these schools "also serves the useful purpose of the promotion of education of the masses, for "the pupils receive a much sounder education in these schools than they could "in an average *pathsala* Those, again, in the middle stage who proceed to the "high English schools are able to prosecute the study of English under much "better conditions" The Lieutenant Governor entirely agrees with the views of the Director as to the need of a sound vernacular training preliminary to English education The orders which have recently been issued by Government, remodelling the system of vernacular education in this Province, will place matters, he trusts, on a more satisfactory footing

It will be seen that during the last five years the expenditure from public funds has gradually been reduced and the contribution from private funds has increased by Rs 2,02,588 The policy of allowing private enterprise to exploit this class of schools, so far as this can be done without impairing their efficiency, has been kept in view Much improvement remains to be effected in the standard of attendance of the students which is very low as compared with similar schools in England

15 *High Schools*—These schools increased from 419 with 93,680 pupils to 462 with 105,954 pupils The number of schools managed by Government and Municipal Boards remained stationary, while the aided schools advanced by 23 and the unaided schools by 20 There has been a satisfactory increase in the strength of all these schools

At the University Entrance examination 5,089 candidates attended as against 4,798 in the preceding year, of whom 3,155 passed as against 2,922, the percentage of success having risen from 60 9 to 61 9

16 *Drawing*—The percentage of the number of pupils examined in drawing at the Entrance examination increased by 3 9, but the percentage of successful pupils dropped by 28 1, due presumably to the test having been severer than in the previous year At present, however, in many schools lack of money prevents the employment of a separate master for drawing This defect is being gradually lessened as it is now the practice to insist upon provision being made for a separate drawing master in aided schools, when the question of a new grant or the renewal of an existing grant is under consideration

17 *Middle Schools*—Middle English schools decreased by 24, or by 2 5 per cent, and the number of pupils in them by 8,216, or by 4 6 per cent The

schools managed by Government remained stationary, while those managed by District or Municipal Boards increased by 6. The aided and unaided middle English schools decreased by 10 and 20, respectively The attendance diminished in all classes of schools except in those managed by Municipal or District Boards

Middle vernacular schools decreased by 49, or by 4 per cent, and the attendance in them by 3,163, or by 5 per cent In the preceding year the attendance had decreased by 8 per cent

18 *Middle Scholarship Examination*—The following table exhibits in a condensed form the results of the Middle Scholarship examination from the two classes of schools (middle English and middle vernacular) for the last two years —

1898 99

	Number of candidates	Passed at the— Middle English examination	Middle Vernacular examination	Total
Middle English schools	3,685	1,414	1,215	2,629
„ vernacular schools	3,487	179	2,268	2,447
Total	7,172	1,593	3,483	5,076

1899 1900

	Number of candidates	Passed at the— Middle English examination	Middle Vernacular examination	Total
Middle English schools	2,992	987	925	1,912
„ vernacular schools	2,913	100	1,667	1,767
Total	5,905	1,087	2,592	3,679

This great falling off can be assigned only to the unpopularity which at present attends middle school education

19 *Bifurcation of Studies in High Schools*—In accordance with the recommendation of the Education Commission, a scheme was sanctioned during the year for the bifurcation of studies in high schools Under this scheme a student, after passing the annual examination of the third class, will have the option of continuing his studies for the University Entrance examination or of taking up a practical course more adapted to commercial than literary pursuits This practical course, or "modern side" as it may be termed, is divided into two classes one for the instruction of boys who elect to take up Engineering or similar subjects, the other to train those who elect to follow an industrial career The "modern side" students will be subjected to an examination after two years' training The successful candidates in the Engineering branch will be allowed to continue their studies in the Sibpur Civil Engineering College, while those in the industrial subjects will be granted pass certificates equivalent to the Entrance examination certificates The latter will also be eligible for a higher course of instruction, which would last two years, the final examination at the end of this period being held equivalent to the University F A examination

20 *Discipline and moral training*—Breaches against discipline and morality appear to have been few, and the offenders in each case were adequately punished A teacher no doubt can do much to elevate the moral tone of his school, but it is at home that a boy's moral character is formed, and the school master cannot succeed without the assistance of parental influence Misconduct on the part of teachers, Mr Pedler says, was "confined chiefly to the primary schools, the teachers of which are generally ill-paid and ill educated, and in whose case the temptation to earn a few additional rupees by unfair means, or by presenting false musters at the reward examinations, is too strong to be resisted"

21 *Transfer rules*—The transfer rules appear on the whole to have worked smoothly in all classes of secondary schools and to have been conducive to the maintenance of discipline In the case of primary schools, Sub-Inspectors should carefully explain to the gurus the aim and object of the rules, which at present the latter break chiefly on account of ignorance

22 *Boarding-houses*—The number of boarding houses for Indian pupils of educational institutions rose from 222 with 6,158 inmates in 1898 99 to 239 with 7,004 inmates in 1899-1900 The steady increase in the number of these

institutions, which are most necessary for the improvement of the tone and discipline of schools, is very satisfactory The total expenditure on these institutions was Rs. 2,37,041 in 1899-1900 as compared with Rs 2,41,456 in 1898-99, of which Rs. 16,292 was contributed by Government. Why with so great an increase in the number of residents the total expenditure decreased so largely is not explained Partly, but not wholly, it may no doubt be due to the economy resulting from dealing with larger numbers

23 *Physical exercises.*—The importance of physical training received attention, but, with the exception of the high schools, there seems to be no systematised form of physical exercise In the year under review, it was decided to make drill a compulsory subject for all students in zilla and collegiate schools, it being left to the school authorities to exempt such students from this form of exercise as were physically unfit, and a drill book was issued. Of European games, football and cricket are the favourites Indigenous games, like *kapati* or *hadoodoo*, are also played in schools in which the boys cannot afford to purchase costly apparatus The Lieutenant Governor is glad to find from the Director's report that several of the District and Subdivisional Officers took an interest in stimulating physical education among the boys by organising for them annual athletic sports

He has however, seen with much regret the long list of High English schools in which so far drill has not been introduced, and he directs that, with regard to such of them as are in receipt of Government aid, this assistance shall be discontinued unless drill is made a compulsory subject as in zilla schools

24 *Primary education*—The number of primary schools and their pupils during the past five years is shown in the following statement —

Year.	Upper Primary		Lower Primary	
	Schools	Pupils.	Schools	Pupils.
1895-96	3,944	153,070	47,054	1,087,356
1896 97	4,029	162 102	45,612	1,081,432
1897-98	4,107	165,067	43,482	1,036,635
1898 99	4,232	173,885	44,080	1,061,477
1899 1900	4,300	176,963	43 807	1,067,837

It is satisfactory to note that the number of upper primary schools and the number of pupils attending them are steadily advancing, and also that though the number of lower primary schools slightly decreased during the year in comparison with that of the previous year, the attendance in them has been increasing during the last two years

25 *Cost of primary education*—The expenditure incurred from the primary allotment by the Department and by the District Boards on account of schools for Indian boys and girls and of the subsidiary agency is compared for the last two years in the following statement —

	From Provincial Revenues		From District Funds		Total	
	1898-99	1899-1900	1898-99	1899 1900	1898 99	1899-1900
1	2	3	4	5	6	7
	Rs	Rs	Rs	Rs	Rs	Rs.
To stipendiary schools ...	1 18 950	1 23 619	1 54 101	1 61 719	2 73 0 1	2 84,338
" non-stipendiary schools	22 083	19 556	3 27 647	2 84 983	40 730	3,04,539
" payments to primary schools under the District Boards or Department or such as are not included in the above	1 317	4,519	3 010	7 507	4,327	12,026
" rewards to teachers of primary schools for passing pupils at scholarship examinations.	9 319	12,334	51 432	96 511	60 751	1 08 845
" charges for abolished schools ..	3 592	2 400	12 008	10 935	15 690	13 335
" buildings and furniture ...	6 736	5 716	2 055	1 563	8,791	7 279
" subordinate inspecting agency	13 640	15 174	87 887	87 916	1 01 527	1 03,090
" lower primary scholarships created from the primary grant	2 463	3 227	24 443	24 862	26 896	28,089
" miscellaneous	14 626	13,[illegible]9	53 153	4[illegible] 441	66 779	58,732
Total payments	1 92 716	1 98 836	7 14 826	7 21 437	9 07 542	9 20 273
Add 80 per cent. of the actual charges on account of Sub-Inspectors	20 706	21 776	1 42,505	1 56 899	1 63 211	1 77 675
Grand Total	2 13,422	2 20 612	8 57 331	8 77 336	10,70 753	10,97 948
Total allotment, excluding the allotment for Sub Inspectors.*	1 98 526	2 03 260	7 53 253	7 47 886*	9 53 779	9 51,146
Actual savings	5 810	4,424	40 427	26 449	46,237	30,873

* Allotment for Sub-Inspectors was Rs. 2,04,863

In comparison with the previous year the expenditure on primary schools both from Provincial Revenues and District Funds increased, but the figures in the table do not include all the charges from Provincial Revenues on primary education, since it excludes those paid for primary schools from the grant in aid and circle funds

It is seen also that while the departmental budget grant for primary schools increased, that from District Funds decreased, the reason for which is not discussed by the Director A large portion even of this reduced allotment remained unexpended during the year, and in this respect the District Boards of Shahabad and Mymensingh were the worst offenders On this point the Director remarks—

That nearly Rs 50,000 available had not been spent on primary education by the District Boards concerned would be a very serious matter, and would be almost sufficient to prove a want of proper supervision on the part of such bodies If large sums are due to uncashed cheques as explained, then the charge of want of interest in the work of primary education could not be maintained At all events any savings in the amount for primary education in one year should be made available for the extension of education in the following year In order to test whether this procedure is followed, a full enquiry will be instituted as to whether the savings were re allotted for the purposes of education or allowed to merge in the General District Fund

The result of this enquiry should be noticed in next year's report Very probably much of this nominal saving is due to uncashed cheques, despite the fact that stringent orders were issued on the subject last year

26 *Comparison of cost of Upper and Lower Primary Schools* —It appears from paragraph 12, Section IV, of the Director's report that the cost of each upper primary school increased, while that for each lower primary school decreased The cost per pupil per annum, in annas, increased in upper primary schools from 19 8 to 20 7, and in lower primary schools decreased from 10 2 to 10 1

Great diversity appears to prevail in the various districts in respect of the administration of the funds for primary education The Lieutenant Governor recognises that different localities require different treatment, and that no fixed uniform standard can be laid down, but he trusts that the local authorities will carefully consider, in consultation with the Circle Inspectors, the conditions and requirements of their respective districts or municipalities

27 *Primary Scholarship Examination* —The results of the Upper Primary Scholarship examination for the last five years are shown in the table below —

Year	Competing schools	Successful schools	Candidates examined	Successful candidates	Percentage of successful schools	Percentage of successful candidates
1	2	3	4	5	6	7
1895 96	2 637	1,942	6,162	3,466	73 0	56 2
1896 97	2 682	2 037	6 518	3 824	75 9	58·6
1897 98	2 647	2 116	6 113	4 051	79 9	66 2
1898 99	2 969	2 280	7 357	4 386	76 8	59 6
1899 1900	2 959	2 343	7 206	4 637	79 1	64 3

The Director remarks that—

Compared with the preceding year, however, the result of the year under review is an appreciable advance, and perhaps the percentage of success is settling down to a normal standard

It is to be noted that the figures in the table above do not represent the total number of passes at the Upper Primary Scholarship examination, for they exclude 2,175 boys that passed during the year under review from middle and special schools

In the Lower Primary Scholarship examinations so far as lower primary schools are concerned, there was an increase both in the number of competing and successful schools The number of examinees increased by 4·6 and that of the passed candidates by 1 6 per cent There were, besides, 40,846 candidates that passed the Lower Primary Scholarship examination from schools other than lower primary ones Any approach to uniformity in the results is wanting, probably because the answer papers are valued by local examiners

28 *Night Schools* —There was a decrease in the number of these schools in comparison with the previous year Some inspecting officers are also reported to have "grave doubts about the *bonâ fides*" of these schools The Director, moreover, writes—

Abuses and malpractices there are no doubt But a careful watch over these schools may reduce the evils to a minimum in the same way as the evils in regard to the season pathsalas have been almost eradicated Considering the little leisure that the children of the masses have to attend schools, the night schools afford a good means of supplementing their imperfect education, and such schools should be encouraged, and should do good, if they are carefully worked out and malpractices are cautiously guarded against

The Lieutenant Governor concurs with the views of the Director, and desires that the matter may be discussed more fully in the next year's report Meanwhile the inspecting staff should give their careful attention to this class of school

29 *School Post Offices* —The number of school post offices was 781 as in the previous year They are reported to have worked well in almost all the Divisions

30 *Training Schools* —During the year under review there were, as in the previous year, 29 training schools—19 for masters and 10 for mistresses The latter were all aided Of the former, 11 (8 first grade and 3 of lower grades) were maintained by Government, and 8 were aided The attendance at the schools for masters increased from 808 to 845, at the schools for mistresses it rose from 456 to 669 The expenditure from Provincial Revenues on all training schools amounted to Rs 1,01,917 as against Rs 95,199 in the previous year The 8 Government first grade schools teach general subjects up to a high standard through the medium of the vernaculars, and in addition instruct students in the theory and practice of teaching, practising schools being attached to the training schools for the exercise of the students The course of training extends over a period of three years, and the final certificates granted by the Education Department on the results of the Vernacular Mastership examination constitute passports to the employment of the recipients as senior vernacular masters in middle schools Of the aided schools for masters, only the one at Krishnagar conforms to the departmental standards and sends up candidates for the Vernacular Mastership examination Similarly, but few of the aided schools for mistresses send up candidates for the departmental senior and junior and Female Teachership Certificate examinations The necessity of continuing aid to those schools which do not conform to the standard should be discussed by the Director when later on he reports with regard to Training Schools generally There were 115 candidates for the last Vernacular Mastership examination of the first grade, of whom 79 passed, as against 73 out of 96 at the previous year's examination That the Education Department suffers for want of properly qualified teachers is known, but the opening of the Training College at Kurseong will gradually remove this defect and facilitate the introduction of the reforms which the Director so much desires

31 *English Teachership classes* —The Lieutenant Governor has read with interest the Director's remarks on the subject of the English Teachership classes attached to the training schools at Calcutta, Patna, Dacca and Cuttack The failure of the scheme is, in the Director's opinion, due in great measure to the classes being attached to vernacular training schools It appears that the abler of the College students do not relish the idea of completing their education at the vernacular training schools, that the practising schools attached to those schools being necessarily worked on a vernacular basis do not afford sufficient scope for the training of teachers who will teach in English secondary schools, and that the practice of holding a common theoretical examination* for all classes of candidates tends to make the examination

too difficult for candidates of inferior general attainments. At the last examination only seven candidates passed out of 30, and the total number of passes at the four examinations, which have been held since the inauguration of the scheme, comes up to only 26—a small success entirely out of proportion to the expenditure incurred The Lieutenant Governor acquiesces in the Director's desire to await the results of another year before deciding on the reforms needed in this branch of the department

32 *Law classes* —There are no institutions in Bengal exclusively devoted to the teaching of Law Law classes are attached to some of the first grade Arts Colleges which are attended by students who desire to go up for the B L or the Pleadership examination During the year under review the number of institutions teaching Law was, as in the previous year, 17 The number of students attending Law classes fell off from 1,305 to 1,260, or by 145 The decrease occurred in unaided colleges, at which, however, nearly four-fifths of the students are trained, the Ripon College having nearly one-third of the total number

The number of students reading for the B L examination increased by 37, while the number of those preparing for the Pleadership examination decreased by 82 In 1899 1900, 451 candidates appeared at the B L examination, of whom 102 only passed, as compared with 206 out of 450 candidates in the preceding year This remarkable variation the Director does not explain. It seems that the standard of the examination has been largely enhanced.

33 *Medical Institutions* —The returns show that these decreased from 11 to 9, and the number of students from 1,709 to 1,582 The Calcutta Medical College is the only institution affiliated in Medicine to the Calcutta University The total strength of the College on the 31st March 1900 was 502 as against 477 on the same date of the previous year The expenditure on the College during the year amounted to Rs 1,84,325, of which Rs 1,49,056 was paid from Provincial Revenues, and Rs 35,269 was realised from fee-receipts The students of the Medical College are required to undergo three University examinations during their five years' study, viz, the Preliminary Scientific examination at the end of the second year, the first L M S or the first M B examination at the end of the third year, and the second L M S or second M B examination at the end of the fifth year During the year under review two candidates passed the second M B and 35 the second L M S examination as against 3 and 51, respectively, during the previous year As was the case last year, no candidate appeared for examination for Honours in Medicine or for that of Doctor in Medicine The Lieutenant Governor regrets to see the small number of passes, and is surprised to learn that out of the 52 students who obtained scholarships on the results of the last F A examination, only one made his scholarship tenable at the Medical College The control of medical education is now in the hands of the Inspector General of Civil Hospitals, who will be consulted as to the cause of the apparent unpopularity of medical studies

Besides the Medical College, Government maintains four vernacular medical schools, viz, the Campbell Medical School at Calcutta, the Temple Medical School at Patna, the Dacca and the Cuttack Medical Schools The number of pupils on the rolls of the several schools on the 31st March 1900 was as follows —

At the Calcutta school	212
„ Dacca „	176
„ Patna ,	151
„ Cuttack „	98

The total expenditure from Provincial Revenues on the four schools amounted to Rs 90,976, while that from fee receipts came to Rs 18,892 In all 81 students passed the final examination of the vernacular medical schools —22 (including three females) from the Campbell School, 23 from the Patna School, 19 from the Dacca School, and 17 from the Cuttack School

Besides the four Government medical schools already noticed, there were four unaided medical schools, including a homœopathic school and an "electric medical school" The total number of pupils attending these schools was 443

34. *Sibpur Engineering College*—The strength of the College on the 31st March 1900 was 105 for the Engineer Department, 156 for the Apprentice Department and 6 in the Artisan class, or a total of 267 against 294 last year The Engineering Department consisted of 98 Hindus, 5 Europeans and Eurasians, and 2 Muhammadans The Apprentice Department consisted of 132 Hindus, 20 Europeans and Eurasians, and 4 Muhammadans Out of 28 candidates for the B E and L E examinations, which are really one examination, no less than 14 candidates passed as against 4 out of 20 at the previous year's examination For the F E examination there were 44 candidates, of whom 30 passed On the results of the examinations in the Apprentice Department, 28 Overseers' certificates and 31 Sub Overseers' certificates were issued as against 5 Overseers' certificates and 17 Sub Overseers' certificates in the year 1898 99 The six technical schools affiliated to the College sent up 64 candidates for its second year examination in the Apprentice Department, of whom 23 passed The failures occurred mainly in practical work In the newly opened Agricultural Department, 9 passed out of the 11 students in the upper class, and both students of the lower class passed The passed students are undergoing a course of practical training under the Director of Land Records and Agriculture The final examination of those who joined the Agricultural Department in 1898 was held in July 1900 The Artisan class of the College showed a little more vitality than in the preceding year, there being six students as against one The teaching in this class is through the medium of the vernacular Two students during the year took mining scholarships, but no student underwent a course of electrical engineering

The Director should consider and report whether in the interests of the B A students the present rules as regards their admission should not be modified so as to ensure their having a proper practical training

The Lieutenant Governor has heard with much satisfaction that all the passed Engineering students of 1899 have secured appointments

35 *The Behar School of Engineering*—The course of instruction followed in this school is the same as in the Apprentice Department of the Civil Engineering College at Sibpur, and in this year was extended to the overseer standard On the 31st March 1900 there were 90 students on the rolls of the school, of whom 58 were Biharis and 32 Bengalis, 23 of the latter being domiciled in Bihar Sixty three of the students were taught in English and 27 through the medium of the vernacular On the results of the examination held in January and February 1900, 31 sub overseers' certificates were awarded A European foreman mechanic was appointed to the workshop during the year, and he is reported to be working with excellent results At the examination of the *amin* class held in April 1899, 23 out of 34 candidates passed, and were awarded First Survey Standard certificates The total fee receipts amounted to Rs 1,458 The total expenditure from Provincial Revenues came up to Rs 17,685 An amount of Rs 1,018 7-6, being the sale proceeds of articles manufactured in the workshop, was paid into the treasury

36 *Reformatory Schools*—The two reformatory schools at Alipore and Hazaribagh were transferred from the control of the Jail to that of the Education Department, with effect from the 1st January 1900 On the 31st December 1899 there were 179 boys at Alipore and 237 at Hazaribagh At both places the boys are taught how to read and write either Bengali or Hindi besides Arithmetic Five of the Alipore boys appeared at the Lower Primary Scholarship examination, and two of them passed in the first division The trades taught to the boys were carpentry, bookbinding, cane work, gardening, blacksmithy, tin work and printing at the Alipore School, and cloth weaving, tailoring, carpentry, blacksmithy and gardening at the Hazaribagh School Drill and gymnastics were attended by boys of both schools Marks for good conduct were earned by 88 per cent of the Alipore boys and 97 per cent of those at Hazaribagh

37 *Survey Schools*—On the 31st March 1900 the Dacca School had 39 students in the Sub Overseers' Department and 84 students in the Survey Department as against 46 and 98 students on the same date in the previous year The Cuttack School had a total attendance of 89 as against 88 Both schools now teach the same course The Dacca School passed 9 out of 11

candidates for the Sub Overseers' examination and 28 out of 38 candidates for the Survey Final examination. The expenditure from Provincial Revenues on the Dacca School was Rs 10,122 as against Rs 10,284, and on the Cuttack School Rs 2,943 as against Rs 2,793 in the preceding year The Patna School has been amalgamated with the Bihar School of Engineering

38 *Government School of Art*—The number of students on the rolls on the 31st March last was 272 as against 265 in 1898 99 The number of students on the practical or industrial side was 255 as against 249, and on the Fine Art side was 17 as against 16 in the preceding year The average percentage of success at the examination for the industrial division was about 75, and for the Fine Art division it was about 71, the corresponding figures for last year being 59 and 52 During the year under review 26 students of the school obtained appointments as drawing masters and draughtsmen, as lithographers and painters, on salaries ranging from Rs 20 to Rs 50 The Lieutenant Governor is glad to learn that the lithographs executed by advanced students of the School of Art will be utilised for training schools As regards the manner in which the School of Art can co operate with the Public Works Department as suggested by the Principal, the Lieutenant Governor awaits such suggestions as the Director may consider necessary to make after consulting the Secretary to Government in the Public Works Department

His Honour desires that in future reports with regard to technical schools the Director would briefly state, concerning each, the defects it suffers from and the measures taken to remedy them

39 *Female education*—The main statistics of female education, *i e*, the attendance and the expenditure in the schools for native girls, are shown in the following table —

Class of Schools	Number of schools	Number on the rolls on the 31st of March	Average monthly roll number	Average daily attendance	Expenditure— From public funds: Provincial revenues	District funds	Municipal funds	From private funds: Fees	Other sources	Total
1	2	3	4	5	6	7	8	9	10	11
					Rs	Rs	Rs	Rs	Rs	Rs

Ditto by District or Municipal Boards	1	57	47	30			201	2		228
Aided by Government or by District or Municipal Boards	[illegible]93	50 843	47 347	3[illegible] 40[illegible]	6[illegible] 62[illegible]	37 828	9 177	20 714	1 26,470	2,68 814
Unaided	4[illegible]1	[illegible]088	6 [illegible]	[illegible]				739	10 081	10 820
Total for 1899 1900	2 719	58,331	54 871	40 839	88 458	37 8[illegible]8	9 378	34 011	1 [illegible]6 976	3 06 651
						1 35 6[illegible]4		1 [illegible]0 987		
Total for 1898-99	2 732	57 617	53 563	39 778	86 713	33 886	9 001	33 880	1 7[illegible] 172	3 39 742
						1 2[illegible] 690		2 10 052		
Total for 1897 98	2 [illegible]81	5[illegible] 807	55 138	41 [illegible] 3		1 30 874		2 11 386		3 42 260
Total for 1896-97	3 [illegible]18	65 213	60 41[illegible]	[illegible]		1 43 597		2 11 811		3 55 408
Total for 1895-96	3 [illegible]56	65 974	61 444	4[illegible] 450		1 43 940		2 31 402		3 75 402

There was again a falling off in the number of girls' schools, but the number of pupils attending them slightly increased from 57,617 in 1898 99 to 58,331 during the year under review, but during the last four years the loss in the number of pupils is about 7,000 This is discouraging, but rapid progress in this direction cannot be expected, more especially as the Government is unable to increase the inducements now put forward to further female education Besides the pupils shown in the above table, there were also 38,988 girls in boys' schools as against 38,083 in the previous year The net result of the year is a loss of 13 schools and a gain of 1,619 pupils, including the girls in boys' schools The number of girls' schools and their attendance decreased in the Burdwan and Presidency Divisions, while that of schools and of pupils increased in the divisions of Chittagong and Chota Nagpur and Orissa Tributary Mahals The town of Calcutta and the Bhagalpur Division lost in schools, but

gained in pupils Much improvement remains to be effected as regards attendance.

There was an increase of Rs 5,974 in expenditure from public funds, but the receipts from local sources decreased by Rs 39,065, the net decrease in the expenditure during the year under review as compared with that of 1898-99 being Rs 33,091

The only two girls' schools maintained by Government are the Bethune Collegiate School in Calcutta and the Eden Female School in Dacca Mention has already been made of the good work done by the Bethune School From the Eden Female School three girls appeared at the last Entrance examination, all of whom passed The total number of girls who passed the modified Middle English, Middle Vernacular, Upper Primary and Lower Primary examinations for boys in the year under review was 2, 16, 57, and 915 as against 3, 22, 108, and 827 in the previous year, respectively At the higher examinations—Middle and Upper Primary—the number of passes was much smaller, though the passes by the Lower Primary standard increased by 88, or 10 per cent On this subject Mr Pedler remarks —

This indicates to how low a standard female education in Bengal usually only rises, and it would appear that the time has apparently not yet come in Bengal when we may expect to see any increase in the number of native girls passing at the examinations above the Upper Primary standard, and we must rest satisfied at present with the small number of girls passing either the Upper or Lower Primary examination, until the people generally (specially of the middle class) renounce their prejudice against the attendance of their daughters in school after they reach the age of about 11 or 12 years, or until, perhaps, a still deeper social change is brought about, namely, that of a distinct increase in the age at which girls are married in Bengal, for, as is well known, female children frequently begin their studies for the higher examinations, say for the Middle or Upper Primary standard, but before they are able to complete the course, they are removed from school to be married, and practically at once cease to attend school

Out of 4,513 pupils examined by Mrs Wheeler, the Inspectress of Girls' Schools, in and out of Calcutta during her visits to schools *in situ*, 3,594 passed The examinations in the Calcutta standards for girls' schools, which have been adopted by girls' schools in some mufassal districts, were held also at convenient centres in the districts of the 24 Parganas, Nadia, Midnapore, Murshidabad, Burdwan, Hooghly, Dacca, and Backergunge In the year under review the number of candidates at these examinations rose from 715 to 736 The number of passes also increased from 457 to 478 At the Female Teachership examination, which was held simultaneously with these examinations in girls' standards, 7 passed by the senior and 11 by the junior standard as against 8 and 6, respectively, of the previous year

40 *Education of Europeans* —The following table shows the number of Government, aided and unaided schools in Bengal for Europeans and the number of pupils attending them for the last two years —

Class	31st March 1899				31st March 1900			
	Number of schools.	Number of scholars.			Number of schools.	Number of Scholars		
		Boys	Girls	Total		Boys	Girls	Total
1	2	3	4	5	6	7	8	9
Secondary schools — Government	2	155	72	227	2	138	76	214
Secondary schools — Aided	40	2 525	2 513	5 038	42	2 793	2 696	5 489
Secondary schools — Unaided	1	1 307	386	1 693	12	1 417	449	1 866
Total	54	3 987	2 971	6 958	56	4 348	3 221	7 569
Primary schools — Aided	18	427	505	932	18	389	411	800
Primary schools — Unaided	3	30	1	4	2	23	6	29
Total	21	457	5[illegible]0	[illegible]0 7	20	412	417	829
Government schools	2	155	72	227	2	138	76	214
Aided schools	58	2952	3 018	5 970	60	3 182	3 107	6 289
Unaided schools	15	1 337	401	1 738	14	1 440	455	1 895
Grand Total of all Schools	75	4 444	3 491	7 935	76	4 760	3 638	8 398

The total number of Government schools remained unchanged, while the aided schools increased in number by 2, and unaided schools decreased by 1

The Government schools at Kurseong show a decrease of 17 pupils, while the aided and unaided schools show an increase of 319 and 157 pupils, respectively, the total increase being 463 as against a decrease of 285 in the preceding year The total cost of European education was Rs 14,37,929 as against Rs 14,85,737 in 1898 99, of which Government contributed Rs 2,13,075, as compared with Rs 2,22,767 in the previous year The number of candidates from European schools who appeared for the University Entrance examination was 32, of whom 16 were successful, the corresponding figures for last year being 26 and 10 Most of these candidates were sent up by unaided schools, which admit a large number of non European pupils The Lieutenant Governor observes that no candidates appeared at the High School Honours examination, except one girl, who was unsuccessful During the year satisfactory progress has been made in the Kindergarten Department of the Welland Memorial School, and new classes were also opened in the Pratt Memorial and the Calcutta Free Schools The Lieutenant Governor notices with pleasure that a beginning has at last been made to promote technical education for girls A domestic science and cookery class was opened in the Dow Hill Girls' School, Kurseong, and at St Helen's School, Kurseong, instruction is given in general house management, gardening, sick nursing, and needle work in various branches The proposals, commented on in last year's resolution, to provide separate ranges for rifle practice and better rifles to the Cadet volunteer corps are still pending a decision on the main question of the general re armament of volunteers

41 *Muhammadan Education*—The number of Muhammadan pupils was 463,343, or 2 4 per cent more than last year, the increase being confined almost wholly to public institutions

The number of Muhammadan candidates successful in the University examinations increased by 1,267 The number of passes in the M A, B A., F A, and Entrance examinations was 337 in the year under review as compared with 296 in the previous year In the number of successful candidates in the Middle Scholarship examination, there was a decrease of 221, and in the Lower Primary Scholarship examination an increase of 1,443 It is gratifying that 10 Muhammadan girls in the Chittagong Division and three in the Chota Nagpur Division passed the Lower Primary Scholarship examination The Lieutenant Governor shares the Director's hope that this success is indicative of further advancement in Muhammadan education in those localities, and trusts that the slight improvement noticed in this year's report may be the precursor of real advance in the near future

42 *Education of aborigines*—The total number of aboriginal pupils was 35,605, showing an increase of 1,339 pupils over the figures of last year, which is shared by all classes of schools, both public and private The largest increase of pupils took place in the Chota Nagpur Division, where the efforts of the several Christian agencies at work have contributed greatly to the spread of education amongst the aboriginal classes

The total number of passes in all the examinations increased from 570 to 834, but these were chiefly confined to the Lower Primary Scholarship examination

43 *Private Institutions*—There are a large number of private institutions which do not conform to the prescribed standards of instruction, but follow merely the old indigenous system of teaching These are the elementary schools for reading and writing, Sanskrit *tols* and *maktabs* for teaching the Koran or Arabic and Persian The number of these schools and that of the pupils attending them during the last two years are shown below:—

	1898 99	1899 1900
Schools	11,078	10,762
Pupils	122,542	121,577

The above figures show a net loss of 316 schools and 965 pupils

44 *Sanskrit Tols*—The number of candidates for the first and second Sanskrit examinations rose from 2,587 to 2,771, and the percentage of passes from 21 to 33 The number of candidates for the title examinations rose from 119 to 147 In all 53 candidates passed, 33 in Sanskrit literature

alone There has been an increase in examinees since 1897, testifying to a revival of interest in Sanskrit literature

As Sanskrit *tols* form a distinctive class of special schools, the Lieutenant-Governor approves of the Director of Public Instruction's suggestion to class the *tols* together in future reports and to separate from them altogether the miscellaneous institutions generically brought together under the head of "other schools"

45 *Central Text Book Committee* —Sir John Woodburn has noticed with pleasure the Director's appreciative remarks on the excellent work done for many years by Mr Justice Gurudas Banerji in his capacity as President of the Central Text Book Committee, the constitution of which has recently been modified

46 *Conclusion* —The Lieutenant Governor thanks Mr Pedler for his able administration of this important department during the past year and for his clear and interesting report During the year under review, the Conference of Educational Officers, the question of remodelling the system of vernacular education, and other measures of equal importance claimed a large share of the Director's attention, and Sir John Woodburn takes this opportunity of placing on record his obligation to Mr Pedler for the circumspect and thorough manner in which he dealt with each of the questions that came under his consideration

The Lieutenant Governor's thanks are also due to the Principals, Professors, Inspectors, Assistant Inspectors, the Personal Assistant to the Director and other officers who have been specially mentioned

By order of the Lieutenant Governor of Bengal,

F A SLACKE,

Secretary to the Govt of Bengal

QUESTIONS DRAWN UP BY THE FAMINE COMMISSION OF 1900 1901

No 162 —The 8th January 1901 —The following questions drawn up by the Famine Commission appointed by the Government of India in the Revenue and Agricultural Department Resolution No 11—294 3, dated the 20th December 1900, are published for general information

F A SLACKE,
Secy to the Govt of Bengal

QUESTIONS

INTRODUCTORY

1 What was the outlook in your district when the rains of 1899 commenced? What had been the character of the harvests in the two preceding years?

2 Were the *kharif* sowings up to normal? If not, what percentage of the normal cultivated area was sown? Please state briefly how the normal cultivated area was arrived at

3 (*a*) What is the average rainfall of your district during the rainy season? (*b*) What was the actual rainfall in the rainy season of 1899 and what percentage of the average did it represent? (*c*) When did the rains cease? and (*d*) What was the distribution of the rainfall from June to September (both inclusive) compared with the average?

4 What percentage of a normal harvest on a normal cultivated area did the actual *kharif* harvest of 1899 represent?

5 What percentage of the total population of your district depends exclusively on agriculture—

(*a*) as petty cultivators?
(*b*) as labourers?

PRELIMINARY ACTION

6 Was the necessity of relief assumed from the fact of crop failure or was proof of necessity required by compliance with tests?

7 What were the observed facts which led you to think that the machinery of relief should be set in motion?

8 What particular relief measures did you first undertake? and what tests were applied to gauge the extent of the distress?

9 How were you prepared to meet famine?—(*a*) Were lists of relief works ready had the works on that list been actually located, and had surveys and estimates of cost been made out beforehand? (*b*) Did the relief programme include scales of establishment necessary to meet any emergency? and were lists of candidates qualified for famine service kept up?

10 Did the relief programme contemplate large public works or small village works as the backbone of the relief system? If the former, was a programme of village works ready in reserve from the beginning?

11 In the sequence of relief measures, what place was taken by the following —

(*a*) Test works
(*b*) Poor houses
(*c*) Kitchens { (*i*) on works, (*ii*) elsewhere
(*d*) organisation of private charity, especially in towns,
(*e*) opening the Government forests?

12 What system of local inspection and control was instituted and at what period—

(*a*) to arrange for village relief,
(*b*) to stimulate the local employment of labour,
(*c*) to organise local charity,
(*d*) to observe the general condition of the people?

13 Were loans issued at the outset? If so to what extent, under what Act, under what conditions, to what classes and for what objects? Were they recoverable in whole or in part?

14 Can irrigation wells be made in your district or any portion of it? What was the average depth below the surface of water on the cessation of the rains in 1899? Was the digging of wells encouraged by loans, and, if so, were they successful—

(*a*) in securing the crop on the ground,
(*b*) as a permanent improvement
(*c*) as a temporary measure to employ labour?

15 If labour was the first criterion of the need for relief, what works were first under taken? Were they ordinary works under district or local board? and under whose supervision were they conducted?

16 What tasks were exacted on test works, and was the same task taken from every one irrespective of sex and previous occupation?

17 Was payment in strict proportion to results? Was there a maximum wage, a minimum wage, a rest day allowance or an allowance to dependants?

18 What circumstances induced the conversion of test works into regular relief works?

LARGE PUBLIC WORKS

19 When it had been decided to open regular relief works, what works were first opened large public works or small village works?

20 Under whose control were these works? Had the scale of supervising establishment been prescribed in advance, and was that establishment ready? Was there any delay in opening the works? Were tools and plant available?

21 Were the works divided into charges and, if so, for what maximum number of workers did the charge provide? Was that maximum ever exceeded? and, if so, what steps were taken to relieve the pressure?

22 Had each charge its own establishment? If so, please give that establishment in detail What, if any, arrangements had been prescribed beforehand for hutting or sheltering the people, for conservancy or sanitation, for water supply, for food supply, and for medical conveniences and supervision?

23 Was admission to the works free to all persons ready to submit to the labour test, or was any system of selection (e g, by tickets) tried at the commencement? Was a distance test of any kind insisted on and was residence on the works compulsory?

24 On the facts that came to your notice, what is your opinion as to the area or population which a large public work, capable of entertaining two charges of 5,000 persons each, may be expected to serve? What distance from their homes did applicants for relief go?

25 Were officers of the Department of Public Works subordinate to the Civil authorities in all matters? If not please specify the matters in which they were independent

26 Was there a Civil officer for each charge, from what class was he taken what salary did he receive, and what was his position with reference to the local representatives of the Public Works Department?

Had the Civil officer in charge full authority to assure himself that measurements were correctly and punctually made, and that the orders of Government were being followed in all the matters mentioned at the end of paragraph 426 of the report of the Famine Commission of 1898?

27 If local conditions were met with, which affected the application of the prescribed tasks, did it rest with the Civil officer in charge to decide which of the prescribed tasks was applicable (e g in varying strata of hard and soft earth)?

28 How were the gangs of labourers constituted and what was the size of the gangs? Were arrangements made to secure village or family gangs so far as possible, and with what success?

29 What classification of labourers, and what wage scale was adopted, and how does it compare with the classification and wage scale of paragraph 445 of the report of the Famine Commission of 1898? How far did experience justify departure from the latter—

(a) from the administrative point of view?
(b) from the point of view of economy?

30 Did your experience lead you to consider that any and if so what, distinction should be drawn in the classification and wages of men and women?

Did the absence of such distinction lead to any difficulty?

Please consider this question also in its financial aspec

31 Was the Code task system introduced from the outset, or was some system of payment by results first adopted? Were the two systems carried on simultaneously or not—

(a) in the same district or subdivision of a district?
(b) on the same work?

32 Did your experience lead you to agree with the Famine Commission of 1898 that a system of payment by results was unsuited to conditions of acute distress or actual famine? or do you consider that if started in time, relief can be adequately afforded in cases of severe famine by works conducted throughout on a system of payment by results?

33 What task was exacted at the outset was it graduated to the class of workers or was the full task demanded from all, was any allowance made for the distance the workers had come? Were subsequent changes of the task in the direction of greater leniency or greater severity, what were the circumstances which led up to the changes, and with reference to what classes of persons were they introduced?

34 Did your experience lead you to believe that the scale of wages adopted was adequate, inadequate, or unduly liberal? What in your experience was its effect upon the condition of the workers? Was there any evidence that the workers saved upon their

earnings? Did copper coin return freely to the banias on the works? Please give reasons for your opinion

35 Was a rest day wage given, or could the workers earn more than the full wage in order to support themselves on the rest day? Which method does your experience lead you to prefer?

36 Does your experience lead you to consider that the minimum wage is too high, and that fining for short work should be continued down to the penal wage or to something between the penal and minimum wage?

37 Was the minimum wage allowed at the outset? if not, was there a penal wage, and was there a tendency to fine down to it? Did the penal wage anywhere become the wage generally earned? if it did, to what do you attribute the fact, and what were its effects?

38 How often was payment made, daily or weekly or at what other interval? If weekly, did your experience lead you to think more frequent payment desirable and practicable?

39 When people first came on a relief work were they paid daily or at longer intervals? Did you find that payment otherwise than daily threw the workers seriously into the debt of the bania?

40 To whom was payment made to the individual or to the head of the gang? Which method did your experience lead you to prefer?

41 Can you give, for two or three typical relief works, figures showing, at the time of greatest pressure, the number of relief workers earning—

(a) the full wage,
(b) the penal wage,
(c) a wage between the full and penal wage?

Did people remain long on the works on the penal wage?

42 If a system of payment by results was in force, was it one of the systems described in paragraphs 208 to 212 of the report of the Famine Commission of 1898, or in what respects did it differ from them?

43 What was the maximum wage, and what arrangements were made for the relief of children, or for the relief of weakly persons capable of some work? Did the arrangements for the latter take the form of task work with a minimum wage, or piece work at favourable rates and which in your experience is preferable?

44 Were contractors employed at any stage of the famine?

45 Under the payment by results system were muster rolls kept up, or what arrangement was there by which on emergency the Code task system could be promptly introduced?

46 Under whose orders was the prices scale for the calculation of the wages fixed? On what grains was it based? Were small variations in prices neglected?

47 Please trace distinctly the various steps adopted in opening a relief work, admitting and classifying labourers, providing for dependants, providing tools and plant, marking out work and measuring it up, paying wages, imposing fines, conserving the water supply, and arranging for hospital requirements

48 Under whose orders were tasks and wages stiffened or relaxed (i e, the Collector, the Commissioner, the Famine Commissioner or the Local Government)? Had the Collector or the Commissioner power to issue orders independently or had he to refer to higher authority If he acted in anticipation of sanction was he often over ruled

49 Were arrangements made at any time to draft people from large public to small village works, what was the occasion calling for transfer, and with what success was the transfer achieved?

SMALL VILLAGE WORKS

50 What part did the small village works play in the scheme of relief?

51 What classes of works did they include?

52 Were they conducted—

(a) under the supervision of the Public Works Department,
(b) under the supervision of the Civil Agency,
 (i) by direct management,
 (ii) through landholders or by means of other non official agency?

53 If conducted under (b) (ii) of the last question, what arrangements were made—

(a) for laying down the work,
(b) for measuring it up,
(c) for paying wages?

How far were the landholders and others responsible administratively and financially, and under whose supervision was the work done?

54 Was any attempt made to work the Code task system? What scale of wages was adopted? Was employment given to every one who wanted it, or only to special classes?

55 Was any system of selection of applicants for relief tried? If so, was it successful or not?

56 If large public and small village works existed close to one another, did either draw labourers from the other?

57 Did your experience lead you to form any definite opinions as to the desirability or otherwise of extending small village relief works? If so, please state them

SPECIAL RELIEF

58 Are there many aboriginal tribes in your district? Were special tests applied to them? Were they forward to take relief or had relief to be taken near their homes? How far were the measures taken successful?

59 Were forest and fodder works opened? How were these controlled and what classes did they serve?

60 Were able bodied persons engaged at any time on works of private utility at public expense (e g, weeding fields etc)? and, if so, to what extent, at what stage, for how long and under what control?

61 Were special measures taken to relieve artisans (weavers and others) in their own crafts?

62 Did they show a reluctance to go on ordinary relief works, or were they physically unfit for ordinary labour?

63 If special relief measures for artisans were taken, were they successful from the point of view of (a), relief (b) economy, and does your experience lead you to consider that more might have been done in this respect, under direct official control or with official assistance?

64 What measures were taken to prevent mortality of cattle and with what success?

65 Were any operations undertaken for the supply of compressed grass to tracts suffering from scarcity of fodder?

GRATUITOUS RELIEF

66 How were dependants relieved—

(a) on large public works,
(b) on small village works,

in cash or uncooked grain or with cooked food?

67 Statistics have been called for, but which of the recognized forms of gratuitous relief was most employed in your district and on what grounds was it chosen?

68 Did the distribution of village relief in your district go beyond the classes mentioned in paragraph 141 of the report of the Famine Commission of 1880? If so, were the recipients of gratuitous relief selected by persons with local knowledge or were they admitted to relief because they complied with some test such as eating cooked food? Please enumerate the tests, if any, by which admission to gratuitous relief was restricted

69 How many poor houses were open in your district, and when were they opened? What classes of people most frequented them, and were the numbers ever large?

70 Were poor-houses used as depots for vagrants and immigrants, and were persons who refused to work on relief works sent to poor houses as a punishment?

71 Were measures taken periodically to weed out the poor houses and send people to their homes or to relief works?

72 Statistics have been called for but how many kitchens were opened in your district (a) before and (b) after the rains broke? What radius was a kitchen expected to serve?

73 What ration was provided and how often were meals distributed, and at fixed or varying times? Were people compelled to feed on the premises, or were they allowed to take food away

74 Was any limit of distance from relief works fixed within which civil kitchens could not be opened, or were civil kitchens opened close to relief works?

75 Was admission to kitchens free or restricted, and, if restricted, what was the method of selection for admission?

76 What was the poor house ration and of what grain, was it varied on occasion to meet the case of sickness or weakness?

77 Who drew up the village gratuitous relief list, by whom were they checked, how often and by whom were the recipients inspected?

78 How was payment made, (a) in cash or grain, (b) daily, weekly, monthly or for any other period, (c) at the homes of the recipients or elsewhere?

79 To what persons, except those mentioned in the Code, was gratuitous village relief given, for how long and under what necessity?

80 What castes of cooks were employed? Was any reluctance to take cooked food shown by any classes and at any stage, and, if so, by what classes and at what stage?

81 What persons were in charge of kitchens, what supervision and check was exercised over them?

82. Were cheap grain shops opened, if so, for what classes and how was admission to their benefit regulated? Was this form of relief successful and what did it cost?

83 Did cheap grain shops in any way discourage the importation of grain, or did they affect general prices?

SUSPENSIONS AND REMISSIONS OF LAND REVENUE

84 To what extent was land revenue in your district (*a*) suspended, (*b*) remitted ?

85 Upon what system were such remissions or suspensions based ? Were they based upon crop failure solely or was the general capacity of the individual to pay also taken into account, and in the latter case, how, and by whom and upon whose information was that general capacity determined ?

86 At what stage were suspensions and remissions determined, after or before collection of revenue began ?

87 In zamindari tracts did suspensions or remissions of rent follow automatically upon suspensions and remissions of revenue ? It only part of the revenue of a village (or estate) was suspended, who decided what cultivators should receive remissions or suspensions ?

88 Did you observe any facts tending to show that sufficient relief by suspension or remission of revenue had not been given, or that such relief had been abused or had failed to reach the right persons ?

GENERAL

89 If the number of persons in receipt of relief in your district at any time exceeded 15 per cent of the population affected, please state briefly the reason for it

90 Does your experience lead you to consider that relief was at any particular period excessive or defective, and what are the grounds of your opinion ?

91 To what classes generally did the people in receipt of relief belong, did they include proprietors State raiyats, occupancy tenants and other tenants with security of tenure and, if so, to what extent ?

92 In your experience were people more ready to come on relief than in former famines, and if so to what is this readiness attributable ?

93 Did facts come to your notice indicating a contraction of private credit, or a reluctance of the people to exhaust their own resources before accepting State relief ?

94 Do you consider that the tests of the Code are sufficient to prevent persons not in need of relief from seeking it ?

95 If you consider the tests of the Code are insufficient, what further test would you propose ? Or do you consider any method of selection for admission to relief to be practicable ?

96 What system of registration of births and deaths is followed ?

97 Where statistics show a very high mortality, how far is that attributable to diseases connected with unsuitable or insufficient food ?

98 How far was an impure or insufficient water supply a cause of increased mortality, and what measures were taken to improve or extend the water supply ? Was permanganate of potash used to disinfect wells and other sources of water supply, and, if so, at what intervals of time ?

99 What special sanitary arrangements were made—

(*a*) on works,
(*b*) at poor houses
(*c*) at kitchens,

and were they sufficient ? Who supervised them ?

100 Was there a regular inspection of the grain shops on the works, and did that inspection disclose the sale or inferior or unwholesome grain ?

101 How far did the people supplement their food with wild products, and had the consumption of wild products any appreciable effect upon their health ?

102 Did you observe much immigration from Native States ? Roughly, what proportion did such immigrants bear to the total number relieved ?

103 What was the mortality among these immigrants compared with the mortality of the district, and what was the effect of this mortality upon the death rate of the district ?

104 How were the orphans disposed of at the end of the famine ? Were they made over to friends, caste people native institutions or missionaries ?

105 Have you any suggestions to make regarding the classification of the *objects* of the Charitable Relief Fund in paragraph 527 of the report of the Famine Commission of 1898 ? Can you suggest any improvements in the management of the fund ?

106 Did you hear any complaints regarding the inability of the Railways to keep pace with the grain and fodder traffic to the distressed districts ? If so, please specify the nature of the complaints Was the local price of food raised by any defects in railway carriage ?

106 (*a*) What arrangements were in force to keep you informed of the traffic in food grains by rail river and road ? Were the statistics reliable ? What proportion of the assumed consumption of the people was imported ?

107 Did you hear any complaints from employers of private labour, agricultural or other, that owing to the attractions of relief works they experienced difficulty in obtaining labourers ?

108 Has there been any change in the character of the crops sown of late years ? Has that change taken the form of—

(*a*) an increase of double cropping,
(*b*) the substitution of food crops for more valuable crops, or *vice versa* ?

109 Does the practice of paying wages in grain still prevail in your district? Is the tendency to substitute a cash for a grain wage? Have cash wages risen in sympathy with the rise in prices?

110 To what extent have the provisions of the Famine Code been departed from? Please specify the departures Were they justified in your experience?

111 Were Staff Corps officers employed in supervision? And were officers of the Native Army and non commissioned officers of the British Army employed in minor posts? Can you suggest any other source from which supervising officers can be drawn?

112 How far was non official agency made use of during the famine? Was it successful? And is there scope for its extension?

113 Please trace, with great care, the effect upon—

(1) the number of people seeking relief,
(2) the death rate,

of any changes in—

(a) the system of work (e g, a change from Code task to payment by results system),
(b) the task,
(c) the scale of wages,
(d) the mode of calculating fines,
(e) the tests of necessity (such as the insistence on a distance test, or compulsory residence, or the drafting to distant works),

and did these changes lead to disorganisation or wandering?

114 Has your experience shown that the massing of people on large works tends to disorganise family life, or to weaken social restraints, or to relax moral ties? If so, can you suggest any means connected with the class or organisation of relief works whereby these evils may be removed or mitigated?

Purchase of Stores in England and locally by the General and Irrigation Branches of the Public Works Department of the Government of Bengal during 1899 1900

No 139A

Government of Bengal

PUBLIC WORKS DEPARTMENT

ACCOUNTS

Dated Calcutta, the 8th January 1901

RESOLUTION

READ again—

(1) Letters from the Government of Bengal, Public Works Department Nos 419 A, dated the 15th October and 51A, dated 4th January 1901, submitting to the Government of India, Public Works Department, the statement of expenditure on stores in the General and Irrigation Branches of the Public Works Department of the Government of Bengal for the year 1899 1900

(2) Letter from the Government of India, Finance and Commerce Department, No 1426S R, dated 25th March 1895, pointing out that, as it is understood that several of the principal engineering firms in India now possess the apparatus necessary for the proper testing, both of the raw material and of the finished product, the fullest use should be made, subject to the prescribed precautions, of the liberty to procure supplies in India

(3) Resolution on the operations of the Public Works Department Bengal, in 1898 99 in respect of purchases of stores in England and locally

REMARKS —The following information is published to show the operations of the Public Works Department of this Province during 1899 1900 in respect to the purchase of European stores in England and locally

2 The total value of the stores so purchased amounted to Rs 2,92,466, against Rs 2,96,441 of the previous year This sum is made up as follows —

		Rs
(a) Cost of stores obtained through the Secretary of State		2,36,340
(b) Cost of stores locally purchased—	Rs	
(i) Of European manufacture	32,813	
(ii) Of Indian manufacture from imported material	23,313	
		56,126
		2,92,466

3 The principal items of the stores obtained through the Secretary of State were the following —

	Rs
Steel joists	64,074
Iron and steel T's, L's, bed plates, bar, flat, channel and chain	51,244
Corrugated iron sheets	13,763
Zinc sheets	5,108
Lead sheets	2,284
Lightning rods	2,633
Copper tape	2,422
Portland cement	30,838
Electric passenger lift	9,438
Paints	25,515
Glazed tiles	13,295
Fire clay	3,660
Miscellaneous	12,066
Total	2,36,340 against Rs 1,56,843 of the previous year

None of the above articles could have been entirely manufactured in India

4 Of stores of European manufacture locally purchased on the score of urgency the following is a detailed list —

	Rs
Steel joists	20,875
T's L's, channels and flats	5,184
Corrugated iron sheets	2,454
Lavatory basins	1,800
Portland cement	2,500
Total	32,813 against Rs 92,270 of the previous year

Taking India Office prices and adding freight and incidental charges, the cost of these articles, if purchased through the Secretary of State, is estimated at Rs 31,062, the estimated loss to Government being 5 63 per cent against a corresponding figure of 26 22 per cent in the previous year

5 The total value of stores locally manufactured from imported material, or substituted for stores formerly imported, is Rs 23,313 against Rs 47,528 of the previous year The items making up this total are—

	Rs
Wrought iron work for bridges	3,555
Ditto roofs	1,755
Ditto record racks	1,575
Wrought iron tank	1,350
Cast iron columns	3,469
Do pipes	6,503
Jumpers, kodalies and pile drivers	5,106
Total	23,313

6 The policy prescribed in Resolution No 1426S R of the 25th March 1895 by the Government of India continues to receive the attention of the Local Government

ORDER —Ordered that a copy of this Resolution be published in the Supplement to the next issue of the *Calcutta Gazette*

Ordered, also, that a copy of this Resolution be forwarded to the Bengal Chamber of Commerce, the Calcutta Trades' Association, and the Bengal National Chamber of Commerce

By order of the Lieutenant Governor of Bengal,

D JOSCELYNE,

Secy to the Govt of Bengal

WEATHER AND CROP REPORT

For the week ending the 7th January 1901

Burdwan —Rainfall at Sadar 0 72 Kalna 0 57, Katwa 0 31, Raniganj 1 23 Rain has been beneficial Weather fine and cold Harvesting of *aman* and pressing of sugarcane still continue Fodder and water sufficient Common rice selling as follows —

	Srs	
Sadar	12	per rupee
Kalna	$11\frac{5}{16}$	
Katwa	13	
Raniganj	13	

Birbhum —Rainfall at Sadar 55, Rampur Hât 71 Weather cloudy and cool Harvesting of *aman* continues Standing crops doing well Price of rice at Sadar 12 seers and at Rampur Hât 14½ seers Fodder sufficient

Bankura —Rainfall at Sadar 1 36, Vishnupur 1 45 Weather cloudy with drizzling rain at the beginning, cleared up since yesterday and very cold The rainfall has been beneficial to some of the *rabi* crops Fodder and water sufficient No cattle disease reported Price of common rice at Bankura 12½ seers and at Vishnupur 12 seers

Midnapore —Rainfall at Sadar 3 18, Contai 0 25, Tamluk 1 95, Ghatal 1 70 *Aman* being reaped Common rice sells as follows —

	Srs	
Sadar	14	per rupee
Contai	15	
Tamluk	$10\frac{7}{8}$	
Ghatal	13½	

Hooghly —Rainfall at Sadar 76, Serampore 97, Arambagh 1 07 Weather cool Rain damages *rabi* crops Harvesting of *aman* nearly finished Common rice sells at 10 seers 15 chitaks per rupee

Howrah —Weather cloudy with drizzling rain at the beginning of the week Fine later Harvesting of *aman* going on The recent rain has done some damage to crops, but should benefit *boro* rice Fodder and water sufficient Common rice sells at 10¼ seers per rupee

24 Parganas —Rainfall at Sadar 1 03, Barasat 1 18, Basirhat 75, Diamond Harbour 1 54 Weather cloudy and rainy Standing crops not good owing to the untimely rain *Rabi* crops growing The harvesting of *aman* still going on and the crop has been injured by the recent rain No cattle disease Fodder and water sufficient Common rice sells as follows —

	Srs	
Sadar	10	per rupee
Barasat	10	
Basirhat	11	
Diamond Harbour	$12\frac{5}{16}$	

Nadia —Rainfall at Sadar 0 35, Kushtia 0 1?, Meherpur 0 19, Chuadanga 0 27, Ranaghat 0 61 Weather cloudy and rainy More rain wanted for the standing crops Harvesting of *aman* still going on Fodder and water sufficient Price of common rice stationary

Murshidabad —Rainfall at Sadar 0 47, Jangipur 0 56, Kandi 0 51, Lalbagh 0 40 Weather seasonable. Harvesting of *aman* still continues Prospects of *rabi* crops hopeful Cattle-disease reported from thana Gorabazar of Sadar subdivision Fodder and water sufficient Common rice sells as follows —

	Srs	
Sadar	13	per rupee
Lalbagh	14	
Kandi	14½	
Jangipur	15	

Jessore —Rainfall at Sadar 0 29, Jhenida 0 18, Magura 0 25, Narail 0 20, Bangaon 0 47 Weather seasonable Prospects of standing crops improved after the rain Harvesting of *aman* almost completed Fodder and water sufficient Common rice sells as follows —

	Srs	
Sadar	14	per rupee
Jhenida	13	
Magura	13½	
Narail	$13\frac{5}{16}$	
Bangaon	$13\frac{5}{16}$	

Khulna—Rainfall at Sadar 0 53, Bagerhat 0 28, Satkhira 0 79 Weather cloudy and a little rainy, damaging standing crops to some extent Harvesting of *aman* paddy continues Fodder and water sufficient Common rice sells as follows—

	Srs	
Sadar	13¾	per rupee
Bagerhat	13 5/16	
Satkhira	10½	

Rajshahi—Rainfall at Sadar 3, Nator 21 Naugaon 3 Prospects of crops fair Harvesting of winter rice still going on No cattle disease Fodder and water plentiful Common rice sells at 14½ seers a rupee

Dinajpur—Average rainfall 64 Weather cold and cloudy Harvesting of *aman* nearly over No cattle disease Fodder and water plentiful Rice selling at Sadar 16 seers and at Thakurgaon 13 seers per rupee

Jalpaiguri—Rainfall 06 Weather cold and cloudy Harvesting of *haimanti* paddy going on Prospect of *rabi* crops favourable Price of common rice steady Fodder and water ample

Darjeeling—Rainfall at Sadar 0 43 Kurseong 43, Siliguri 20, Kalimpong 33 Weather seasonable Days cloudy, nights cold and frosty *Bara marua aman dhan, kalai* being harvested *Phapor, tori*, wheat, barley progressing *Terai—haimanti* paddy being harvested Mustard, tobacco, progressing Coarse rice sells as follows—

	Srs	
Hills	11	per rupee
Terai	14	

Bhutta sells at Darjeeling 20 seers and at Kalimpong 24 seers per rupee

Rangpur—Rainfall at Sadar 0 55, Gaibanda 0 47, Kurigram 9 50, Nilphamari 0 21 Weather cloudy and very cold Harvesting of *aman* going on Fodder and water sufficient Price of common rice stationary

Bogra—Average rainfall 16 Weather cold and cloudy Harvesting of *aman* nearly finished and that of mustard begun Prospects of standing crops moderate and lands being prepared for *aus* and jute Water and fodder sufficient Common rice sells at 14 seers a rupee

Pabna—Rainfall at Sadar 0 16, Sirajganj 0 07 Weather cold and cloudy Harvesting of winter paddy complete, yield fair Rain wanted for *rabi* crops Prices unchanged Fodder and water sufficient

Dacca—Rainfall at Sadar 20, Manikganj 10 Munshiganj 19, Naraingan 23 Weather seasonable Prospects of crops fair Fodder available No cattle disease Common rice 11½ seers per rupee

Mymensingh—Rainfall at Sadar 0 08, Kishoreganj 0 03 Weather cloudy and cold Harvesting of *aman* nearly finished Pressing of sugarcane transplantation of *boro* going on Fields are being prepared for early rice crop Prospects of standing crops fair Fodder and water sufficient Common rice sells as follows—

	Srs	
Sadar	10½	per rupee
Jamalpur	10	
Kishorganj	11 5/16	
Tangail	11	
Netrakona	11 5/16	

Faridpur—Rainfall at Sadar 0 24, Goalundo 0 22, Madaripur 0 36 Weather very cold, damp and misty State and prospects of crops good *Aman* paddy has been harvested Common rice sells at 12½ seers a rupee

Backergunge—Rainfall at Sadar 0 10 Weather cloudy Prospects of crops good except in Patuakhali, where 25 per cent of *aman* is said to have been damaged by insects Fodder and water sufficient Common rice sells at 10 seers (old) *aman* and 12 seers (new)

Tippera.—Rainfall at Sadar 23, Brahmanbaria 5 47, Chandpur 42 Weather cloudy with foggy mornings Prospects of standing crops favourable Common rice averages 12½ seers per rupee

Noakhali—Rainfall at Sadar 0 01, Feni 02 Weather cloudy and chilly Harvesting of *aman* completed. Cattle disease in Lakhipur, veterinary help asked for Fodder and water sufficient Prices stationary

Chittagong —No rain during the week Harvesting of winter rice completed Outturn 12 annas Water and fodder sufficient Common rice sells at 12½ seers

Patna —Rainfall at Sadar 1 71, Bihar 2 76, Barh 1 90, Dinapore 1 51, Hilsa 0 10 Rain during the week has improved the prospects of *rabi* and other standing crops Fodder and water for cattle sufficient Common rice in Patna sells at 15 seers per rupee.

Gaya —Rainfall at Sadar 2 90, Jahanabad 1 96, Aurangabad 2 88 Nawadah 2 83 Harvesting of paddy nearly over *Rabi* doing well Poppy suffered to some extent by rain Common rice sells at 12 seers per rupee

Shahabad —Rainfall at Sadar 1 80, Buxar 1 98, Bhabhua 4 09, Sasaram 3 31, Dehri 3 62 Weather cold and cloudy Excessive rainfall damaged prospects of *rabi* crops Dry weather urgently required Pressing of sugarcane going on Fodder and water sufficient Rice 12 seers a rupee at Sadar

Saran —Rainfall at Sadar 1 49, Siwan 1 22, Gopalganj 1 13 Weather cloudy and rainy with east wind Standing crops much benefited by recent rain Bright sunshine and fair weather need Poppy promising Common rice 14⅞ seers and *makai* 23⅛ seers per rupee

Champaran —Rainfall at Motihari 1 04, Bettiah 1 15 Prospects continue favourable Weeding of *rabi* in progress and threshing of paddy continues Fodder and water sufficient Prices of common rice and maize at Sadar are 1[illegible] and 26½ seers per rupee respectively

Muzaffarpur —Rainfall at Sadar 1 40 Hajipur 1 2[illegible] and Sitamarhi 1 45 Prospects good The rainfall of the week has done immense good to the *rabi* crops Prices are—Common rice 14 seers, wheat 13 seers, barley 20 seers, maize 24 seers, gram 15 seers, *arhar* 14 seers, and *marua* 22 seers a rupee

Darbhanga —Rainfall at Sadar 1 28, Samastipur 1 19, Madhubani 0 90 Harvesting of paddy is almost over *Rabi* doing well Fodder and water sufficient No cattle-disease reported Common rice sells as follows —

	Srs	
Sadar	15½	per rupee
Samastipur	16	
Madhubani	16¼	

Monghyr —Rainfall at Sadar 1 74, Begusarai 1 46, Jamui 2 97 Very cold and cloudy. Paddy harvesting nearly finished Standing crops benefited by recent rain Common rice sells as follows —

	Srs	
Sadar	16	per rupee
Begusarai	15	
Jamui	14½	

Bhagalpur —Rainfall at Sadar 1 46, Banka 1 70, Madhipura 1 24, Supaul 0 65 Weather cloudy with drizzling rain attending with chilly cold Reaping of winter rice almost complete Pressing of sugarcane going on No cattle disease Fodder and water sufficient Prices almost stationary

Purnea —Rain at Sadar 0 95, Kishanganj 0 35, Araria 0 62 Weather cold and cloudy Harvesting of *aghani* rice nearly finished *Rabi* crops much benefited by recent rain Prospects of crops good No cattle disease Fodder and water sufficient Common rice sells as follow —

	Srs	
Sadar	15	per rupee
Kishanganj	14	
Araria	16	

Malda —Rainfall at Sadar 1 63 Gazole 80 Harvesting of winter rice going on Recent rain has done much good to the *rabi* crops Average price of rice 15 seers per rupee Cattle disease reported from *Kharba* thana Fodder and water sufficient Weather cold and foggy

Sonthal Parganas —Average rainfall 1 18 Weather cloudy and cold Harvesting of winter crops and pressing of sugarcane still continues in some places *Rabi* crops promising No cattle disease Fodder and water-supply sufficient Average price of rice 15 seers and that of maize 20 seers 12 chitaks per rupee

Cuttack.—Rainfall at Sadar 0 45, Jajpur 0 30 Weather seasonable. Sugarcane and *guru sarad* being harvested *Rabi* in flowers and pods *Dalua* and tobacco growing Condition of cattle good Fodder and water sufficient Common rice sells as follows —

	Srs	ch	
Sadar	14	7	per rupee.
Jajpur	17	1	per rupee.
Kendrapara	Return not received		
Banki	16	12	per rupee

Balasore—Rainfall at Sadar 53 *Kandha, sarad* and *rabi* being cut and threshed Cotton being gathered Sugarcane pressing continues Rice sells at 16¼, 14¼ and 16 seers per rupee in interior, Balasore and Bhadrak, respectively Cattle disease reported from Basudebpur circle Fodder and water sufficient

Angul—Rainfall at Sadar 65 Weather cloudy Rain has benefited the standing oilseed, gram and *khasari* crops Harvesting of *rabi* in progress Common rice selling at 20 and 14 seers per rupee in Angul and Khondmals markets Cattle disease reported from the interior Fodder and water sufficient

Puri—Rainfall at Puri 1 31, Khurda 0 26 Weather seasonable *Sarad* paddy being harvested *Dalua* and *mung* growing well Pressing of sugarcane continues Winter *mandia* and *kulthi* in flowers Other miscellaneous crops doing well Fodder and water sufficient Rice sells as follows —

		Srs	ch
Sadar	(Old)	13	12
	(New)	15	1
Khurda		15	12
In the interior	(New)	16	9

Hazaribagh—Rainfall at Sadar 2 23, Giridih 2 57 Weather very cold Fodder and water sufficient Estimate of poppy remains unchanged Common rice sells at Sadar 12 to 14 seers and at Giridih 14½ seers per rupee

Ranchi—Rainfall 2 24 Weather cold and rainy *Rabi* crops much benefited by the rain Rice sells at Sadar 16 seers per rupee No cattle disease reported Fodder and water sufficient

Palamau.—Rainfall 3 41 Weather cloudy General rain throughout the district *Rabi* doing well Rice selling at Sadar 13½ seers per rupee

Manbhum—Rainfall at Sadar 2 76, Gobindpur 1 10 Weather cloudy Prospects of crops on ground good Fodder and water sufficient Cattle disease reported from Jhalda only Average price of common rice at Sadar 14 seers and at Gobindpur 13 seers per rupee Supply sufficient

Singhbhum—Rainfall 4 76 Average price of rice is 17 seers in the district, at Chaibassa 16 seers. Rain will do a deal of good to the *rabi*

General Summary—There has been a general rainfall during the week throughout the province except in Chittagong *Rabi* in Hooghly and Shahabad, poppy in Gaya, and some crops in Howrah, 24-Parganas and Khulna are said to have suffered to some extent by the rain, but it has improved the prospects of standing crops elsewhere Harvesting of paddy and pressing of sugarcane approaching completion Fodder sufficient Cattle disease continues to be reported from a few districts The price of common rice has fallen in 7 districts, risen in 17 and is stationary in the rest (22).

STATISTICAL DEPARTMENT,
The 8th January 1901

F A SLACKE,
Secy to the Govt of Bengal

Abstract of the Results of Meteorological Observations taken at the Alipore Observatory in the month of December 1900

	Inches	Date.	Hour
The mean pressure of the month	30 037		
The average pressure of December from 24 years' registers	30 027		
The highest pressure in the month	30 201	22nd	10
The lowest pressure in the month	29 848	4th	16
The range of pressure	0 353		
	Hours		
The total number of hours of bright sunshine during the month	248 2		
The maximum possible number of hours of sunshine	332 8		
	°		
The mean temperature of the month	67 5		
The average temperature of December from 24 years' registers	68 0		
The highest temperature in the month	83 3	5th	
The lowest temperature in the month	54 8	10th	
The range of temperature during the month	28 5		
The mean daily range of temperature	22 0		
The greatest range of temperature in one day	26 3	4th and 10th	
	Per cent		
The mean humidity of the month	73		
The average humidity of December from 24 years' registers	71		
	Inches		
The mean vapour tension of the month	0 481		
The average vapour tension of December from 9 years' registers	0 476		
The mean cloud proportion of the month	1 44		
The average cloud proportion of December from 23 years' registers	1 51		
	Inches		
The total rainfall of the month	0 05		
The total rainfall indicated by a Beckley's self registering rain-gauge (mouth of the gauge about 52 feet above the ground)	0 04		
The average fall of December from 48 years' registers	0 23		
The greatest fall in 24 hours	0 05	28th	
	Day.		
The number of rainy days in the month	1		
The average number of rainy days in December from 24 years' registers	1		
	°		
The mean maximum equilibrium temperature of solar radiation during the month	131 8		
The mean difference of sun and air temperatures	51 7		
The greatest sun temperature	135 8	5th and 8th	
The greatest excess of sun over air temperature	56 4	8th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	53 2		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	4 9		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	6 1	8th	
	Miles.		
The mean movement of the wind per day	70 8		
The greatest movement of the wind in one day	117 0	12th	
The greatest movement of the wind in one hour	13 0	12th	1 to 2 P M

* The number of hours with winds from each of the 8 points—
* N 278, N E 38, E 11, S E 14, S 10, S W 41, W 39, N W 197, Calm 96

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory) The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore 003 lower The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 2 3° lower, and, finally, the thermometer, which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards, is found to read 0 6 higher than the Kew Standard thermometer, which is the standard of reference at the present Observatory

* The anemograph stopped on two days, hence there has been a deficiency in the wind direction for 20 hours

G W KÜCHLER,

For *Meteorological Reporter to the Govt of India, and Director-General of Indian Observatories*

METEOROLOGICAL OFFICE, GOVT OF INDIA,
Alipore (Calcutta), the 7th January 1901

	Inches
The mean pressure of the seven days	29 984
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	30 029
	Hours.
The total number of hours of bright sunshine	28 8
The maximum possible number of hours of sunshine	75 2
The mean temperature of the seven days	65° 4
The average temperature of the corresponding period for 24 years, Surveyor General's Office	67 1
The extreme variation of temperature	22 4
The maximum temperature	78 5
	Miles.
The highest velocity of the wind in one hour	14?
	%
The mean relative humidity	83
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	71
	Inches
The total fall of rain from 30th December 1900 to 5th January 1901	1 03
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0 04
The total fall from 1st January 1900 to 5th January 1901	90 35
The average fall of the corresponding period for 24 years, Surveyor-General's Office	65 28

The mean pressure, temperature, &c , are deduced from the traces of the Barograph and Thermograph

The maximum and minimum temperatures are obtained from self-registering thermometers All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground

The barometer readings are corrected approximately to those of the standard, Newman's No 86, formerly at the Surveyor-General's Office

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph

The mouth of the rain-gauge is one foot above the ground

C E BUCKLAND,

Offg Chief Secy to the Govt of Bengal

REVENUE DEPARTMENT—(FORESTS)

NOTIFICATION—No 212For

The 10th January 1901 —In exercise of the powers conferred by sections 31 and 41 of the Indian Forest Act, 1878, (VII of 1878) and with the previous sanction of the Governor General in Council, the Lieutenant Governor of Bengal is pleased to make, with effect from the date of this notification, the following rules for the management of the protected forests in the Sonthal Parganas, in supersession of those published with Notification No 789T —F , dated the 3rd July 1899 –

Sonthal Parganas

1 All *bonâ fide* cultivators of Government land in the district may, free of charge, fell, convert and remove to their homes for their own private use only—

(i) all trees and timber of the species not reserved, and all other forest produce whatsoever within the areas from which, by custom or by special orders, they are entitled to be supplied and

(ii) on prepayment of a royalty equivalent to half the current rates paid by other purchasers and with the written permission of the Forest Officer, trees and timber of the reserved species within the same area

provided that when the cultivator felling, cutting, collecting or removing trees timber or other forest produce under sub clause (i) of this rule is a potter, blacksmith or other person following some industry for which a regular supply of fuel is necessary, such person shall obtain from the Forest Officer an annual license to be paid for at the rate of one rupee or such other rate as may be fixed from time to time by the Local Government

2 Paharia raiyats may cut or fell convert, collect and remove, and such other persons as the Deputy Commissioner may, from time to time, authorise in this behalf in writing,

may cut or fell, convert, collect and remove, or cause to be cut, felled, converted, collected or removed by such agency as the Deputy Commissioner may, from time to time, authorise in this behalf in writing, for the purpose of sale or barter any trees, timber or other forest produce subject to the following conditions —

(a) green trees and timber of the reserved species shall not be felled, converted or removed, except with the permission of the Forest Officer

(b) if the Deputy Commissioner, being of opinion that the supply of any kind of forest produce is not more than sufficient to meet local requirements, shall by order in writing, prohibit the removal of such produce, beyond the limits of any special locality, such forest produce shall not be removed beyond such locality, and

(c) all timber and other forest produce cut, felled, converted or collected under this rule shall in the first instance between the hours of sunrise and sunset on the days fixed, be conveyed to the nearest authorised hat for such produce and shall be deposited in such place as may be there appointed by the Forest Officer whence it shall not be removed by the purchaser except with the permission of the Forest Officer and after prepayment to him of the royalty due thereon

3 No person, other than a person specified in Rules 1 and 2, or in contravention of the conditions prescribed therein, and in Rule 4 may cut fell, convert, collect or remove, or cause to be cut, felled, converted, collected or removed, any trees, timber or other forest produce

4 No person shall—

(a) cut the stem of any standing tree at a height exceeding 12 inches from the ground

(b) cut up into fuel or fencing material or otherwise damage the value of any wood of the reserved species which could be more profitably used,

(c) injure any tree of the reserved species

(d) manufacture charcoal, except in localities previously approved by the Forest Officer,

(e) hunt, shoot or fish in contravention of the rules on the subject for the time being in force in the protected forests in Bengal

5 The number and location of the authorised hats, as well as the scale of royalties which shall be the rates levied for forest produce, shall be fixed from time to time by the Deputy Commissioner, in consultation with the Conservator of Forests, under such rules as the Local Government may lay down

6 *Bonâ fide* cultivators of Government land in the district may graze, free of charge the cattle kept by them for their own household and agricultural requirements on any forest land within the areas in which by custom or special order, they are entitled to graze their cattle the grazing of all other cattle is prohibited provided that cattle which are the property of residents other than cultivators of the Government estate in the district, and which in the opinion of the Deputy Commissioner, are necessary for local requirement may be allowed to graze in the protected forests, within such limits as may be prescribed by the Forest Officer, after payment of the grazing fees or such other fees as may be fixed, from time to time, by the Local Government

Goats and sheep shall not be pastured, except in areas set apart for that purpose provided that when, in any locality, it is found impracticable, for want of a sufficiency of waste land to set apart a particular area for this purpose the Deputy Commissioner may, after consultation with the Forest Officer, permit such pasturing generally in such locality, except such parts, if any, thereof as it may be considered essential to maintain clothed with trees or bushes

7 Jhooming (locally known as larwa) may continue to be practised by all Paharia raiyats of Government land in the district, who are, at the time of this notification lawfully practising this method of cultivation, subject, nevertheless, to the following restrictions —

(a) The Deputy Commissioner may except from this method of cultivation any specified area if more suitable provision for the people can be obtained elsewhere, and in such case jhooming shall cease to be practised on such excepted lands, and shall thenceforth be restricted to the substituted land

(b) Wood cut in process of jhooming shall not be sold or bartered, except after compliance with the conditions of rule 2

(c) In the case of the wood of the reserved species, it shall not be removed from the jhooms until marked by the Forest Officer

(d) Trees of over two feet in girth, measured at four feet from the ground, shall not be cut without the written permission of the Forest Officer

Explanation —The term "jhooming" as used in this rule, means the system of cultivation which consists in felling the forest on a selected area, burning the cut material, and sowing one or two crops in the ashes and then, after reaping, leaving the area to lie fallow for a number of years before recultivation

8 No land shall be cleared or broken up for a public work, or for permanent cultivation, except with the written permission, in each case, of the Deputy Commissioner

9 These rules are made subject to the provisions and conditions of any settlement made, or hereafter to be made, under the Sonthal Parganas Settlement Regulation, 1872 (III of 1872), or any other law for the settlement of land for the time being in force in the Sonthal Parganas

REGULATIONS FOR THE FOREST SERVICE BRANCH OF COOPER'S HILL COLLEGE FOR 1901

No 239 —The 11th January 1901 —The following is published for general information

F A SLACKE,
Secy to the Govt of Bengal

Circular No 12F

Extract from the Proceedings of the Government of India, in the Department of Revenue and Agriculture (Forests), dated Calcutta, the 17th December 1900

READ the following Regulations for 1901 of the Forest Service Branch in Cooper's Hill College —

REGULATIONS FOR THE FOREST SERVICE BRANCH OF THE ROYAL INDIAN ENGINEERING COLLEGE, COOPER'S HILL, FOR 1901

Post Town Staines Railway Station Egham Telegraph Station Englefield Green

[*The arrangements hereinafter described are subject to revision under the orders of the Secretary of State for India*]

1 The Royal Indian Engineering College is primarily maintained under the orders of the Secretary of State for India in Council, in view to the education of candidates from this country for the service of Government in the Indian Public Works and Telegraph Departments, the Accounts Branch of the Public Works Department, the Traffic Branch of the Indian State Railways, and the Forest Department, but it is open, to the extent of the accommodation available, to other persons being British subjects desirous of following the course of study pursued in it

2 Admission to the College is under the orders of the President who will allot accommodation as may best secure the object for which the College is primarily maintained namely, the training and recruitment of the European element in the Departments mentioned in Clause I

INDIAN FOREST DEPARTMENT APPOINTMENTS

3 The examination, which will be conducted by the Civil Service Commissioners, will be simultaneous with and (except that German must be taken as an obligatory subject and that Botany is added) in the same subjects and papers as the examination for the Indian Police Department * which is usually held in June

Candidates may undergo the written part of their examination in London, Edinburgh or Dublin, or at any of the provincial centres at which the simultaneous examination of candidates for admission to the Royal Military College, Sandhurst, is to be held A list of the probable centres may be obtained from the Civil Service Commissioners at any time after January 1901 The oral and practical parts of the examination will be held in London only

A fee of £2 is required from candidates examined in London, but when the written examination is conducted elsewhere than in London the fee is £3 Candidates examined at a college or school will probably be required to pay a local fee in addition to the fee of £3 in order to defray the expenses of superintendence, as to which they should obtain early information from the college or school authorities The fee payable to the Civil Service Commissioners must be paid by means of stamps of the specified amount Instructions on this point will be issued to candidates about ten days before the examination

4 The number of candidates to be selected annually varies according to the requirements of the Forest Service in India, the figures as regards each particular year will be advertised from time to time *In 1901 there will be eight appointments offered for competition*

5 Candidates for the Indian Forest Department are selected under the following arrangements —

(1) An applicant must be a natural born British subject and must be above 17 and under 20 years of age on the 1st June of the year in which he competes for an appointment He must be unmarried, and if he marries before reaching India he will forfeit his appointment

---

* Candidates may, if qualified, enter for both the Police and the Forest Department. They will in such case have to pay the fee due in respect of each examination

(2) An applicant must send* to the Revenue Department of the India Office on or before the 1st day of May of the year in which he proposes to compete —

(a) His name, parentage, and home address, a certificate or other satisfactory evidence of the date of his birth, and the written consent of parent or guardian that his name should be recorded as a candidate

(b) A statement of the places of education at which he may have been, accompanied by testimonials of good conduct, during the last four years

(3) Applicants will have to appear before a Medical Board† at the India Office, particular stress being laid upon good vision and hearing A physical test will also be imposed, so as to ensure the selection of persons of active habits and powers of endurance

(4) Applicants who have passed the medical examination and the physical test will be permitted to undergo an examination before the Civil Service Commissioners in the following subjects‡ (Classes I and II), marks being assigned as follows —

CLASS I §

	Marks.
Mathematics I (including Arithmetic)	3,000
German‖ (300 for colloquial)	2,000
Botany	2,000
English Composition	1,000
Geometrical Drawing	500
Freehand Drawing	500
Geography	500

CLASS II

Mathematics II	2,000
Latin	2,000
French	2,000
Greek	2,000
English History	2,000
Chemistry and Heat	2 000
Physics	2,000
Physiography and Geology	2,000

Candidates must obtain such an aggregate of marks in the examination as a whole as may indicate in the judgment of the Civil Service Commissioners a competent amount of general proficiency

(5) The Secretary of State will nominate as probationers such competitors as attain the highest aggregate of marks (provided they obtain the aggregate referred to above and satisfy the requisite conditions in other respects) These probationers will then enter the College, where they will be further trained for the Forest Service of India

(6) If the full number of competent probationers required in any year cannot be obtained from the persons so examined, the Secretary of State reserves a discretion to fill up the deficiency by selecting any other person or persons whom after consulting the authorities of the College he may consider properly qualified to become probationers for the Forest Service

6 The course of study for candidates for the Indian Forest Service extends over about three years For about seven terms the candidates will prosecute their studies mainly at the College and during the period of foreign study, which will occupy the remainder of the course, they will visit, under suitable supervision such Continental forests as may be selected for the purpose Excursions may also be made for purpose of instruction, both during term time and during part of the vacations

---

* There is no form of application; the documents [illegible] in paragraph (2) clauses (a) and (b) should be enclosed in a covering letter addressed to the Secretary, Revenue Department, India Office, London

† With a view to prevent [illegible] parents and guardians from incurring the inconvenience and expense of preparing candidates who may be physically unfit for the Forest Service, it is suggested that before any such preparation is begun candidates be submitted to examination by the medical adviser of the family or any other qualified medical practitioner with regard to the following points —

1 A weak constitution
2 Defective vision
3 Impaired hearing
4 The existence of any congenital defect
5 The condition of teeth

It is to be understood that this private examination is merely suggested to lessen the chances of disappointment and that it is by no means intended to take the place of or to influence in any way the official examination which is obligatory on all candidates

On the subject of the standard of eyesight required for the Indian Services a pamphlet can be obtained on application to the Secretary, Revenue and Statistics Department, India Office

‡ Reprints of the papers set at previous examinations together with tables of the marks assigned to the candidates are published by the Civil Service Commissioners and can be obtained through any bookseller from the following Agents — EYRE and SPOTTISWOODE, East Harding Street, Fleet Street, London, E C; JOHN MENZIES & Co Rose Street Edinburgh and 90 West Nile Street Glasgow and HODGES FIGGIS & Co Limited 101 Grafton Street Dublin The price is one shilling

§ All the subjects of Class I may be taken up Only two of the subjects of Class II may be taken up

‖ Candidates must qualify in German

7 Each annual session begins in September, and is divided into three terms, with vacations of about four weeks at Christmas, two weeks at Easter, and eight weeks in the summer

8 A charge of £61 is made for each of the seven terms spent at the College, for the period of foreign study the charge is £150, the amounts must be paid terminally in advance to the Bank of England for the first seven terms, and the amount due for the period of foreign study must be paid before the period begins Receivable orders, with full directions as to the mode of payment, will be forwarded from the India Office to the parents or guardians shortly before the fees fall due A student will not be allowed to come into residence or to start for his study of foreign forests until his fee has been paid

9 A deposit of £5 is required to be paid by each student on admission to the College as caution money to cover charges incurred by him for damage to books, instruments, etc or any College bills outstanding on leaving the College Any balance over and above such charges will be repaid This deposit is to be paid with the fee for the first term, making the total payment on that occasion £66

10 The foregoing payments cover all charges for tuition, board, according to the College tariff, lodging, with washing up to a cost of 2s a week, and ordinary medical attendance while in residence at the College When students are on tour, and during the course of practical instruction, whether in Great Britain or on the Continent, the Secretary of State will defray the expenses of (1) board lodging and washing (the aggregated maximum expenditure under these heads being 10s per diem), (2) travelling expenses, and (3) fees to local Forest officers, etc

Students are required to provide their own class books and drawing instruments Drawing paper, drawing boards and surveying instruments are provided by the College

11 The prescribed course of study comprise the following subjects —

I —Auxiliary Subjects

1	Geometrical Drawing	7	Mechanics
2	Freehand Drawing	8	Physics
3	Surveying	9	Chemistry
4	Forest Engineering	10	Geology and Mineralogy
5	Accounts	11	Entomology
6	German	12	Botany

13 Drill and Gymnastics

II —Forestry, Theoretical and Practical, in all its branches

12 Every student is required to conform to the College rules, to exhibit due diligence in his studies throughout the course and to give evidence of satisfactory progress in such manner as may be required, failing which or in the event of serious misconduct, he will be liable to be removed from the College, or to be sent back from the foreign study, which may entail the loss of his appointment

13 During the course of study the proficiency of the students will be tested by periodical examinations, and on the termination of their studies there will be a final examination Each student may also, at the discretion of the Secretary of State for India, be required from time to time to appear before the Medical Board, and should the result be unsatisfactory he cannot claim to be allowed to complete the course

14 The subjects enumerated in paragraph 11 are grouped in certain main branches of study,* and a fixed minimum of qualification is required in each branch and in the subjects taught during the forest tours as well as a certain minimum for the branches taken together Students who obtain these minima will receive the College diploma in Forestry

15 Candidates who have obtained this diploma and are found to be of sound constitution and free from physical defects which would render them unsuitable for employment in the Forest Department (the final decision on which points will rest with the Secretary of State for India), will be appointed Assistant Conservators in the Forest Department of India in the order of their standing at the end of the final examination They will be allowed before leaving the College to state their preference in respect to the Provinces to which they desire to be allotted, but the distribution will be made to the several Provinces according to the needs of the public service at the discretion of the Secretary of State for India after consulting the President of the College Officers are, however, at all times liable to be transferred from one Province to another at the pleasure of the Government of India

16 Within a month of his nomination as Assistant Conservator, each nominee must sign articles of agreement describing the terms and conditions of his appointment, he must embark for India when required to do so by the Secretary of State, and will be provided with a free passage Failure to embark at the stated time will, in the absence of satisfactory explanation, lead to forfeiture of appointment

17 The pay of an Assistant Conservator of Forests will begin from the date of reporting arrival in India Probationers who acquit themselves creditably during their course at Cooper's Hill College will begin on a salary of Rs 350 a month It will, however, rest with the President of the College to decide whether any of the probationers though they have obtained the College diploma in Forestry, have failed to deserve that rate of initial salary Such probationers, if any, will begin on a salary of Rs 250 a month and this difference of salary will continue until the first departmental examination is passed in India Officers entering the Forest Service will be required to contribute a subscription ranging from a

* For details see Royal Indian Engineering College Calendar

compulsory minimum of 5 per cent up to a voluntary maximum of 10 per cent of their salary to the Forest Officers' Provident Fund Such contributions, with compound interest, will accumulate till the date of retirement, when the total sum will be paid to the contributor, or in the event of death before retirement to his legal representative

18 Promotion, leave, and pension will be governed by the regulations laid down by the Government of India and made applicable to Forest officers such regulations being subject to any modifications or alterations which may be made in them from time to time by the Government of India and their interpretation in case of any doubt arising being left to that Government The pension rules applicable to Public Works and Telegraph officers appointed from Cooper's Hill College have been extended to Forest officers appointed from England and the Inspector General of Forests and Conservators of the 1st grade are now eligible for the extra pension of Rs 1,000 per annum admissible to an officer after at least three years of approved service as a head of a department in any Province, if considered deserving of the special concession A copy of the Regulations relative to these matters can be seen on application either at the Library or the Record Department of the India Office, the principal rules are contained in the Abstract of the Civil Service Regulations as given in the "India List and India Office List" published by Messrs Harrison and Sons, 59, Pall Mall, London which can be procured through any bookseller

19 Every candidate, before proceeding to India, will be required to furnish to the President of the College satisfactory evidence of his competency in riding

GENERAL RULES

20 Chemical physical, and botanical laboratories, a forestry museum, a forest nursery, a library and gymnasium are attached to the College Means are also provided for the practice of photography Students making use of the laboratories are supplied with the needful apparatus

21 The responsibility for the discipline and management of the College and for the superintendence of the studies is vested in the President, under the control of the Secretary of State for India

22 The students are distributed in divisions, under personal charge of one of the Professors or Instructors selected by the President, such tutor being responsible for exercising the proper degree of personal supervision over each student in his division, and for conducting necessary correspondence with the student's parents or guardians

23 Each student residing in the College is provided with a separate room and with fire and light, also with the necessary attendance Furniture and bedding are supplied by the College, but students are required to provide their own towels and bed linen Meals are taken in the Hall Wine and beer are not included in the ordinary fare, but can be obtained from the College cellar at fixed prices

24 A chapel is attached to the College, which the students are required to attend at Sunday morning service, unless specially exempted

25 Every student will be required to go through a course of gymnastics and also of military exercises, including the use of the rifle

STUDENTS NOT NOMINATED FOR THE INDIAN FOREST SERVICE, BUT DESIROUS OF OBTAINING A DIPLOMA IN FORESTRY FROM COOPER'S HILL COLLEGE

26 Students not nominated for the Indian Forest Service may be received into the College as far as the available accommodation permits Such students may pass through the course of instruction prescribed for the nominees of the Indian Forest Service, as detailed above, or they may be permitted to participate in the instruction given in certain subjects only On attaining the prescribed minima of marks in the several branches of study and in totals as laid down above, they will receive, as the case may require either the College diploma in Forestry or special certificates showing in what subjects they have followed the instruction and with what result

27 Candidates who desire to be admitted under paragraph 26 may submit the necessary application at any time, but not later than the 15th day of June of the year named for admission, except with a special permission of the President The application must be made on the prescribed forms which can be obtained from the Secretary of the College

28 Candidates whose applications are found satisfactory as to character and in other respects will be required to undergo an examination to be held at the College, about the last week in June of the year, for admission The object of the examination will be to ascertain whether the candidate is qualified to follow the course of instruction with advantage (or certain parts of it, as the case may be) Candidates who do not come up to the required standard will not be admitted to the College

The President may dispense with the whole or any portion of this examination in the case of a candidate who produces an University diploma or other similar certificate granted by a recognised examining body

29 Candidates admitted to the College under paragraph 26, who propose to pass through the full prescribed course of study, will be required to pay the same fees in every respect as those paid by the nominees for the Indian Forest Service Candidates who do not become resident, and are admitted only to certain subjects of study, will be required to pay the fees which may be fixed in each special case in consideration of the extent of their studies The candidates of both classes will be required to abide by the general rules of the College

FOREST ENTRANCE EXAMINATION

SYLLABUS

Mathematics I—Arithmetic, Algebra up to and including the Binomial Theorem, the theory and use of logarithms, Euclid, Books I to IV and VI, Plane Trigonometry, up to and including solution of triangles, Mensuration

Mathematics II—Further questions on the Syllabus of Mathematics I, Elementary Solid Geometry including Euclid, Book XI Propositions 1 to 21 Euclid Book XII, Propositions 1 and 2, Geometrical Conic Sections, the elementary properties common to the ellipse parabola and hyperbola, Dynamics and Statics uniform and uniformly accelerated rectilinear motion, uniform circular motion, motion of projectiles (not requiring a knowledge of the parabola), equilibrium of forces in one plane and of parallel forces, the centre of mass and the construction and use of the simpler machines

Latin—Passages selected from the authors usually read in schools will be set for translation into English Passages from English authors will be given for translation into Latin prose and verse, but candidates will be allowed, in the place of verse composition, to answer questions of a simple character, which will test whether they possess a fundamental knowledge of the Grammar of the language and such an elementary acquaintance with Roman History as is required for the intelligent study of the books they have read

Greek—Passages will be set for translation into English from the authors usually read in schools, and in other respects the Examination will proceed on the same lines as in Latin

French—Translations of unseen passages from French into English, and from English into French The passages for translation will be taken, mainly, from standard authors, and a few simple questions may be asked on the passages set, as to the structure and character of the language, and allusions of obvious and general interest The *viva voce* Examination will include Dictation Three hundred marks will be allotted to coloquial knowledge of the language

German—The passages for translation will be taken mainly from standard authors, and in other respects the Examination will proceed on the same lines as in French

English Composition—Candidates will be tested by precis writing as well as by an Essay The standard of positive merit will be looked for in logical arrangement of thought, and in accuracy and propriety of expression, but large deductions of marks will be made for faults of writing and spelling

(Candidates are also warned that for similar faults in the use of the English language similar deductions will be made from the marks obtained in other subjects)

Geometrical Drawing—Practical plane geometry, the construction of scales, and the elements of solid geometry, and of simple orthographic projection Great importance will be attached to neatness and exactness of drawing

Geography—Simple questions in descriptive and general geography

English History—The General Paper in this subject will be confined to events subsequent to the Norman Conquest It will test whether the candidates are accurately acquainted with the facts of English History and also possess an intelligent knowledge of the meaning of the facts

The paper on the special period will be confined to distinctly modern history It will require from the candidates more minute knowledge than the General Paper

The Special Period will be for 1901—From 1748 to 1800

Natural Science Subjects—The standard of Examination in these subjects will be such as may be reasonably expected from the education given at schools possessing appliances for practical instruction, such as a laboratory, etc A considerable portion of the marks will be given for proficiency shown in the practical part of the Examination A knowledge of the metric system will be expected

Chemistry—The laws of chemical combination and decomposition, and the preparation classification, and properties of the principal metallic and non metallic elements and of such of their compounds as are treated of in inorganic chemistry In the practical part of the Examination only the more ordinary apparatus and the less dangerous reagents will be supplied, and no candidate will be allowed to bring his own apparatus or reagents

Heat—The elementary portion of the subject

Physics—The elementary properties of electricity, magnetism, light, and sound

Physiography, *i e*, physical geography

Geology—Chiefly economic, including the recognition of the more familiar minerals and rocks, and their properties and uses

Botany—The elementary parts of vegetable morphology, histology and physiology, and the principles of a natural system of classification as illustrated by the more important British natural orders Candidates will be required to describe plants in technical language

(Questions will not be set on vegetable palæontology or on the geographical distribution of plants)

ORDER —Ordered that a copy be forwarded, for information, to the Governments of Madras and Bombay, the Local Governments and Administrations noted in the margin, the Inspector General of Forests, and the Comptroller and Auditor General

Bengal	Assam
North Western Provinces and Oudh	Coorg
Punjab	Ajmer
Burma	Andamans
Central Provinces	Baluchistan
	Hyderabad

Ordered, also, that these papers be published in the *Supplement* to the *Gazette of India*

[True Extract]
T W HOLDERNESS,
Secretary to the Government of India

CALCUTTA;
OFFICE OF THE ACCTT.-GENL., BENGAL,
The 12th January 1901.

J C E. BRANSON,
Accountant-General, Bengal.

NOTIFICATION—No 5031Mis

The 19th November 1900—It is hereby notified for general information that under the powers conferred on him by clause (1), section 9 of the Indian Census Act (Act X of 1900), the Lieutenant Governor is pleased to direct that in cases where it is likely that a more accurate record will be obtained if the census schedules are filled in by the occupier of a dwelling house or any specified part thereof, rather than by the enumerator of the block, the enumerator or other census officer deputed for the purpose shall, a few days before the census, leave at the house of each such person a household or private schedule in the form annexed It will be the duty of the occupier to fill in correctly all the columns of the said schedule for all persons present in his house on the night of the 1st March (except native servants who will be dealt with by the enumerator) and to make over the same to the enumerator or other census officer when he calls for it on the morning of the 2nd March. The instructions for filling in the schedule are printed on the back of the same Any further explanations that may be required will be furnished by the Census Officer concerned

Form of Schedule

House number	Serial number	NAME	Religion In the case of Christians add sect also	Male or female	Married unmarried or widowed	Age	Caste of Hindus and Jains, Tribe or race of others. E N BAKER,
Secy to the Govt of Bengal

NOTIFICATION

IN supersession of the notification, dated the 16th May 1891, published at page 488, Part I of the *Calcutta Gazette* of the 20th May 1891, the following revised notification is published for general information —

Midnapur

Under the provisions of section 9 of the Bengal Excise Act, VII of 1878, and with the sanction of the Board of Revenue, a distillery for the manufacture of spirituous liquors after the native process having been established at Nabinabag, in the district of Midnapur, it is hereby notified that from and after the 1st April 1901 within the following limits which have been fixed with the sanction of the said Board of Revenue, no such liquors, unless manufactured at the said Sudder distillery shall be introduced or sold without a pass from the Collector, and no still shall be constructed or worked or spirituous liquors manufactured, except at the said distillery —

Northern Boundary—Thana Garbeta of the district
Eastern Boundary—Districts of Hooghly Howrah and river Hooghly
Southern Boundary—Bay of Bengal and district of Balasore
Western Boundary—A line excluding thanas Binpore, Jhargram and Gopibullabpore of the district

H F SAMMAN, *Collector*

The 18th December 1900

NOTIFICATIONS OF THE BOARD OF REVENUE

NOTIFICATION—No 34B

Dated Calcutta, the 4th January 1901

CUSTOMS

THE HON'BLE MR C W BOLTON, C S I

THE following rules 7 (*a*) and 14 (*a*) which have been added by the Board of Revenue, Lower Provinces, under the powers vested in them by section 164 of the Sea Customs Act, VIII of 1878, to the rules published at pages 793 798, Part I of the *Calcutta Gazette* of the 5th September 1888 under Notification No 1127B, dated the 30th August 1888, are published for general information in accordance with the provisions of section 204 of the Act

By order of the Board of Revenue, L.P,
C J STEVENSON MOORE,
Offg Secretary

Rules

7 (*a*) Instead of shippers being required to take out shipping bills for goods taken on board of vessels of the Orissa Service plying under General passes, the Agents themselves shall be at liberty to send in a consolidated shipping bill containing all necessary particulars, separate shipping bills being, however, taken out for dutiable goods

14 (*a*) The Master or Agent of any vessel plying between Calcutta and the ports of the Orissa Division may, on the announcement of such vessel's arrival in the river, enter her inwards at the Calcutta Custom House on the production by telegram of a certified copy of the manifest stating the name of the vessel and the port of departure and showing separately the number of packages and the description and destination of the goods shipped, and in the case of packages to be transhipped at Calcutta, the marks and numbers on and the names of the consignees of such packages as well The production of such manifest shall not, however, be held to dispense with the presentation, within 24 hours after the arrival of the vessel in port, of the extract from the cargo book and duplicate shipping bills for all dutiable cargo required under rule 14

No 2723B

MILITARY SECRETARY'S OFFICE

NOTIFICATION

Calcutta, the 11th January 1901

No 46-*I* —His Excellency the Grand Master of the Most Exalted Order of the Star of India and the Most Eminent Order of the Indian Empire will hold an Investiture of both Orders in the grounds of Government House on Tuesday, the 26th February 1901, at 9 30 P M

His Excellency the Viceroy and Governor-General of India will at the same Darbar present the Kaisar-i-Hind Medals of the First Class

Admission to Government House on the occasion will be by tickets only

Members of the above mentioned Orders and members of the Consular body will be invited by the Secretary in the Foreign Department, and Kaisar-i-Hind Medallists of the First Class will be invited by the Secretary in the Home Department All other persons desirous of attending are requested to apply for tickets to the undersigned not later than the 14th February 1901, *after which date no applications will be received* Tickets will be issued on or after the 21st February 1901

Applications for tickets should have the word "Investiture" written on the outside of the envelope

Gentlemen attending the ceremony who are entitled to wear uniform will appear in ***Full Dress***, Military Officers in ***Review Order***, and those not entitled to wear uniform in ***Evening Dress***

The carriages of those having the private entree will enter the Government House grounds by the south-west gate, set down opposite the private entrance in front of the gun, and will be passed out by the south gate

The carriages of those not having the private entrée will enter by the north east gate, and set down before reaching the grand stairs

The gates of Government House will be closed at 9 15 P M, after which no carriages will be allowed into the Government House grounds until the ceremony is over

By Command,

E BARING, *Lt-Colonel,*
Military Secretary to the Viceroy

The following orders, issued by the Government of India in the Home Department, are republished for general information

C B BUCKLAND,
Offg Chief Secy to the Govt of Bengal

NOTIFICATIONS

EXAMINATIONS

Calcutta, the 11th January 1901

No 7—The following amended Regulations respecting the examination of Candidates for the Civil Service of India, to be held in August 1901, are published for general information in supersession of the Regulations published with Home Department Notification No 523, dated the 14th September 1900

The Syllabus showing the extent of the examination in certain subjects and the Form of Application, published with the Notification quoted above, are unaltered

Copies of this paper may be had on application to the Secretary to the Government of India, Home Department

EXAMINATIONS FOR THE CIVIL SERVICE OF INDIA

An open Competitive Examination for admission to the Civil Service of India will be held in London, under the Subjoined Regulations, commencing on the 1st August, 1901

The number of persons to be selected at this Examination will be announced hereafter

No person will be admitted to compete from whom the Secretary, Civil Service Commission, has not received on or before the **1st July, 1901,** *an application on the prescribed form, accompanied by a list of the subjects in which the Candidate desires to be examined*

The Order for admission to the Examination will be posted on the 18th July, 1901, to the address given on the Form of Application. It will contain instructions as to the time and place at which candidates will be required to attend, and as to the manner in which the fee (£6) is to be paid

Civil Service Commission,

December, 1900

REGULATIONS

*** *The following Regulations, made by the Secretary of State for India in Council, are liable to alteration from year to year*

1 An Examination for admission to the Civil Service of India, open to all qualified persons, will be held in London in August of each year The date of the Examination and the number of appointments to be made for each Province will be announced beforehand by the Civil Service Commissioners.

2 No person will be deemed qualified who shall not satisfy the Civil Service Commissioners—

(i) That he is a natural born subject of Her Majesty.

(ii) That he had attained the age of twenty-one, and had not attained the age of twenty-three, on the first day of the year in which the Examination is held

[*N B—In the case of Natives of India it will be necessary for a Candidate to obtain a certificate of age and nationality issued under Notification of the Government of India, No 2252, dated 21st August, 1888, as amended by Notification No 404, dated 19th May, 1898, and signed, should he be a resident in British India, by the Secretary to Government of the Province, or the*

Commissioner of the Division within which his family resides, or should he reside in a Native State, by the highest Political Officer accredited to the State in which his family resides]

(iii) That he has no disease, constitutional affection, or bodily infirmity unfitting him, or likely to unfit him for the Civil Service of India

(iv) That he is of good moral character

3 Should the evidence upon the above points be *primâ facie* satisfactory to the Civil Service Commissioners, the Candidate, on payment of the prescribed fee, will be admitted to the Examination The Commissioners may, however, in their discretion, at any time prior to the grant of the Certificate of Qualification hereinafter referred to, institute such further inquiries as they may deem necessary, and if the result of such inquiries, in the case of any Candidate, should be unsatisfactory to them in any of the above respects, he will be ineligible for admission to the Civil Service of India, and if already selected, will be removed from the position of a Probationer.

4 The Open Competitive Examination will take place only in the following branches of knowledge —

		Marks
English Composition		500
Sanskrit Language and Literature		500
Arabic Language and Literature		500
Greek Language and Literature		750
Latin Language and Literature		750

For the North Western Provinces and Oudh, the Punjab and the Central Provinces	Hindustani
For Burma	Burmese
For Bombay	Marathi
For Madras	Tamil or Telugu } At the option of the Candidate
For the Lower Provinces of Bengal	Hindustani or Bengali } At the option of the Candidate

In Hindustani the Candidate will be required to be acquainted with both the Persian and the Nagari character and in the case of the last two Provinces mentioned above a Candidate whose Vernacular Language is either of the languages shown against his Province must offer the other for examination

(*a*) Syllabus defining the character of the Examination in the various subjects may be obtained on application to the Secretary Civil Service Commission

(*b*) No deduction will be made from the marks assigned to Candidates in Mathematics or English Composition

(*c*) Instructions showing the extent of the Examination will be issued to the successful Candidates as soon as possible after the result of the Open Competition is declared

Optional [Not more than two of the following subjects]	Marks
1 The Code of Civil Procedure and the Indian Contract Act	400
2 Hindu and Muhammadan Law	450
*3 Sanskrit	400
*4 Arabic	400
5 Persian	400
6 History of British India	350
7 Chinese (for Candidates assigned to the Province of Burma only)	400

* These subjects may not be offered by any Candidate who has offered them at the Open Competition

In this Examination, as in the Open Competition, the merit of the Candidates examined will be estimated by marks (which will be subject to deductions in the same way as the marks assigned at the Open Competition), and the number set opposite to each subject denotes the greatest number of marks that can be obtained in respect of it The Examination will be conducted on paper and *vivâ voce*, as may be deemed necessary This Examination will be held at the close of the year of probation, and will be called the "*Final Examination*"

If any Candidate is prevented by sickness or any other adequate cause from attending such examination, the Commissioners may, with the concurrence of the Secretary of State for India in Council, allow him to appear at the Final Examination to be held in the following year, or at a special examination

10 The selected Candidates will also be tested during their probation as to their proficiency in Riding

The examinations in riding will be held, as follows —

(1) Shortly after the result of the Open Competitive Examination has been declared, or at such time or times as the Commissioners may appoint during the course of the probationary year

(2) Again, at the time of the Final Examination, Candidates who may fully satisfy the Commissioners of their ability to ride well and to perform journeys on horseback, shall receive a Certificate which shall entitle them to be credited with 200 or 100 marks, according to the degree of proficiency displayed, to be added to their marks in the Final Examination

(3) Candidates who fail to obtain this Certificate, but who gain a Certificate of minimum proficiency in riding, will be allowed to proceed to India, but will be subjected on their arrival to such further tests in riding as may be prescribed by their Government, and shall receive no increase to their initial salary until they have passed such tests to the satisfaction of that Government A Candidate who fails at the end of the year of probation to gain at least the Certificate of minimum proficiency in riding, will be liable to have his name removed from the list of Selected Candidates

11 The selected Candidates who, on examination, shall be found to have a competent knowledge of the subjects specified in Regulation 9, and who shall have satisfied the Civil Service Commissioners of their eligibility in respect of nationality, age, health, character, conduct during the period of probation, and ability to ride, shall be certified by the said Commissioners to be entitled to be appointed to the Civil Service of India, provided they shall comply with the regulations in force, at the time, for that Service

12 Persons desirous to be admitted as Candidates, must apply on Forms, which may be obtained from "The Secretary, Civil Service Commission, London, S W," at any time after the 1st December, in the year previous to that in which the Examination is to be held. The Forms must be returned so as to be received at the office of the Civil Service Commissioners on or before the 1st July (or, if that date should fall upon a Sunday or public holiday, then on or before the first day thereafter on which their office is open), in the year in which the Examination is to be held

The Civil Service Commissioners are authorized by the Secretary of State for India in Council to make the following announcements —

(i) *Selected Candidates will be allotted to the various provinces upon a consideration of all the circumstances, including their own wishes but the requirements of the Public Service will rank before every other consideration*

(ii) *An allowance amounting to £100 will be given to all Candidates who pass their probation at one of the Universities or Colleges which have been approved by the Secretary of State, viz, the Universities of Oxford Cambridge, Dublin, Glasgow, Edinburgh, St Andrews, and Aberdeen, Victoria University, Manchester University College, London, and King's College, London provided such Candidates shall have passed the Final Examination to the satisfaction of the Civil Service Commissioners, and shall, in the opinion of the Secretary of State, have conducted themselves well and*

complied with such rules as may be laid down for the guidance of Selected Candidates The whole probation must ordinarily be passed at the same Institution Migration will not be permitted except for special reasons approved by the Secretary of State

(iii) *The allowance of £100 will not be paid to any Selected Candidate until he has been certified by the Civil Service Commissioners to be entitled to be appointed to the Civil Service of India and every Certificated Candidate must, before receiving his allowance, give a written undertaking to refund the amount in the event of his failing to proceed to India*

(iv) *All Candidates obtaining Certificates will be also required to enter into covenants, by which, amongst other things, they will bind themselves to make such payments as, under the rules and regulations for the time being in force, they may be required to make towards their own pensions or for the pensions of their families The stamps payable on these covenants amount to £1*

(v) *The seniority in the Civil Service of India of the Selected Candidates will be determined according to the order in which they stand on the list resulting from the combined marks of the Open Competitive and Final Examinations*

(vi) *Selected Candidates will be required to report their arrival in India within such period after the grant of their Certificate of Qualification as the Secretary of State may in each case direct*

(vii) *Candidates rejected at the Final Examination held in any year will in no case be allowed to present themselves for re examination*

N B—A Manual of Rules and Regulations applicable to members of the covenanted Civil Service of India has been compiled by permission of the Government of India, and may now be procured either from Messrs A Constable & Co, 2, Whitehall Gardens, S W, or from Mr E A Arnold, 37, Bedford Street, Covent Garden Price 2*s* 6*d*

The Commissioners have been requested by the Secretary of State for India to draw the attention of Selected Candidates to the prefatory note attached to this manual, as it is considered important that it should be clearly understood that this compilation is not to be regarded in any other light than that of a collection, made for facility of reference, of certain information and rules, that it is by no means exhaustive, and that it is liable to such modifications as may from time to time be sanctioned by competent authority

The Indian Law Reports

Published under Authority

THE Indian Law Reports published under the authority of the Governor General in Council appear in monthly parts published as soon as possible after the first of each month at Calcutta Madras Bombay and Allahabad and comprise four series—one for the Calcutta High Court a second for the Madras High Court a third for the Bombay High Court and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Courts in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depot and the Madras Bombay and Allahabad Series are distributed from Madras Bombay and Allahabad respectively.

In supersession of the previous advertisements on and from the 1st January 1889 the terms of subscription and sale will be as follows for current issue as well as for back numbers of the report from 1876 —

Notice

IT is hereby notified for general information that subscriptions to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions for the complete [illegible] before the 31st March in each year. Those who register their [illegible] after that date will understand that copies will be supplied only if available.

THE following Weather Reports of the Bengal Meteorological Department [illegible] order of the Government of Bengal can be supplied to the public at the prices annexed:—

1st.—Bay of Bengal Daily Weather Report, giving meteorological observations taken at 28 stations in Bengal and [illegible] near the coast of the Bay, with a chart and summary. This is published in connection with the Bay of Bengal Storm Signal Service. The report giving 8 A.M. observations of the day is distributed by peon in Calcutta soon after midday. Price to subscribers in Calcutta Rs. 2 per mensem, payable in advance for six months.

This report will be issued every year from 1st November to 30th April. From 1st May a Bay of Bengal [illegible] containing observations taken at [illegible] stations will be issued up to 1st October.

2nd.—A Monthly Statement of Meteorological Observations taken at the following stations and of rainfall recorded at subdivisional and other stations, together with summary of the more important features of the meteorology of the month of the province and of the distribution of the rainfall and its variation from the normal. Price of the Monthly Summary Rs. 2 per annum payable in advance.

Subscriptions payable to the Meteorological Reporter to the Government of Bengal, 1 Camac Street, Calcutta, for the Bay of Bengal and Bengal Daily Weather Report, and to the Accountant and Treasurer, Bengal Secretariat, for the Monthly Report.

Notice

NOTICE is hereby given that the terms for the purchase of publications from the Bengal Secretariat Book Depôt, except by Government offices or [illegible] of Government Officers [illegible] other terms [illegible] publications [illegible] advertisements [illegible] &c. [illegible] neither of the Gazettes.

In the case of [illegible] must [illegible] when forwarded by Mofussil [illegible] offices and [illegible] forwarded by the Official Assignee cash must be paid on presentation of memorandum of cost by the Accountant and Treasurer, Bengal Secretariat.

Remittances in postage stamps should be accompanied by an addition of one anna in the rupee on account of discount.

☞ Applications for Acts of the Bengal Legislative Council required on the public service should be addressed to the REGISTRAR, Office of the Legislative Department, Government of Bengal.

Copies are available for purchase at the Bengal Secretariat Book Depôt.

Notice

The 8th June 1900.—The subscription to and postage for the *Calcutta Gazette* will from 1st July 1900 be at the following rates payable in advance:—

For the Mofussil.

Princess Charlotte bay—Coral patch

The British Admiralty has given notice (No 813 of 1900) of the existence in Princess Charlotte bay of a coral patch from 300 to 400 yards in extent with several shoal heads, the depth on the shoalest being 3 fathoms, low water springs, which is situated with Dhu reef beacon bearing N 47° E, distant 5½ miles, and Ead reef beacon N 15° W (*Notice No 813 of 1900*)

Approximate position, lat 14° 11 S, long 143° 56 E

(*Variation 5° Easterly in 1900*)

NOTE It appears probable that this is the shoal reported by Mr S Clarke in 1893, as the depth over it and the bearing of Dhu reef beacon are the same but the distance given was 7 miles instead of 5½ miles (*see* Notice to Mariners No 393 of 1893)

Mr Clarke's shoal will be also retained for the present

[First Publication]

PACIFIC OCEAN—NEW CALEDONIA

Information respecting Pilots, &c

THE British Admiralty has given the following information in Notice to Mariners No 516 of 1900 respecting Pilots, &c, in New Caledonia —

PILOT BOATS have an anchor and number painted in black on the upper part of their sails When pilots are on board, the pilot jack is hoisted by day, and a white light by night at the gaff

PILOT STATIONS have been established at Amedee islet, where two pilots and one apprentice are stationed, and at Noumea, Tchio, and Monéo, where one pilot and one apprentice, respectively, are stationed

REGULATIONS —Vessels will be piloted according to the order of their arrival All vessels are compelled to take a pilot where a pilot station has been established, except vessels of war and local coasting vessels Vessels bound for any other port, but wishing to call at Noumea, can do so by furnishing the pilot with a certificate to that effect

PILOT DUES —Vessels passing through the Bulari channel *en route* for Tchio will pay half dues from Bulari to Havannah in addition to those for entry to or departure from Tchio

Full dues are to be paid by—

(*a*) Vessels coming from sea and taking a pilot
(*b*) Vessels coming from sea which have been met by pilots and do not employ them
(*c*) Vessels coming from sea which enter or leave, any port in the colony

Vessels which take a pilot when they are in the channels will only be charged half dues except in the Bulari channel at night, when full dues must be paid

Where there is no pilot station, and no pilot goes out to meet the vessel, no pilotage need be paid

Vessels of war are piloted at half dues (*Notice No 516 of 1900*)

Approximate position, port Noumea, lat 22° 16 S, long 166° 26 E

This Notice affects the following Admiralty Charts —New Caledonia Nos 936a b Uen island to St Vincent bay, No 2607 Port Noumea, No 2069 also, Pacific islands, Vol I, Part II, 1893, pages 43, 47, 111, 73 and Pacific islands, Vol II, 1900 (now in Press), pages 312, 313

THE MONSOON OF 1900

THE following report is published for general information

F A SLACKE,

The 14th January 1901 *Secy to the Govt of Bengal*

METEOROLOGICAL SUMMARY FOR THE MONSOON PERIOD OF 1900

THE following remarks are intended to form the usual brief introduction to the rainfall tables which give full information regarding the rainfall measured during the south west monsoon months in all parts of the Province Only the more important features of the general atmospheric conditions are discussed, and these only when they show a tendency favourable or unfavourable to rainfall.

A general review of the rainfall distribution during the early months of the year is not satisfactory from the point of view of a comparison with the amounts usually received in those months The distribution was less regular than usual, inasmuch as, while month by month up till May there were generally excess falls in some parts of the Province, there was always a large, though changing, area of deficient rainfall In January this area of deficient rainfall included Bengal Proper and Orissa, in February Bihar, Chota Nagpur and Orissa, in March the whole Province except Orissa, and in April North and East Bengal and Bihar The area, therefore, which was most continuously in receipt of deficient rainfall was Bihar where, after the heavy rain of January, exceptionally light falls occurred till the commencement of the monsoon season

In January the more conspicuous weather conditions were almost continuous high temperature in most districts and relatively heavy rainfall in Chota Nagpur and Bihar Rainfall was largely confined to these two divisions which received on an average 2 3 and

2 2 inches respectively, the corresponding normal amounts being 6 and 5 inch Though not altogether absent in other divisions, rainfall was not only much lighter than in Bihar and Chota Nagpur, but was considerably below the small amounts normal for January North Bengal received 34 inch South West Bengal 24 inch, while in Orissa and East Bengal it was practically nil

The explanation of the above peculiarities, viz, heavy rainfall in the west and continued high temperature in the east and south of the Province, appears to be in the check which the shallow depressions received to their easterly motion while over the western districts This check was due to a rise of pressure in the east so that the depressions filled up before they crossed the Province and passed into Burma

A depression which occurred early in February was similar in its behaviour to those of January, but thereafter the depressions crossed the Province in the usual way They gave rise to more generally unsettled weather than is usual in February, and in one respect were exceptional They were attended by numerous local disturbances of the Nor' wester type Instead, however, of advancing from the north west, these thunderstorms passed from south west to north east, probably indicating by their motion that the upper atmospheric currents were more from the south than usual

The first of the three depressions causing local storms of the kind referred to in the previous paragraph occurred about the 12th, the second about the 18th, and the third on the 25th and 26th The heaviest rainfall as compared with the normal, occurred in Lower Bengal There was a small excess in North Bengal, while in the western districts there was a small defect, greatest in Chota Nagpur where it amounted to about half the normal fall

During the early part of March, fine settled weather generally prevailed over the Province and the Bay with winds variable in direction and below normal strength For a few days the cold season distribution of pressure, with westerly or north westerly winds, was restored, and temperature was in consequence below the normal by several degrees at that time Owing to the variable conditions accompanying the change from southerly to northerly winds, a few local storms with light scattered rainfall, occurred in the south western districts, mostly in Orissa and the south of Chota Nagpur, but the falls were in all cases so light that they scarcely influenced the total falls for the month

During the latter half of the month weather underwent a marked change and became unsettled to an exceptional extent This exceptional character was not so much in the severity of the disturbance, but in the fact that the unsettled conditions continued with little intermission till the end of the month Very little rain fell in Bihar or in Chota Nagpur Towards the east it increased in amount and was especially heavy in the south of Assam Silchar received more than 12 and Sibsagar and Dhubri more than 4 inches, while the average fall in East Bengal was 2 5 inches The only other average fall of more than 1 inch was 1 42 inches in Orissa

In April four series of local disturbances occurred, at intervals of about a week, and fairly general rain fell over the Province The depressions to which these disturbances were due were on two occasions forced southward over Orissa and the north of the Bay by the rise of pressure so frequently noticed in Assam and North Bengal under similar circumstances It was probably owing to that rise of pressure in the north east and the consequent change of motion of the depressions that rainfall was much heavier in the south western districts than in other parts of the Province

In Chota Nagpur the average excess for April was 1 73 inches, in South West Bengal 1 05 and in Orissa 62 inch, while in Bihar and East and North Bengal there was a deficiency varying from a quarter of an inch in the first to rather more than 1 inch in the last

Showery weather was of frequent occurrence in May, but the total falls for the month were below the normal except over a narrow strip of country running north and south from the head of the Bay to North Bengal Only a very slight disturbance occurred over the Bay and rainfall was much less heavy than usual on the Burma Coast The high pressure over Bengal, this settled weather over the Bay, and the scanty rainfall in Burma were the usual indications that the commencement of south west monsoon weather would be later than usual over the Province

The total fall for May was much more uniform than in previous months, and was about 20 per cent below the normal on an average for the various divisions The chief features in the general weather conditions were the almost continuous high pressure over the northern districts, the frequent occurrence of showery weather in all parts of the Province except Bihar, and the relatively low temperature due to these local disturbances The numerous showers were probably due to, as they accompanied, the frequent oscillations of pressure, and it is noteworthy that they were most frequent when pressure was above the normal On the other hand, the period when rainfall was least common was the only occasion of low pressure over the Province with a corresponding steep gradient over the Bay A possible explanation of this peculiarity may be that the high pressure in the north caused a displacement of the air more towards the west than usual, and the rainfall which would otherwise have occurred in the eastern districts was diffused over the central and western districts This supposition receives support from the peculiar distribution of the rainfall for the month as a whole It was deficient in both the eastern and western districts, and, as stated above, over almost the whole Province, but over a comparatively narrow belt running north and south from the north west angle of the Bay towards North Bengal it was considerably in excess, as if the heavier rainfall of May in the eastern districts had been displaced westward to the loss of those eastern districts

Of the shallow depressions which could be traced in the somewhat confusing and frequent pressure oscillations, two appeared to pass westward—one at the end of the first week, the other towards the end of the month, and a third from west to east about the middle of the month The local storms with rain at other times were probably due to the moderately large pressure oscillations and the shifting winds which accompanied them The defect in East Bengal was 3 85 inches, in North Bengal 2 inches and in the other divisions half-an inch or a little more

Three periods of disturbed weather occurred during the month the first of which was of the kind usual in the hot weather months and caused a considerable amount of rainfall over the Province and very low temperature for several days at the beginning of the month The depression to which this rainfall was due appeared to begin in Assam and moved slowly westward The second disturbance was a cyclonic storm of moderate intensity which began in the south or south east of the Bay about the beginning of the second week and moved north westward across the Orissa Coast on the 12th When in the east of the Central Provinces the storm recurved, and on the 14th was in Chota Nagpur moving in an east north east direction One of the results of this change of motion was the general heavy rainfall which began in Bengal simultaneously with the change of motion and was most noticeable in the northern districts

During the third week the low pressure over the Bay concentrated into a slight depression which was in the north west angle on the 23rd and caused the third disturbance of the month The depression attained to no great depth, but moving north north eastward it remained over Bengal, Proper for some days, causing unsettled weather in the eastern districts with heavy continuous rainfall while in the western districts dry weather, with hot westerly winds, prevailed till the end of the month

On an average for the month there was defect of 16 per cent of the normal in Orissa and South west Bengal and of 8 per cent in Chota Nagpur In the other divisions there was excess varying from 5 per cent in North Bengal to 30 per cent in Bihar

During July the moist current from the Bay continued to be diverted eastward, and East and North Bengal were the only divisions which received rainfall in excess of the normal for the month Two slight disturbances occurred in the early part of the month The depressions were not accompanied by stormy weather in the Bay, and they to a large extent filled up soon after passing inland, but they were important as indicating a change from the abnormal conditions of the monsoon season of 1899 and the early part of the present season

It will be remembered that during the monsoon season of 1899 such depressions as formed over the Bay either moved northwards, or after moving north westward as far as the Central Provinces, recurved and in the end filled up over Bengal that this feature was accompanied by an absence of rainfall in western India and excessive rainfall over the Province The early disturbances of the present season were in character similar to those of the previous year, and these slight disturbances of July were the first to indicate that the conditions were being restored under which depressions from the Bay move north westward without recurving The first disturbance was in a manner neutral as it practically filled up where it formed but the second, which occurred about the middle of the month, moved rapidly north westward giving more or less general rainfall to the country over which it passed

The direction of motion of cyclonic disturbances is probably controlled by the higher atmospheric currents, and the change which then occurred, and was made apparent by the direction followed by the depressions, was in these higher rain bearing currents returning to their usual south westerly direction

During the latter half of July pressure increased over Bengal and rainfall partially ceased, more especially in the north western districts, where only light scattered showers fell The pressure distribution became uniform over the Bay, the usual indication that a cyclonic disturbance was in process of development, and this disturbance appeared in the north west of the Bay at the end of the month

The monsoon during these early weeks of the season was below the normal strength, a condition which continued during August The weakness was shown in the absence of general heavy rainfall such as usually falls in ordinary years In July there was relatively heavy rainfall in Bengal Proper but not in other parts of the Province, and when the change occurred which has been indicated above, the rainfall became heavy in Orissa and light in Bengal Proper, the deficiency increasing towards the north east In August Orissa received 74 per cent excess, Chota Nagpur and South West Bengal almost the normal amount, while in the other divisions there was defect ranging up to 53 per cent in North Bengal

An unusual number of storms formed during August at the head of the Bay, none of them, however, of even average severity Three of the depressions crossed the coast near Balasore and the fourth near False Point, after which they moved north westward without any tendency to recurve During their passage, they were not accompanied by very heavy rainfall, but owing to their comparatively large number, Orissa received the heavy rain mentioned above

The main features of the weather during September were—

(1) the comparative absence of cyclonic storms over the north of the Bay,
(2) the relatively high pressure in the east and north of the Province, and the continued absence of rainfall in North and East Bengal and Assam,
(3) the period of disturbed weather which ended in the exceptionally heavy rainfall in Lower Bengal, and the heavy falls in Chota Nagpur and Orissa

During the early days of the month winds were much more easterly than usual over the Province, an arrangement which was unfavourable for rainfall in the northern districts and continued till the end of the first week As a depression which had, during these early days, been moving westward through the Central Provinces turned northwards and broke up on reaching the Himalayas, the distribution of pressure in Bengal became more favourable, and ordinary monsoon conditions were general for some days, i e, up till about the 9th

The changes of pressure during the few days subsequent to the 10th were nowhere large, but a shallow depression over the Bay was becoming more definite and was drifting northwards Light northerly winds prevailed in Bengal, and weather was in all respects such as usually obtains during the early stage of a cyclonic disturbance over the Bay

About the 15th general and fairly heavy rainfall began in East Bengal and Orissa, and on that date a widespread depression lay over the Province with a moderately steep gradient over the Bay The pressure arrangement was such as usually occurs when a diffused depression has moved northwards from the Bay It is always accompanied by general monsoon weather, but not always by heavy rainfall Between the 15th and 16th the depression concentrated off the Orissa Coast, and a shallow low pressure area with a well defined cyclonic circulation of winds moved westward across Orissa

Following this westward movement of the depression, the usual change would have been a rise of pressure in Bengal, but a brisk fall occurred on the 17th in the south-western districts, and a new centre of disturbance was shown near Saugor Island, where pressure was 2 inch below the normal This also appeared to move westward, and at 8 A M on the 19th pressure was rising rapidly in Assam and briskly in Bengal Proper

By the morning of the 19th the heavy rainfall had begun, as Saugor Island reported 5 inches during the 24 hours previous to 8 A M of that date What appears to be the most significant fact towards explaining the heavy rainfall of the two succeeding days is the south-westerly wind at Saugor Island, a direction which is almost diametrically opposite to what might be expected from the pressure distribution prevailing at that time This peculiarity in the wind at Saugor Island was very persistent till the 21st, and became even more marked before it disappeared on the 22nd, when with a similar pressure distribution the direction was east south east

If the wind had been light and variable on those days, this discrepancy in direction, as compared with neighbouring stations in Bengal might be overlooked, but velocity was steadily increasing, and on the 20th averaged 36 miles an hour What may be a possible explanation is that the area of low pressure which was near Saugor Island on he 18th did not pass westward, that it ceased to be felt at the ground level, but continued to exist in the upper region of the atmosphere over South-west and part of East Bengal This would account for the south westerly direction of the wind at Saugor Island the centre of disturbance having been in that case transferred north eastward It would also account for the cyclonic circulation of winds in South West Bengal on the 20th, and for the great amount of ascensional motion of the air which alone could produce the fall of 20 to 30 inches in two days over an area, including the greater part of the 24 Parganas, the Sunderbans, Howrah, and Khulna But as the pressure changes at the ground level give no indication of the existence of deficient pressure over Lower Bengal at that time, its existence can be only a matter of speculation On the 20th the difference from normal pressure at Calcutta was only 04 inch, and on the 21st it was 05 inch, in both cases defect The rainfall diminished in amount rather quickly towards the west and north, and less quickly towards the east For the week ending at 8 A M on the 22nd September a fall of more than 40 inches was recorded at Kaliganj, more than 30 over a tract of country about 30 miles in breadth extending northwards from the sea coast to a little north of Calcutta, and from there eastward as far as Khulna Falls of more than 15 inches occurred over the greater part of the Sunderbans, Backergunge, Khulna, 24 Parganas, Jessore, and Burdwan

The rising pressure in the east continued during these days, and the pressure gradient became gradually steeper over the greater part of the Province and the Bay, but on the 22nd the rise became general over the Province, the low pressure area moved westward, and rainfall to a large extent ceased in Lower Bengal There were still falls of 2 to 4 inches, but these were mostly in the south western districts The rise of pressure moved westward, and readings were in excess over the whole area from the 23rd onwards till the 27th, when the depression having recurved and moved northwards affected weather and caused heavy rainfall in the west of Bihar On the 28th the disturbance ceased to exist, the depression having broken up on reaching the Himalayas

While the heavy rain was falling in south of the Province, very little fell in North Bengal and Bihar, but temperature was unusually low over almost the whole area Defect was greatest in the region of heavy cloud and rain, and was for several days on an average little short of 10° below the normal In the central and northern districts defect varied from 5° to 8° This defect slowly disappeared, and it was not till the 27th that mean temperature was approximately normal over the greater part of the Province

At the end of the month after the depression finally disappeared, the pressure distribution rapidly changed Pressure fell over the Bay and rose inland, so that readings became highest in the northern districts and lowest in the south, the first indication of the approaching change of season Light northerly winds prevailed with comparatively low temperature, except in the extreme east, cloudless skies and only a few scattered showers

Owing to the phenomenal rainfall at the end of the third week, the total fall for September was much above the average in the south west of the Province, and as heavy rainfall occurred subsequently in Bihar, there was a moderate excess in that division South-West Bengal received 280 per cent of the normal, Chota Nagpur 194 per cent, and Orissa 165 per cent In East Bengal the distribution was irregular, amounts varying from very heavy in the western parts of the division to light in the east, and in North Bengal there was considerable defect

Cold season pressure conditions having appeared before the end of September, they continued more marked than usual in October, and, with the exception of two periods of disturbed weather, the month was drier and cooler than in ordinary years

The first of the two disturbances developed in the east of the Bay, moved north westward into the north west angle, and after crossing Orissa about the 6th recurved towards the north While the central area was approaching and crossing Orissa, heavy rain fell in that area During the northerly movement of the depression general rain fell in the western districts, especially between the 7th and 9th in Chota Nagpur and on the 10th in Bihar The second disturbance entered the Bay from the east about the 20th and developed into one of considerable depth while crossing the Bay towards the Madras Coast which it crossed on the 24th The influence of this depression was slight over the Province, as only scattered rainfall occurred in Orissa and Lower Bengal

In October Orissa received 16 per cent excess, but in all other parts rainfall was deficient, Bengal Proper received less than half the usual amount, Chota Nagpur 62 per cent of the normal, and Bihar 81 per cent

Since the end of October fine rainless weather has prevailed

Actual rainfall in inches during 1900

METEOROLOGICAL OFFICE, BENGAL,
The 8th December 1899

C LITTLE,
Meteorological Reporter to the Govt of Bengal.

WEATHER AND CROP REPORT

For the week ending the 14th January 1901

Burdwan —Rainfall at Sadar 0 01 Weather fine and cold Harvesting of *aman* nearly finished Pressing of sugarcane continues Fodder and water sufficient Price of common rice stationary

Birbhum —No rain Weather cold and cloudy Standing crops benefited by last rain Price of rice at Sadar 13½ seers and at Rampur Hât 14¾ seers per rupee Fodder sufficient

Bankura —No rain Weather cold and occasionally cloudy Pressing of sugarcane commenced in places *Rabi* crops doing well Fodder and water sufficient No cattle disease reported Price of common rice at Bankura 12 seers and at Vishnupur 12½ seers

Midnapore —No rain *Aman* being reaped Common rice sells as follows —

	Srs	
Sadar	14	per rupee
Contai	14	
Tamluk	11	
Ghatal	13½	

Hooghly —No rain Harvesting of *aman* nearly finished *Rabi* crops doing well Fodder and water sufficient Common rice sells at 10 seers 15 chitaks per rupee

Howrah —No rain Weather seasonable Harvesting of *aman* going on in places Fodder and water sufficient Common rice sells at 10¼ seers per rupee

24-Parganas —Rainfall at Sadar 01 Weather seasonable Prospect of standing crops not good Harvesting of *aman* still going on No cattle disease Fodder and water sufficient Common rice sells as follows —

	Srs	
Sadar	10	per rupee
Barasat	10	
Basirhat	11	
Diamond Harbour	12$\frac{5}{16}$	

Nadia.—No rain Weather cloudy Rain wanted for the standing crops Harvesting of *mung* and *kalai* going on Fodder and water sufficient Price of common rice stationary

Murshidabad —Rainfall at Lalbagh 0 02 Weather seasonable. Harvesting of *aman* finished and that of *kalai* continues Prospects of *rabi* crops fair Fodder and water sufficient No cattle-disease. Common rice sells as follows —

	Srs	
Sadar	13	per rupee
Lalbagh	13⅛	
Kandi	15	
Jangipur	15	

Jessore —No rainfall Weather seasonable Prospects of standing crops favourable Harvesting of *aman* nearly finished Fodder and water sufficient Common rice sells as follows —

	Srs	
Sadar	13	per rupee
Jhenida	13	
Magura	13½	
Narail	13$\frac{5}{16}$	
Bangaon	13$\frac{5}{16}$	

Khulna.—Rainfall nil Weather seasonable Harvesting of *aman* paddy continues Prospect fair. Fodder and water sufficient Common rice sells as follows —

	Srs	
Sadar	13½	per rupee
Bagerhat	13$\frac{5}{16}$	
Satkhira	10½	

Rajshahi —Prospects of standing crops fair Harvesting of *aman* paddy still going on Condition of cattle good Fodder and water ample Common rice sells at 14½ seers per rupee.

Dinajpur—Rainfall nil Weather cold and cloudy Harvesting of *aman* nearly over No cattle disease Fodder and water plentiful. Rice selling at Sadar 15 seers and at Thakurgaon 13 seers per rupee

Jalpaiguri—Rainfall nil Weather cold and cloudy Harvesting of *haimanti* paddy continues State of *rabi* crops satisfactory Price of common rice steady Fodder and water sufficient

Darjeeling—Rainfall at Darjeeling 0 09, Kurseong 12, Siliguri nil, Kalimpong nil Weather seasonable Days cloudy, nights cold and frosty *Bara marua aman dhan, kalai* being harvested *Tori, tatar,* wheat and barley progressing *Terai—haimanti* paddy being harvested Tobacco and mustard moderate Potato well Coarse rice sells as follows —

	Srs	
Hills	10	per rupee
Terai	14	

Bhutta sells at Darjeeling and Kalimpong 20 seers per rupee

Rangpur—Rainfall nil Weather very cold Harvesting of *aman* still going on Fodder and water sufficient Common rice sells as follows —

	Srs	
Sadar	13	per rupee
Gaibanda	12	
Kurigram	10	
Nilphamari	13	

Bogra—No rain Harvesting of *aman* very nearly finished and that of mustard and sugarcane going on Weather cold and seasonable Rain want for *rabi* crops Prospects moderate Lands being prepared for *aus* and jute Fodder and water sufficient

Pabna—Rainfall nil Weather cold and cloudy Prospects of crops fair Rain wanted for *rabi* crops Prices unchanged Fodder and water sufficient

Dacca—Rainfall nil Weather seasonable Prospects of crops fair Fodder available No cattle disease Common rice 11½ seers per rupee

Mymensingh—Rainfall at Kishoreganj 07, Tangail 08 Weather cloudy and cold Fields are being prepared for early rice crop Transplantation of *boro* continues Prospects of standing crops fair Common rice sells as follows —

	Srs	
Sadar	10½	per rupee
Jamalpur	10	
Kishorganj	11⅞	
Tangail	11	
Netrakona	11$\frac{5}{16}$	

Faridpur—Rainfall at Sadar nil, Goalundo nil, Madaripur 0 72 Weather cold State and prospects of winter crops favourable though more rain wanted Common rice sells at 12½ seers a rupee

Backergunge—Rainfall nil Weather cold Prospects of crops fair Patuakhali reports 25 per cent *aman* paddy damaged by insects Fodder and water sufficient Common rice sells at 10 seers (old) *aman* and 12 seers (new)

Tippera—No rain Weather cloudy at times Standing crops doing well Fodder and water sufficient Common rice averages 12½ seers per rupee

Noakhali—Rainfall nil Weather seasonable Prospects of standing crops good Cattle disease in Lakhimpur Fodder and water sufficient Prices unchanged

Chittagong—No rain Harvesting of winter rice completed Outturn 12 annas Water and fodder sufficient Common rice 12½ seers per rupee

Patna—Rainfall at Bikram 0 04 *Rabi* crops coming up well Weather favourable and a good harvest expected Pressing of sugarcane still going on Fodder and water for cattle sufficient Common rice in Patna sells at 15 seers per rupee

Gaya—Rainfall nil *Rabi* and poppy doing well Sugarcane being pressed Common rice sells at 12½ seers per rupee

Shahabad—Rainfall at Sadar 0 03 Weather cloudy and cold *Rabi* on low land in Sasaram subdivision damaged by rain Pressing of sugarcane continues Fodder and water sufficient. Rice 12½ seers a rupee at Sadar

Saran—Rainfall at Sadar nil, Siwan 0 56, Gopalganj 0 32 Weather cloudy and rainy Standing crops doing fairly well Bright sunshine and fine weather needed Fodder and water sufficient Common rice 15$\frac{3}{16}$ seers and *makai* 22$\frac{1}{16}$ seers per rupee

Champaran.—Rainfall nil Prospects of *rabi* good Weeding continues Threshing of paddy finished Sugarcane pressing going on Fodder and water sufficient Prices of common rice and maize at Sadar are 15½ and 26 seers per rupee respectively

Muzaffarpur.—Rainfall nil Prospects good Prices are—Common rice 14 seers, wheat 13 seers, barley 20 seers, maize 24 seers, gram 15 seers, *arhar* 13 seers, and *marua* 24 seers a rupee

Darbhanga.—Rainfall at Sadar nil, Samastipur 0 02, Madhubani 0 13 *Rabi* doing well Fodder and water sufficient No cattle-disease reported. Common rice sells as follows —

	Srs	
Sadar	15½	per rupee
Samastipur	15	
Madhubani	16¼	

Monghyr.—Rainfall at Sadar nil, Begusarai 0 87, Jamui 0 21 Very cold Paddy harvesting nearly finished Standing crops promising *Rabi* crops much promising *Rabi* crops much benefited by recent rains. Lands being prepared for *phaguni* indigo at Begusarai subdivision Common rice sells as follows —

	Srs	
Sadar	15	per rupee
Begusarai	16	
Jamui	14½	

Bhagalpur.—Rainfall at Sadar nil, Banka nil, Madhipura 0 06, Supaul 0 32 Weather cloudy and windy Harvesting of winter rice almost complete Pressing of sugarcane is still going *Rabi* crops have been much benefited by last week's rainfall No cattle disease Fodder and water-supply sufficient Prices stationary

Purnea.—No rain Weather cold and cloudy Harvesting of *aghani* paddy nearly finished *Rabi* crops doing well No cattle disease Fodder and water sufficient Common rice sells as follows —

	Srs	
Sadar	15	per rupee
Kishanganj	14	
Araria	16	

Malda.—Rainfall nil Weather cold and cloudy Harvesting of winter rice not yet finished Prospect of standing *rabi* crops good. No cattle disease Fodder and water sufficient Price of rice stationary

Sonthal Parganas.—Rainfall nil Weather cloudy and cold Harvesting of winter rice is nearly over Standing *rabi* crops doing well Fodder and water supply ample No cattle disease reported Rice sells at 15 seers and maize 21¾ seers per rupee

Cuttack.—Rainfall nil Weather seasonable *Guru sarad* and sugarcane being harvested *Rabi*, *dalua* and tobacco growing Condition of cattle good Fodder and water sufficient Common rice sells as follows —

	Srs	ch	
Sadar	14	7	per rupee
Jajpur	14	7	
Kendrapara	15	12	
Banki	16	12	

Balasore.—Rainfall nil Harvesting of *kandha*, *sarad* *rabi* and cotton continues Sugarcane being pressed *Rabi* doing well Rice sells at 16½, 14½ and 16 seers per rupee in interior, Balasore and Bhadrak, respectively Fodder and water sufficient

Angul.—Rainfall at Angul nil, Bissipara 70, Tikerpara 1 68, Chhindipara 79 Weather cloudy Crushing of sugarcane and harvesting of *rabi* and *til* going on Price of common rice stationary Fodder and water ample

Puri.—Rainfall at Sadar 0 34, Khurda 1 63 Weather seasonable *Sarad* paddy being harvested and gathered *Dalua*, *mung*, *biri* and other miscellaneous crops growing well Fodder and water sufficient Rice sells as follows —

	Srs	ch	
Sadar	15	1	per rupee
Khurda	15	12	
In the interior	16	12	

Hazaribagh.—Weather cold and cloudy Rainfall at Sadar nil, Giridih 02 Sugarcane pressing going on Fodder and water sufficient Common rice sells at Sadar 11 to 13 seers per rupee and at Giridih 14 seers

Ranchi—Rainfall nil Weather cold and cloudy Prospect of crops good Average price of common rice is 18 seers per rupee No cattle disease reported Fodder and water sufficient

Palamau—No rain Weather cloudy Prospect of *rabi* much improved by recent rain Fodder and water sufficient Rice sells at Sadar 13½ seers per rupee

Manbhum—Rainfall nil Weather seasonable Prospects of crops on ground good Fodder and water sufficient Cattle disease reported from Jhalda, Purulia, Manbazar and Barabazar Average price of common rice at Sadar 14 seers and at Gobindpur 12 seers per rupee Supply sufficient

Singhbhum—No rain *Rabi* crops doing well Average price of rice is 16 seers 10 chitaks in the district, at Chaibassa 16 seers

General Summary—Light and scattered showers fell during the week The rain has been generally beneficial to the standing crops *Rabi* doing well Harvesting of paddy nearly finished Pressing of sugarcane still going on Prospects good on the whole Fodder sufficient Cattle disease reported from two districts only The price of common rice has fallen in 8 districts, risen in 10, and is stationary in the rest

By order of the Lieutenant-Governor of Bengal,

F A SLACKE,

Secretary to the Govt of Bengal

The highest velocity of the wind in one hour	11
	%
The mean relative humidity	76
The average relative humidity of the corresponding period for 24 years, Surveyor General's Office	71
	Inches
The total fall of rain from 6th to 12th January 1901	0 01
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0 07
The total fall from 1st to 12th January 1901	1 04
The average fall of the corresponding period for 24 years, Surveyor General's Office	0 11

The mean pressure, temperature, &c, are deduced from the traces of the Barograph and Thermograph, and from eye observations

The maximum and minimum temperatures are obtained from self-registering thermometers All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground

The barometer readings are corrected approximately to those of the standard, Newman's No 86, formerly at the Surveyor General's Office

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph

The mouth of the rain gauge is one foot above the ground

⏜, dew o, overcast, d, drizzling rain

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF DECEMBER 1900

WEATHER during December was more settled than usual over the south of the Bay, where no cyclonic disturbance occurred Strong winds generally prevailed on the Madras coast and there was a considerable increase of strength on the coast of the Circars about the middle of the month, followed by heavier rainfall in the south North East monsoon conditions were less marked than usual, the withdrawal of the monsoon from the Bay area being earlier than usual

Accompanying this relatively settled state of the weather in the south of the Bay, fine weather was uninterrupted over the Province and the north of the Bay during the greater part of the month Temperature was generally higher than usual, but otherwise nothing exceptional was observed, pressure undergoing the usual oscillations, sometimes moderate in amount, and winds being northerly or north westerly except in Bihar and North Bengal, where greater irregularity occurred These conditions prevailed till the end of the third week, when the first cold season disturbance began to affect weather over the Province From about the 25th till the end of the month showers, more or less general and at times heavy, were falling in places, the larger proportion occurring in the Western districts, where considerably more than the normal amount for the season was received The fall in Bihar and Chota Nagpur was four times the usual amount In other divisions, with the exception of South West Bengal where the fall was about normal, very little rain fell

The cause of the rainfall towards the end of the month was probably the usual shallow depression moving from the west, but the changes of pressure differed from those characteristic of settled weather, only in being somewhat more irregular, and the variation from the normal was very small throughout the period of disturbance The changes of temperature following the disturbance began in North Bengal, where rain first fell, and from there extended westward and southward, showing that, as is not unusual, a change began in the north east, which checked the advancing disturbance, so that the heaviest rainfall was in the Western districts

At the beginning of the month pressure was normal over the Bay and in slight defect over the Province Northerly winds prevailed at coast station, but inland, owing to the more uniform distribution of pressure, winds were light and irregular, Temperature was high in the Western and low in the Eastern district, by amounts generally about 2° There was very little change till the 4th, when a brisk fall of pressure occurred over the Province and the north of the Bay, after which the distribution was still more uniform and winds became westerly or south westerly in Bengal This arrangement of pressure and winds continued till the 7th, when pressure began to recover, and by the 8th had become in moderate excess For some days pressure steadily increased, but as barometric readings remained low in Bihar relatively to other parts of the Province, the southerly winds continued in the Western districts with a perceptible increase of temperature over the whole land area On the 12th pressure was more than 1 inch in excess in Bengal and on the west coast of the Bay, and the temperature excess varied from 6° in Chota Nagpur to 2° in East and North Bengal and Assam

On the 13th pressure began to fall, the gradient became more normal and the area of high temperature was transferred from the Western to the Eastern districts These conditions continued till the 19th, when a rapid fall of pressure occurred in Bengal It continued more slowly on the 20th, and was followed by a rapid recovery on the 21st The general weather conditions remained unchanged during these the most rapid variations of pressure, which occurred throughout the month Winds were lighter and less regular, while pressure was lowe t, but temperature was uniformly high at all stations

There was little change till the 24th, when signs appeared of the first cold season disturbance Pressure fell moderately in the west of Bihar, and winds were irregularly cyclonic in that area The slight depression was better defined on the 25th, and weather was more generally disturbed, as rainfall in moderate amount fell on that date in Bihar, Chota Nagpur and part of North Bengal, while the sky was more or less heavily clouded over the whole area Following this rainfall a change of temperature began in North Bengal It was most marked at Darjeeling and Jalpaiguri on the 26th, and on subsequent days extended over the greater part of the northern half of the Province Pressure changes continued irregular till the 28th, and weather remained slightly disturbed, as shown by the clouded skies and the scattered rainfall in Chota Nagpur and South West Bengal

After a moderate increase of pressure on the 29th and 30th, it again fell rapidly on the 31st,—a change which was accompanied by general and in places heavy rainfall in Bihar and Chota Nagpur The heaviest falls were in Manbhum and Palamau, in a number of cases exceeding 1 inch

Pressure oscillations, though at times of considerable amount, were regular during the greater part of the month During the last week two shallow depressions approached the Western districts, causing irregular and at times rapid changes of pressure The variation from the normal was never more than moderate, and was most frequently above the normal In consequence, mean pressure for the month is in excess except in the west of Bihar, where

it is practically normal. The greatest excess is 03 inch in the Central districts and the east of Chota Nagpur, while in Orissa and the Eastern districts it is 02 inch or less

Temperature was at times largely above the normal, at first in the Western districts, but later in the east At other times there was a uniform though smaller excess over the whole Province Mean temperature was below the normal in the Eastern districts during the early part of the month, and in the north towards the end On an average for the whole month maximum temperature is everywhere above the normal, excess varying from 3° in the west to 2° in the north east Mean minimum temperature is in excess except at a few stations in the west, the greatest excess being 5° in part of Orissa and Chota Nagpur.

The average excess for Orissa and Chota Nagpur is 3° 6, for South West Bengal 2° 5, East Bengal and Bihar about 2° and for North Bengal and Assam a little over 1°

Rainfall was entirely absent until towards the end of the month, when weather became disturbed in the Western districts A few showers fell in North Bengal on the 21st, but most of the falls occurred on the 25th and 31st, with scattered showers on intermediate days in the South Western districts Chota Nagpur and Bihar received 85 and 48 inch, respectively, in each case, about four times the normal amount for the month In South-West Bengal practically the usual amount fell In other divisions there was only a small fraction of the usual amount

The following table gives the average rainfall for each division month by month throughout the year, expressed as a percentage of the normal fall for each month It will be seen that Orissa has received 21 per cent more than the normal, South-West Bengal 11, and Chota Nagpur 5, and that North Bengal, East Bengal and Bihar have received respectively 16, 10 and 2 per cent less than the average —

METEOROLOGICAL DIVISIONS	January	February	March*	April.	May	June	July	August	September	October	November	December	Actual rainfall of the year 1900 expressed as a percentage of the normal fall for the period.

(a) Increase under coaching is due to improved traffic generally and one day's earnings more than the corresponding period of last year
(b) Decrease under goods is due to the traffic last year being abnormal
(c) under other earnings is mainly duly to the adjustment of Rs. 34 315 on account of mileage and demurrage charge on rolling stock made in the corresponding period of last year
(d) Includes 4 874 miles of ballast trains run on open line
(e) audited figures up to week ending 17th November 1900
(f) 2 562 miles of ballast trains run on open line

NOTIFICATION—No 447L.R.

The 19th January 1901—Whereas it has been decided that a survey should be made and a record of rights prepared in respect of lands in the district of Backergunge

Backergunge

In exercise of the powers conferred upon him by section 101 (1) of the Bengal Tenancy Act, VIII of 1885, as amended by Act III (B C) of 1898, and with the previous sanction of the Governor General in Council, the Lieutenant Governor is pleased to direct that a survey shall be made and a record of rights prepared in respect of all lands included within the Estate No 1628, taluk Mahamad Safi, Joar Ramna Bamna, in thana Matbaria, in the district of Backergunge

The particulars to be recorded in the survey and record of rights shall be the following —

(*a*) The name of each tenant or occupant

(*b*) The class to which each tenant belongs, that is to say, whether he is a tenure-holder, raiyat holding at fixed rates, settled raiyat, occupancy raiyat, non-occupancy raiyat or under raiyat, and if he is a tenure-holder, whether he is a permanent tenure-holder or not, and whether his rent is liable to enhancement during the continuance of his tenure

(*c*) The situation, quantity and one or more of the boundaries of the land held by each tenant or occupier

(*d*) The name of each tenant's landlord

(*e*) The rent payable at the time the record of rights is being prepared

(*f*) The mode in which that rent has been fixed, whether by contract, by order of a Court, or otherwise

(*g*) If the rent is a gradually increasing rent, the time at which, and the steps by which, it increases

(*h*) The special conditions and incidents, if any, of the tenancy

(*i*) The name of each proprietor, including rent-free owner, with the character and extent of his interest, and the situation, quantity and boundaries of the proprietor's private lands as defined in Chapter XI of the Act

(*j*) If the land is claimed to be held rent free, whether or not rent is actually paid, or, if not paid, whether or not the occupant is entitled to hold the land without payment of rent, and, if so entitled, under what authority

Offg Chief Secy to the Govt of Bengal

NOTIFICATION—No. 519J

The 22nd January 1901 —In exercise of powers conferred by section 7 of the Indian Explosives Act, 1884, and with the previous sanction of the Governor-General in Council, the Lieutenant-Governor is pleased to substitute the following rule for rule 27 of the rules for the manufacture, possession, and sale of explosives in the Lower Provinces of Bengal.

RULE

27 The officers herein undermentioned are authorised, within the areas, respectively specified below —

(*a*) to enter, inspect, and examine any place, carriage or vessel in which an explosive is being manufactured, possessed, used, sold, transported or imported under a license granted under the Indian Explosives Act (IV of 1884), or in which they have reason to believe that an explosive has been, or is being manufactured, possessed, used, sold, transported or imported in contravention of that Act, or of the rules thereunder,

(*b*) to search for explosives therein,

(*c*) to take samples of any explosives found therein, on payment of the value thereof, and

(*d*) to seize, detain, remove, and, if necessary, destroy or otherwise render harmless any explosive found therein, in respect of which there may be reason to believe that the provisions of the said Act or of the rules thereunder have been contravened

Areas	*Officers*
In all parts of Bengal	Chief Inspector and Inspector of Explosives
Within their respective districts	All District Magistrates
Within the areas respectively subject to their jurisdiction	All Magistrates subordinate to the District Magistrate
In the town of Calcutta and its suburbs	The Commissioner of Police, Calcutta, and all Police Officers of rank not below that of Inspector, if specially deputed in that behalf by the Commissioner of Police

Provided that—

(1) Whenever the Chief Inspector or the Inspector of Explosives, or any Magistrate subordinate to the District Magistrate, seizes, detains or removes any such explosive, he shall report the fact to the District Magistrate

(2) Neither the Chief Inspector nor the Inspector of Explosives, nor any Magistrate subordinate to the District Magistrate, shall destroy or otherwise render harmless any such explosive, without the previous sanction of the District Magistrate, unless the matter appears to him urgent and fraught with serious public danger, and in such cases, he shall take and keep a sample of the explosive, and shall, if required, give a portion of the sample to the person owing the explosive or having the same under his control at the time of seizure, and shall report the circumstances to the District Magistrate

C E BUCKLAND,

HIGH COURT NOTICES

NOTIFICATION

THE undermentioned Mukhtar, having withdrawn the security deposited by him under the rules of the Court, has ceased to be Mukhtar of the High Court on its Appellate Side His certificate has been cancelled and his name removed from the Roll :—

Name	No in List	No in Register
Mathura Nath Roy	102	26 of 1883

By order of the High Court,

E P CHAPMAN, *Registrar*

HIGH COURT, *the 16th January 1901*

General Letter No 12, dated Calcutta, the 21st December 1900

From—E P CHAPMAN, Registrar, High Court,
To—The District Judge of

I AM directed to reproduce below a letter from the Hon'ble the Colonial Secretary, Singapore, to the Secretary to the Government of India, Home Department, drawing attention to the insufficient time allowed by Courts in India for the service of summonses and other documents on persons residing in the Straits Settlements and for the attendance of those persons before the Courts in India I am to request you to give your special attention to the suggestion made in paragraph 3 of the letter and to issue the necessary instructions to the Courts subordinate to you to give effect to it

---

No Police 7252—1900, dated Singapore, the 28th August 1900

From—The Acting Colonial Secretary, Straits Settlements,
To—The Secretary to the Government of India, Home Department

I AM directed by the Officer Administering the Government of the Straits Settlements to invite your attention to the insufficient time allowed by the Courts in the Punjab and other parts of India for the service of summonses and other documents on persons resident in the Straits Settlements and the attendance of those persons before the Courts in India

2 At present it seldom happens that documents are received from India in sufficient time to allow of the person summoned taking any steps to appear in person or by deputy on the date fixed in the document, and it not infrequently occurs that the papers are not received in Singapore until after the date fixed for the hearing of the suit

3 I am to suggest that the attention of the Judicial Officials who issue these documents be called to the advisability of fixing a date not less than three months from the day on which the documents are posted to the Straits Settlements for the appearance of the person mentioned therein before an Indian Court

No 83 G—With the sanction of Her Majesty's Government, the Governor-General in Council is pleased to recognise the provisional appointment of Count Amabile Raybaudi Massiglia as Consul General for Italy at Calcutta

No 96-E B—The following Order of Her Majesty in Council, which was published in the *London Gazette* of the 27th November 1900, is republished for general information:—

At the Court at *Windsor*, the 26th day of November 1900

PRESENT

The Queen's Most Excellent Majesty

Lord President
Lord Chamberlain.
Earl of Kintore

Whereas by Treaty, capitulation, grant, usage, sufferance and other lawful means, Her Majesty has jurisdiction within the territories of the King of Siam,

Now, therefore —

1 In this Order the expression "British subject" includes a person who, by virtue of section fifteen of "The Foreign Jurisdiction Act, 1890," or otherwise, enjoys Her Majesty's protection in Siam

2 A register of British subjects shall be kept in the office of every Consulate in Siam

3 Every British subject, resident or arriving in Siam, being of the age of twenty one years or upwards or being married, or a widower or widow, though under that age, may, subject to the provisions of this Order, be registered in a Consular register

4. The registration of a man shall comprise the registration of his wife, or wives, if living with him, and the registration of the head of a family shall comprise the registration of all females and minors, being his relatives, in whatever degree, living under the same roof with him at the time of his registration.

5 A British subject resident in Siam shall not be registered elsewhere than in the register of the Consular district in which he resides; but a person arriving in Siam may be registered either in the register of the Consular district in which he first arrives, or in that of the district in which he goes to reside.

6 A person arriving in Siam and not already registered must apply for registration within one month after arrival, a person resident in Siam must apply for registration in January in every year Provided that a person who fails to obtain registration within the time so limited may be registered at any time if he excuses his failure to the satisfaction of the Consular officer

7 A person registered in any register of British subjects established under "The Siam Order in Council, 1889," shall be registered under the provisions of this Order, unless the Consular officer is satisfied, after inquiry, that the previous registration was erroneous, or that such person is not entitled to registration under the provisions of this Order

8 The Consular officer shall on every registration give to the person registered a certificate of registration signed by him and sealed with his Consular seal

9 The name of a wife, if her registration is, under the provisions of this Order, comprised in her husband's, shall be indorsed on the husband's certificate.

10 The names and descriptions of females and minors, whose registration is, under the provisions of this Order, comprised in that of the head of a family, shall be indorsed on the certificate of the head of the family

11 Every person applying to be registered under this Order shall, unless excused by the Consular officer, attend personally for that purpose at the Consulate on each occasion of registration

12 Every person shall, on every registration of himself, pay a fee of two shillings and six pence, or such other fee as the Secretary of State from time to time appoints The amount of the fee may be uniform for all persons, or may vary according to the position and circumstances of different classes if the Secretary of State from time to time so directs, but may not in any case exceed five shillings

13 If any British subject fails to obtain registration under the provisions of this Order, he shall not be entitled to be recognised or protected as a British subject in Siam, but he shall, although not registered, be subject to the jurisdiction of Her Majesty's Consular Courts in Siam

Provisions affecting particular Classes of British Subjects

14 A person, not of Asiatic descent, arriving in Siam and applying to be registered as a British subject, shall be so registered if the Consular officer is satisfied, after such enquiry as he may deem fit, that he is entitled to the status of a British subject

15 A person of Asiatic descent, arriving in Siam and applying to be registered as a British subject, shall be so registered if he (*a*) produces a passport as a British subject from British India or a British possession, or (*b*) files an affidavit or sworn declaration showing that he was born within Her Majesty's dominions or within the territory of any prince or State in India under the suzerainty or in alliance with Her Majesty, or that he has been naturalised in the United Kingdom, and (*c*) in either case gives satisfactory evidence of his identity

16 A person born in Siam, being the child of a person of Asiatic descent who arrived in Siam, may be registered as a British subject if it is proved that the father (*a*) was registered as a British subject at the time of the child's birth, or (*b*) being entitled was prevented from being so registered by causes for which he was not responsible

Any child of a person registered under the provisions of this Article shall not be entitled to be registered as a British subject by reason only that his father and grandfather were so registered.

17 A person of Asiatic descent, being a native of Upper Burmah or of the British Shan States, shall not be registered as a British subject if it appears that he arrived in Siam before the first January, one thousand eight hundred and eighty six, and has become domiciled there

18 A woman, being the widow of a person of Asiatic descent, who was in his lifetime registered as a British subject, shall be registered as a British subject if her name appears on the last certificate given to her husband before his death, but not otherwise

19 The Consular officer may, without fee, register any British subjects, being minors, living in the houses of foreigners or Siamese subjects

20 Article ninety four of "The Siam Order in Council, 1889," is hereby repealed, provided all registers kept under that Order shall continue in force until superseded by registers kept under this Order

21 This Order may be cited as "The Siam (Registration) Order in Council, 1900"

Advertisement of Sale

NOTICE is hereby given that the proprietary right of Government as specified in the conditions of sale below, to the undermentioned estate situated in the district of Midnapore will be put up to sale at the Midnapore Collectorate on Tuesday the 26th March 1901, corresponding with the 13th of Chaitra 1307 (B S) and 14th of Chaitra 1308 A S

The purchasers will be subject to the following conditions of sale —

Conditions of Sale

1st —Each estate to be sold to the highest bidder above the upset price which will be fixed by the Collector at the time of sale The purchasers of these estates will be considered as the proprietors of the estates and the entire proprietary right of Government in such estates will be transferred to them subject to the revenue fixed in perpetuity

2nd —The sales to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force and the purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities

3rd —If the amount of purchase money do not exceed Rs 100 the whole amount to be paid down at once

4th —If the amount of purchase-money exceed Rs 100 one fourth of the amount bid to be immediately deposited If the balance be not paid by noon of the fifteenth day after the sale reckoning the date of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day the sale is to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisements as in the case of original sale

PART VI.

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 23.

GOVERNMENT OF INDIA

LEGISLATIVE DEPARTMENT.

The following Bill was introduced in the Council of the Governor General of India for the purpose of making Laws and Regulations on the 18th January, 1901 —

No. 3 OF 1901

A Bill further to amend the Administrator General's Act, 1874

WHEREAS Hindus, Muhammadans, Parsis and Buddhists are exempted from the operation of certain provisions of the Administrator General's Act, 1874, and it is expedient that Native Christians should be exempted from the operation of the said provisions to the same extent as Hindus, Muhammadans, Parsis and Buddhists, It is hereby enacted as follows —

Short title and commencement

1 (1) This Act may be called the Administrator General's Act (Amendment) Act, 1901, and

(2) It shall come into force at once

Definition.

2 In this Act, the expression "Native Christian" means a native of India who is or in good faith claims to be of unmixed Asiatic descent and who professes any form of the Christian religion

Further amendment of certain sections of Act II of 1874.

3 In sections 16, 17, 18, 37 and 64 respectively of the Administrator General's Act, 1874, before the word "Hindu" wherever it occurs, the word "Native Christian" shall be inserted

Saving

4. Nothing herein contained shall affect any probate, letters of administration or certificate granted or vested under the said Act

STATEMENT OF OBJECTS AND REASONS

SEVERAL representations have been received by the Government on the subject of the grievances from which Native Christians suffer through the unequal operation of the law in India, relating to probate and administration, to be found in the Indian Succession Act, 1865 (X of 1865), the Hindu Wills Act, 1870 (XXI of 1870), the Administrator General's Act, 1874 (II of 1874), and the Probate and Administration Act, 1881 (V of 1881)

2 By sections 187 and 190 of the Act of 1865 it is provided that no right under a will or to the property of an intestate can be established in any Court unless probate or administration has been granted, and such a grant is further rendered necessary by certain provisions of the Act of 1874, under which the omission to obtain a grant entails the intervention of the Administrator General if the value of the assets of

the estate concerned exceeds Rs 1,000 These provisions govern Native Christians, but not Hindus, Muhammadans or Buddhists save in the Lower Provinces of Bengal and the towns of Madras and Bombay, where, owing to the provisions of the Hindu Wills Act, 1870, which incorporates section 187 of the Act of 1865, probate of the wills of Hindus, Jains, Sikhs and Buddhists has been rendered compulsory Elsewhere Hindus, Muhammadans and Buddhists are only subject to the Act of 1881, which, while it enables a person governed by it to take out a grant if he finds it expedient to do so, contains no compulsory provisions similar to those of sections 187 and 190 of the Act of 1865 This concession was deliberately made with a view to save Natives of India unnecessary trouble and expense, in uncontested cases, and it is clear that by reason of it Native Christians are in a less favourable position than other Natives who differ from them only in respect of their religious belief

3 The Government of India are of opinion that the considerations which prompted the granting of the concession above explained to the vast majority of Natives of India, have equal force when applied to the case of such as are Christians The Act of 1865 was originally designed for Europeans and other persons with a foreign domicile resident in India, and it is due only to the fact that Natives on their conversion to Christianity *ipso facto* cease to be governed by the Indian laws of succession, that, though Asiatics domiciled in the country, they fall within the purview of that Act

4 To remove these grievances more than one course has been proposed, but that which commends itself to the Government, is the exemption of Native Christians from the provisions of sections 16, 17, 18, 37 and 64 of the Administrator General's Act, 1874 This will do for them precisely what was done for Parsis by the amending Act IX of 1881, *i e*, it will relieve them from the interference of the Administrator General in certain cases, and will enable them to avoid taking out probate, and therefore, to escape payment of probate duty, in cases where the assets can be amicably distributed Such action, though it will not place Native Christians on terms of absolute equality with other natives of India, will, it is thought, be an adequate recognition of their grievances The present Bill has been prepared accordingly

EASTERN ARCHIPELAGO—BORNEO—PULO LAUT STRAIT

Suangi and Kota Baru—Lights established

WITH reference to Notice to Mariners Nos 311 and 312 dated the 7th December last, issued by this office, the British Admiralty has given further notice (No 825 of 1900), that the following leading lights have been established on the Suangi islands, and also a light at Kota Baru, Pulo Laut strait —

1 Suangi island rear light is *white fixed*, elevated 154 feet above high water, and visible from about the bearing of N 13° E to N 3° E, and from about S 35° W to S 25° W

It is shown from an iron skeleton tower 23 feet high, painted white, near the dwelling, erected near the position of the beacon, which is about 7 cables north eastward of the south point of the island

Approximate position, lat 3° 27 S, long 116° 1 E

2. Suangi island front light is *white fixed*, elevated 36 feet above high water, and visible from about S 35 W to S 25° W

It is shown from a similar structure to the rear light erected near the beacon on the east side of the islet (Anak Suangi) about 8 cables N 28° E from the beacon on Suangi island

These two lights in line, S 30° W, lead through the channel abreast of Tampakan island

The beacons situated close to the position of these lights will be removed now the lights are exhibited

3 Kota Baru is a *white flashing* light every *five seconds*, of the 5th order, elevated 223 feet above high water

It is shown from an iron skeleton tower, with dwelling attached, erected on a hill named Balingkor, in lat 3° 14 0" S, long 116° 13 20" E (*Notice No 825 of 1900*)

Variation 2° Easterly in 1900

This Notice affects the following Admiralty Chart —Pulo Laut strait on sheet No 2662 Also List of Lights, part VI, 1900, page 92, Eastern Archipelago, part II, 1893, pages 310 and 307 and Supplement, 1899, page 34.
